280.903 General requirements for designing the structure to withstand transportation shock and vibration.
280.904 Specific requirements for designing the transportation system.

AUTHORITY: Sec. 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d), Title VI, Housing and Community Development Act of 1974 (42 U.S.C. 5401).

Subpart A—General

§ 280.1 Scope.

(a) This standard covers all equipment and installations in the design, construction, fire safety, plumbing, heat-producing and electrical systems of mobile homes which are designed to be used as dwelling units. The Secretary may approve such equipment and installations which are listed or labeled by an approved testing or listing agency. Equipment and installations not listed or labeled may be approved by the Secretary upon a determination that such equipment and installations are adequate for the protection of health, safety and the general welfare.

(b) These Federal Mobile Home Construction and Safety Standards seek, to the maximum extent possible, to establish performance requirements. In certain instances, however, the use of specific requirements in the Standard is necessary because, at this time, that is the best available means of identifying the desired performance. The use of specific requirements is not intended to prohibit the utilization of any material, piece of equipment, or system which cannot meet the precise specifications, but which upon evaluation provides equivalent or superior performance. Where any material, piece of equipment, or system which does not meet precise specifications set out in the standard is shown, to the satisfaction of the Secretary, to meet the level of performance of a material, piece of equipment or system which meets the precise specifications, the Secretary may waive the specifications set out in the standard for that material, piece of equipment, or system. Whenever a waiver is issued, the Secretary shall issue an interpretative bulletin which announces the waiver, states that the material, piece of equipment or system meets the required standard of performance, and sets out any limitations or other requirements with respect to how the material, piece of equipment, or system must be used, including any tests of the material, piece of equipment, or system which the Secretary determines must be carried out before it can be used. Where a waiver has been issued, the requirements of the section of the Federal standard to which the waiver relates may be met either by meeting the specifications set out in the standard or by meeting any requirements set out in the interpretative bulletin which announces the waiver.

(c) Interpretative bulletins may also be issued for the following purposes:

(1) to clarify the meaning of the standard; and

(2) to assist in the enforcement of the standard.

§ 280.2 Definitions.

(a) Definitions in this Subpart are those common to all Subparts of the standard and are in addition to the definitions provided in individual parts.

(1) "Approved," when used in connection with any material, appliance or construction, means complying with the requirements of the Department of Housing and Urban Development.

(2) "Center" means the midline between the right and left side of a mobile home.

(3) "Certified." See "listed."

(4) "Combustible Material" means materials made of, or surfaced with, wood, compressed paper, plant fibers, or other material that will ignite and burn. Such materials shall be considered as combustible even though flameproofed, fire-retardant treated, or plastered.

(5) "Defect" includes any defect in the performance, construction, components, or material of a mobile home that renders the home or any part thereof not fit for the ordinary use for which it was intended.

(6) "Department" means the Department of Housing and Urban Development.

(7) "Dwelling Unit" means one or more habitable rooms which are designed to be occupied by one family with facilities for living, sleeping, cooking and eating.

(8) "Equipment" includes materials, appliances, devices, fixtures, fittings or accessories both in the construction of, and in the fire safety, plumbing, heat-producing and electrical systems of mobile homes.

(9) "Federal mobile home construction and safety standard" means a reasonable standard for the construction, design, and performance of a mobile home which meets the needs of the public including the need for quality, durability, and safety.

(10) "Imminent safety hazard" means a hazard that presents an imminent and unreasonable risk of death or severe personal injury.

(11) "Installations" means all arrangements and methods of construction, as well as fire safety, plumbing, heat-producing and electrical systems used in mobile homes.

(12) "Labeled" means a label, symbol or other identifying mark of a nationally recognized testing laboratory, inspection agency, or other organization concerned with product evaluation that maintains periodic inspection of production of labeled equipment or materials, and by whose labeling is indicated compliance with nationally recognized standards or tests to determine suitable usage in a specified manner.

(13) "Length of a Mobile Home" means the distance from the exterior of the front wall (nearest to the drawbar and coupling mechanism) to the exterior of the rear wall (at the opposite end of the home) where such walls enclose living or other interior space and such distance includes expandable rooms but not bay windows, porches, drawbars, couplings, hitches, wall and roof extensions, or other attachments.

(14) "Listed or Certified" means included in a list published by a nationally recognized testing laboratory, inspection agency, or other organization concerned with product evaluation that maintains periodic inspection of production of listed equipment or materials, and whose listing states either that the equipment or material meets nationally recognized standards or has been tested and found suitable for use in a specified manner.

(15) "Manufacturer" means any person engaged in manufacturing or assembling mobile homes, including any person engaged in importing mobile homes for resale.

(16) "Mobile Home" means a structure, transportable in one or more sections, which is eight body feet or more in width and is thirty-two body feet or more in length, and which is built on a permanent chassis, and designed to be used as a dwelling with or without permanent foundation, when connected to the required utilities, and includes the plumb-

V 4 0 2 4 4 DEC 18 75 XUM

ing, heating, air-conditioning, and electrical systems contained therein.

(17) "Mobile Home Construction" means all activities relating to the assembly and manufacture of a mobile home including, but not limited to, those relating to durability, quality and safety.

(18) "Mobile Home Safety" means the performance of a mobile home in such a manner that the public is protected against any unreasonable risk of the occurrence of accidents due to the design or construction of such mobile home, or any unreasonable risk of death or injury to the user or to the public if such accidents do occur.

(19) "Registered Engineer or Architect" means a person licensed to practice engineering or architecture in a state and subject to all laws and limitations imposed by the state's Board of Engineering and Architecture Examiners and who is engaged in the professional practice of rendering service or creative work requiring education, training and experience in engineering sciences and the application of special knowledge of the mathematical, physical and engineering sciences in such professional or creative work as consultation, investigation, evaluation, planning or design and supervision of construction for the purpose of securing compliance with specifications and design for any such work.

(20) "Secretary" means the Secretary of Housing and Urban Development, or an official of the Department delegated the authority of the Secretary with respect to Title VI of Public Law 93-383.

(21) "State" includes each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, the Canal Zone, and American Samoa.

(22) "Width of a Mobile Home" means the distance from the exterior of one side wall to the exterior of the opposite side wall where such walls enclose living or other interior space and such distance includes expandable rooms but not bay windows, porches, wall and roof extensions, or other attachments.

§ 280.3 Acceptance of plans.

(a) Each manufacturer of mobile homes shall submit the building plans for every model of such mobile home to the Secretary, or Secretary's designee, for the purpose of inspection for conformance to this standard.

(b) The manufacturer shall certify that each such building plan meets the Federal construction and safety standard in force at that time before the mobile home involved is produced.

(c) Regulations pertaining to enforcement of these standards and to labeling of mobile homes shall be as prescribed by the Secretary.

§ 280.4 Incorporation by reference.

(a) The specifications, standards and codes of agencies of the U.S. Government, to the extent they are incorporated by reference in this standard, have the same force and effect as this standard. Wherever reference standards and this standard are inconsistent, the requirements of this standard prevail to the extent of the inconsistency.

(b) The abbreviations and sources of these referenced standards, specifications and codes appear below:

AA—The Aluminum Association, 750 Third Avenue, New York, N.Y. 10017.
ABPA—Acoustical and Board Products Association, 205 West Touhy Avenue, Chicago, Illinois 60068.
AGA—American Gas Association Laboratories, 8501 East Pleasant Valley Road, Cleveland, Ohio 44131.
AISC—American Institute of Steel Construction, 1221 Avenue of the Americas, New York, New York 10020.
AISI—American Iron and Steel Institute, 1000 16th Street, N.W., Washington, D.C. 20036.

§ 280.5 Data plate.

(a) Each mobile home shall bear a data plate affixed in a permanent manner near the main electrical panel or other readily accessible and visible location. Data plates shall bear not less than the following information:

(1) The manufacturer's name and address.

(2) The serial number and the model number of the unit and date the unit was manufactured.

(3) The statement, "The mobile home is designed to comply with the Federal mobile home construction and safety standard in force at the time of manufacture."

(4) Factory installed equipment, the manufacturer's name and the model designation of major factory-installed appliances.

(5) Reference to the structural zone and wind zone for which the home is designed and duplicates of the maps as set forth in § 280.305(c)(4). This information may be combined with the heating/cooling certificate and insulation zone maps required by §§ 280.510 and 280.511.

§ 280.6 Serial number.

(a) A mobile home serial number which will identify the manufacturer and the state in which the mobile home is manufactured, must be stamped into the foremost cross member. Letters and numbers must be ⅜ inch minimum in height. Numbers must not be stamped into hitch assembly or drawbar.

Subpart B—Planning Considerations

§ 280.101 Scope.

Subpart B states the planning requirements in mobile homes. The intent of this subpart is to assure the adequacy of architectural planning considerations which assist in determining a safe and healthful environment.

§ 280.102 Definitions.

(a) "Gross Floor Area" means all space, wall to wall, including recessed entries not to exceed 5 sq. ft. and areas under built-in vanities and similar furniture. Where the ceiling height is less than that specified in § 280.104, the floor area under such ceilings shall not be included. Floor area of closets shall not be included in the gross floor area.

(b) "Habitable Room" means a room or enclosed floor space arranged for living, eating, food preparation, or sleeping purposes not including bathrooms, foyers, hallways, and other accessory floor space.

(c) "Laundry Area" means an area containing or designed to contain a laundry tray, clothes washer and/or clothes dryer.

§ 280.103 Light and ventilation.

Provisions shall be made for adequate light and ventilation in accordance with the following:

(a) Each habitable room shall be provided with exterior windows and/or doors having a total glazed area of not less than 8 percent of the gross floor area. An area equivalent to not less than 4 percent of the gross floor area shall be available for unobstructed ventilation. Glazed areas need not be openable where a mechanical ventilation system is provided and is capable of producing a change of air in the room(s) every 30 minutes with not less than one-fifth of the air supply taken from outside the mobile home. Windows and doors used for light or ventilation shall open directly to the outside of the home.

(b) In lieu of the requirements in § 280.103(a), kitchens may be provided with artificial light and mechanical ventilation capable of producing a change of air in the room every 30 minutes. (See § 280.710).

(c) Bathroom and toilet compartments. Each bathroom and toilet compartment shall be provided with artificial light and, in addition, be provided with external windows or doors having not less than 1½ sq. ft. of fully openable glazed area, except where a mechanical ventilation system is provided capable of producing a change of air every 12 minutes. Any mechanical ventilation system shall exhaust directly to the outside of the mobile home.

§ 280.104 Ceiling heights.

(a) Every habitable room and bathroom shall have a minimum ceiling height of not less than 7 feet, 0 inches for a minimum of 50 percent of the room's floor area. The remaining area may have a ceiling with a minimum height of 5 feet, 0 inches. Minimum height under dropped ducts, beams, etc. shall be 6 feet, 4 inches.

(b) Hallways and foyers shall have a minimum ceiling height of 6 feet, 6 inches.

§ 280.105 Exit facilities; exterior doors.

(a) *Number and location of exterior doors.* Mobile homes shall have a minimum of two exterior doors located remote from each other.

(1) Required egress doors shall not be located in rooms where a lockable interior door must be used in order to exit.

(2) In order for exit doors to be considered "remote" from each other, they must comply with all of the following: (i) Both of the required doors must not be in the same room or in a group of rooms which are not defined by fixed walls. (ii) Single wide units. Doors may not be less than 12 ft. c-c from each other as measured in any straight line direction regardless of the length of path of travel between doors. (iii) Double wide units. Doors may not be less than 20 ft. c-c from each other as measured in any straight line direction regardless of the length of path of travel between doors. (iv) One of the required exit doors must be accessible from the doorway of each bedroom without traveling more than 35 ft.

(b) *Door design and construction.* (1) Exterior swinging doors shall be constructed in accordance with § 280.405 the "Standard for Swinging Exterior Passage Doors for Use in Mobile Homes". Exterior sliding glass doors shall be constructed in accordance with § 280.403 the "Standard for Windows and Sliding Glass Doors Used in Mobile Homes".

(2) All exterior swinging doors shall provide a minimum 28 inch wide by 74 inch high clear opening. All exterior sliding glass doors shall provide a minimum 28 inch wide by 72 inch high clear opening.

(3) Each swinging exterior door other than screen or storm doors shall have a key-operated lock that has a deadlocking latch or a key-operated dead bolt with a passage latch. Locks shall not require the use of a key for operation from the inside.

(4) All exterior doors, including storm and screen doors, opening outward shall be provided with a safety door check.

§ 280.106 Exit facilities; egress windows.

(a) Every room designed expressly for sleeping purposes, unless it has an exit door (See § 280.105), shall have at least one outside window or approved device which meets the requirements of § 280.404 the "Standard for Egress Windows for Use in Mobile Homes".

(b) The bottom of the window opening shall not be more than 36 inches above the floor.

(c) Locks, latches, operating handles, tabs and any other window, screen or storm window devices which need to be operated in order to permit exiting shall not be located in excess of 60 inches from the finished floor.

§ 280.107 Interior privacy.

Bathroom and toilet compartment doors shall be equipped with a privacy lock.

§ 280.108 Interior passage.

(a) Interior doors having passage hardware without a privacy lock, or with a privacy lock not engaged, shall open from either side by a single movement of the hardware mechanism in any direction.

(b) Each mobile home interior door, when provided with a privacy lock, shall have a privacy lock that has an emergency release on the outside to permit entry when the lock has been locked by a locking knob, lever, button, or other locking device on the inside.

§ 280.109 Space planning.

The dimensions set forth in §§ 280.110 through 280.113 are intended to assure that space and a functional arrangement of this space are provided to accommodate the normal activities of living in the mobile home.

§ 280.110 Room requirements.

(a) Every mobile home shall have at least one living area with not less than 150 sq. ft. of gross floor area.

(b) Rooms designed for sleeping purposes shall have a minimum gross square foot floor area as follows:

(1) All bedrooms shall have at least 50 sq. ft. of floor area.

(2) Bedrooms designed for two or more people shall have 70 sq. ft. of floor area plus 50 sq. ft. for each person in excess of two.

(c) Every room designed for sleeping purposes shall have accessible clothes hanging space with a minimum inside depth of 22 inches and shall be equipped with a rod and shelf.

§ 280.111 Minimum room dimension.

The gross floor area required by § 280.110(a) and (b) shall have no clear horizontal dimension less than 5 feet except as permitted by § 280.102(a).

§ 280.112 Toilet compartments.

Each toilet compartment shall be a minimum of 30 inches in width, except, when the toilet is located adjacent to the short dimension of the tub, the distance from the tub to the center line of the toilet shall not be less than 12 inches. At least 21 inches of clear space shall be provided in front of each toilet.

§ 280.113 Hallways.

Hallways shall have a minimum horizontal dimension of 28 inches measured from the interior finished surface to the interior finished surface of the opposite wall. When appliances are installed in a laundry area, the measurement shall be from the front of the appliance to the opposite finished interior surface. When appliances are not installed and a laundry area is provided, the area shall have a minimum clear depth of 27 inches in addition to the 28 inches required for passage. In addition, a notice of the available clearance for washer/dryer units shall be posted in the laundry area. Minor protrusions into the minimum hallway width by doorknobs, trim, smoke detectors or light fixtures are permitted.

§ 280.114 Glass and glazed openings.

(a) *Windows and sliding glass doors.* All windows and sliding glass doors shall meet the requirements of § 280.403 the "Standard for Windows and Sliding Glass Doors Used in Mobile Homes".

(b) *Safety glazing.* Glazing in all entrance or exit doors, sliding glass door units (fixed or moving sections), unframed glass doors, unbacked mirrored wardrobe doors (i.e. mirrors not secured to a backing capable of being the door itself), shower and bathtub enclosures and surrounds to a height of 6 feet above the bathroom floor level, storm doors or combination doors, and in panels located within 12 inches on either side of exit or entrance doors shall be of a safety glazing material. Safety glazing material is considered to be any glazing material capable of passing the requirements of ANSI Z97.1–72.

Subpart C—Fire Safety

§ 280.201 Scope.

The purpose of Subpart C of this standard is to specify measures which will provide a reasonable degree of safety from fire for the occupants. It is the intent of this Subpart that mobile homes shall be constructed so as to reduce fire hazards and provide detection of a fire for safe egress.

V 40 244 DEC 18 75 XUM

§ 280.202 Definitions.

(a) The following definitions are applicable to Subpart C only:

(1) "Flame Spread" means the propagation of flame over a surface.

(2) "Interior finish" means the surface material of walls, fixed or movable partitions, ceilings and other exposed interior surfaces affixed to the mobile home structure including any material such as paint or wallpaper and the substrate to which they are applied. Interior finish does not include windows and doors or their frames, skylight, trim, moldings, decorations or furnishing which are not affixed to the mobile home structure.

(3) "Single Station Alarm Device" means an assembly incorporating the smoke detector sensor, the electrical control equipment requirement, and the alarm-sounding device in one unit.

(4) "Smoke Detector" means wall mounted detector of the ionization chamber or photoelectric type which detects visible or invisible particles of combustion and operates from the 120 V AC source of electrical power supply.

§ 280.203 Flame spread limitations and combustibility.

(a) *Flame spread limitations.* The surface flame spread rating of interior finish materials shall not exceed the following when tested by Standard Method of Test for Surface Burning Characteristics of Building Materials, ASTM E84. The surface flame spread rating of interior finish materials required by § 280.203(a) (4) and (6) may be established using the Surface Flammability of Materials Using a Radiant Heat Energy Source, ASTM E162. Testing shall be by laboratories acceptable to the Secretary.

(1) The interior finish of all walls and partitions shall not have a flame spread rating exceeding 200 except as otherwise specified herein. The flame spread limitation shall not apply to; molding, trim, windows, doors or series of doors not exceeding 4 feet in width, and permanently attached decorative items such as pictures or accent panels constituting not more than 10 percent of the aggregate wall surface in any room or space nor more than 32 square feet in surface area whichever is less.

(2) All ceiling interior finish shall not have a flame spread rating exceeding 200, excluding molding and trim 2 inches or less in width.

(3) Furnace and water heater spaces shall be enclosed by walls, ceiling and doors having an interior finish with a flame spread rating not exceeding 25.

(4) Combustible kitchen cabinet doors, countertops, exposed bottoms and end panels shall not exceed a flame spread rating of 200. Cabinet rails, stiles, mullions and toe strips are exempted.

(5) Exposed interior finishes adjacent to the cooking range shall not have a flame spread rating exceeding 50. Adjacent surfaces are the exposed vertical surfaces between the range top height and the overhead cabinets and/or ceiling and within 6 horizontal inches of the cooking range.

(6) Finish surfaces of plastic bath tubs, shower units and tub or shower doors shall not exceed a flame spread rating of 200.

(b) *Combustibility.* The interior walls and ceiling encasing furnace and water heater enclosures (including doors) and the exposed wall adjacent to the cooking range as defined in § 280.203(a) (5) shall be surfaces with 5/16 inch gypsum board or material having equivalent fire protective properties. At furnace and water heater spaces all openings for pipes and vents shall be tight-fitted or firestopped.

§ 280.204 Kitchen cabinet protection.

(a) The bottom and sides of combustible kitchen cabinets over cooking ranges including a space of 6 inches from the side of the cooking range shall be protected with at least ¼ inch thick asbestos millboard covered with not less than 26 gage sheet metal (.017 stainless steel, .024 aluminum, or .020 copper) or equivalent protection. The protective metal over the range shall form a hood with not less than a 3 inch eyebrow (measuring horizontally from face of cabinet). The hood shall be centered over and at least as wide as the cooking range.

§ 280.205 Carpeting.

(a) Carpeting shall not be used under a fuel-fired furnace or water heater.

§ 280.206 Firestopping.

(a) Firestopping of 1 inch minimum nominal lumber or the equivalent, shall be provided to cut off all concealed draft openings in all stud walls and partitions, including furred spaces, so placed that the maximum vertical dimension of any concealed space is not over eight feet.

§ 280.207 Requirements for foam plastic thermal insulating materials.

(a) *General.* Foam plastic thermal insulating materials shall not be used within the cavity of walls or ceiling or exposed to the interior of the mobile home, unless otherwise specifically approved by HUD, based on accepted tests including full scale room fire testing.

(b) *Specific requirements.* Foam plastic having a flame spread rating of 75 or less may be used as siding backer board or sheathing with a maximum of ¾-inch thickness when separated from the interior of the mobile home by a minimum of 2-inches of mineral insulation or equivalent fire protective material.

§ 280.208 Mobile home fire detection equipment.

(a) *General.* At least one smoke detector (which may be a single-station alarm device) shall be installed in each mobile home to protect each separate bedroom area.

(b) *Smoke detector location.* A smoke detector shall be installed in the hallway or space communicating with the bedroom area.

(1) The specific location shall be in the hallway between the living room area and the first bedroom, except that when a door(s) separates the living area from the bedroom area, the detector shall be installed on the living area side as close to the door(s) as practicable.

(2) Mobile homes having bedrooms separated by any one or combination of common use areas such as kitchen, dining room, living room, or family room (but not a bathroom or utility room), shall have at least two smoke detectors, one detector protecting each bedroom area.

(3) Where practicable, the detector shall be located between the return air intake and the living area.

(4) The architectural planning of the mobile home shall not isolate a smoke detector so as to impair its effectiveness.

(c) *Smoke detectors.* Smoke detectors shall be either the ionization chamber or the photoelectric wall mounted type and shall comply with all the requirements of Underwriters' Laboratories Standard No. 167 for ionization and 168 for photoelectric type detectors. Detectors shall bear the label of a testing and approval laboratory that indicates the smoke detectors have been tested and approved under the requirements of UL 167 or 168. The testing and approved laboratory shall be one which maintains a periodic follow-up service of the labeled devices to ensure compliance with the original approval.

(d) *Installation.* Smoke detectors shall be installed on an interior wall of the mobile home. The top of the detector shall be 5- to 7-inches from the ceiling. The detector mounting shall be attached to an electrical outlet box and the detector connected by a permanent wiring method into a general electrical circuit. There shall be no switches in the circuit to the detector other than the overcurrent protective device protecting the branch circuit.

Subpart D—Body and Frame Construction Requirements

§ 280.301 Scope.

This Subpart covers the minimum requirements for materials, products, equipment and workmanship needed to assure that the mobile home will provide (a) structural strength and rigidity, (b) protection against corrosion, decay, insects and other similar destructive forces, (c) protection against hazards of windstorm, (d) resistance to the elements, and (e) durability and economy of maintenance.

§ 280.302 Definitions.

(a) The following definitions are applicable to Subpart D only:

(1) "Anchoring Equipment" means straps, cables, turnbuckles, and chains, including tensioning devices, which are used with ties to secure a mobile home to ground anchors.

(2) "Anchoring System" means a combination of ties, anchoring equipment, and ground anchors that will, when properly designed and installed, resist overturning and lateral movement of the mobile home from wind forces.

(3) "Tie" means strap, cable, or securing device used to connect the mobile home to ground anchors.

"(4) "Diagonal Tie" means a tie intended to primarily resist horizontal forces, but which may also be used to resist vertical forces."

(5) "Vertical Tie" means a tie intended to resist the uplifting or overturning forces.

(6) "Footing" means that portion of the support system that transmits loads directly to the soil.

(7) "Ground Anchor" means any device at the mobile home stand designed to transfer mobile home anchoring loads to the ground.

(8) "Hurricane Resistive Mobile Home" means a mobile home which meets the wind design load requirements for Zone II in § 280.305(c)(2).

(9) "Loads" (i) "Dead Loads" means the weight of all permanent construction including walls, floors, roof, partition, and fixed service equipment. (ii) "Live Load" means the weight superimposed by the use and occupancy of the mobile home, including wind load and snow load, but not including dead load. (iii) "Wind Load" means the lateral or vertical pressure or uplift on the mobile home due to wind blowing in any direction.

(10) "Main Frame" means the structural component on which is mounted the body of the mobile home.

(11) "Pier" means that portion of the support system between the footing and the mobile home exclusive of caps and shims.

(12) "Sheathing" means material which is applied on the exterior side of a building frame under the exterior weather resistant covering.

(13) "Stabilizing Devices" means all components of the anchoring and support systems such as piers, footings, ties, anchoring equipment, ground anchors, and any other equipment which supports the mobile home and secures it to the ground.

(14) "Support System" means a combination of footings, piers, caps, and shims that will, when properly installed, support the mobile home.

§ 280.303 General requirements.

(a) *Minimum requirements.* The design and construction of a mobile home shall conform with the provisions of this standard. Requirements for any size, weight, or quality of material modified by the terms of "minimum," "not less than," "at least," and similar expressions are minimum standards. The manufacturer or installer may exceed these standards provided such deviation does not result in any inferior installation or defeat the purpose and intent of this standard.

(b) *Construction.* All construction methods shall be in conformance with accepted engineering practices to insure durable, livable, and safe housing and shall demonstrate acceptable workmanship reflecting journeyman quality of work of the various trades.

(c) *Structural analysis.* The strength and rigidity of the component parts and/or the integrated structure shall be determined by engineering analysis or by suitable load tests to simulate the actual loads and conditions of application that occur. (See Subparts E and J.)

(d) *Hurricane resistive design.* Only mobile homes which meet the applicable requirements of § 280.305(c)(2) may be designated "Designed for Hurricane Zone." No similar designation which would imply hurricane resistance shall be used when the mobile home does not meet these requirements.

(e) *New materials and methods.* (1) Any new material or method of construction not provided for in this standard and any material or method of questioned suitability proposed for use in the manufacture of the structure shall nevertheless conform in performance to the requirements of this standard.

(2) Unless based on accepted engineering design for the use indicated, all new mobile home materials, equipment, systems or methods of construction not provided for in this standard shall be subjected to the tests specified in paragraph (g) of this section.

(f) *Allowable design stress.* The design stresses of all materials shall conform to accepted engineering practice. The use of materials not identified as to strength or stress grade shall be limited to the minimum allowable stresses under accepted engineering practice.

(g) *Alternate test procedures.* In the absence of listed and prescribed standards, the manufacturer shall develop or cause to be developed necessary tests to demonstrate the structural properties and the significant characteristics of the method employed. Such tests shall be witnessed by an independent licensed professional engineer or architect or by a recognized testing organization. Copies of the test results shall be kept on file by the mobile home manufacturer.

§ 280.304 Materials.

(a) Dimension and board lumber shall not exceed 19 percent moisture content at time of installation.

(b) (1) Standards for some of the generally used materials and methods of construction are listed in the following table. (2) Materials and methods of construction utilized in the design and construction of mobile homes which are covered by the standards in the following table, or any applicable portion thereof shall comply with these requirements. (3) Engineering analysis and testing methods contained in these references shall be utilized to judge conformance with accepted engineering practices required in § 280.303(c). (4) Materials and methods of installation conforming to these standards shall be considered acceptable when installed in conformance with the requirements of this Part. (5) Materials meeting the standards (or the applicable portion thereof) are considered acceptable unless otherwise specified herein or unless substantial doubt exists as to conformance.

(c) Wood products shall be identified as complying with the appropriate standards."

§ 280.305 Structural design requirements.

(a) Each mobile home shall be designed and constructed as a completely integrated structure capable of sustaining the design load requirements of this standard and shall be capable of transmitting these loads to stabilizing devices without exceeding the allowable loads stresses or deflections. Roof framing shall be securely fastened to wall framing, walls to floor structure, and floor structure to chassis to secure and maintain continuity between the floor and chassis, so as to resist wind overturning and sliding as imposed by design loads in this Part. Uncompressed finished flooring greater than ⅛ inch in thickness, shall not extend beneath load bearing walls which are fastened to the floor structure.

(b) *Design Loads.* (1) *Design dead loads.* Design dead loads shall be the actual dead load supported by the structural assembly under consideration. (2) *Design live loads.* The design live loads and wind and snow loads shall be as specified in this Section and shall be considered to be uniformly distributed. The roof live load or snow load shall not be considered as acting simultaneously with the wind load and the roof live or snow load and floor live loads shall not be considered as resisting the overturning moment due to wind. (3) When engineering calulations are performed, allowable unit stresses may be increased as provided in the documents referenced in § 280.304 except as shown otherwise in § 280.306(a).

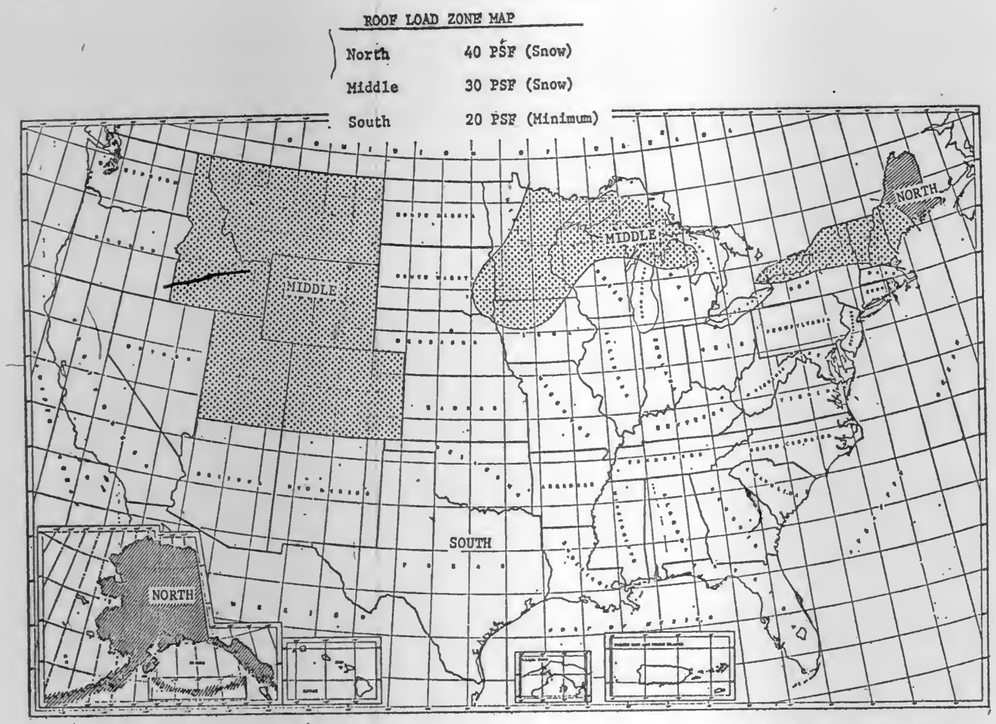
(c) *Wind, Snow and Roof Loads.* (1) *Standard Wind (Zone I).* When a mobile home is not designated as "Hurricane-Resistive," the mobile home and each wind resisting part and portion thereof shall be designed for horizontal wind loads not less than 15 psf and a net uplift load of not less than 9 psf.

(2) *Hurricane Resistive (Zone II).* (i) When a mobile home is designated as "Hurricane Resistive," the home and each wind resisting part and portion thereof shall be designed for horizontal wind loads not less than 25 psf and a net uplift not less than 15 psf. (ii) For exposures in coastal and other areas where wind records indicate significant differences, 125 mph or greater, from the wind loads stated above, the Department may establish more stringent requirements for homes known to be destined for such areas.

(3) *Roof Loads.* (i) Flat, curved and pitched roofs shall be designed to resist the following live loads, applied downward on the horizontal projection as appropriate for the design zone marked on the mobile home:

	Pounds per square foot
North Zone	40
Middle Zone	30
South Zone	20

(ii) For exposures in areas (mountainous or other) where snow or wind records or experience indicate significant differences from the loads stated above, the Department may establish more stringent requirements for homes known to be destined for sluch areas. For snow lands, such requirements are to be based on a roof snow load of 0.6 of the ground snow load for areas exposed to wind and a roof snow load of 0.8 of the ground snow load for sheltered areas.



(iii) Eaves and cornices shall be designed for a net uplift pressure of 2.5 times the design uplift wind pressure cited in § 280.305(c) (1) and (2).

(4) The Data Plate posted in the mobile home (See § 280.5) shall show for which structural zone(s) of the USA the mobile home has been designed and the actual design external snow and/or wind live loads. The Data plate shall include reproduction of the Load Zone Maps shown in this Section and related information. The Load Zone Maps shall be not less than one-half the size illustrated.

WIND ZONE MAP

V40244 DEC 18 75 XUM

(d) *Design Load Deflection.* When a structural assembly is subjected to total design live loads, the deflection for structural framing members shall not exceed the following:

Floor	L/240
Roof and ceiling	L/180
Headers, beams, and girders (vertical load)	L/180
Walls and partitions	L/180

Where L equals the clear span between supports or two times the length of a cantilever.

(e) *Fastening of Structural Systems.* Roof framing shall be securely fastened to wall framing, walls to floor structure, and floor structure to chassis to secure and maintain continuity between the floor and chassis, so as to resist wind overturning and sliding as imposed by design loads in this Part.

(f) *Walls.* The walls shall be of sufficient strength to withstand the load requirements as defined in § 280.305(c) of this part, without exceeding the deflections as specified in § 280.305(d). The connections between the bearing walls, floor, and roof framework members shall be fabricated in such a manner as to provide support for the material used to enclose the mobile home and to provide for transfer of all lateral and vertical loads to the floor and chassis.

(1) Except where substantiated by engineering analysis or tests, studs shall not be notched or drilled in the middle one-third of their length.

(2) Interior walls and partitions shall be constructed with structural capacity adequate for the intended purpose and shall be capable of resisting a horizontal load of not less than five pounds per square foot. Finish of walls and partitions shall be securely fastened to wall framing.

(g) *Floors.* (1) Floor assemblies shall be designed in accordance with accepted engineering practice standards to support a minimum uniform live load of 40 lb/ft² plus the dead load of the materials. In addition (but not simultaneously), floors shall be able to support a 200-pound concentrated load on a one-inch diameter disc at the most critical location with a maximum deflection not to exceed one-eighth inch relative to floor framing. Perimeter wood joists of more than six inches depth shall be stabilized against overturning from superimposed loads as follows: at ends by solid blocking not less than two-inch thickness by full depth of joist, or by connecting to a continuous header not less than two-inch thickness and not less than the depth of the joist with connecting devices; at eight-feet maximum intermediate spacing by solid blocking or by wood cross-bridging of not less than one inch by three inches, metal cross-bridging of equal strength, or by other approved methods.

(2) Wood, wood fibre or plywood floors or subfloors in kitchens, bathrooms (including toilet compartments), laundry rooms, water heater compartments, and any other areas subject to excessive moisture shall be moisture resistant or shall be made moisture resistant by sealing or by an overlay of nonabsorbent material applied with water-resistant adhesive. Carpets and/or carpet pads shall not be installed in concealed spaces subject to excessive moisture such as plumbing fixture spaces.

(3) Except where substantiated by engineering analysis or tests:

(i) Notches on the ends of joists shall not exceed one-fourth the joist depth.

(ii) Holes bored in joists shall not be within 2 inches of the top or bottom of the joist, and the diameter of any such hole shall not exceed one-third the depth of the joist.

(iii) Notches in the top or bottom of the joists shall not exceed one-sixth the depth and shall not be located in the middle third of the span.

(4) Bottom board material (with or without patches) shall meet or exceed the level of 48 inch-pounds of puncture resistance as tested by the Beach Puncture Test in accordance with ASTM D-781-68. The material shall be suitable for patches and the patch life shall be equivalent to the material life. Patch installation instruction shall be included in the mobile home manufacturer's instructions.

(h) *Roofs.* (1) Roofs shall be of sufficient strength to withstand the load requirements as defined in § 280.305 (b) and (c) without exceeding the deflections specified in § 280.305(d). The connections between roof framework members and bearing walls shall be fabricated in such a manner to provide for the transfer of design vertical and horizontal loads to the bearing walls and to resist uplift forces.

(2) Roofing membranes shall be of sufficient rigidity to prevent deflection which would permit ponding of water or separation of seams due to wind, snow, ice, erection or transportation forces.

(3) Cutting of roof framework members for passage of electrical, plumbing or mechanical systems shall not be allowed except where substantiated by engineering analysis.

(4) All roof penetrations for electrical, plumbing or mechanical systems shall be properly flashed and sealed. In addition, where a metal roof membrane is penetrated, a wood backer shall be installed. The backer plate shall be not less than 5/16 inch plywood, with exterior glues, secured to the roof framing system beneath the metal roof, and shall be of a size to assure that all screws securing the flashing are held by the backer plate.

§ 280.306 Windstorm protection.

(a) *Provisions for support and anchoring systems.* Each mobile home shall have provisions for support and anchoring systems, which, when properly designed and installed, will resist overturning and lateral movement (sliding) of the mobile home as imposed by the respective design loads. The design wind loads to be utilized for calculating resistance to overturning and lateral movement shall be the wind loads indicated in § 280.305(c) (1) and (2) increased by a factor of safety of 1.5. The basic allowable stresses of materials required to resist overturning and lateral movement shall not be increased in the design and proportioning of these members.

(1) The provisions of this section shall be followed and the support and anchoring systems shall be designed by a Registered Professional Engineer or Architect.

(2) The manufacturer of each mobile home is required to make provision for the support and anchoring systems but is not required to provide the anchoring equipment or stabilizing devices. When the manufacturer's installation instructions provide for the main frame structure to be used as the points for connection of diagonal ties, no specific connecting devices need be provided on the main frame structure.

(b) The manufacturer shall provide printed instructions with each mobile home specifying the location and required capacity of stabilizing devices on which the design is based. The manufacturer shall provide drawings and specifications certified by a registered professional engineer indicating at least one acceptable system of anchorage including the details of required straps or cables, their end connections and all other devices needed to transfer the wind loads from the mobile home to the ground anchors.

(c) The provisions made for anchoring systems shall be based on the following design criteria for mobile homes.

(1) The minimum number of ties required per side shall be as required to resist the design loads stated in § 280.305 (c) (1) and (2).

(2) Ties shall be as evenly spaced as practicable along the length of the mobile home with not more than 8 feet open-end spacing on each end.

(3) When continuous straps are provided as vertical ties, such ties shall be positioned at rafters and studs. Where a vertical tie and diagonal tie are located at the same place, both ties may be connected to a single ground anchor, provided that the anchor used is capable of carrying both loadings.

(4) Add-on sections of expandable mobile homes shall have provisions for vertical ties at the exposed ends.

(d) Double-wide mobile homes require only diagonal ties. These shall be placed along the main frame and below the outer side walls.

(e) Protection shall be provided at sharp corners where the anchoring system requires the use of external cables or straps. Protection shall also be provided to minimize damage to roofing or sliding by the cable or strap.

(f) Anchoring equipment shall be capable of resisting an allowable working load equal to or exceeding 3,150 pounds and shall be capable of withstanding a 50 percent overload (4,725 pounds total) without failure of either the anchoring equipment or the attachment point on the mobile home.

(g) Anchoring equipment exposed to weathering shall have a resistance to weather deterioration at least equivalent to that provided by a coating of zinc on steel of not less than 0.30 ounces per square foot of surface coated.

(1) Slit or cut edges of zinc-coated steel strapping do not need to be zinc coated.

(2) Type 1, Finish B, Grade 1 steel strapping, 1¼ inches wide and 0.035 inch thick, conforming with Federal Specification QQ-S-781-H, is judged to conform with the provisions of this section and paragraph (f) above.

§ 280.307 Resistance to elements and use.

(a) Exterior coverings shall be of moisture and weather resistive materials attached with corrosion resistant fasteners to resist wind, snow and rain. Metal coverings and exposed metal structural members shall be of corrosion resistant materials or shall be protected to resist corrosion. All joints between portions of the exterior covering shall be designed, and assembled to protect against the infiltration of air and water, except for any designed ventilation of wall or roof cavity.

(b) Joints between dissimilar materials and joints between exterior coverings and frames of openings shall be protected with a compatible sealant suitable to resist infiltration of air or water.

(c) Where adjoining materials or assemblies of materials are of such nature that separation can occur due to expansion, contraction, wind loads or other loads induced by erection or transportation, sealants shall be of a type that maintains protection against infiltration or penetration by air, moisture or vermin.

(d) Exterior surfaces shall be sealed to resist the entrance of rodents.

Subpart E—Testing

§ 280.401 Structural load tests.

Every structural assembly tested shall be capable of meeting the Proof Load Test or the Ultimate Load Test as follows:

(a) *Proof load tests.* Every structural assembly tested shall be capable of sustaining its dead load plus superimposed live loads equal to 1.75 times the required live loads for a period of 12 hours without failure. Tests shall be conducted with loads applied and deflections recorded in ¼ design live load increments at 10-minute intervals until 1.25 times design live load plus dead load has been reached. Additional load shall then be applied continuously until 1.75 times design live load plus dead load has been reached. Assembly failure shall be considered as design live load deflection (or residual deflection measured 12 hours after live load removal) which is greater than the limits set in § 280.305(d), rupture, fracture, or excessive yielding. An assembly to be tested shall be of the minimum quality of materials and workmanship of the production. Each test assembly, component or subassembly shall be identified as to type and quality or grade of material. All assemblies, components or subassemblies qualifying under this section shall be subject to a continuing qualification testing program acceptable to the Department.

(b) *Ultimate load tests.* Ultimate load tests shall be performed on a minimum of three assemblies to generally evaluate the structural design. Every structural assembly tested shall be capable of sustaining its total dead load plus live loads increased by a factor of safety consistent with the material being tested. Factors of safety shall be based on nationally recognized standards and approved by the Department. Tests shall be conducted with loads applied and deflections recorded in ¼ design live load increments at 10-minute intervals until 1.25 times design live load plus dead load has been reached. Additional loading shall then be applied continu-

V40244 DEC 18 75 XUM

ously until failure occurs or 1.50 times the factor of safety times the design live load plus the dead load is reached. Assembly failure shall be considered as design live load deflection greater than the limits set in § 208.305(d) rupture, fracture, or excessive yielding. Assemblies to be tested shall be representative of average quality or materials and workmanship of the production. Each test assembly, component, or subassembly shall be identified as to type and quality or grade of material. All assemblies, components, or subassemblies qualifying under this section shall be subject to a periodic qualification testing program acceptable to the Department.

§ 280.402 Test procedure for roof trusses.

(a) *Roof load tests.* The following is an acceptable test procedure, consistent with the provisions of § 280.401, for roof trusses that are supported at the ends and support design loads. Where roof trusses act as support for other members, act as cantilevers, or support concentrated loads, they shall be tested accordingly.

(b) *General.* Trusses may be tested in pairs or singly in a suitable test facility. When tested singly, simulated lateral support of the test assembly may be provided, but in no case shall this lateral support exceed that which is specified for the completed mobile home. When tested in pairs, the trusses shall be spaced at the design spacing and shall be mounted on solid support accurately positioned to give the required clear span distance (L) as specified in the design. The top and bottom chords shall be braced and covered with the material, with connections or method of attachment, as specified by the completed mobile home.

(1) As an alternate test procedure, the top chord may be sheathed with ¼ inch by 12 inch plywood strips. The plywood strips shall be at least long enough to cover the top chords of the trusses at the designated design truss spacing. Adjacent plywood strips must be separated by at least ⅛ inch. The plywood strip shall be nailed with 4d nails or equivalent staples not closer than 8 inches on center along the top chord of one truss only. The bottom chords of the adjacent trusses may be either: (i) Unbraced, (ii) laterally braced together (not cross braced) with 1" x 2" stripping not closer than 24 inches on center nailed with only one 6d nail at each truss, or (iii) covered with the material, with connections or methods of attachment, as specified for the completed mobile home.

(2) Truss deflections will be measured relative to a taut wire running over the support and weighted at the end to insure constant tension or other approved methods. Deflections will be measured at the two quarter points and at midspan. Loading shall be applied to the top chord through a suitable hydraulic, pneumatic, or mechanical system, masonry units, or weights to simulate design loads. Load units for uniformly distributed loads shall be separated so that arch action does not occur, and shall be spaced not greater than 12 inches on center so as to simulate uniform loading.

(c) *Nondestructive test procedure*—(1) *Dead load plus live load.* (i) Noting figure A, measure and record initial elevation of the truss in test position at no load. (ii) Apply load units to the top chord of the truss equal to the full dead load of roof and ceiling. Measure and record deflections. (iii) Maintaining the dead load, add live load in approximate ¼ design live load increments. Measure the deflections after each loading increment. Apply incremental loads at a uniform rate such that approximately one-half hour is required to establish the total design load condition. Measure and record the deflections five minutes after loads have been applied. The maximum deflection due to design live load (deflection measured in step (iii) minus step (ii)) shall not exceed L/180, where L is a clear span measured in the same units. (iv) Continue to load truss to dead load plus 1.75 times the design live load. Maintain this loading for 12 hours and inspect the truss for failure. (v) Remove the total superimposed live load. Trusses not recovering to at least the L/180 position within 12 hours shall be considered as failing.

(2) *Uplift loads.* This test shall only be required for truss designs which may be critical under uplift load conditions. (i) Measure and record initial elevation of the truss in an inverted test position at no load. Bottom chord of the truss shall be mounted in the horizontal position. (ii) Apply the uplift load as stated in § 280.305(c) to the bottom chord of the truss. Measure and record the deflections 5 minutes after the load has been applied. (iii) Continue to load the truss to 1.75 times the design uplift load. Maintain this load for 3 hours and inspect the truss for failure. (iv) Remove applied loads and within three hours the truss must recover to at least L/180 position, where L is a clear span measured in the same units.

(d) *Destructive test procedure.* (1) Destructive tests shall be performed on three trusses to generally evaluate the truss design. (2) Noting figure A–1, apply the load units to the top chord of the truss assembly equal to full dead load of roof and ceiling. Measure and record deflections. Then apply load and record deflections in ¼ design live load increments at 10-minute intervals until 1.25 times design live load plus dead load has been reached. (3) Additional loading shall then be applied continuously until failure occurs or the factor of safety times the design live load plus the dead load is reached. (4) Assembly failure shall be considered as design live load deflection greater than the limits set in § 280.305(d), rupture, fracture, or excessive yielding. (5) The assembly shall be capable of sustaining the dead load plus the applicable factor of safety times the design live load (the applicable factor of safety for wood trusses shall be taken as 2.50).

(e) Trusses qualifying under the nondestructive test procedure, Tests §§ 208.402(c) (1) and (2) (when required), shall be subject to a continuing qualification testing program acceptable to the Department. Trusses qualifying under the destructive test procedures, Tests § 280.402 (c)(2) (when required), and (d), shall be subject to periodic tests only.

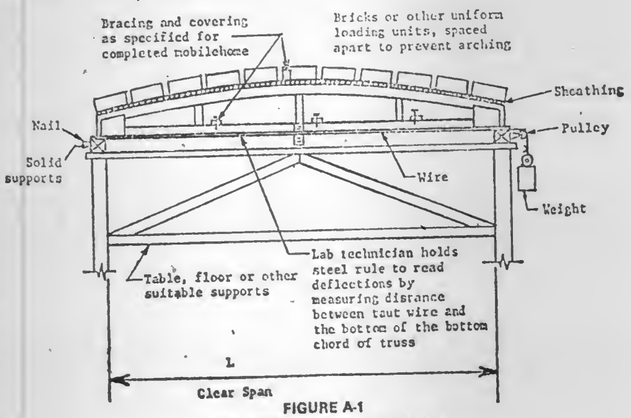


FIGURE A-1
Test Procedure for Roof Trusses

§ 280.403 Standard for windows and sliding glass doors used in mobile homes.

(a) *Scope.* This section sets the requirements for prime windows and sliding glass doors used in mobile homes except for windows used in entry doors. Windows so mounted are components of the door and thus are excluded from this standard.

(b) *Materials and methods.* Any material or method of construction, whether or not provided for in this standard, and any material or method of questioned suitability, proposed for use in manufacture, shall nevertheless conform in performance as outlined in paragraph (c) of this Section and proof of capability of structural integrity shall be presented. If applicable, units shall comply with the following:

(1) *Wood and wood based products.* (i) *Wood.* Wood parts including plywood and particleboard parts of window units shall have a moisture content of 6 to 12 percent at the time of fabrication. Wood parts, except inside stops and trim shall be manufactured utilizing wet-use adhesive requirements as defined in ASTM D–3110 and preservative treated in accordance with NWMA IS–4. (ii) *Plywood.* Plywood parts except for inside stops and trim shall be exterior type plywood and preservative treated in accordance with NWMA IS–4. (iii) *Particleboard.* Particleboard parts except for inside stops and trim shall be type-2 particleboard and preservative treated in accordance with NWMA IS–4.

(2) *Aluminum.* (i) *Alloys.* Aluminum shall be of a commercial quality and of proper alloy for window construction, free from defects impairing strength and/or durability, as follows:

Wrought aluminum alloys shall be those in which the alloying elements do not exceed the following maximum limits:

	Percent
Silicone	7.0
Magnesium Manganese Chromium	6.0
Iron	1.0
Copper	.4
Zinc	1.0
Other	.5
Aluminum	Balance

These limits apply to both bare products and to the core clad products. The cladding of clad products shall be within the same limits except that the maximum zinc limit may be 3.0 percent in order to assure that the cladding is anodic to the core. Where aluminum extrusions are used for the main frame and sash or ventilator sections, they shall have a minimum ultimate tensile strength of 22,000 psi and a yield of 16,000 psi.

(ii) *Finish.* The exposed surface of all aluminum members shall be clean and free from serious surface blemishes. If exposed welded joints are used, they shall be dressed and finished.

(3) *Glass.* (i) Safety glazing materials, where used, shall meet ANSI Z97.1–1972. Tempered glass, where used, shall also meet FS DD–G–1403A. (ii) Insulated glass, when used, shall meet or exceed the requirements of Sealed Insulating Glass Manufacturers Association (SIGMA) and shall be permanently identified with the name of the insulating glass manufacturer. (iii) Glass tolerances and areas shall meet or exceed the values shown in the Glass Table below.

Glass dimensional tolerances and maximum allowable areas [b]—sheet glass

Nominal thickness (inches)	Minimum thickness (inches)	Maximum area [b] (square feet) at 15 lb/ft²	Maximum area [b] (square feet) at 25 lb/ft²
1S or	0.078	11	10
SS	.085	13	11
2¼ oz	.106	18	14
DS	.115	20	15
3/16	.182	40	30
7/32	.206	58	37
¼	.236	72	48

[a] For other types of glass see Federal Specification DD–G–451c, dated Jan. 15, 1968.
[b] Maximum areas shown are based on minimum glass thicknesses set forth. Maximum areas shown apply for rectangular lites of annealed glass firmly supported on all 4 sides in a vertical position.

Tabulated areas may be increased as noted for use of tempered, heat strengthened or sealed insulating glass and shall be decreased as noted for use of sandblasted, wire or laminated glass. Glass louvers installed in jalousies shall be not less than 7/32" thick nor longer than 36" and exposed edges shall be seamed, ground or polished.

ADJUSTMENT FACTORS
RELATIVE RESISTANCE TO WIND LOADS [1]

Glass type:	Approximate relationship
Regular plate	1.0
Laminated	0.6
Wire	0.5
Heat strengthened	2.0
Fully tempered	4.0
Factory fabricated insulating glass [2]	1.5
Rough rolled or patterned surface	1.0
Sand blasted annealed glass	0.4

[1] To determine the maximum allowable area for the glass types listed multiply the allowable area established by the appropriate adjustment factor.
[2] Use thickness of thinner of the two lights, not thickness of unit.

(4) *Glazing.* Any method of glazing conforming to the Performance Requirements (paragraph c of this section) and Material and Methods Requirements (paragraph b of this section) shall be acceptable.

(5) *Hardware and Fasteners.* All hardware components and fasteners when considered as individual components, whether commercially available, or proprietary, must be capable of performing to the criteria stipulated in Performance Requirements, paragraph (c) of this section.

(c) *Performance Requirements.* Test procedures as outlined in pargaraphs (c) (1) thru (4) of this section are applicable to preproduction prototype units of prime windows and sliding glass doors. Production line units shall be equivalent in design and materials to the tested and passed prototype units and shall also meet the requirements of 280.403(c)(5).

(1) *Size of test specimen.* Production line units shall have width and height dimensions equal to or less than the corresponding dimensions of the prototype unit tested and passed. No inference of compliance to these requirements is to be made for products exceeding the size of the tested and passed prototype.

(2) *Structural performance test*—(i) *Zone I.* There shall be no glass breakage, permanent deflection or any other condition which would cause the specimen to be inoperable after being subjected to an exterior pressure, 15 pounds per square foot. The test method applicable to this requirement shall be ASTM E–330. (ii) *Zone II.* There shall be no glass breakage, permanent deflection or any other condition which would cause the specimen to be inoperable after being subjected to exterior pressure of 25 pounds per square foot. The test method applicable to this requirement shall be ASTM E–330. (iii) *Interior pressure.* There shall be no glass breakage, permanent deflection or any other condition which would cause the specimen to be inoperable after being subjected to an interior pressure equal to ½ the requirements in either paragraphs (c)(2)(i) or (c)(2)(ii). The test method applicable to this requirement shall be ASTM E–330 except that no artificial means of containing pressure shall be allowed. Should pressure not be obtainable due to lack of air the testing agency will report the pressure achieved, the theoretical air flow supplied to the unit, and certify that no additional flow from the equipment in use was available. Laboratory equipment used for this test must be capable of developing 10 x air flow determined in § 280.403(c)(3).

(3) *Air infiltration test.* Air infiltration shall not exceed 0.50 CFM per square foot of window area when tested in accordance with ASTM E–283 at an exterior pressure differential of 1.567 pounds per square foot (0.30" of water pressure).

(4) *Water resistance test.* No leakage shall pass the interior face of the test specimen at a test pressure of 2.86 psf (0.55" water pressure) when tested in accordance with ASTM E–547 with a test period consisting of four cycles, each cycle consisting of five minutes with pressure released, during which the water spray will be continuously applied. (i) For the purpose of compliance with paragraph (c)(4), all units which may have exterior screens, shall be tested first with screens in place and thereafter with screens removed. (ii) For the purpose of compliance with paragraph (c)(4), penetration, as referenced in ASTM E–331–70, paragraph 4.3, shall not include drops passing the interior face by energy developed in the bursting of sill drain system bubbles created by a pressure differential applied to the exterior face of the specimen.

(5) *Production Line Units.* Production line units of prime windows and sliding glass doors shall comply with: (i) The structural performance test to the zone limit certified in paragraph (c)(2) of this section and; (ii) the air infiltration test in paragraph (c)(3) of this section and; (iii) the water resistance test in paragraph (c)(4) of this section except that the test pressure shall be 1.56

V 40244 DEC 18 75 XUM

psf (0.30" water column) and the water application rate shall be 2.5 GPH, per square foot of window surface area, all other parameters being the same as set forth in paragraph (c) (4) of this section.

(d) *Test sequence.* The sequence of tests shall be performed as they are listed above except that Structural Performance Test to Zone I (15 PSF) exterior pressure may be followed by Zone I interior pressure (7.5 PSF), which may be followed by the Air Infiltration Test, which may be followed by the Water Resistance Test, which may be followed by the Structural Performance Test to Zone II and (25 PSF) exterior pressure, which may be followed by the Zone II and interior pressures (12.5 PSF), which may be followed by the Air Infiltration Test, which may be followed by the Water Resistance Test. The Air Infiltration Test may be performed after the Water Resistance Test providing all sealed areas are thoroughly dried.

(e) *Screens.* (1) Screen, when specified, shall be provided with fastening devices, suited particularly for application to the specific window for which they are intended, and be of sufficient strength to perform satisfactorily.

(2) Insect screening shall be of a material compatible with aluminum and shall meet CS 138–55, "Insect Wire Screening," FS RR–W–365, "Screening, Wire, Insect," CS 248–64, "Vinyl Coated Glass Fibre Insect Screening and Louver Cloth," or FS L–S–125a "Screening, Non Metallic Insect."

(f) *Assembly.* Windows shall be assembled in a secure and workmanlike manner to perform as hereinafter specified and to assure neat and weather tight construction. A permanent-type watertight joint shall be made at the junction of the sill and side frame members.

(g) *Shipping.* Units may be shipped either as a subassembly unit or as a completely assembled unit but not as a KD or open unit. A KD unit is a unit that is complete in its entirety with the exception of glass, glazing material, or screen, which is shipped in a disassembled condition and later assembled and glazed according to the instructions of the manufacturer and utilizing all of the components supplied or specified by the manufacturer.

(1) An open unit is a unit that is complete in its entirety with the exception of glass, glazing materials, or screen, which is shipped in an assembled condition and later glazed according to the instruction of the manufacturer, utilizing all of the components supplied by the manufacturer.

(2) A subassembly unit is a unit that is complete in its entirety including the glazing of glass or other glazing panels into their respective fixed or moving sash frames, which is shipped with such glazed panels separate from each other or from any master frame, which master frame may be either disassembled or assembled. The connection of such master frame to glazed, fixed, or moving panels is to take place later according to the instructions of the manufacturer utilizing all of the components supplied by the manufacturer.

(3) A completely assembled unit is one that is complete in its entirety and is shipped with all parts and subassemblies in complete connection with each other and no separate pieces.

(h) *Permanent identification.* (1) As identification, each unit shall bear a certification label containing a code number traceable to the manufacturer through the certifying agency or the name of the manufacturer or brand name together with the city and state location of the manufacturer or main office of the manufacturer.

(2) The label shall be of a permanent-type designed to discourage easy removal, shall be legible and shall remain legible under normal operating conditions for a period of not less than five years from date of product installation.

(3) Acceptable means of identification are, but are not limited to, the following: Embosed, stamped, cast or molded characters becoming an integral part of the material on which they are located; flexible color-fast and durable labels, decals, stickers, etc., affixed with a permanent-type adhesive; or rigid metal or plastic name plates affixed mechanically or with a permanent-type adhesive.

(4) Location of the label shall be such that it is accessible for normal direct viewing purposes from the interior side of the product, after the unit is installed, without the necessity of product disassembly. Identification located only on the glass or screen shall not be acceptable.

(i) *Certification.* The manufacturer shall show evidence of continued compliance by affixing a quality certification label to the product in accordance with ANSI Z34.1, "American National Standard Practice for Certification Procedures." In determining certifiability under this section, compliance shall consist of preproduction specimen testing in accordance with each and every requirement of this section followed by an in-plant inspection and production unit testing system consisting of a minimum of two such inspections per year by an independent quality assurance agency.

§ 280.404 Standard for egress windows for use in mobile homes.

(a) *Scope and purpose.* The purpose of this section is to establish the requirements for the design, construction, and installation of windows and approved devices intended to be used as an emergency exit during conditions encountered in a fire or similar disaster.

(b) *Requirements*—(1) *Installation.* Window manufacturers shall provide the home manufacturer with written installation instructions.

(2) *Performance.* The egress window including auxiliary frame and seals, if any, shall meet the requirements of § 280.403 "Standard for Windows and Sliding Glass Doors Used in Mobile Homes."

(3) *Dimensions.* (i) All egress windows shall have a minimum clear dimension of 22 inches when determined in accordance with Test A paragraph (d) (1) of this section. (ii) All egress windows shall have a minimum clear opening of 5 square feet when determined in accordance with Test B, paragraph (d) (2) of this section.

(4) *Operational.* (i) Operating instructions shall be applied to each egress window and carry the legend "Do Not Remove." In addition, the instructions should include a reminder to remove all shipping clips on screens, storm windows, and other appurtenances for exiting purposes. (ii) The number of locks and latches shall not exceed 2, not including the 4 appurtenance attachment mechanisms permitted by paragraph (c) (2) (i) of this section. (iii) Locks, latches, lifting and sliding operational forces shall not exceed a force of 20 pounds when tested in accordance with Test C, paragraph (d) (3) of this section. (iv) Any handle or latch required to operate the emergency egress provisions of the window shall be attached in the factory by either a permanent method or a mechanical method which requires a tool not commonly available in the home, unless removal of the latch or handle will in no way limit the effectiveness of the egress provision. (v) Any window whose egress provisions are dependent on the operation of a rotary operator is unacceptable.

Example: Awning windows utilizing a single vent for egress and requiring a rotary operator for activation is unacceptable, whereas an awning window set in a separate frame whose activation requires only a 180° twist of the lock to allow egress is acceptable even though a rotary operator is present for normal operation.

(c) *Appurtenances.* (1) The addition or inclusion of screens, storm windows, or other appurtenances shall not encroach upon the dimensional requirements set forth in paragraph (b) (3).

(2) Any mechanism used to attach an appurtenance such as a screen or storm window to the window shall meet the following requirements unless the appurtenance meets the requirements of paragraph (c) (3): (i) The number of mechanisms shall not exceed 4 and; (ii) The operating force of the mechanisms shall not exceed 5 pounds tested in accordance with Test D paragraph (d) (4) and; (iii) The mechanisms shall be designed so that that cannot be misapplied utilizing normal household tools such as screwdrivers, pliers and wrenches exceeding the aforementioned forces; and (iv) The surface to which the operating force is applied shall have a minimum cross-sectional area of 0.25 square inches.

(3) If an appurtenance such as a screen or storm window is attached to the window in such a manner that it need not be removed or disengaged in any way in order to effect a fully opened exit, the requirements of paragraph (c) (2) need not be met.

(4) The operating instructions detailed in paragraph (b) (4) (i) shall include instructions on the required removal and replacement of any screen and/or storm sash appurtenance.

(d) *Test methods*—(1) *Test Method A—Minimum Dimensions.* The minimum dimension of 22 in. required by paragraph (b) (3) (i) shall be tested as follows: When the window is in the final position for egress, a 22 in. dowel shall

be passed through the opening at the point of its least dimension while contacting only one point of the window frame, at either the horizontal or vertical orientation of the dowel. (i) Example: In a horizontally opening window (sliding or rolling), the minimum dimension requirement may be met as follows: When the window is in the final position for egress, place one end of the dowel perpendicularly against the portion of the main frame side (bottom) projecting furthest towards the center of the opening, and pass the dowel through the opening in a horizontal (vertical) plane without touching any portion of the device except the main frame side (bottom) on which it is pivoted. (ii) Example: Any type of window may be mounted in a side, bottom, or top hinged or pop-out egress frame which in the fully opened position meets the minimum dimension and area requirements.

(2) *Test Method B—Minimum Area.* The minimum area requirement of 5 square feet contained in paragraph (b) (3) (ii) shall be determined by multiplying the minimum dimension (which may exceed 22 in.) by the clear dimension measured perpendicularly to the minimum dimension and in the plane of the window main frame. (i) Example: In a vertically operating window whose minimum dimension is from the main frame bottom to that portion of the operating vent projecting furthest toward the horizontal center line of the egress opening when in the fully opened position, the minimum area shall be determined by multiplying the minimum dimension by the inside side-to-side dimension.

(3) *Test Method C—Operating Forces.* (i) For horizontal or vertical moving windows, a force gage shall be attached to the manual pull bar at its centerpoint. After opening the latch or lock, a force not to exceed 20 pounds shall be exerted in a direct pull parallel to the window in order to obtain movement in the opening direction. The window shall be in the closed and latched position prior to the test and shall have been subjected to 5 opening and closing cycles prior to the test. (ii) Locks and latches shall be tested as noted in section (d) (3) (i) except that the force gage shall be located in the center of the latch or lock handle.

(4) *Test Method D—Mechanical Device Operating Force (Appurtances).* (i) A force gage of sufficient capacity using a point contact and having the ability to retain the maximum reading (Chatillon DPP–50 or similar) shall be used. The force gage point shall be applied to the mechanism at the center of the normal force application area and sufficient force applied to disengage the appurtenance. The maximum reading shall be retained by the force gage and may be read directly.

(e) *Test Report.* (1) The test report shall include all requirements of this standard listed in their order shown in this standard. Where certain provisions of the standard do not apply, the notation "N.A." (Not applicable) shall so denote these items. Where certain appurtenances are not supplied; such as storm windows or screen, the notation "N.S." (Not supplied) shall so denote those items.

(2) The test report shall be complete with manufacturers assembly drawing, extrusion drawings, parts list, weatherstrip description, glazing method description including backbedding and glazing method, installation and operating instructions. Where the unit tested is not in its actual installation, a clause stating the following shall be included in the test report: "This unit tested as submitted. Actual installation must be in accordance with the instructions included with this report or this report is not valid."

(3) The test report on all units submitted for test not having appurtenances listed in paragraph (c) shall include a statement as follows: "This unit tested without storm windows (or screen). The installation of these items with this product invalidates this test report."

(4) For any test on component parts, such as balances, friction positioners, etc., certification by an independent testing agency shall be acceptable for evidence of compliance. If such certification is used, the test report shall so state, and give the name of the agency.

(5) Test reports used to demonstrate compliance with this standard to any governmental body shall be made available to the public upon request.

§ 280.405 Standard for swinging exterior passage doors for use in mobile homes.

(a) *Introduction.* This standard applies to all exterior passage door units, excluding sliding doors and doors used for access to utilities and compartments. This standard applies only to the door frame consisting of jambs, head and sill and the attached door or doors.

(b) *Purpose.* It is the purpose of this standard to establish the requirements for exterior passage door units irrespective of the type of material used in the manufacture of these products.

(c) *General requirements and materials of construction.* (1) The design and construction of the exterior passage door units shall conform with the provisions of this standard. Requirements for any size, weight, or quality of material modified by the terms of "minimum," "not less than," "at least," and similar expressions are minimum standards. The manufacturer may exceed these standards provided such deviation does not result in an inferior product or defeat the purpose and intent of this standard. Units may be shipped as a completely assembled unit, but not as KD or open unit. A KD unit is a unit that is complete in its entirety, which is shipped in a dissassembled condition and later assembled and glazed according to the instructions of the manufacturer. An open unit is a unit that is complete in its entirety with the exception of a window insert, which is shipped in an assembled condition and later glazed according to the instructions of the manufacturer. A completely assembled unit is one that is complete in its entirety and is shipped with all parts and subassemblies in complete connection with each other and no separate pieces, except for: Lock-knobs only and keys, door chain and attachments, storm door latch, chain and attachments, threshold extension, screw cover, drip cap.

(2) *Workmanship.* All construction methods, materials and workmanship shall be in conformance with accepted engineering practices to insure durable, livable, and safe housing.

(d) *Materials and methods.* Any material or method of construction, whether or not provided for in this standard, and any material or method of questioned suitability, proposed for use in manufacture, shall nevertheless conform in performance as outlined in paragraph (e) of this standard and proof of capability of structural integrity shall be presented. If applicable, units shall comply with the following:

(1) *Wood and wood based products*—(i) Wood. Wood door parts shall be manufactured of suitable lumber having a moisture content of 6 to 12 percent at time of fabrication. Wood parts except interior trim shall be manufactured utilizing wet-use adhesive requirements as defined in ASTM D–3110 and Preservative Treated in accordance with NWMA I.S.–4 standard. Doors shall conform to the Type 1 requirements of NWMA I.S. 1–74. (ii) Plywood. Plywood shall be exterior type and preservative treated in accordance with NWMA I.S.–4. (iii) Hardboard parts shall meet or exceed the requirements for ⅛ inch tempered hardboard in accordance with the latest edition of PS 58.

(2) *Hardware and fasteners.* All hardware components and fasteners when considered as individual components, whether commercially available, or proprietary, must be capable of performing to the criteria stipulated in this section and in the Performance Requirements Section, Paragraph (e) of these specifications.

(3) *Glass.* All glazing in doors shall be safety glazing material meeting ANSI Z97.1–72. Glass in jalousies shall also be at least 7/32 in. in thickness and not longer than 36 inches. Exposed edges shall be seamed, ground or polished to prevent injury.

(4) *Weatherstripping.* A tight threshold and weatherstripping to reduce air infiltration and improve water resistance shall be provided capable of conforming to the criteria stipulated in the Performance Requirements Section, Paragraph (e) of this standard.

(e) *Performance requirements*—(1) *Size of test specimen.* All tests shall be performed on exterior passage door units with all operable portions closed and all criteria herein are applicable to exterior passage doors of the largest type that the producer desires to qualify under this specification. No inference of compliance to these requirements is to be made for products exceeding the size of the test specimen submitted. Largest unit size is determined by the maximum width and height dimensions of production units that are equal to or less than correspond-

V 40 244 DEC 18 75 XUM

ing dimensions in that unit tested and passed.

(2) *Structural performance test*—(i) *Wind pressure resistivity.* There shall be no glass breakage or permanent deflection or any other condition which would cause the specimen to be inoperable after being subjected to exterior pressures of 25 pounds per square foot. The test method applicable to this requirement shall be ASTM E–330. (ii) *Interior pressure.* There shall be no glass breakage or permanent deflection or any other condition which would cause the specimen to be inoperable after being subjected to an interior pressure equal to ½ the requirements in paragraph (e) (2) (i). The test method applicable to this requirement shall be ASTM E–330 except that no artificial means of containing pressure shall be allowed. Should pressure not be obtainable due to lack of air, the testing agency will report the pressure achieved, the theoretical air flow supplied to the unit, and certify that no additional flow from the equipment in use was available. Laboratory equipment used for this test must be capable of developing 10 x air flow determined in paragraph (e) (2) (iii) of this specification. (iii) *Air infiltration test.* Air infiltration shall not exceed the limits set forth below when tested in accordance with ASTM E–283 at an exterior pressure differential of 1.56 pounds per square foot (0.300'' water pressure).

1.35 CFM per sq. ft. of door	Jan. 1, 1975.
1.2 CFM per sq. ft. of door	Jan. 1, 1976.
1.0 CFM per sq. ft. of door	Jan. 1, 1977.

(iv) *Water resistance test.* No water shall pass the interior face of the test specimen at a test pressure of 0 psf when tested in accordance with ASTM E–331. (v) The sequence of tests shall be performed as they are listed above. The Air Infiltration Test may be performed after the Water Resistance Test providing all sealed areas are thoroughly dried.

Subpart F—Thermal Protection

§ 280.501 Scope.

This subpart sets forth the requirements for condensation control, air infiltration, thermal insulation and certification for heating and comfort cooling.

§ 280.502 Definitions.

(a) The following definitions are applicable to Subpart F only:

(1) "Pressure Envelope" means that primary air barrier surrounding the living space which serves to limit air leakage. In construction using ventilated cavities, the pressure envelope is the interior skin.

(2) "Thermal Envelope Area" means the sum of the surface areas of outside walls, ceiling and floor, including all openings. The wall area is measured by multiplying outside wall lengths by the inside wall height from floor to ceiling. The floor and ceiling areas are considered as horizontal surfaces using exterior width and length.

§ 280.503 Materials.

Materials used for insulation shall be of proven effectiveness and adequate durability to assure that required design conditions concerning thermal transmission are attained.

§ 280.504 Condensation control (vapor barriers).

(a) *Ceilings.* Ceilings shall have a vapor barrier having a permeance not greater than 1 perm (dry cup method) installed on the living space side of the roof cavity.

(b) Exterior walls. (1) Exterior walls shall have a vapor barrier not greater than 1 perm (dry cup method) installed on the living space side of the wall, or (2) Unventilated wall cavities shall have an external covering and/or sheathing which forms the pressure envelope. The covering and/or sheathing shall have a combined permeance of not less than 5.0 perms. In the absence of test data, combined permeance may be computed using the formula:

$$P_{Total} = \frac{1}{\frac{1}{P_1} + \frac{1}{P_2}}$$

where P_1 and P_2 are the permeance values of the exterior covering and sheathing in perms.

Formed exterior siding applied in sections with joints not caulked or sealed shall not be considered to restrict water vapor transmission, or (3) Wall cavities shall be constructed so that ventilation is provided to dissipate any condensation occurring in these cavities.

§ 280.505 Air infiltration.

(a) *Envelope air infiltration.* The opaque envelope shall be designed and constructed to limit air infiltration to the living area of the home. Any design, material, method or combination thereof which accomplishes this goal may be used. The goal of the infiltration control criteria is to reduce heat loss/heat gain due to infiltration as much as possible without impinging on health and comfort and within the limits of reasonable economics.

(1) *Envelope penetrations.* Plumbing, mechanical and electrical penetrations of the pressure envelope not exempted by this part, and installations of window and door frames shall be constructed or treated to limit air infiltration. Penetrations of the pressure envelope made by electrical equipment, other than distribution panel boards and cable and conduit penetrations, are exempt from this requirement. Cable penetrations through outlet boxes are considered exempt.

(2) *Joints between major envelope elements.* Joints not designed to limit air infiltration between wall-to-wall, wall-to-ceiling and wall-to-floor connections shall be caulked or otherwise sealed. When walls are constructed to form a pressure envelope on the outside of the wall cavity, they are deemed to meet this requirement.

§ 280.506 Heat loss.

The mobile home heat loss/heat gain shall be determined by methods outlined in §§ 280.508 and 280.509. The outdoor winter design temperature zone for which the mobile home is acceptable and the lowest outdoor temperature to which the installed heating equipment will maintain a temperature of 70 F shall be certified as specified in § 280.510 of this subpart.

(a) Transmission Heat Loss Coefficient. The overall coefficient of heat transmission of the mobile home for the respective zones and an indoor design temperature of 70 F, including internal and external ducts, and excluding infiltration ventilation and condensation control, shall not exceed the B.T.U./(hr.) (sq. ft) (F) of the mobile home envelope area as tabulated below

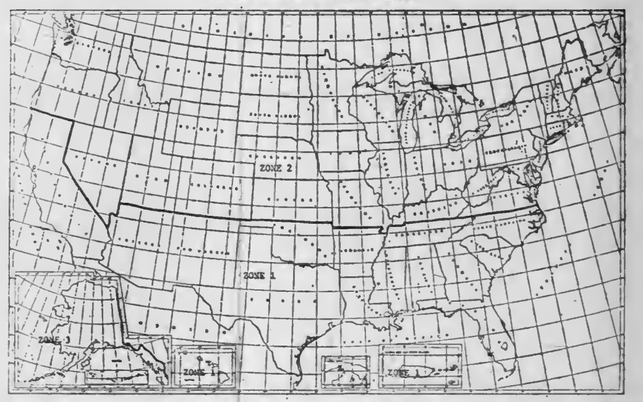
Zone:	*Maximum transmission coefficient*
I	.157 Btu/(hr.) (sq. ft.) (F3
II	.126 Btu/(hr.) (sq. ft.) (F)
III	.104 Btu/(hr.) (sq. ft.) (F)

(b) To assure uniform heat transmission in mobile homes, cavities in exterior walls, floors, and ceilings shall be provided with thermal insulation.

(c) Mobile homes designed for Zones II and III shall be factory equipped with storm windows or insulating glass.

§ 280.507 Comfort heat gain.

Information necessary to calculate the home cooling load shall be provided as specified in this Part.



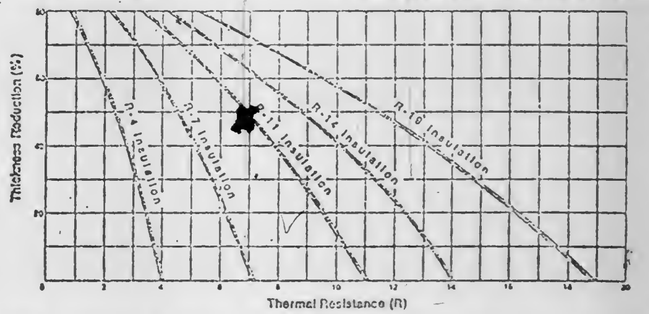
(a) *Transmission heat gains.* Homes complying with this section shall meet the minimum heat loss transmission coefficients specified in § 280.506(a).

§ 280.508 Heat loss, heat gain and cooling load calculations.

Information, values and data necessary for heat loss and heat gain determinations shall be taken from the 1972 ASHRAE Handbook of Fundamentals.

Infiltration and Ventilation—Chapter 19.
Determining "R" & "U" Value—Chapter 20.
Heating Load—Chapter 21.
Cooling Load Calculations—Chapter 22.
Outdoor Winter Design Temperatures (Use 97½ percent values)—Chapter 33.
Outdoor Summer Design Temperatures (Use 2½ percent values)—Chapter 33.

OUTDOOR WINTER DESIGN TEMPERATURE ZONES



§ 280.509 Criteria in absence of specific data.

In the absence of specific data, for purposes of heat-loss/gain calculation, the following criteria shall be used:

(a) *Infiltration Heat Loss.* In the absence of measured infiltration heat loss data, the following formula shall be used to calculate heat loss due to infiltration and intermittently operated fans exhausting to the outdoors. The perimeter calculation shall be based on the dimensions of the pressure envelope.

Infiltration Heat-Loss=0.7 (T) (ft. of perimeter), BTU/hr.

When insulation is installed over the framing members the thermal performance of the insulation is reduced due to compression at the framing members. The Resistance value of the insulation between the framing members is reduced by 12.5 percent for framing members 16'' O.C., 8.5 percent for framing members 24'' O.C., and 4 percent for framing members 48'' O.C.

(d) *Air supply ducts within floor cavity.* Air supply ducts located within a floor cavity shall be assumed to be heating or cooling the floor cavity to living space temperatures unless the duct is structurally isolated by the framing system or thermally insulated from the rest of the floor cavity with a thermal insulation at least equal to R–4.

(e) *Air supply ducts within ceiling cavity.* Where supply ducts are located in ceiling cavities, the influence of the duct on cavity temperatures shall be considered in calculating envelope heat loss or heat gain.

(f) The supply duct loss (and/or heat gain where applicable—See § 280.511) shall be calculated using the actual duct surface area and the actual thickness of insulation between the duct and outside of the mobile home. If there is an air space of at least ½ inch between the duct and the insulation, heat loss/gain need not be calculated if the cavity in which the duct is located is assumed to be at living space temperature. The average temperature inside the supply duct, including ducts installed outside the mobile home, shall be assumed to be 130 F for purposes of calculation of heat loss and 60 F for heat gain.

(g) *Return air cavities.* Cavities used as return air plenums shall be considered to be at living space temperature.

where: T=70 minus the heating system capacity certification temperature stipulated in the Heating Certificate, in F.

(b) *Framing areas.*

Wall	15 percent of wall area less windows and doors.
Floor and Ceiling	10 percent of the area.

(c) *Insulation compression.* Insulation compressed to less than nominal thickness shall have its nominal R-values reduced for that area which is compressed in accordance with the following graph:

§ 280.510 Heat loss certificate.

The mobile home manufacturer shall permanently affix the following "Certificate" to an interior surface of the home that is readily visible to the homeowner. The "Certificate" shall specify the following:

(a) *Heating zone certification.* The design zone at which the mobile home heat loss complies with § 280.506(a).

(b) *Outdoor certification temperature.* The lowest outdoor temperature at which the installed heating equipment will maintain a 70 F temperature inside the home without storm sash or insulating glass for Zone I and with storm sash or insulating glass or Zones II and III and complying with §§ 280.508 and 280.509.

HEATING CERTIFICATE

Home Manufacturer _____
Plant Location _____
Home Model _____
(Include Winter Climate Zone Map)

This mobile home has been thermally insulated to conform with the requirements of the Federal Mobile Home Construction and Safety Standards for all locations within climatic Zone ——.

Heating Equipment Manufacturer _____
Heating Equipment Model _____

The above heating equipment has the capacity to maintain an average 70 F temperature in this home at outdoor temperatures of —— F.

To maximize furnace operating economy, and to conserve energy, it is recommended that this home be installed where the outdoor winter design temperature (97½%) is not higher than —— degrees Fahrenheit.[1]

The above information has been calculated assuming a maximum wind velocity of 15 MPH at standard atmospheric pressure.

§ 280.511 Comfort cooling certificate and information.

(a) The mobile home manufacturer shall permanently affix a "Comfort Cooling Certificate" to an interior surface of the home that is readily visible to the home owner. This certificate may be combined with the heating certificate required in § 280.511. The manufacturer shall comply with one of the following

[1] The temperature to be specified shall be 20 F or 30% of the design temperature difference, whichever is greater, added to the temperature specified as the heating system capacity certification temperature without storm windows or insulating glass for Zone I and with storm windows or insulating glass for Zones II and III. Design temperature difference is 70 minus the heating system capacity certification temperature in degrees Fahrenheit.

V 40 244 DEC 18 75 XUM

three alternatives in providing the certificate and additional information concerning the cooling of the mobile home:

(1) *Alternative 1.* If a central air conditioning system is provided by the home manufacturer, the heat gain calculation necessary to properly size the air conditioning equipment shall be in accordance with procedures outlined in Chapter 22 of the ASHRAE Handbook of Fundamentals, with an assumed location and orientation. The following information shall be supplied on the Comfort Cooling Certificate:

"Air Conditioner Manufacturer----------
Air Conditioner Model----------
Certified Capacity—B.T.U./Hr. in accordance with the appropriate Air Conditioning and Refrigeration Institute Standards.

The central air conditioning system provided with this home has been sized, assuming an orientation of the front (hitch) end of the home facing ---------- and is designed on the basis of a 75 F indoor temperature and an outdoor temperature of —— F dry bulb and —— F wet bulb."

Example Alternate 1

COMFORT COOLING CERTIFICATE

Mobile Home Mfg----------
Plant Location----------
Mobile Home Model----------
Air Conditioner Manufacturer----------
Air Conditioner Model----------

Certified Capacity—B.T.U./Hr. in accordance with the appropriate Air Conditioning and Refrigeration Institute Standards.

The central air conditioning system provided with this home has been sized assuming an orientation of the front (hitch end) of the home facing ----------. On this basis the system is designed to maintain an indoor temperature of 75 F when outdoor temperatures are —— F dry bulb and —— F wet bulb.

The temperature to which this home can be cooled will change depending upon the amount of exposure of the windows of this home to the sun's radiant heat. Therefore, the home's heat gains will vary dependent upon its orientation to the sun and any permanent shading provided. Information concerning the calculation of cooling loads at various locations, window exposures and shadings are provided in Chapter 22 of the 1972 edition of the ASHRAE Handbook of Fundamentals.

Information necessary to calculate cooling loads at various locations and orientations is provided in the special comfort cooling information provided with this mobile home.

(2) *Alternative 2.* For each home suitable for a central air cooling system, the manufacturer shall provide the following statement: "This air distribution system of this home is suitable for the installation of a central air conditioning system."

Example Alternate 2

COMFORT COOLING CERTIFICATE

Mobile Home Manufacturer----------
Plant Location----------
Mobile Home Model----------

This air distribution system of this home is suitable for the installation of central air conditioning.

The supply air distribution system installed in this home is sized for Mobile Home Central Air Conditioning System of up to —— B.T.U./Hr. rated capacity which are certified in accordance with the appropriate Air Conditioning and Refrigeration Institute Standards. When the air circulators of such air conditioners are rated at 0.3 inch water column static pressure or greater for the cooling air delivered to the mobile home supply air duct system.

Information necessary to calculate cooling loads at various locations and orientations is provided in the special comfort cooling information provided with this mobile home.

(3) *Alternative 3.* If the mobile home is not equipped with an air supply duct system, or if the manufacturer elects not to designate the home as being suitable for the installation of a central air conditioning system, the manufacturer shall provide the following statement: "This air distribution system of this home has not been designed in anticipation of its use with a central air conditioning system."

Example Alternate 3

COMFORT COOLING CERTIFICATE

Mobile Home Mfg----------
Plant Location----------
Mobile Home Model----------

The air distribution system of this home has not been designed in anticipation of its use with a central air conditioning system.

(b) For each home designated as suitable for central air conditioning the manufacturer shall provide the maximum central mobile home air conditioning capacity certified in accordance with the appropriate A.R.I. standards and in accordance with § 280.715(a)(3). If the capacity information provided is based on entrances to the air supply duct at other than the furnace plenum, the manufacturer shall indicate the correct supply air entrance and return air exit locations.

(c) *Comfort cooling information.* For each mobile home designated, either "suitable for" or "provided with" a central air conditioning system, the manufacturer shall provide comfort cooling information specific to the mobile home necessary to complete the cooling load calculations. The comfort cooling information shall include a statement to read as follows:

To determine the required capacity of equipment to cool a home efficiently and economically, a cooling load (heat gain) calculation is required. The cooling load is dependent on the orientation, location and the structure of the home. Central air conditioners operate most efficiently and provide the greatest comfort when their capacity closely approximates the calculated cooling load. Each home's air conditioner should be sized in accordance with Chapter 22 of the American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE) Handbooks of Fundamentals, once the location and orientation are known.

Air ducts installed outside the home	"U" ----------

Information necessary to calculate duct area

Subpart G—Plumbing Systems

§ 280.601 Scope.

Subpart G of this Standard covers the plumbing materials, fixtures, and equipment installed within or on mobile homes. It is the intent of this subpart to assure water supply, drain, waste and vent systems which permit satisfactory functioning and provide for health and safety under all conditions of normal use.

§ 280.602 Definitions.

(a) The following definitions are applicable to Subpart G only:

(1) "Accessible," when applied to a fixture, connection, appliance or equipment, means having access thereto, but which may require removal of an access panel or opening of a door.

(2) "Air Gap (Water Distribution System)" means the unobstructed vertical distance through the free atmosphere between the lowest opening from any pipe or faucet supplying water to a tank, plumbing fixture, water supplied appliances, or other device and the flood level rim of the receptacle.

(3) "Anti-Siphon Trap Vent Device" means a device which automatically opens to admit air to a fixture drain above the connection of the trap arm so as to prevent siphonage, and closes tightly when the pressure within the drainage system is equal to or greater than atmospheric pressure so as to prevent the escape of gases from the drainage system into the mobile home.

(4) "Backflow" means the flow of water or other liquids, mixtures, or substances into the distributing pipes of a potable supply of water from any source or sources other than its intended sources.

(5) "Backflow Connection" means any arrangement whereby blackflow can occur.

(6) "Backflow Preventer" means a device or means to prevent backflow.

(7) "Branch" means any part of the piping system other than a riser, main or stack.

(8) "Common Vent" means a vent connecting at the junction of fixture drains and serving as a vent for more than one fixture.

(9) "Continuous Vent" means a vertical vent that is a continuation of the drain to which it connects.

(10) "Continuous Waste" means a drain from two or more fixtures connected to a single trap.

(11) "Critical Level" means a point established by the testing laboratory (usually stamped on the device by the manufacturer) which determines the minimum elevation above the flood level rim of the fixture or receptacle served on which the device may be installed. When a backflow prevention device does not bear a critical level marking, the bottom of the vacuum breaker, combination valve, or of any such approved or listed device shall constitute the critical level.

(12) "Cross Connection" means any physical connection or arrangement between two otherwise separate systems or sources, one of which contains potable water and the other either water, steam,

gas or chemical of unknown or questionable safety whereby there may be a flow from one system or source to the other, the direction of flow depending on the pressure differential between the two systems.

(13) "Developed Length" means that length of pipe measured along the center line of the pipe and fittings.

(14) "Diameter," unless otherwise specifically stated, means the nominal (inside) diameter designated commercially.

(15) "Drain" means a pipe that carries waste, water, or water-borne waste in a drainage system.

(16) "Drain Connector" means the removable extension, consisting of all pipes, fittings and appurtenances, from the drain outlet to the drain inlet serving the mobile home.

(17) "Drain Outlet" means the lowest end of the main or secondary drain to which a sewer connection is made.

(18) "Drainage System" means all piping within or attached to the structure that conveys sewage or other liquid waste to the drain outlet, not including the drain connector.

(19) "Fixture Drain" means the drain from the trap of a fixture to the junction of that drain with any other drain pipe.

(20) "Fixture Supply" means the water supply pipe connecting a fixture to a branch water supply pipe or directly to a main water supply pipe.

(21) "Flood-Level" means the level in the receptacle over which water would overflow to the outside of the receptacle.

(22) "Flooded" means the condition which results when the liquid in a container or receptacle rises to the flood-level.

(23) "Flush Tank" means that portion of a toilet that is designed to contain sufficient water to adequately flush the fixture.

(24) "Flush Valve" means a device located at the bottom of a flush tank for flushing a toilet.

(25) "Flushometer Valve" means a device which discharges a predetermined quantity of water to a fixture for flushing purposes and is closed by direct water pressure.

(26) "Grade" means the fall (slope) of a pipe in reference to a horizontal plane expressed in inches per foot length.

(27) "Horizontal Branch" means any pipe extending laterally, which receives the discharge from one or more fixture drains and connects to the main drain.

(28) "Horizontal Pipe" means any pipe or fitting which makes an angle of not more than 45 degrees with the horizontal.

(29) "Individual Vent" means a pipe installed to vent a fixture drain.

(30) "Inlet Coupling" means the terminal end of the water system to which the water service connection is attached. It may be a swivel fitting or threaded pipe end.

(31) "Main" means the principal artery of the system to which branches may be connected.

(32) "Main Drain" means the lowest pipe of a drainage system which receives sewage from all the fixtures within a mobile home and conducts these wastes to the drain outlet.

(33) "Main Vent" means the principal artery of the venting system to which vent branches may be connected.

(34) "Offset" means a combination of pipe and/or fittings that brings one section of the pipe out of line but into a line parallel with the other section.

(35) "Pitch." See Grade.

(36) "Plumbing Fixtures" means receptacles, devices, or appliances which are supplied with water or which receive liquid or liquid-borne wastes for discharge into the drainage system.

(37) "Plumbing System" means the water supply and distribution pipes; plumbing fixtures, faucets and traps; soil, waste and vent pipes; and water-treating or water-using equipment.

(38) "Primary Vent." See Main Vent.

(39) "Relief Vent" means an auxiliary vent which permits additional circulation of air in or between drainage and vent systems.

(40) "Secondary Vent" means any vent other than the main vent or those serving each toilet.

(41) "Sewage" means any liquid waste containing animal or vegetable matter in suspension or solution, and may include liquids containing chemicals in solution.

(42) "Siphonage" means the loss of water-seal from fixture traps resulting from partial vacuum in the drainage system which may be of either of the following two types, or a combination of the two: (a.) Self-siphonage resulting from vacuum in a fixture drain generated solely by the discharge of the fixture served by that drain, or, (b). Induced siphonage resulting from vacuum in the drainage system generated by the discharge of one or more fixtures other than the one under observation.

(43) "Toilet Drain" means that part of the drainage piping which receives the discharge from each individual toilet.

(44) "Trap" means a fitting or device designed and constructed to provide a liquid seal that will prevent the back passage of air without materially affecting the flow of liquid waste through it.

(45) "Trap Arm" means the portion of a fixture drain between a trap and its vent.

(46) "Trap Seal" means the vertical depth of liquid that a trap will retain.

(47) "Vacuum Breaker." See Backflow Preventer.

(48) "Vent Cap" means the device or fitting which protects the vent pipe from foreign substance with an opening to the atmosphere equal to the area of the vent it serves.

(49) "Vent System" means that part of a piping installation which provides circulation of air within a drainage system.

(50) "Vertical Pipe" means any pipe or fitting which makes an angle of not more than 45 degrees with the vertical.

(51) "Water Connection" means the fitting or point of connection for the mobile-home water distribution system designed for connection to a water supply.

(52) "Water Connector" means the removable extension connecting the mobile home water distribution system to the water supply.

(53) "Water Distribution System" means potable water piping within or permanently attached to the mobile home.

(54) "Wet Vent" means a vent which also serves as a drain for one or more fixtures.

(55) "Wet Vented Drainage System" means the specially designed system of drain piping that also vents one or more plumbing fixtures by means of a common waste and vent pipe.

§ 280.603 General requirements.

(a) *Minimum requirements.* Any plumbing system installed in a mobile home shall conform, at least, with the provisions of this subpart.

(1) *General.* The plumbing system shall be of durable material, free from defective workmanship, and so designed and constructed as to give satisfactory service for a reasonable life expectancy.

(2) *Conservation.* Water closets shall be selected and adjusted to use the minimum quantity of water consistent with proper performance and cleaning.

(3) *Connection to drainage system.* All plumbing, fixtures, drains, appurtenances, and appliances designed or used to receive or discharge liquid waste or sewage shall be connected to the mobile home drainage system in a manner provided by this standard.

(4) *Workmanship.* All design, construction, and workmanship shall be in conformance with accepted engineering practices and shall be of such character as to secure the results sought to be obtained by this standard.

(5) *Components.* Plumbing materials, devices, fixtures, fittings, equipment, appliances, and accessories intended for use in or attached to a mobile home, and not shown in the Table in § 280.604, shall be listed or certified by an approved listing agency, or be specifically approved by the Department when listing by an approved listing agency is not available.

(6) *Prohibited fittings and practices.* (i) Drainage or vent piping shall not be drilled and tapped for the purpose of making connections. (ii) Except as specifically provided elsewhere in this standard, vent pipes shall not be used as waste or drain pipes. (iii) Fittings, connections, devices, or methods of installation that obstruct or retard the flow of sewage, or air in the drainage or venting systems in an amount greater than

V 40 244 DEC 18 75 XUM

the normal frictional resistance to flow shall not be used unless their use is acceptable in this standard or their use is accepted as having a desirable and acceptable function of ultimate benefit to the proper and continued functioning of the plumbing system. (iv) Cracks, holes, or other imperfections in materials shall not be concealed by welding, brazing, or soldering or by paint, wax, tar, or other leak-sealing or repairing agents. (v) Piping, fixtures or equipment shall be located so as not to interfere with the normal use or with the normal operation and use of windows, doors or other required facilities. (vi) Galvanized pipe shall not be bent or welded.

(7) *Alignment of fittings.* All valves, pipes, and fittings shall be installed in correct relationship to the direction of flow.

(b) *Protective requirements.* (1) Cutting structural members. Structural members shall not be unnecessarily or carelessly weakened by cutting or notching.

(2) *Exposed piping.* All piping, pipe threads, hangers, and support exposed to the weather, water, mud, and road hazard, and subject to damage therefrom, shall be painted, coated, wrapped, or otherwise protected from deterioration.

(3) *Road damage.* Pipes, supports, drains, outlets, or drain hoses shall not extend or protrude in a manner where they could be unduly subjected to damage during transit.

(4) *Freezing.* All piping and fixtures subject to freezing temperatures shall be insulated or protected to prevent freezing, under normal occupancy. The manufacturer shall provide: (i) Written installation instructions for the method(s) required for compliance to this section; (ii) a statement in his installation instructions that if heat tape is used it shall be listed for use with mobile homes; (iii) a receptacle outlet conveniently located for the use of a heat tape and in compliance with § 280.806(b).

(5) All piping, except the fixture trap, shall be designed to allow drainage.

(6) *Rodent resistance.* All exterior openings around piping and equipment shall be sealed to resist the entrance of rodents.

(7) Piping and electrical wiring shall not pass through the same holes in walls, floors or roofs. Plastic piping shall not be exposed to heat in excess of manufacturers recommendation or radiation from heat producing appliances.

§ 280.604 Materials.

(a) *Minimum standards.* Materials, fixtures, or devices used or entering into the construction of plumbing systems in any mobile home shall be free from defects and shall conform to approved standards or to applicable standards in the following Table.

(b) *Specific usage.* Each of the sections following the Table indicates specifically the type of material presently permitted for use in the various parts of the plumbing system.

Materials	ANSI	ASTM	FS	Other standards
Ferrous pipe and fittings				
Cast iron screwed fittings	B16.4—1971			
Malleable iron screwed fittings	B16.3—1971			
Special cast iron fittings				IAPMO PS 5—1966
Welded wrought iron pipe	B36.2—1969	A72—1968

[1] With addenda.

§ 280.605 Joints and connections.

(a) *Tightness.* Joints and connections in the plumbing system shall be gastight and watertight for the pressures required under testing procedures.

(1) *Assembling of pipe.* All joints and connections shall be correctly assembled for tightness. Pipe threads shall be fully engaged with the threads of the fitting. Plastic pipe and copper tubing shall be inserted to the full depth of the solder cup or welding sockets of each fitting. Pipe threads and slip joints shall not be wrapped with string, paper, putty, or similar fillers.

(2) *Threaded joints.* Threads for screw pipe and fittings shall conform to the approved or listed standard. Pipe ends shall be reamed out to size of bore. All burrs, chips, cutting oil and foreign matter shall be removed. Pipe joint cement or thread lubricant shall be of approved type and applied to male threads only.

(3) *Solder joints.* Solder joints for tubing shall be made with approved or listed solder type fittings. Surfaces to be soldered shall be cleaned bright. The joints shall be properly fluxed with noncorrosive paste type flux and made with approved or listed 50–50 solder or an approved solder having a higher melting temperature.

(4) *Plastic pipe, fittings and joints.* Plastic pipe and fittings shall be joined by installation methods recommended by the manufacturer or in accordance with the provisions of a recognized, approved, or listed standard.

(5) *Union joints.* Metal unions in water piping shall have metal-to-metal ground seats.

(6) *Flared joints.* Flared joints for soft-copper water tubing shall be made with approved or listed fittings. The tubing shall be expanded with a proper flaring tool.

(7) *Cast iron soil pipe joints.* Approved or listed cast iron pipe may be joined as follows: (i) Approved or listed hubless pipe as per the manufacturer's recommendation. (ii) Hub and plain-end soil pipe may be joined by compression fittings per the manufacturer's recommendation.

§ 280.606 Traps and cleanouts.

(a) *Traps*—(1) *Traps required.* Each plumbing fixture, except listed toilets, shall be separately trapped by approved water seal "P" traps. All traps shall be effectively vented.

(2) *Dual fixtures.* A two-compartment sink, two single sinks, two lavatories, or a single sink and a single lavatory with waste outlets not more than 30 inches apart and in the same room and flood level rims at the same level may be connected to one "P" trap and may be considered as a single fixture for the purpose of drainage and vent requirements.

(3) *Prohibited traps.* A trap which depends for its seal upon concealed interior partitions shall not be used. Full "S" traps, bell traps, drum traps, crown-vented traps, and running traps are prohibited. Fixtures shall not be double-trapped.

(4) *Material and design.* Each trap shall be self-cleaning with a smooth and uniform interior waterway. Traps shall be manufactured of cast iron, cast brass, or drawn brass tubing of not less than No. 20 Brown and Sharpe gage, or approved or listed plastic, or other approved or listed material. Union joints for a trap shall be beaded to provide a shoulder for the union nut. Each trap shall have the manufacturer's name stamped or cast in the body of the trap, and each tubing trap shall show the gage of the tubing.

(5) *Trap seal.* Each "P" trap shall have a water seal of not less than 2 inches and not more than 4 inches and shall be set true to its seal.

(6) *Size.* Traps shall be not less than 1¼ inches in diameter. A trap shall not be larger than the waste pipe to which it is connected.

(7) *Location.* Each trap shall be located as close to its vent and to its fixture outlet as structural conditions will permit.

(8) *Length of tailpiece.* The vertical distance from a trap to the fixture outlet shall not exceed 24 inches.

(9) *Installation.* (i) *Grade of trap arm.* The piping between a "P" trap and the fixture tee or the vented waste line shall be graded ¼ inch per foot towards the vent and in no event shall have a slope greater than its diameter. The vent opening at fixture tees shall not be below the weir of the "P" trap outlet. (ii) *Trap arm offset.* The piping between the "P" trap and vent may change direction or be offset horizontally with the equivalent of no more than 180 degrees total change in direction with a maximum of 90 degrees by any one fitting. (iii) *Concealed traps.* Traps with mechanical joints shall be accessible for repair and inspection. (iv) *Removability of Traps, Etc.* Traps shall be designed and installed so the "U" bend is removable without removing the strainers from the fixture. Continuous waste and tail pieces which are permanently attached to the "U" bend shall also be removable without removing the strainer from the fixture.

(b) *Cleanout openings*—(1) *Location of cleanout fittings.* (i) Cleanouts shall be installed if the drainage system cannot be cleaned through fixtures, drains, or vents. Cleanouts shall also be provided when fittings of more than 45 degrees are used to affect an offset except where long turn ells are used which provide sufficient "sweep" for cleaning. (ii) A full size cleanout shall be installed at the upper end of any section of drain piping which does not have the required minimum slope of ¼ inch per foot grade. (iii) A clearing tool shall not be required to pass through more than 360 degrees of fittings, excluding removable "P" traps, to reach any part of the drainage system.

(2) *Access to cleanouts.* Cleanouts shall be accessible through an unobstructed minimum clearance of 12 inches directly in front of the opening. Each cleanout fitting shall open in a direction opposite to the flow or at right angles to the pipe. Concealed cleanouts that are not provided with access covers shall be extended to a point above the floor or outside of the mobile home, with pipe and fittings installed, as required, for drainage piping without sags and pockets.

(3) *Material.* Plugs and caps shall be brass or approved or listed plastic, with screw pipe threads.

(4) *Design.* Cleanout plugs shall have raised heads except that plugs at floor level shall have counter-sunk slots.

§ 280.607 Plumbing fixtures.

(a) *General requirements*—(1) *Quality of fixtures.* Plumbing fixtures shall have smooth impervious surfaces, be free from defects and concealed fouling surfaces, be capable of resisting road shock and vibration, and shall conform in quality and design to listed standards. Fixtures shall be permanently marked with the manufacturer's name.

(2) *Strainers.* The waste outlet of all plumbing fixtures, other than toilets, shall be equipped with a drain fitting that will provide an adequate unobstructed waterway.

(3) *Fixture connections.* Fixture tailpieces and continuous wastes in exposed or accessible locations shall be not less than No. 20 Brown and Sharpe gage seamless drawn-brass tubing or other approved pipe or tubing materials. Inaccessible fixture connections shall be constructed according to the requirements for drainage piping. Each fixture tailpiece, continuous waste, or waste and overflow shall be not less than 1½ inches for sinks of two or more compartments, dishwashers, clothes washing machines, laundry tubs, bath tubs, and not less than 1¼ inches for lavatories and single compartment sinks having a 2 inch maximum drain opening.

(4) *Concealed connections.* Concealed slip joint connections shall be provided with adequately sized unobstructed access panels and shall be accessible for inspection and repair.

(5) *Directional fitting.* An approved or listed "Y" or other directional-type branch fitting shall be installed in every tailpiece or continuous waste that receives the discharge from food waste disposal units, dishwashing, or other force-discharge fixture or appliance. (See also § 280.607(b)(4)(ii))

(b) *Fixtures.* (1) *Spacing.* All plumbing fixtures shall be so installed with regard to spacing as to be reasonably accessible for their intended use.

(2) *Toilets.* (i) Toilets shall be designed and manufactured according to approved or listed standards and shall be equipped with a water flushing device capable of adequately flushing and cleaning the bowl at each operation of the flushing mechanism. (ii) Toilet flushing devices shall be designed to replace the water seal in the bowl after each operation. Flush valves, flushometer valves, and ball cocks shall operate automatically to shut off at the end of each flush or when the tank is filled to operating capacity. (iii) Flush tanks shall be fitted with an overflow pipe large enough to prevent flooding at the maximum flow rate of the ball cock. Overflow pipes shall discharge into the toilet, through the tank. (iv) Toilets

V 40 244 DEC 18 75 XUM

immersed in the hottest water within the manufacturer or in accordance with pro- listed plastic, cast iron, or other listed

that have fouling surfaces that are not thoroughly washed at each discharge shall be prohibited. Any toilet that might permit the contents of the bowl to be siphoned back into the water system shall be prohibited. (v) Floor connection. Toilets shall be securely bolted to an approved flange or other approved fitting which is secured to the floor by means of corrosion-resistant screws. The bolts shall be of solid brass or other corrosion-resistant material and shall be not less than ¼ inch in diameter. A watertight seal shall be made between the toilet and flange or other approved fitting by use of a gasket or sealing compound.

(3) *Shower compartment.* (i) Each compartment stall shall be provided with an approved watertight receptor with sides and back extending at least 1 inch above the finished dam or threshold. In no case shall the depth of a shower receptor be less than 2 inches or more than 9 inches measured from the top of the finished dam or threshold to the top of the drain. The wall area shall be constructed of smooth, noncorrosive, and nonabsorbent waterproof materials to a height not less than 6 feet above the bathroom floor level. Such walls shall form a watertight joint with each other and with the bathtub, receptor or shower floor. The floor of the compartment shall slope uniformly to the drain at not less than one-fourth nor more than one-half inch per foot. (ii) The joint around the drain connection shall be made watertight by a flange, clamping ring, or other approved listed means. (iii) Shower doors and tub and shower enclosures shall be constructed so as to be waterproof and, if glazed, glazing shall comply with the Standard for Transparent Safety Glazing Material used in Buildings (ANSI Z97.1–1972). (iv) Prefabricated plumbing fixtures shall be approved or listed.

(4) *Dishwashing machines.* (i) Dishwashing machine shall not be directly connected to any waste piping, but shall discharge its waste through a fixed air gap installed above the machine. The drain connection from the air gap may connect to an individual trap, to a directional fitting installed in the sink tailpiece, or to the opening provided on the inlet side of a food waste disposal unit. (ii) Drain from a dishwashing machine shall not be connected to a sink tailpiece, continuous waste line, or trap on the discharge side of a food waste disposal unit.

(5) *Clothes washing machines.* (i) Clothes washing machines shall drain either into a properly vented trap, into a laundry tub tailpiece with watertight connections, into an open standpipe receptor, or over the rim of a laundry tub. (ii) Standpipes shall be 1½ inches minimum nominal iron pipe size, 1½ inches diameter nominal brass tubing not less than No. 20 Brown and Sharpe gage, or 1½ inches approved plastic materials. Receptors shall discharge into a vented trap or shall be connected to a laundry tub tailpiece by means of an approved or listed directional fitting. Each standpipe shall extend not less than 18 inches or more than 30 inches above its trap and shall terminate in an accessible location no lower than the top of clothes washing machine. A removable tightfitting cap or plug shall be installed on the standpipe when clothes washer is not provided. (iii) Clothes washing machine drain shall not be connected to the tailpiece, continuous waste, or trap of any sink or dishwashing machine.

(c) *Installation.* (1) *Access.* Each plumbing fixture and standpipe receptor shall be located and installed in a manner to be accessible for usage, cleaning, repair and replacement.

(2) *Alignment.* Fixtures shall be set level and in true alignment with adjacent walls. Where practical, piping from fixtures shall extend to nearest wall.

(3) *Brackets.* Wall-hung fixtures shall be rigidly attached to walls by metal brackets or supports without any strain being transmitted to the piping connections. Flush tanks shall be securely fastened to toilets or to the wall with corrosive-resistant materials.

(4) *Tub supports.* Bathtub rims at wall shall be supported on meal hangers or on end-grain wood blocking attached to the wall unless otherwise recommended by the manufacturer of the tub.

§ 280.608 Hangers and supports.

(a) *Strains and stresses.* Piping in a plumbing system shall be installed without undue strains and stresses, and provision shall be made for expansion, contraction, and structural settlement.

(b) *Piping supports.* Piping shall be secured at sufficiently close intervals to keep the pipe in alignment and carry the weight of the pipe and contents. Unless otherwise stated in the standards for specific materials shown in the Table in § 280.604(a), or unless specified by the pipe manufacturer, plastic drainage piping shall be supported at intervals not to exceed 4 feet and plastic water piping shall be supported at intervals not to exceed 3 feet.

(c) *Hangers and anchors.* (1) Hangers and anchors shall be of sufficient strength to support their proportional share of the pipe alignments and prevent rattling.

(2) Piping shall be securely attached to the structure by hangers, clamps, or brackets which provide protection against motion, vibration, road shock, or torque in the chassis.

(3) Hangers and straps supporting plastic pipe shall not compress, distort, cut or abrade the piping and shall allow free movement of the pipe.

§ 280.609 Water distribution system.

(a) *Water supply.* (1) *Supply piping.* Piping systems shall be sized to provide an adequate quantity of water to each plumbing fixture at a flow rate sufficient to keep the fixture in a clean and sanitary condition without any danger of backflow or siphonage (See Table in § 280.609(f)(1)). The manufacturer shall include in his written installation instructions that the mobile home has been designed for an inlet water pressure of 80 psi, and a statement that when the mobile home is to be installed in areas where the water pressure exceeds 80 psi, a pressure reducing valve should be installed.

(2) *Hot water supply.* Each mobile home equipped with a kitchen sink, and bathtub and/or shower shall be provided with a hot water supply system including a listed water heater.

(b) *Water outlets and supply connections.* (1) *Water connection.* Each mobile home with a water distribution system shall be equipped with a ¾-inch threaded inlet connection located within the rear half of the length of the mobile home. This connection shall be tagged or marked "Fresh Water Connection" (or "Fresh Water Fill"). A matching cap or plug shall be provided to seal the water inlet when it is not in use, and shall be permanently attached to the mobile home or water supply piping. When a master cold water shutoff full flow valve is not installed on the main feeder line in an accessible location, the manufacturer's installation instructions shall indicate that such a valve is to be installed in the water supply line adjacent to the home. When a mobile home includes expandable rooms or is composed of two or more units, fittings or connectors designed for such purpose shall be provided to connect any water piping. When not connected, the water piping shall be protected by means of matching threaded caps or plugs.

(2) *Prohibited connections.* (i) The installation of potable water supply piping or fixture or appliance connections shall be made in a manner to preclude the possibility of backflow. (ii) No part of the water system shall be connected to any drainage or vent piping.

(3) *Rim outlets.* The outlets of faucets, spouts, and similar devices shall be spaced at least 1 inch above the flood level of the fixture.

(4) *Appliance connections.* Water supplies connected to clothes washing or dishwashing machines shall be protected by an approved or listed fixed air gap provided within the appliance by the manufacturer.

(5) *Flushometer valves or manually operated flush valves.* An approved or listed vacuum breaker shall be installed and maintained in the water supply line on the discharge side of a toilet flushometer valve or manually operated flush valve. Vacuum breakers shall have a minimum clearance of 6 inches above the flood level of the fixture to the critical level mark unless otherwise permitted in their approval.

(6) *Flush tanks.* Toilet flush tanks shall be equipped with an approved or listed anti-siphon ball cock which shall be installed and maintained with its outlet or critical level mark not less than 1 inch above the full opening of the overflow pipe.

(c) *Water heater safety devices.* (1) *Relief valves.* (i) All water heaters shall be installed with approved and listed fully automatic valve or valves designed to provide temperature and pressure relief. (ii) Any temperature relief valve or combined pressure and temperature relief valve installed for this purpose shall have the temperature sensing element

immersed in the hottest water within the upper 6 inches of the tank. It shall be set to start relieving at a pressure of 150 psi or the rated working pressure of the tank whichever is lower and at or below a water temperature of 210° F. (iii) Relief valves shall be provided with full-sized drains, with cross sectional areas equivalent to that of the relief valve outlet, which shall be directed downward and discharge beneath the mobile home. Drain lines shall be of a material listed for hot water distribution and shall drain fully by gravity, shall not be trapped, and shall not have their outlets threaded, and the end of the drain shall be visible for inspection.

(d) *Materials.* (1) Piping material. Water pipe shall be of standard weight brass, galvanized wrought iron, galvanized steel, Type K, L or M copper tubing, approved or listed plastic or other approved or listed material. (i) Plastic Piping. All plastic water piping and fittings in mobile homes must be approved or listed for use with hot water.

(2) *Fittings.* Appropriate fittings shall be used for all changes in size and where pipes are joined. The material and design of fittings shall conform to the type of piping used. Special consideration shall be given to prevent corrosion when dissimilar metals are joined. (i) Fittings for screw piping shall be standard weight galvanized iron for galvanized iron and steel pipe, and of brass for brass piping. They shall be installed where required for change in direction, reduction of size, or where pipes are joined together. (ii) Fittings for copper tubing shall be cast brass or drawn copper (sweat-soldered) or shall be approved or listed fittings for the purpose intended.

(3) *Prohibited material.* Used piping materials shall not be permitted. Those pipe dopes, solder fluxes, oils, solvents, chemicals, or other substances that are toxic, corrosive, or otherwise detrimental to the water system shall not be used.

(e) *Installation of piping.* (1) *Minimum requirement.* All piping equipment, appurtenances, and devices shall be installed in workmanlike manner and shall conform with the provisions and intent of this standard.

(2) *Screw pipe.* Iron pipe-size brass or galvanized iron or steel pipe fittings shall be joined with approved or listed standard pipe threads fully engaged in the fittings. Pipe ends shall be reamed to the full bore of the pipe. Pipe-joint compound shall be insoluble in water, shall be nontoxic and shall be applied to male threads only.

(3) *Solder fittings.* Joints in copper water tube shall be made by the appropriate use of approved cast brass or wrought copper fittings, properly soldered together. The surface to be soldered shall be thoroughly cleaned bright mechanically. The joints shall be properly fluxed and made with approved solder.

(4) *Flared fittings.* A flaring tool shall be used to shape the ends of flared tubing to match the flare of fittings.

(5) *Plastic pipe and fittings.* Plastic pipe and fittings shall be joined by installation methods recommended by the manufacturer or in accordance with provisions of a listed standard.

(f) *Size of water supply piping.*—(1) *Minimum size.* The size of water supply piping and branch lines shall not be less than sizes shown in the following Table:

Minimum size tubing and pipe for water distribution systems

Number of fixtures	Tubing (nominal) Diameter (inches)	Tubing (nominal) Outer diameter (inches)	Pipe iron pipe size (inches)
1	*¾	⅝	¼
2	⅝	⅞	⅜
3	⅞	1⅛	½
4	1⅛	1⅜	¾
5 or more	¾	⅞	¾

* 6 ft maximum length.

Exceptions to table: ⅜ inch nominal diameter or ½ inch OD minimum size for clothes washing or dishwashing machines, unless larger size is recommended by the fixture manufacturer. ½ inch nominal diameter or ⅝ inch OD minimum size for flushometer or metering type valves unless otherwise specified in their listing. No galvanized screw piping shall be less than ½ inch iron pipe size.

(2) *Sizing procedure.* Both hot and cold water piping systems shall be computed by the following method: (i) *Size of branch.* Start at the most remote outlet on any branch of the hot or cold water piping and progressively count towards the water service connection, computing the total number of fixtures supplied along each section of piping. Where branches are joined together, the number of fixtures on each branch shall be totalled so that no fixture is counted twice. Following down the left-hand column of the preceding Table a corresponding number of fixtures will be found. The required pipe or tubing size is indicated in the other columns on the same line. (ii) A water heater, food waste disposal unit, evaporative cooler or ice maker shall not be counted as a water-using fixture when computing pipe sizes.

(g) *Line valves.* Valves, when installed in the water supply distribution system (except those immediately controlling one fixture supply) and when fully opened, shall have a cross-sectional area of the smallest orifice or opening, through which the water flows, at least equal to the cross-sectional area of the nominal size of the pipe in which the valve is installed.

§ 280.610 Drainage systems.

(a) *General.* (1) Each fixture directly connected to the drainage system shall be installed with a water seal trap (§ 280.606(a)).

(2) The drainage system shall be designed to provide an adequate circulation of air in all piping with no danger of siphonage, aspiration, or forcing of trap seals under conditions of ordinary use.

(b) *Materials*—(1) *Pipe.* Drainage piping shall be standard weight steel, wrought iron, brass, copper tube DWV, listed plastic, cast iron, or other listed or approved materials.

(2) *Fittings.* Drainage fittings shall be recessed drainage pattern with smooth interior waterways of the same diameter as the piping and shall be of a material conforming to the type of piping used. Drainage fittings shall be designed to provide for a ¼ inch per foot grade in horizontal piping. (i) Fittings for screw pipe shall be cast iron, malleable iron, brass, or listed plastic with standard pipe threads. (ii) Fittings for copper tubing shall be cast brass or wrought copper. (iii) Socket-type fittings for plastic piping shall comply with listed standards. (iv) Brass or bronze adaptor or wrought copper fittings shall be used to join copper tubing to threaded pipe.

(c) *Drain outlets*—(1) *Location of drain.* Each mobile home shall have only one drain outlet which shall terminate in the rear half section.

(2) *Clearance from drain outlet.* The drain outlet shall be provided with a minimum clearance of 3 inches in any direction from all parts of the structure or appurtenances and with not less than 18 inches unrestricted clearance directly in front of the drain outlet.

(3) *Drain connector.* The drain connector shall not be smaller than the piping to which it is connected and shall be equipped with a water-tight cap or plug matching the drain outlet. The cap or plug shall be permanently attached to the mobile home or drain outlet.

(4) The drain outlet and drain connector shall not be less than 3 inches inside diameter.

(5) Preassembly of drain lines. Drain lines, provided by the manufacturer, located under the mobile home, designed to bring the drain system to one distribution point and which may be damaged in transit, must be designed for proper site assembly.

(d) *Fixture connections.* Drainage piping shall be provided with approved or listed inlet fittings for fixture connections, correctly located according to the size and type of fixture to be connected.

(1) *Toilet connection.* The drain connection for each toilet shall be 3 inches minimum inside diameter and shall be fitted with an iron, brass, or listed plastic floor flange adaptor ring securely screwed, soldered or otherwise permanently attached to the drain piping, in an approved manner and securely fastened to the floor.

(e) *Size of drainage piping*—(1) *Fixture load.* Except as provided by § 280.611 (d)(2), drain pipe sizes shall be determined by the type of fixture and the total number connected to each drain. (i) A 1½ inch minimum diameter piping shall be required for one and not more than three individually vented fixtures. (ii) A 2-inch minimum diameter piping shall be required for four or more fixtures individually vented. (iii) A 3-inch minimum diameter piping shall be required for toilets.

(f) *Wet-vented drainage system.* Plumbing fixture traps may connect into a wet-vented drainage system which shall be designed and installed to accom-

modate the passage of air and waste in the same pipe.

(1) *Horizontal piping.* All parts of a wet-vented drainage system, including the connected fixture drains, shall be horizontal except for wet-vented vertical risers which shall terminate with a 1½ inch minimum diameter continuous vent. Where required by structural design, wet-vented drain piping may be offset vertically when other vented fixture drains or relief vents are connected to the drain piping at or below the vertical offsets.

(2) *Size.* A wet-vented drain pipe shall be 2 inches minimum diameter and at least one pipe size larger than the largest connected trap or fixture drain. Not more than three fixtures may connect to a 2-inch diameter wet-vented drain system.

(3) *Length of trap arm.* Fixture traps shall be located within the distance given in § 280.611(c)(5). Not more than one trap shall connect to a trap arm.

(g) *Offsets and branch fittings*—(1) *Changes in direction.* Changes in direction of drainage piping shall be made by the appropriate use of approved or listed fittings, and shall be of the following angles: 11¼, 22½, 45, 60, or 90 degrees; or other approved or listed fittings or combination of fittings with equivalent radius or sweep.

(2) *Horizontal to vertical.* Horizontal drainage lines, connecting with a vertical pipe shall enter through 45-degree "Y" branches, 60-degree "Y" branches, long-turn "TY" branches, sanitary "T" branches, or other approved or listed fittings or combination of fittings having equivalent sweep. Fittings having more than one branch at the same level shall not be used, unless the fitting is constructed so that the discharge from any one branch cannot readily enter any other branch. However, a double sanitary "T" may be used when the drain line is increased not less than two pipe sizes.

(3) *Horizontal to horizontal and vertical to horizontal.* Horizontal drainage lines connecting with other horizontal drainage lines or vertical drainage lines connected with horizontal drainage lines shall enter through 45-degree "Y" branches, long-turn "TY" branches, or other approved or listed fittings or combination of fittings having equivalent sweep.

(h) Grade of Horizontal Drainage Piping. Except for fixture connections on the inlet side of the trap, horizontal drainage piping shall be run in practical alignment and have a uniform grade of not less than ¼ inch per foot toward the mobile home drain outlet. Where it is impractical, due to the structural features or arrangement of any mobile home, to obtain a grade of ¼ inch per foot, the pipe or piping may have a grade of not less than ⅛ inch per foot, when a full size cleanout is installed at the upper end.

§ 280.611 Vents and venting.

(a) *General.* Each plumbing fixture trap shall be protected against siphonage and back pressure, and air circulation shall be ensured throughout all parts of the drainage system by means of vents installed in accordance with the requirements of this section and as otherwise required by this standard.

(b) *Materials*—(1) *Pipe.* Vent piping shall be standard weight steel, wrought iron, brass, copper tube DWV, listed plastic, cast iron or other approved or listed materials.

(2) *Fittings.* Appropriate fittings shall be used for all changes in direction or size and where pipes are joined. The material and design of vent fittings shall conform to the type of piping used. (i) Fittings for screw pipe shall be cast iron, malleable iron, plastic, or brass, with standard pipe threads. (ii) Fittings for copper tubing shall be cast brass or wrought copper. (iii) Fittings for plastic piping shall be made to approved applicable standards. (iv) Brass adaptor fittings or wrought copper shall be used to join copper tubing to threaded pipe. (v) Listed rectangular tubing may be used for vent piping only providing it has an open cross section at least equal to the circular vent pipe required. Listed transition fittings shall be used.

(c) *Size of vent piping*—(1) *Main vent.* The drain piping for each toilet shall be vented by a 1½ inch minimum diameter vent or rectangular vent of venting cross section equivalent to or greater than the venting cross section of a 1½ inch diameter vent, connected to the main drain by one of the following methods: (i) A 1½ inch diameter (min.) individual vent pipe or equivalent directly connected to the toilet drain within the distance allowed in § 280.611(c)(5), for 3-inch trap arms undiminished in size through the roof, (ii) A 1½ inch diameter (min.) continuous vent, or equivalent, indirectly connected to the toilet drain piping through a 2-inch wet-vented drain that carries the waste of not more than one fixture, or, (iii) Two or more vented drains when at least one is wet-vented, or 2-inch diameter (minimum), and each drain is separately connected to the main drain. At least one of the drains shall connect downstream from the toilet within the distance allowed in § 280.611(c)(5) for 3-inch trap arms.

(2) *Individual Vents.* Each individually vented fixture with a 1½ inch or smaller trap shall be provided with a vent pipe equivalent in area to a 1¼ inch nominal pipe size. The main vent, toilet vent and relief vent, and the continuous vent of wet-vented systems shall have an area equivalent to 1½ inch nominal pipe size.

(3) *Common Vent.* When two fixture traps located within the distance allowed from their vent have their trap arms connected separately at the same level into an approved double fitting, an individual vent pipe may serve as a common vent without any increase in size.

(4) *Intersecting Vents.* Where two or more vent pipes are joined together, no increase in size shall be required; however, the largest vent pipe shall extend full size through the roof.

(5) Distance of fixture trap from vent shall not exceed the values given in the following Table:

Maximum Distance of Fixtures From Vent Trap

Size of fixture drain (inches)	*Distance trap to vent*
1¼	4 ft. 6 in.
1½	4 ft 6 in.
2	5 ft.
3	6 ft.

(d) *Anti-siphon trap vent.* An anti-siphon trap vent may be used as a secondary vent system for plumbing fixtures protected by traps not larger than 1½ inches, when installed in accordance with the manufacturers' recommendations and the following conditions: (i) Not more than two fixtures individually protected by the device shall be drained by a common 1½ inch drain. (ii) Minimum drain size for three or more fixtures individually protected by the device shall be 2 inches. (iii) A primary vent stack must be installed to vent the main drain at the point of heaviest drainage fixture unit loading. (iv) The device shall be installed in a location that permits a free flow of air and shall be accessible for inspection, maintenance, and replacement and the sealing function shall be at least 6 inches above the top of the trap arm. (v) Materials for the anti-siphon trap vent shall be as follows: cap and housing shall be listed acrylonitrile-butadiene styrene, DWV grade; stem shall be DWV grade nylon or acetal; spring shall be stainless steel wire, type 302; sealing disc shall be neoprene, conforming to ASTM C 564–70, or, silicone rubber, low and high temperature and tear resistant, conforming to F.S. ZZ–R–765B and MIL–L–10547.

(e) *Grade and connections*—(1) *Horizontal vents.* Each vent shall extend vertically from its fixture "T" or point of connection with the waste piping to a point not less than 6 inches above the extreme flood level of the fixture it is venting before offsetting horizontally or being connected with any other vent pipe. Vents for horizontal drains shall connect above the centerline of the drain piping ahead (downstream) of the trap. Where required by structural conditions, vent piping may offset below the rim of the fixture at the maximum angle or height possible.

(f) *Vent terminal.*—(1) *Roof extension.* Each vent pipe shall extend through its flashing and terminate vertically, undiminished in size, not less than 2 inches above the roof. Vent openings shall not be less than 3 feet away from any motor-driven air intake that opens into habitable areas.

(2) *Flashing.* The opening around each vent pipe shall be made watertight by an adequate flashing or flashing material.

(g) *Vent caps.* Vent caps, if provided, shall be of the removable type (without removing the flashing from the roof). When vent caps are used for roof space ventilation and the caps are identical to vent caps used for the plumbing system,

plumbing system caps shall be identified with permanent markings.

§ 280.612 Test and inspection.

(a) *Water system.* All water piping in the water distribution system shall be subjected to a pressure test. The test shall be made by subjecting the system to air or water at 10 psi for 15 minutes without loss of pressure.

(b) *Drainage and vent system and plumbing fixtures.* The waste and vent system shall be tested by one of the three following alternate methods for evidence or indication of leakage:

(1) *Water test.* Before plumbing fixtures are connected, all of the openings into the piping shall be plugged and the entire piping system subjected to a static water test for 15 minutes by filling it with water to the top of the highest vent opening. There shall be no evidence of leakage.

(2) *Air test.* After all fixtures have been installed, the traps filled with water, and the remaining openings securely plugged, the entire system shall be subjected to a 2-inch (manometer) water column air pressure test. If the system loses pressure, leaks may be located with smoke pumped into the system, or with soap suds spread on the exterior of the piping (Bubble test).

(3) *Flood level test.* The mobile home shall be in a level position, all fixtures shall be connected, and the entire system shall be filled with water to the rim of the toilet bowl. (Tub and shower drains shall be plugged). After all trapped air has been released, the test shall be sustained for not less than 15 minutes without evidence of leaks. Then the system shall be unplugged and emptied. The waste piping above the level of the toilet bowl shall then be tested and show no indication of leakage when the high fixtures are filled with water and emptied simultaneously to obtain the maximum possible flow in the drain piping.

(c) *Fixture test.* The plumbing fixtures and connections shall be subjected to a flow test by filling them with water and checking for leaks and retarded flow while they are being emptied.

(d) *Shower compartments.* Shower compartments and receptors shall be tested for leaks prior to being covered by finish material. Each pan shall be filled with water to the top of the dam for not less than 15 minutes.

Subpart H—Heating, Cooling and Fuel Burning Systems

§ 280.701 Scope.

Subpart H of this standard covers the heating, cooling and fuel burning equipment installed within, on, or external to a mobile home.

§ 280.702 Definitions.

(a) The definitions in this subpart apply to Subpart H only.

(1) "Accessible," when applied to a fixture, connection, appliance or equipment, means having access thereto, but which may require the removal of an access panel, door or similar obstruction.

(2) "Air Conditioner Blower Coil System" means a comfort cooling appliance where the condenser section is placed external to the mobile home and evaporator section with circulating blower attached to the mobile home air supply duct system. Provision must be made for a return air system to the evaporator/blower section. Refrigerant connection between the two parts of the system is accomplished by tubing.

(3) "Air Conditioner Split System" means a comfort cooling appliance where the condenser section is placed external to the mobile home and the evaporator section incorporated into the heating appliance or with a separate blower/coil section within the mobile home. Refrigerant connection between the two parts of the system is accomplished by tubing.

(4) "Air Conditioning Condenser Section" means that portion of a refrigerated air cooling or (in the case of a heat pump) heating system which includes the refrigerant pump (compressor) and the external heat exchanger.

(5) "Air Conditioning Evaporator Section" means a heat exchanger used to cool or (in the case of a heat pump) heat air for use in comfort cooling (or heating) the living space.

(6) "Air Conditioning Self Contained System" means a comfort cooling appliance combining the condenser section, evaporator and air circulating blower into one unit with connecting ducts for the supply and return air systems.

(7) "Air Duct" means conduits or passageways for conveying air to or from heating, cooling, air conditioning or ventilation equipment, but not including the plenum.

(8) "Automatic Pump (Oil Lifter)" means a pump, not an integral part of the oil-burning appliance, that automatically pumps oil from the supply tank and delivers the oil under a constant head to an oil-burning appliance.

(9) "Btu. British Thermal Units" means the quantity of heat required to raise the temperature of one pound of water one degree Fahrenheit.

(10) "Btuh" means British thermal units per hour.

(11) "Burner" means a device for the final conveyance of fuel or a mixture of fuel and air to the combustion zone.

(12) "Central Air Conditioning System" means either an air conditioning split system or an external combination heating/cooling system.

(13) "Class 0 Air Ducts" means ducts of materials and connectors having a fire-hazard classification of zero.

(14) "Class 1 Air Ducts" means ducts of materials and connectors having a flame-spread rating of not over 25 without evidence of continued progressive combustion and a smoke-developed rating of not over 50.

(15) "Class 2 Air Ducts" means ducts of materials and connectors having a flame-spread rating of not over 50 without evidence of continued progressive combustion and a smoke-developed rating of not over 50 for the inside surface and not over 100 for the outside surface.

(16) "Clearance" means the distance between the appliance, chimney, vent, chimney or vent connector or plenum and the nearest surface.

(17) "Connector—Gas Appliance" means a flexible or semi-rigid connector listed as conforming to ANSI Standard Z21.24, Metal Connectors for Gas Appliance, used to convey fuel gas, three feet or less in length (six feet or less for gas ranges), between a gas outlet and a gas appliance in the same room with the outlet.

(18) "Energy Efficiency Ratio (EER)" means the ratio of the cooling capacity output of an air conditioner for each unit of power input.

$$EER = \frac{\text{Capacity (Btuh)}}{\text{Power input (watts)}}$$

(19) "External Combination Heating/Cooling System" means a comfort conditioning system placed external to the mobile home with connecting ducts to the mobile home for the supply and return air systems.

(20) "Factory-Built Fireplace" means a hearth, fire chamber and chimney assembly composed of listed factory-built components assembled in accordance with the terms of listing to form a complete fireplace.

(21) "Fireplace Stove" means a chimney connected solid fuel-burning stove having part of its fire chamber open to the room.

(22) "Fuel Gas Piping System" means the arrangement of piping, tubing, fittings, connectors, valves and devices designed and intended to supply or control the flow of fuel gas to the appliance(s).

(23) "Fuel Oil Piping System" means the arrangement of piping, tubing, fittings, connectors, valves and devices designed and intended to supply or control the flow of fuel oil to the appliance(s).

(24) "Gas Clothes Dryer" means a device used to dry wet laundry by means of heat derived from the combustion of fuel gases.

(25) "Gas Refrigerator" means a gas-burning appliance which is designed to extract heat from a suitable chamber.

(26) "Gas Supply Connection" means the terminal end or connection to which a gas supply connector is attached.

(27) "Gas Supply Connector, Mobile Home" means a listed flexible connector designed for connecting the mobile home to the gas supply source.

(28) "Gas Vents" means factory-built vent piping and vent fittings listed by an approved testing agency, that are assembled and used in accordance with the terms of their listings, for conveying flue gases to the outside atmosphere. (j) "Type B Gas Vent" means a gas vent for venting gas appliances with draft hoods

V401244 DEC 18 75 XUM

and other gas appliances listed for use with Type B Gas Vents. (ii) "Type BW Gas Vent" means a gas vent for venting listed gas-fired vented wall furnaces.

(29) "Heat Producing Appliance" means all heating and cooking appliances and fuel burning appliances.

(30) "Heating Appliance" means an appliance for comfort heating or for domestic water heating.

(31) Liquefied Petroleum Gases." The terms "Liquefied petroleum gases," "LPG" and "LP-Gas" as used in this standard shall mean and include any material which is composed predominantly of any of the following hydrocarbons, or mixtures of them: propane, propylene butanes (normal butane or isobutane), and butylenes.

(32) "Plenum" means an air compartment which is part of an air-distributing system, to which one or more ducts or outlets are connected. (i) Furnace supply plenum is a plenum attached directly to, or an integral part of, the air supply outlet of the furnace. (ii) Furnace return plenum is a plenum attached directly to, or an integral part of, the return inlet of the furnace.

(33) "Quick-Disconnect Device" means a hand-operated device which provides a means for connecting and disconnecting a gas supply or connecting gas systems and which is equipped with an automatic means to shut off the gas supply when the device is disconnected.

(34) "Readily Accessible" means direct access without the necessity of removing any panel, door, or similar obstruction.

(35) "Roof Jack" means that portion of a mobile home heater flue or vent assembly, including the cap, insulating means, flashing, and ceiling plate, located in and above the roof of a mobile home.

(36) "Sealed Combustion System Appliance" means an appliance which by its inherent design is constructed so that all air supplied for combustion, the combustion system of the appliance, and all products of combustion are completely isolated from the atmosphere of the space in which it is installed.

(37) "Water Heater" means an appliance for heating water for domestic purposes other than for space heating.

§ 280.703 Minimum standards.

Heating, cooling and fuel burning appliances and systems in mobile homes shall be free of defects and shall conform to applicable standards in the following table unless otherwise specified in this standard. (See § 280.4).

Type	ANSI	UL	Other standards

§ 280.704 Fuel supply systems.

(a) *LP-Gas system design and service line pressure*—(1) Systems shall be of the vapor-withdrawal type.

(2) Gas, at a pressure not over 14 inches water column (½ psi), shall be delivered from the system into the gas supply connection.

(b) *LP-Gas Containers*—(1) *Maximum capacity.* No more than two containers having an individual water capacity of not more than 105 pounds (approximately 45 pounds LP-Gas capacity), shall be installed on or in a compartment of any mobile home.

(2) *Construction of containers.* Containers shall be constructed and marked in accordance with the specifications for LP-Gas Containers of the U.S. Department of Transportation (DOT) or the Rules for Construction of Unfired Pressure Vessels, Section VIII, Division 1, ASME Boiler and Pressure Vessel Code. ASME Containers shall have a design pressure of at least 312.5 psig. (i) Container supply systems shall be arranged for vapor withdrawal only. (ii) Container openings for vapor withdrawal shall be located in the vapor space when the container is in service or shall be provided with a suitable internal withdrawal tube which communicates with the vapor space in or near the highest point in the container when it is mounted in service position, with the vehicle on a level surface. Containers shall be permanently and legibly marked in a conspicuous manner on the outside to show the correct mounting position and the position of the service outlet connection. The method of mounting in place shall be such as to minimize the possibility of an incorrect positioning of the container.

(3) *Location of LP-Gas Containers and Systems.* (i) LP-Gas Containers shall not be installed, nor shall provisions be made for installing or storing any LP-Gas container, even temporarily, inside any mobile home except for listed, completely self-contained hand torches, lanterns, or similar equipment with containers having a maximum water capacity of not more than 2½ pounds (approximately one pound LP-Gas capacity). (ii) Containers, control valves, and regulating equipment, when installed, shall be mounted on the "A" frame of the mobile home, or installed in a compartment that is vaportight to the inside of the mobile home and accessible only from the outside. The compartment shall be ventilated at top and bottom to facilitate diffusion of vapors. The compartment shall be ventilated with two vents having an aggregate area of not less than two percent of the floor area of the compartment and shall open unrestricted to the outside atmosphere. The required vents shall be equally distributed between the floor and ceiling of the compartment. If the lower vent is located in the access door or wall, the bottom edge of the vent shall be flush with the floor level of the compartment. The top vent shall be located in the access door or wall with the bottom of the vent not more than 12 inches below the ceiling level of the compartment. All vents shall have an unrestricted discarge to the outside atmosphere. Access doors or panels of compartments shall not be equipped with locks or require special tools or knowledge to open. (iii) Permanent and removable fuel containers shall be securely mounted to prevent jarring loose, slipping or rotating and the fastenings shall be designed and constructed to withstand static loading in any direction equal to twice the weight of the tank and attachments when filled with fuel, using a safety factor of not less than four based on the ultimate strength of the material to be used.

(4) *LP-Gas Container Valves and Accessories.* (i) Valves in the assembly of a two-cylinder system shall be arranged so that replacement of containers can be made without shutting off the flow of gas to the appliance(s). This provision is not to be construed as requiring an automatic change-over device. (ii) Shutoff valves on the containers shall be protected as follows, in transit, in storage, and while being moved into final utilization by setting into a recess of the container to prevent possibility of their being struck if container is dropped upon a flat surface, or by ventilated cap or collar, fastened to the container, capable of withstanding a blow from any direction equivalent to that of a 30-pound weight dropped 4 feet. Construction shall be such that the blow will not be transmitted to the valve. (iv) Regulators shall be connected directly to the container shutoff valve outlets or mounted securely by means of a support bracket and connected to the container shutoff valve or valves with listed high pressure connections. If the container is permanently mounted the connector shall be as required above or with a listed semi-rigid tubing connector.

(5) *LP-Gas Safety Devices.* (i) DOT containers shall be provided with safety relief devices as required by the regulations of the U.S. Department of Transportation. ASME containers shall be provided with relief valves in accordance with Subsection 221 of the Standard for the Storage and Handling of Liquefied Petroleum Gases (NFPA No. 58–1974; ANSI Z106.1–1974). Safety relief valves shall have direct communication with the vapor space of the vessel. (ii) The delivery side of the gas pressure regulator shall be equipped with a safety relief device set to discharge at a pressure not less than two times and not more than three times the delivery pressure of the regulator. (iii) Systems mounted on the "A" frame assembly shall be so located that the discharge from the safety relief devices shall be into the open air and not less than three feet horizontally from any opening into the mobile home below the level of such discharge. (iv) Safety relief valves located within liquefied petroleum gas container compartments may be less than three feet from openings provided the bottom vent of the compartment is at the same level or lower than the bottom of any opening into the vehicle, or the compartment is not located on the same wall plane as the opening(s) and is at least two feet horizontally from such openings.

(6) *LP-Gas System Enclosure and Mounting.* (i) Housings and enclosures shall be designed to provide proper ventilation at least equivalent to that specified in § 280.704(b)(3)(ii). (ii) Doors, hoods, domes, or portions of housings and enclosures required to be removed or opened for replacement of containers shall incorporate means for clamping them firmly in place and preventing them from working loose during transit. (iii) Provisions shall be incorporated in the assembly to hold the containers firmly in position and prevent their movement during transit. (iv) Containers shall be mounted on a substantial support or a base secured firmly to the vehicle chassis. Neither the container nor its support shall extend below the mobile home frame.

(c) *Oil Tanks*—(1) *Installation.* Oil tanks and listed automatic pumps (oil lifters) installed for gravity flow of oil to heating equipment shall be installed so that the top of the tank is no higher than 8 feet above the appliance oil control and the bottom of the tank is not less than 18 inches above the appliance oil control.

(2) *Auxiliary Oil Storage Tank.* Oil supply tanks affixed to a mobile home shall be so located as to require filling and draining from the outside and shall be in a place readily available for inspection. If the fuel supply tank is located in a compartment of a mobile home, the compartment shall be ventilated at the bottom to permit diffusion of vapors and shall be insulated from the structural members of the body. Tanks so installed shall be provided with an outside fill and vent pipe and an approved liquid level gage.

(3) *Shutoff Valve.* A readily accessible, approved manual shutoff valve shall be installed at the outlet of an oil supply tank. The valve shall be installed to close against the supply.

(4) *Fuel Oil Filters.* All oil tanks shall be equipped with an approved oil filter or strainer located downstream from the tank shutoff valve. The fuel oil filter or strainer shall contain a sump with a drain for the entrapment of water.

§ 280.705 Gas piping systems.

(a) *General.* The requirements of this Section shall govern the installation of all fuel gas piping attached to any mobile home. The gas piping supply system shall be designed for a pressure not exceeding 14 inch water column (½ psi) and not less than 7 inch water column (¼ psi). The manufacturer shall indicate in his written installation instructions the design pressure limitations for safe and effective operation of the gas piping system. None of the requirements listed in this Section shall apply to the piping supplied as a part of an appliance. All exterior openings around piping, ducts, plenums or vents shall be sealed to resist the entrance of rodents.

(b) *Materials.* All materials used for the installation, extension, alteration, or repair of any gas piping system shall be new and free from defects or internal obstructions. It shall not be permissible

V 40 244 DEC 18 75 D XUM

to repair defects in gas piping or fittings. Inferior or defective materials shall be removed and replaced with acceptable material. The system shall be made of materials having a melting point of not less than 1,450° F, except as provided in § 280.705(e). They shall consist of one or more of the materials described in § 280.705(b) (1) through (4).

(1) Steel or wrought-iron pipe shall comply with ANSI Standard B36.10–1970 for Wrought-Steel and Wrought-Iron Pipe. Threaded brass pipe in iron pipe sizes may be used. Threaded brass pipe shall comply with Standard Sizes and Specifications for Seamless Red Brass Pipe (ASTM B43–66).

(2) Fittings for gas piping shall be wrought iron, malleable iron, steel, or brass (containing not more than 75 percent copper).

(3) Copper tubing shall be annealed type, Grade K or L, conforming to the Specifications for Seamless Copper Water Tube (ASTM B88–72), or shall comply with the Specifications for Seamless Copper Tube for Air Conditioning and Refrigeration Field Service, ASTM B280–73. When used on systems designed for natural gas, such tubing shall be internally tinned.

(4) Steel tubing shall have a minimum wall thickness of 0.032 inch for tubing of ½ inch diameter and smaller and 0.049 inch for diameters ½ inch and larger. Steel tubing shall be constructed in accordance with ASTM Specification for Electric-Resistance-Welded Coiled Steel Tubing for Gas and Fuel Oil Lines (ASTM A539–73), and shall be externally corrosion protected.

(c) *Piping design.* Each mobile home requiring fuel gas for any purpose shall be equipped with a fuel gas piping system that is designed for LP-Gas only or with a natural gas piping system acceptable for LP-Gas.

(1) Where fuel gas piping is to be installed in both portions of an expandable or multiple unit mobile home, the design and construction of the crossover shall be as follows: (i) There shall be only one point of crossover which shall be readily accessible from the exterior of the mobile home. (ii) The connector between units shall be a listed type for exterior use, sized in accordance with § 280.705(d). (iii) The connection shall be made by a listed "quick disconnect" device which shall be designed to provide a positive seal of the supply side of the gas system when such device is separated. (iv) The flexible connector and "quick disconnect" device shall be provided with protection from mechanical and impact damage and located to minimize the possibility of tampering. (v) Suitable protective coverings for the "quick disconnect" device, when separated, shall be permanently attached to the device or flexible connector. (vi) A 3 inch by 1¾ inch minimum size tag made of etched, metal-stamped or embossed brass, stainless steel, anodized or alclad aluminum not less than 0.020 inch thick, or other approved material (e.g., 0.005 inch plastic laminates) shall be permanently attached on the exterior wall adjacent to the access to the "quick disconnect" device. Each tag shall be legibly inscribed with the following information using letters no smaller than ¼ inch high:

Do Not Use Tools to Separate the "Quick-Disconnect" Device.

(d) *Gas Pipe Sizing.* Gas piping systems shall be sized so that the pressure drop to any appliance inlet connection from any gas supply connection, when all appliances are in operation at maximum capacity, is not more than 0.5 inch water column as determined on the basis of test, or in accordance with the following Table. When determining gas pipe sizing in the table, gas shall be assumed to have a specific gravity of 0.65 and rated at 1000 B.T.U. per cubic foot. The natural gas supply connection(s) shall be not less than the size of the gas piping but shall be not smaller than ¾ inch nominal pipe size.

(e) *Joints for Gas Pipe.* All pipe joints in the piping system, unless welded or brazed, shall be threaded joints that comply with ANSI Standard Pipe Threads (Except Dryseal) B2–1—1968. Right and left nipples or couplings shall not be used. Unions, if used, shall be of ground joint type. The material used for welding or brazing pipe connections shall have a melting temperature in excess of 1,000 F.

(f) *Joints for Tubing.* (1) Tubing joints shall be made with either a single or a double flare of 45 degrees in accordance with SAE Standard J 533A or with other listed vibration-resistant fittings, or joints may be brazed with material having a melting point exceeding 1,000 F. Metallic ball sleeve compression-type tubing fittings shall not be used.

(2) Steel tubing joints shall be made with a double-flare in accordance with SAE Standard J 533A.

(g) *Pipe Joint Compound.* Screw joints shall be made up tight with listed pipe joint compound, insoluble in liquefied petroleum gas, and shall be applied to the male threads only.

(h) *Concealed Tubing.* Tubing shall not be run inside walls, floors, partitions, or roofs. Where tubing passes through walls, floors, partitions, roofs, or similar installations, such tubing shall be protected by the use of weather resistant grommets that shall snugly fit both the tubing and the hole through which the tubing passes.

(i) *Concealed Joints.* Piping or tubing joints shall not be located in any floor, wall partition, or similar concealed construction space.

(j) *Location of gas supply connection.* (1) For LP-Gas-only systems the supply connection shall be located at the "A" frame, container recess, or in the rear half of the total length of the mobile home and within 24 inches from the left (road) side wall, and should be as close as practicable to a point 30 feet from the front of the mobile home.

(2) For combination LP-Gas and natural gas systems, the natural gas supply connection shall be located under the rear half of the total length of the mobile home and within 24 inches of the left (road) side wall and be located as close as practicable to a point 30 feet from the front of the mobile home. The natural gas supply connection shall not be located beneath any exit door. An additional connection, if used, shall be located at the "A" frame. The system shall be sized to provide adequate capacity from either supply connection for natural gas.

(k) *Identification of gas supply connections.* Each mobile home shall have permanently affixed to the exterior skin at or near each gas supply connection or the end of the pipe, a tag of 3 inches by 1¾ inches minimum size, made of etched, metal-stamped or embossed brass, stainless steel, anodized or alclad aluminum not less than 0.020 inch thick, or other approved material (e.g., 0.005 inch plastic laminates), which reads (as appropriate) in accordance with one of the following label designs depending upon the fuel used. The connector capacity indicated on this tag shall be equal to or greater than the total Btuh rating of all intended gas appliances.

LP-Gas System

This gas piping system is designed for use of liquefied petroleum gas only.

DO NOT CONNECT NATURAL GAS TO THIS SYSTEM.

CONTAINER SHUTOFF VALVES SHALL BE CLOSED DURING TRANSIT.

When connecting to lot outlet, use a listed gas supply connector for mobile homes rated at ☐100,000 Btuh or more, ☐250,000 Btuh

Before turning on gas, make certain all gas connections have been made tight, all appliance valves are turned off, and any unconnected outlets are capped.

After turning on gas, test gas piping and connections to appliances for leakage with soapy water or bubble solution, and light all pilots.

Combination LP-Gas and Natural Gas System

This gas piping system is designed for use of either liquefied petroleum gas or natural gas.

NOTICE: BEFORE TURNING ON GAS BE CERTAIN APPLIANCES ARE DESIGNED FOR THE GAS CONNECTED AND ARE EQUIPPED WITH CORRECT ORIFICES. SECURELY CAP THIS INLET WHEN NOT CONNECTED FOR USE.

When connecting to lot outlet, use a listed gas supply connector for mobile homes rated at ☐100,000 Btuh or more. ☐250,000 Btuh

Before turning on gas, make certain all gas connections have been made tight, all appliance valves are turned off, and any unconnected outlets are capped.

After turning on gas, test gas piping and connections to appliances for leakage with soapy water or bubble solution, and light all pilots.

(l) *Gas supply connectors*—(1) *LP-Gas.* A listed LP-Gas flexible connector conforming to the UL Standard for Pigtails, Expansion Coils and Flexible Hose Connectors for LP-Gas (UL 569–1973) or equal shall be supplied when the fuel gas piping system is designed for the use of LP-Gas and cylinder(s) and regulator(s) are supplied.

(2) *Appliance connections.* All gas burning appliances shall be connected to the fuel piping. Materials as provided in § 280.705(b) or listed appliance connectors shall be used. Listed appliance connectors when used shall not run through walls, floors, ceilings or partitions. Connectors of aluminum shall not be used outdoors. A mobile home containing an LPG or combination LP-natural-gas-system may be provided with a gas outlet to supply exterior appliances when installed in accordance with the following: (i) No portion of the completed installation shall project beyond the wall of the mobile home. (ii) The outlet shall be provided with an approved "quick-disconnect" device, which shall be designed to provide a positive seal on the supply side of the gas system when the appliance is disconnected. A shutoff valve shall be installed immediately upstream of the quick-disconnect device. The complete device shall be provided as part of the original installation. (iii) Protective caps or plugs for the "quick-disconnect" device, when disconnected, shall be per-

V 40 244 DEC 18 75 XUM

manently attached to the mobile home adjacent to the device. (iv) A tag shall be permanently attached to the outside of the exterior wall of the mobile home as close as possible to the gas supply connection. The tag shall indicate the type of gas and the Btuh capacity of the outlet and shall be legibly inscribed as follows:

THIS OUTLET IS DESIGNED FOR USE WITH GAS PORTABLE APPLIANCES WHOSE TOTAL INPUT DO NOT EXCEED _____ BTUH. REPLACE PROTECTIVE COVERING OVER CONNECTOR WHEN NOT IN USE.

(3) *Valves.* A shutoff valve shall be installed in the fuel piping at each gas appliance inside the mobile home structure, upstream of the union or connector in addition to any valve on the appliance and so arranged to be accessible to permit servicing of the appliance and removal of its components, and for shutoff in case of emergency. The shutoff valve shall be located within 6 feet of a cooking appliance and within 3 feet of any other appliance. A shutoff valve may serve more than one applicant if located as required above. Shutoff valves used in connection with gas piping shall be of a type designed and listed for use on LP-Gas.

(4) *Gas Piping System Openings.* All openings in the gas piping system shall be closed gas-tight with threaded pipe plugs or pipe caps.

(5) *Electrical Ground.* Gas piping shall not be used for an electrical ground.

(6) *Couplings.* Pipe couplings and unions shall be used to join sections of threaded piping. Right and left nipples or couplings shall not be used.

(7) *Hangers and Supports.* All gas piping shall be adequately supported by galvanized or equivalently protected metal straps or hangers at intervals of not more than 4 feet, except where adequate support and protection is provided by structural members. Solid-iron-pipe gas supply connection(s) shall be rigidly anchored to a structural member within 6 inches of the supply connection(s).

(8) *Testing for Leakage.* (i) Before appliances are connected, piping systems shall stand a pressure of at least six inches mercury or three PSI gage for a period of not less than ten minutes without showing any drop in pressure. Pressure shall be measured with a mercury manometer or slope gage calibrated so as to be read in increments of not greater than one-tenth pound, or an equivalent device. The source of normal operating pressure shall be isolated before the pressure tests are made. Before a test is begun, the temperature of the ambient air and of the piping shall be approximately the same, and constant air temperature be maintained throughout the test. (ii) After appliances are connected, the piping system shall be pressurized to not less than 10 inches nor more than 14 inches water column and the appliance connections tested for leakage with soapy water or bubble solution.

§ 280.706 Oil Piping Systems.

(a) *General.* The requirements of this Section shall govern the installation of all liquid fuel piping attached to any mobile home. None of the requirements listed in this Section shall apply to the piping in the apliance(s).

(b) *Materials.* All materials used for the installation extension, alteration, or repair, of any oil piping systems shall be new and free from defects or internal obstructions. The system shall be made of materials having a melting point of not less than 1,450 F, except as provided in § 280.706(d) and (e). They shall consist of one or more of the materials described in § 280.706(b) (1) through (4). (1) Steel or wrought-iron pipe shall comply with American National Standard for Wrought-Steel or Wrought-Iron Pipe, B36.10—1970. Threaded copper or brass pipe in iron pipe sizes may be used. (2) Fittings for oil piping shall be wrought iron, malleable iron, steel, or brass (containing not more than 75 percent copper). (3) Copper tubing shall be annealed type, Grade K or L conforming to the Specifications for Seamless Copper Water Tube (ASTM B88–72), or shall comply with the specifications for Seamless Copper Tube for Air Conditioning and Refrigeration Field Service, ASTM B280–73, (4) Steel tubing shall have a minimum wall thickness of 0.032 inch for diameters up to ½ inch and 0.049 inch for diameters ½ inch and larger. Steel tubing shall be constructed in accordance with the Specification for Electric-Resistance Welded Coiled Steel Tubing for Gas and Fuel Oil Lines (ASTM A539–73) and shall be externally corrosion protected.

(c) *Size of Oil Piping.* The minimum size of all fuel oil tank piping connecting outside tanks to the appliance shall be no smaller than ⅜ inch OD copper tubing or ¼ inch IPS. If No. 1 fuel oil is used with a listed automatic pump (fuel lifter), copper tubing shall be sized as specified by the pump manufacturer.

(d) *Joints for Oil Piping.* All pipe joints in the piping system, unless welded or brazed, shall be threaded joints which comply with American National Standard for Pipe Threads (Except Dryseal), B2.1—1968. The material used for brazing pipe connections shall have a melting temperature in excess of 1,000 F.

(e) *Joints for Tubing.* Joints in tubing shall be made with either a single or double flare of the proper degree, as recommended by the tubing manufacturer, by means of listed tubing fittings, or brazed with materials having a melting point in excess of 1,000 F.

(f) *Pipe joint compound.* Threaded joints shall be made up tight with listed pipe joint compound which shall be applied to the male threads only.

(g) *Couplings.* Pipe couplings and unions shall be used to join sections of threaded pipe. Right and left nipples or couplings shall not be used.

(h) *Grade of piping.* Fuel oil piping installed in conjunction with gravity feed systems to oil heating equipment shall slope in a gradual rise upward from a central location to both the oil tank and the appliance in order to eliminate air locks.

(i) *Strap hangers.* All oil piping shall be adequately supported by galvanized or equivalently protected metal straps or hangers at intervals of not more than 4 feet, except where adequate support and protection is provided by structural members. Solid-iron-pipe oil supply connection(s) shall be rigidly anchored to a structural member within 6 inches of the supply connection(s).

(j) *Testing for leakage.* Before setting the system in operation, tank installations and piping shall be checked for oil leaks with fuel oil of the same grade that will be burned in the appliance. No other material shall be used for testing fuel oil tanks and piping. Tanks shall be filled to maximum capacity for the final check for oil leakage.

§ 280.707 Heat producing appliances.

(a) Heat-producing appliances and vents, roof jacks and chimneys necessary for their installation in mobile homes shall be listed or certified by a nationally recognized testing agency for use in mobile homes.

(1) A mobile home shall be provided with a comfort heating system. (i) When a mobile home is manufactured to contain a heating appliance, the heating appliance shall be installed by the manufacturer of the mobile home in compliance with applicable sections of this subpart. (ii) When a mobile home is manufactured for field application of an external heating or combination heating/cooling appliance, preparation of the mobile home for this external application shall comply with the applicable sections of this part.

(2) After the effective date specified herein gas and oil burning comfort heating appliances shall have a flue loss of not more than that specified below, and a thermal efficiency of not less than that specified in nationally recognized standards. (See § 280.703)

Effective date:	*Maximum allowable flue loss*
Jan. 1, 1977	25 percent
Jan. 1, 1976	30 percent

(b) Fuel-burning heat-producing appliances and refrigeration appliances, except ranges and ovens, shall be of the vented type and vented to the outside.

(c) Fuel-burning appliances shall not be converted from one fuel to another fuel unless converted in accordance with the terms of their listing and the appliance manufacturer's instructions.

(d) *Performance Efficiency.* (1) All automatic electric storage water heaters shall have a standby loss not exceeding 43 watts/meter² (4 watts/FT²) of tank surface area effective January 1, 1977. The method of test for standby loss shall be as described in Section 4.3.1 of ANSI C72.1–72.

(2) All gas and oil-fired automatic storage water heaters shall have a recovery efficiency, E_r, and a standby loss, S, as described below, effective January 1, 1977. The method of test of E_r and S shall be as described in Section 2.7 of ANSI Z21.10.1–1974, except that for oil-fired units. CF=1.0, Q=total gallons of oil consumed and H=total heating value of oil in Btu/gallon.

Storage capacity in gallons	Recovery efficiency	Standby loss
Less than 25	At least 75 percent.	Not more than 7.5 percent.
25 up to 35	do	Not more than 7 percent.
35 or more	do	Not more than 6 percent.

(e) Each space heating, cooling or combination heating and cooling system shall be provided with at least one readily adjustable automatic control for regulation of living space temperature. The control shall be placed a minimum of 3 feet from the vertical edge of the appliance compartment door. It shall not be located on an exterior wall or on a wall separating the appliance compartment from a habitable room.

§ 280.708 Clothes dryers.

(a) *Clothes dryers.* (1) Clothes dryers shall be exhausted to the outside by a moisture-lint exhaust duct and termination fitting. Such termination fittings for gas dryers shall be listed or certified as components of the dryer.

(2) A clothes dryer moisture-lint exhaust duct shall not be connected to any other duct, vent or chimney.

(3) The exhaust duct shall not terminate beneath the mobile home.

(4) Moisture-lint exhaust ducts shall not be connected with sheet metal screws or other fastening devices which extend into the interior of the duct.

(b) *Gas clothes dryer.* A mobile home may be provided with "stubbed in" equipment at the factory to supply a gas clothes dryer for future installation by the owner provided it complies with the following provisions: (1) The "stubbed in" gas outlet shall be provided with a shutoff valve, the outlet of which is closed by threaded pipe plug or cap. (2) The "stubbed in" gas outlet shall be permanently labeled to identify it for use only as the supply connection for a gas clothes dryer. (3) A moisture-lint exhaust duct system shall be roughed in by the manufacturer at the time of original installation. The moisture-lint exhaust system shall comply with provisions of § 280.708(a) (1) through (4).

(c) *Electric clothes dryers.* Electric clothes dryers shall be exhausted to the outside in accordance with the appliance manufacturer's instructions. When a receptacle is installed to supply an electric clothes dryer for future installation by the owner, the moisture-lint exhaust system required by § 280.708(a) (4) shall be roughed in by the manufacturer. The moisture-lint exhaust system shall comply with provisions of § 280.708(a) (1) through (4).

§ 280.709 Installation of appliances.

(a) The installation of each appliance shall conform to the terms of its listing and the manufacturer's instructions. The installer shall leave the manufacturer's instructions attached to the appliance. Every appliance shall be secured in place to avoid displacement. For the purpose of servicing and replacement, each appliance shall be both accessible and removable.

(b) Heat-producing appliances shall be so located that no doors, drapes, or other such material can be placed or swing closer to the front of the appliance than the clearances specified on the labeled appliances.

(c) Clearances between heat-producing appliances and adjacent surfaces shall not be less than specified in the terms of their listing. Clearance spaces shall be framed in or guarded to prevent creation of storage space within the clearance specified.

(d) All fuel-burning appliances, except ranges, ovens, illuminating appliances, clothes dryers, solid fuel-burning fireplaces and solid fuel-burning fireplace stoves, shall be installed to provide for the complete separation of the combustion system from the interior atmosphere of the mobile home. Combustion air inlets and flue gas outlets shall be listed or certified as components of the appliance. The required separation may be obtained by:

(1) The installation of direct vent system (sealed combustion system) appliances, or

(2) The installation of appliances within enclosures so as to separate the appliance combustion system and venting system from the interior atmosphere of the mobile home. There shall not be any door, removable access panel, or other opening into the enclosure from the inside of the mobile home. Any opening for ducts, piping, wiring, etc., shall be sealed.

(e) A forced air appliance and its return-air system shall be designed and installed so that negative pressure created by the air-circulating fan cannot affect its or another appliance's combustion air supply or act to mix products of combustion with circulating air.

(1) The air circulating fan of a furnace installed in an enclosure with another fuel-burning appliance shall be operable only when any door or panel covering an opening in the furnace fan compartment or in a return air plenum or duct is in the closed position. This does not apply if both appliances are direct vent system (sealed combustion system) appliances.

(2) If a warm air appliance is installed within an enclosure to conform to § 280.709(d)(2), each warm-air outlet and each return air inlet shall extend to the exterior of the enclosure. Ducts, if used for that purpose, shall not have any opening within the enclosure and shall terminate at a location exterior to the enclosure.

(3) Cooling coils installed as a portion of, or in connection with, any forced-air furnace shall be installed on the downstream side unless the furnace is specifically otherwise listed.

(4) An air conditioner evaporator section shall not be located in the air discharge duct or plenum of any forced-air furnace unless the mobile home manufacturer has complied with certification required in § 280.511.

(5) If a cooling coil is installed with a forced-air furnace, the coil shall be installed in accordance with its listing. When a furnace-coil unit has a limited listing, the installation must be in accordance with that listing.

(6) When an external heating appliance or combination cooling/heating appliance is to be applied to a mobile home, the manufacturer shall make provision for proper location of the connection to the mobile home supply system and return air system of the external ducts connected to the appliance.

(7) The installation of a self contained air conditioner comfort cooling appliance shall meet the following requirements: (i) The installation on a duct common with an installed heating appliance shall require the installation of an automatic damper or other means to prevent the cooled air from passing through the heating appliance unless the heating appliance is certified or listed for such application and the supply system is intended for such an application. (ii) The installation shall prevent the flow of heated air into the external cooling appliance and its connecting ducts to the mobile home supply and return air system during the operation of the heating appliance installed in the mobile home. (iii) The installation shall prevent simultaneous operation of the heating and cooling appliances.

(f) *Vertical clearance above cooking top.* Ranges shall have a vertical clearance above the cooking top of not less than 24 inches. (See § 280.204).

(g) Solid fuel-burning factory-built fireplaces and fireplace stoves listed for use in mobile homes may be installed in mobile homes provided they and their installation conform to the following paragraphs. A fireplace or fireplace stove shall not be considered as a heating facility for determining compliance with Subpart F.

(1) A solid fuel-burning fireplace or fireplace stove shall be equipped with integral door(s) or shutter(s) designed to close the fireplace or fireplace stove fire chamber opening and shall include complete means for venting through the roof, a combustion air inlet, a hearth extension, and means to securely attach the fireplace or the fireplace stove to the mobile home structure. The installation shall conform to the following paragraphs (g)(1) (i) to (vii) inclusive: (i) A listed factory-built chimney designed to be attached directly to the fireplace or fireplace stove shall be used. The listed factory built chimney shall be equipped with and contain as part of its listing a termination device(s) and a spark arrester(s). (ii) A fireplace or fireplace stove, air intake assembly, hearth extension and the chimney shall be installed in accordance with the terms of their listings and their manufacturer's instructions. (iii) The combustion air inlet shall conduct the air directly into the fire chamber and shall be designed to prevent material from the hearth dropping onto the area beneath the mobile home. (iv) The fireplace or fireplace stove shall not be installed in a sleeping room. (v) Hearth extension shall be of noncombustible material not less than ⅜-inch thick. The hearth shall extend at least 16 inches in front or and at least 8 inches beyond each side of the fireplace

V40244 DEC 18 75 D XUM

or fireplace stove opening. Furthermore the hearth shall extend over the entire surface beneath a fireplace stove and beneath an elevated or overhanging fireplace. (vi) The label on each solid fuel-burning fireplace and solid fuel-burning fireplace stove shall include the following wording: For use with solid fuel only. (vii) The chimney shall extend at least three feet above the part of the roof through which it passes and at least two feet above the highest elevation of any part of the mobile home within 10 feet of the chimney. Portions of the chimney and termination that exceed an elevation of 13½ ft. above ground level may be designed to be removed for transporting the mobile home.

§ 280.710 Venting, ventilation and combustion air.

(a) The venting as required by § 280.707 (b) shall be accomplished by one or more of the methods given in (1) and (2) below:

(1) An integral vent system listed or certified as part of the appliance.

(2) A venting system consisting entirely of listed components, including roof jack, installed in accordance with the terms of the appliance listing and the appliance manufacturer's instructions.

(b) Venting and combustion air systems shall be installed in accordance with the following:

(1) Components shall be securely assembled and properly aligned using the method shown in the appliance manufacturer's instructions.

(2) Draft hood connectors shall be firmly attached to draft hood outlets or flue collars by sheet metal screws or by equivalent effective mechanical fasteners.

(3) Every joint of a vent, vent connector, exhaust duct and combustion air intake shall be secure and in alignment.

(c) Venting systems shall not terminate underneath a mobile home.

(d) Venting system terminations shall be not less than three feet from any motor-driven air intake discharging into habitable areas.

(e) The area in which cooking appliances are located shall be ventilated by a metal duct which may be single wall, not less than 12.5 square inches in cross-sectional area (minimum dimension shall be two inches) located above the appliance(s) and terminating outside the mobile home, or by listed mechanical ventilating equipment discharging outside the home, that is installed in accordance with the terms of listing and the manufacturer's instructions. Gravity or mechanical ventilation shall be installed within a horizontal distance of not more than ten feet from the vertical front of the appliance(s).

(f) Mechanical ventilation which exhausts directly to the outside atmosphere from the living space of a home shall be equipped with an automatic or manual damper. Operating controls shall be provided such that mechanical ventilation can be separately operated without directly energizing other energy consuming devices.

§ 280.711 Instructions.

Operating instructions shall be provided with each appliance. These instructions shall include directions and information covering the proper use and efficient operation of the appliance and its proper maintenance.

§ 280.712 Marking.

(a) Information on clearances, input rating, lighting and shutdown shall be attached to the appliances with the same permanence as the nameplate, and so located that it is easily readable when the appliance is properly installed or shutdown for transporting of mobile home.

(b) Each fuel-burning appliance shall bear permanent marking designating the type(s) of fuel for which it is listed.

§ 280.713 Accessibility.

Every appliance shall be accessible for inspection, service, repair, and replacement without removing permanent construction. Sufficient room shall be available to enable the operator to observe the burner, control, and ignition means while starting the appliance.

§ 280.714 Appliances, cooling.

(a) Every air conditioning unit or a combination air conditioning and heating unit shall be listed or certified by a nationally recognized testing agency for the application for which the unit is intended and installed in accordance with the terms of its listing.

(1) Mechanical air conditioners shall be rated in accordance with the Standard for Unitary Air-Conditioning Equipment (ARI Standard 210–74) and certified by ARI or other nationally recognized testing agency capable of providing follow-up service. (i) Electric motor-driven unitary cooling systems with rated capacity less than 65,000 Btu/hr manufactured after the times indicated in the following table, when rated at ARI Standard rating conditions as listed in ARI Standard 210–74, shall show energy efficiency ratio (EER) values not less than as shown below:

Date:	*Energy efficiency ratio*
Jan. 1, 1977	6.5
Jan. 1, 1980	7.2

(ii) Direct refrigerating systems serving any air conditioning or comfort-cooling system installed that ranks no lower than Group 5 in the Underwriters' Laboratories, Inc. "Classification of Comparative Life Hazard of Various Chemicals." (iii) Heat pumps shall be listed in the ARI Directory of Certified Unitary Heat Pumps or certified to comply with all the requirements of the Standard for Unitary Heat Pumps 240–74. Electric motor-driven vapor compression heat pumps with supplemental electrical resistance heat shall be sized to provide by compression at least 60 percent of the calculated annual heating requirement for the mobile home being served. A control shall be provided and set to prevent operation of supplemental electrical resistance heat at outdoor temperatures above 40 F, except for defrost operation. (iv) Electric motor-driven vapor compression heat pumps with supplemental electric resistance heat conforming to ARI Standard 240–74 manufactured after the dates indicated in the table shall show coefficient of performance ratios not less than shown below:

COP

Date	Outdoor air temperature		
	45° F	20° F	0° F
Jan. 1, 1977	2.2	1.4	Permit shutoff.
Jan. 1, 1980	2.5	1.7	1.0.

(2) Gas fired absorption air conditioners shall be listed or certified in cordance with ANSI Standard Z21.40.1–1973 and certified by AGA or another nationally recognized testing agency capable of providing follow-up service.

(3) Direct refrigerating systems serving any air conditioning or comfort-cooling system installed in a mobile home shall employ a type of refrigerant that ranks no lower than Group 5 in the Underwriters' Laboratories, Inc. "Classification of Comparative Life Hazard of Various Chemicals."

(b) *Installation and instructions.*

(1) The installation of each appliance shall conform to the terms of its listing as specified on the appliance and in the manufacturer's instructions. The installer shall include the manufacturer's installation instructions in the mobile home. Appliances shall be secured in place to avoid displacement and movement from vibration and road shock.

(2) Operating instructions shall be provided with the appliance.

(c) Fuel-burning air conditioners shall also comply with § 280.707.

(d) The appliance rating plate shall be so located that it is easily readable when the appliance is properly installed.

(e) Every installed appliance shall be accessible for inspection, service, repair and replacement without removing permanent construction.

§ 280.715 Circulating air system.

(a) *Supply system.* (1) Supply ducts and any dampers contained therein shall be made from galvanized steel, tin-plated steel, or aluminum, or shall be listed Class 0, Class 1, or Class 2 air ducts. Class 2 air ducts shall be located at least 3 feet from the furnace bonnet or plenum. A duct system integral with the structure shall be of durable construction that can be demonstrated to be equally resistant to fire and deterioration. Ducts constructed from sheet metal shall be in accordance with the following table:

Minimum metal thickness for ducts [1]

Duct type	Diameter 14 in or less	Width over 14 in
Round	0.013	0.016
Enclosed rectangular	.013	.016
Exposed rectangular	.016	.019

[1] When "nominal" thicknesses are specified, 0.003 in shall be added to these "minimum" metal thicknesses.

(2) Sizing of ducts for heating. (i) Ducts shall be so designed that when a labeled forced-air furnace is installed and operated continuously at its normal heating air circulating rate in the mobile home, with all registers in the full open position, the static pressure measured in the casing shall not exceed 90% of that shown on the label of the appliance. For upflow furnaces the static pressure shall be taken in the duct plenum. For external heating or combination heating/cooling appliances the static pressure shall be taken at the point used by the agency listing or certifying the appliance. (ii) When an evaporator-coil specifically designed for the particular furnace is installed between the furnace and the duct plenum, the total static pressure shall be measured downstream of the coil in accordance with the appliance label and shall not exceed 90 percent of that shown on the label of the appliance. (iii) When any other listed air-cooler coil is installed between the furnace and the duct plenum, the total static pressure shall be measured between the furnace and the coil and it shall not exceed 90 percent of that shown on the label of the furnace. (iv) The minimum dimension of any branch duct shall be at least 1½ inches, and of any main duct, 2½ inches.

(3) Sizing of ducts for air cooling. (i) The mobile home manufacturer shall certify the capacity of the air cooling supply duct system for the maximum allowable output of ARI certified central air conditioning systems. The certification shall be at operating static pressure of 0.3 inches of water or greater. (See § 280.511). (ii) The refrigerated air cooling supply duct system including registers must be capable of handling at least 300 cfm per 10,000 btuh with a static pressure no greater than 0.3 inches of water when measured at room temperature. In the case of application of external self contained comfort cooling appliances or the cooling mode of combination heating/cooling appliances, either the external ducts between the appliance and the mobile home supply system shall be considered part of, and shall comply with the requirements for the refrigerated air cooling supply duct system, or the connecting duct between the external appliance and the mobile supply duct system shall be a part of the listed appliance. The minimum dimension of any branch duct shall be at least 1½ inches, and of any main duct, 2½ inches.

(4) Airtightness of supply duct systems. A supply duct system shall be considered substantially airtight when the static pressure in the duct system, with all registers sealed and with the furnace air circulator at high speed, is at least 80 percent of the static pressure measured in the furnace casing, with its outlets sealed and the furnace air circulator operating at high speed. For the purpose of this paragraph and § 280.715(b) pressures shall be measured with a water manometer or equivalent device calibrated to read in increments not greater than ⅛ inch water column.

(5) Expandable or multiple mobile home connections. (i) An expandable or multiple mobile home may have ducts of the heating system installed in the various units. The points of connection must be so designed and constructed that when the mobile home is fully expanded or coupled, the resulting duct joint will conform to the requirements of this Part. (ii) Installation instructions for supporting the crossover duct from the mobile home shall be provided for onsite installation. The duct shall not be in contact with the ground.

(6) Air supply ducts shall be insulated with material having an effective thermal resistance (R) of not less than 4.0 unless they are within mobile home insulation having a minimum effective value of R–4.0 for floors or R–6.0 for ceilings.

(7) Supply and return ducts exposed directly to outside air, such as under chassis crossover ducts or ducts connecting external heating, cooling or combination heating/cooling appliances shall be insulated with material having a minimum thermal resistance of R=4.0, with a continuous vapor barrier having a perm rating of not more than 1 perm. Where exposed underneath the mobile home, all such ducts shall comply with § 280.715 (a)(5)(ii).

(b) *Return air systems.* (1) *Return air openings.* Provisions shall be made to permit the return of circulating air from all rooms and living spaces, except toilet room(s), to the circulating air supply inlet of the furnace.

(2) *Duct Material.* Return ducts and any diverting dampers contained therein shall be in accordance with the following: (i) Portions of return ducts directly above the heating surfaces, or closer than 2 feet from the outer jacket or casing of the furnace shall be constructed of metal in accordance with § 280.715(a)(1) or shall be listed Class 0 or Class 1 air ducts. (ii) Return ducts, except as required by (a) above, shall be constructed of one-inch (nominal) wood boards (flame spread classification of not more than 200), other suitable material no more flammable than one-inch board or in accordance with § 280.715(a)(1). (iii) The interior of combustible ducts shall be lined with noncombustible material at points where there might be danger from incandescent particles dropped through the register or furnace such as directly under floor registers and the bottom return. (iv) Factory made air ducts used for connecting external heating, cooling or combination heating/cooling appliances to the supply system and return air system of a mobile home shall be listed by a nationally recognized testing agency. Ducts applied to external heating appliances or combination heating/cooling appliances supply system outlets shall be constructed of metal in accordance with § 280.715(a)(1) or shall be listed Class 0 or Class 1 air ducts for those portions of the duct closer than 2 feet from the outer casing of the appliance. (v) Ducts applied to external appliances shall be resistant to deteriorating environmental effects, including but not limited to ultra violet rays, cold weather, or moisture and shall be resistant to insects and rodents.

(3) *Sizing.* The cross-sectional areas of the return air duct shall not be less than 2 square inches for each 1,000 Btu per hour input rating of the appliance. Dampers shall not be placed in a combination fresh air intake and return air duct so arranged that the required cross-sectional area will not be reduced at all possible positions of the damper.

(4) *Permanent unclosable openings.* Living areas not served by return air ducts or closed off from the return opening of the furnace by doors, sliding partitions, or other means shall be provided with permanent unclosable openings in the doors or separating partitions to allow circulated air to return to the furnace. Such openings may be grilled or louvered. The net free area of each opening shall be not less than 1 square inch for every 5 square feet of total living area closed off from the furnace by the door or partition serviced by that opening. Undercutting doors connecting the closed-off space may be used as a means of providing return air area. However, in the event that doors are undercut, they shall be undercut a minimum of 2 inches and no more than 2½ inches, and no more than one half of the free air area so provided shall be counted as return air area.

(c) *Joints and seams.* Joints and seams of ducts shall be securely fastened and made substantially airtight. Slip joints shall have a lap of at least 1 inch and shall be individually fastened. Tape or caulking compound may be used for sealing mechanically secure joints. Where used, tape or caulking compound shall not be subject to deterioration under long exposures to temperatures up to 200° F. and to conditions of high humidity, excessive moisture, or mildew.

(d) *Supports.* Ducts shall be securely supported.

(e) *Registers or grilles.* Fittings connecting the registers or grilles to the duct system shall be constructed of metal or material which complies with the requirements of Class 1 or 2 ducts under Underwriters' Laboratories, Inc. Standard for Air Ducts, UL181–1972. Air supply terminal devices (registers) when installed in kitchens, bedrooms and bathrooms shall be equipped with adjustable closeable dampers. Registers or grilles shall be constructed of metal or conform with the following:

(1) Be made of a material classified 94VE–0 or 94VE–1 when tested as described in Underwriters' Laboratories, Inc. Standard for Tests for Flammability of Plastic Materials for Parts in Devices and Appliances. UL94–1974.

DEC 18 75 V40244 XUM

(2) Floor register or grilles shall resist without structural failure a 200 lb. concentrated load on a 2-inch diameter disc applied to the most critical area of the exposed face of the register or grille. For this test the register or grille is to be at a temperature of not less than 165° F and is to be supported in accordance with the manufacturer's instructions.

Subpart I—Electrical Systems

§ 280.801 Scope.

(a) Subpart I of this Standard and Part A of Article 550 of the National Electrical Code (NFPA No. 70—1975) cover the electrical conductors and equipment installed within or on mobile homes and the conductors that connect mobile homes to a supply of electricity.

(b) In addition to the requirements of this Standard and Article 550 of the National Electrical Code (NFPA No. 70—1975), the applicable portions of other Articles of the National Electrical Code shall be followed covering electrical installations in mobile homes. Wherever the requirements of this Standard differ from the National Electrical Code, this Standard shall apply.

(c) The provisions of this Standard apply to mobile homes intended for connection to a wiring system nominally rated 115/230 volts, 3-wire AC, with grounded neutral.

(d) All electrical materials, devices, appliances, fittings and other equipment shall be listed or labeled by a nationally recognized testing agency and shall be connected in an approved manner when in service.

(e) Aluminum conductors are not acceptable in branch circuit wiring in mobile homes except as specifically approved by the Department after examination of proposed systems for individual cases.

§ 280.802 Definitions.

(a) The following definitions are applicable to Subpart I only.

(1) "Accessible (i) (As Applied to Equipment)" means admitting close approach because not guarded by locked doors, elevation, or other effective means. (See "Readily Accessible.") (ii) "(As Applied to Wiring Methods) means capable of being removed or exposed without damaging the mobile home structure or finish, or not permanently closed-in by the structure or finish of the mobile home (see "Concealed" and "Exposed").

(2) "Air Conditioning or Comfort Cooling Equipment" means all of that equipment intended or installed for the purpose of processing the treatment of air so as to control simultaneously its temperature, humidity, cleanliness, and distribution to meet the requirements of the conditioned space.

(3) (i) "Appliance" means utilization equipment, generally other than industrial, normally built in standardized sizes or types, which is installed or connected as a unit to perform one or more functions, such as clothes washing, air conditioning, food mixing, deep frying, etc. (ii) "Appliance, Fixed" means an appliance which is fastened or otherwise secured at a specific location. (iii) "Appliance, Portable" means an appliance which is actually moved or can easily be moved from one place to another in normal use. For the purpose of this Standard, the following major appliances are considered portable if cord-connected: refrigerators, clothes washers, dishwashers without booster heaters, or other similar appliances. (iv) "Appliance, Stationary" means an appliance which is not easily moved from one place to another in normal use.

(4) "Attachment Plug (Plug Cap) (Cap)" means a device which, by insertion in a receptacle, establishes connection between the conductors of the attached flexible cord and the conductors connected permanently to the receptacle.

(5) "Bonding" means the permanent joining of metallic parts to form an electrically conductive path which will assure electrical continuity and the capacity to conduct safely any current likely to be imposed.

(6) "Branch Circuit" (i) means the circuit conductors between the final overcurrent device protecting the circuit and the outlet(s). A device not approved for branch circuit protection, such as a thermal cutout or motor overload protective device, is not considered as the overcurrent device protecting the circuit. (ii) "Branch Circuit—Appliance" means a branch circuit supplying energy to one or more outlets to which appliances are to be connected; such circuits to have no permanently connected lighting fixtures not a part of an appliance. (iii) "Branch Circuit—General Purpose" means a circuit that supplies a number of outlets for lighting and appliances. (iv) "Branch Circuit—Individual" means a branch circuit that supplies only one utilization equipment.

(7) "Cabinet" means an enclosure designed either for surface or flush mounting, and provided with a frame, mat, or trim in which swinging doors are hung.

(8) "Circuit Breaker" means a device designed to open and close a circuit by nonautomatic means, and to open the circuit automatically on a predetermined overload of current without injury to itself when properly applied within its rating.

(9) "Concealed" means rendered inaccessible by the structure or finish of the mobile home. Wires in concealed raceways are considered concealed, even though they may become accessible by withdrawing them. (See "Accessible (As Applied to Wiring Methods)")

(10) "Connector, Pressure (Solderless)" means a device that establishes a connection between two or more conductors or between one or more conductors and a terminal by means of mechanical pressure and without the use of solder.

(11) "Dead Front (As Applied to Switches, Circuit-Breakers, Switchboards, and Distribution Panelboard)" means so designed, constructed, and installed that no current-carrying parts are normally exposed on the front.

(12) "Demand Factor" means the ratio of the maximum demand of a system, or part of a system, to the total connected load of a system or the part of the system under consideration.

(13) "Device" means a unit of an electrical system that is intended to carry but not utilize electrical energy.

(14) "Disconnecting Means" means a device, or group of devices, or other means by which the conductors of a circuit can be disconnected from their source of supply.

(15) "Distribution Panelboard" means a single panel or a group of panel units designed for assembly in the form of a single panel, including buses, and with or without switches or automatic overcurrent protective devices or both, for the control of light, heat, or power circuits of small individual as well as aggregate capacity; designed to be placed in a cabinet placed in or against a wall or partition and accessible only from the front.

(16) "Enclosed" means surrounded by a case that will prevent a person from accidentally contacting live parts.

(17) "Equipment" means a general term, including material, fittings, devices, appliances, fixtures, apparatus, and the like used as a part of, or in connection with, an electrical installation.

(18) "Exposed" (i) (As Applied to Live Parts) means capable of being inadvertently touched or approached nearer than a safe distance by a person. It is applied to parts not suitably guarded, isolated, or insulated. (See "Accessible" and "Concealed.") (ii) (As Applied to "Wiring Method") means on or attached to the surface or behind panels designed to allow access. (See "Accessible (As Applied to Wiring Methods)")

(19) "Externally Operable" means capable of being operated without exposing the operator to contact with live parts.

(20) "Feeder Assembly" means the overhead or under-chassis feeder conductors, including the grounding conductor, together with the necessary fittings and equipment, or a power supply cord approved for mobile home use, designed for the purpose of delivering energy from the source of electrical supply to the distribution panelboard within the mobile home.

(21) "Fitting" means an accessory, such as a locknut, bushing, or other part of a wiring system, that is intended primarily to perform a mechanical rather than an electrical function.

(22) "Ground" means a conducting connection, whether intentional or accidental, between an electrical circuit or equipment and earth, or to some conducting body that serves in place of the earth.

(23) "Grounded" means connected to earth or to some conducting body that serves in place of the earth.

(24) "Grounded Conductor" means a system or circuit conductor that is intentionally grounded.

(25) "Grounding Conductor" means a conductor used to connect equipment or the grounded circuit of a wiring system to a grounding electrode or electrodes.

(26) "Guarded" means covered, shielded, fenced, enclosed, or otherwise protected by means of suitable covers, casings, barriers, rails, screens, mats or platforms to remove the likelihood of approach or contact by persons or objects to a point of danger.

(27) "Isolated" means not readily accessible to persons unless special means for access are used.

(28) "Laundry Area" means an area containing or designed to contain either a laundry tray, clothes washer and/or clothes dryer.

(29) "Lighting Outlet" means an outlet intended for the direct connection of a lampholder, a lighting fixture, or a pendant cord terminating in a lampholder.

(30) "Mobile Home Accessory Building or Structure" means any awning, cabana, ramada, storage cabinet, carport, fence, windbreak or porch established for the use of the occupant of the mobile home upon a mobile home lot.

(31) "Mobile Home Service Equipment" means the equipment containing the disconnecting means, overcurrent protective devices, and receptacles or other means for connecting a mobile home feeder assembly.

(32) "Outlet" means a point on the wiring system at which current is taken to supply utilization equipment.

(33) "Panelboard" means a single panel or group of panel units designed for assembly in the form of a single panel; including buses; automatic overcurrent protective devices, and with or without switches for the control of light, heat, or power circuits; designed to be placed in a cabinet or cutout box placed in or against a wall or partition and accessible only from the front.

(34) "Raceway" means any channel for holding wires, cables, or busbars that is designed expressly for, and used solely for, this purpose. Raceways may be of metal or insulating material, and the term includes rigid metal conduit, rigid nonmetallic conduit, flexible metal conduit, electrical metallic tubing, underfloor raceways, cellular concrete floor raceways, cellular metal floor raceways, surface raceways, structural raceways, wireways, and busways.

(35) "Raintight" means so constructed or protected that exposure to a beating rain will not result in the entrance of water.

(36) "Readily Accessible" means capable of being reached quickly for operation, renewal, or inspection, without requiring those to whom ready access is requisite to climb over or remove obstacles or to resort to portable ladders, chairs, etc. (See "Accessible.")

(37) "Receptacle" means a contact device installed at an outlet for the connection of a single attachment plug. A single receptacle is a single contact device with no other contact device on the same yoke. A multiple receptacle is a single device containing two or more receptacles.

(38) "Receptacle Outlet" means an outlet where one or more receptacles are installed.

(39) "Utilization Equipment" means equipment which utilizes electric energy for mechanical, chemical, heating, lighting, or similar purposes.

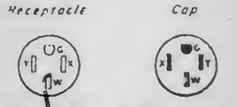
(40) "Voltage (of a Circuit)" means the greatest root-mean-square (effective) difference of potential between any two conductors of the circuit concerned. Some systems, such as 3-phase 4-wire, single-phase 3-wire, and 3-wire direct-current may have various circuits of various voltages.

(41) "Weatherproof" means so constructed or protected that exposure to the weather will not interfere with successful operation. Rainproof, raintight, or watertight equipment can fulfill the requirements for weatherproof where varying weather conditions other than wetness, such as snow, ice, dust, or temperature extremes, are not a factor.

§ 280.803 Power supply.

(a) The power supply to the mobile home shall be a feeder assembly consisting of not more than one listed 50 ampere mobile home power-supply cords, or a permanently installed circuit. A mobile home that is factory-equipped with gas or oil-fired central heating equipment and cooking appliances shall be permitted to be provided with a listed mobile home power-supply cord rated 40 amperes.

(b) If the mobile home has a power-supply cord, it shall be permanently attached to the distribution panelboard or to a junction box permanently connected to the distribution panelboard, with the free end terminating in an attachment plug cap.



(c) Cords with adapters and pigtail ends, extension cords, and similar items shall not be attached to, or shipped with, a mobile home.

(d) A listed clamp or the equivalent shall be provided at the distribution panelboard knockout to afford strain relief for the cord to prevent strain from being transmitted to the terminals when the power-supply cord is handled in its intended manner.

(e) The cord shall be of an approved type with four conductors, one of which shall be identified by a continuous green color or a continuous green color with one or more yellow stripes for use as the grounding conductor.

(f) The attachment plug cap shall be a 3-pole, 4-wire grounding type, rated 50 amperes, 125/250 volts with a configuration as shown herein and intended for use with the 50-ampere, 125/250 receptacle configuration shown. It shall be molded of butyl rubber, neoprene, or other approved materials which have been found suitable for the purpose, and shall be molded to the flexible cord so that it adheres tightly to the cord at the point where the cord enters the attachment-plug cap. If a right-angle cap is used, the configuration shall be so oriented that the grounding member is farthest from the cord.

(g) The overall length of a power-supply cord, measured from the end of the cord, including bared leads, to the face of the attachment-plug cap shall not be less than 21 feet and shall not exceed 36½ feet. The length of cord from the face of the attachment-plug cap to the point where the cord enters the mobile home shall not be less than 20 feet.

50-ampere 125/250 volt receptacle and attachment-plug-cap configurations, 3 pole, 4-wire grounding type used for mobile home supply cords and mobile home parks. Complete details of the 50-ampere cap and receptacle can be found in the American National Standard Dimensions of Caps, Plugs and Receptacles, Grounding Type (ANSI C73.17—1972).

(h) The power-supply cord shall bear the following marking: "For use with mobile homes—40 amperes" or "For use with mobile homes—50 amperes."

(i) The point of entrance of the feeder assembly to the mobile home shall be in the exterior wall, floor, or roof, in the rear third section (away from the coupler), of the mobile home.

(j) Where the cord passes through walls or floors, it shall be protected by means of conduit and bushings or equivalent. The cord may be installed within the mobile home walls, provided a continuous raceway is installed from the branch-circuit panelboard to the underside of the mobile home floor. The raceway may be rigid conduit, electrical metallic tubing or polyethylene (PE), poly-vinylchloride (PVC) or acrylonitrile-butadiene-styrene (ABS) plastic tubing having a minimum wall thickness of nominal ⅛ inch.

(k) Permanent provisions shall be made for the protection of the attachment-plug cap of the power supply cord and any connector cord assembly or receptacle against corrosion and mechanical damage if such devices are in an exterior location while the mobile home is in transit.

(l) Where the calculated load exceeds 50 amperes or where a permanent feeder is used, the supply shall be by means of:

(1) One mast weatherhead installation installed in accordance with Article 230 of the National Electrical Code NFPA No. 70—1975 containing four continuous insulated, color-coded, feeder conductors, one of which shall be an equipment grounding conductor; or,

(2) An approved raceway from the disconnecting means in the mobile home to the underside of the mobile home with provisions for the attachment of a suitable junction box or fitting to the raceway on the underside of the mobile home. The manufacturer shall provide in his written installation instructions, the proper feeder conductor sizes for the raceway and the size of the junction box to be used.

§ 280.804 Disconnecting means and branch-circuit protective equipment.

(a) The branch-circuit equipment shall be permitted to be combined with

DEC 18 75
V 40 244
XUM

the disconnecting means as a single assembly. Such a combination shall be permitted to be designated as a distribution panelboard. If a fused distribution panelboard is used, the maximum fuse size of the mains shall be plainly marked with lettering at least ¼-inch high and visible when fuses are changed. See Section 110-22 of the National Electrical Code (NFPA No. 70—1975) concerning identification of each disconnecting means and each service, feeder, or branch circuit at the point where it originated and the type marking needed.

(b) Plug fuses and fuseholders shall be tamper-resistant, Type "S," enclosed in dead-front fuse panelboards. Electrical distribution panels containing circuit breakers shall also be dead-front type.

(c) Disconnectiong means. A single disconnecting means shall be provided in each mobile home consisting of a circuit breaker, or a switch and fuses and their accessories installed in a readily accessible location near the point of entrance of the supply cord or conductors into the mobile home. The main circuit breakers or fuses shall be plainly marked "Main." This equipment shall contain a solderless type of grounding connector or bar for the purposes of grounding with sufficient terminals for all grounding conductors. The neutral bar termination of the grounded circuit conductors shall be insulated.

(d) The disconnecting equipment shall have a rating suitable for the connected load. The distribution equipment, either circuit breaker or fused type, shall be located a minimum of 24 inches from the bottom of such equipment to the floor level of the mobile home. There shall be a label attached to the panelboard stating: This Panelboard shall be connected by a Feeder Assembly having Overcurrent Protection rated at not more than _____ Amperes. The correct ampere rating shall be marked in the blank space.

(e) A distribution panelboard employing a main circuit breaker shall be rated 50 amperes and employ a 2-pole circuit breaker rated 40 amperes for a 40-ampere supply cord, or 50 amperes for a 50-ampere supply cord. A distribution panelboard employing a disconnect switch and fuses shall be rated 60 amperes and shall employ a single 2-pole, 60-ampere fuseholder with 40- or 50-ampere main fuses for 40- or 50-ampere supply cords, respectively. The outside of the distribution panelboard shall be plainly marked with the fuse size.

(f) The distribution panelboard shall not be located in a bathroom, or in any other inaccessible location, but shall be permitted just inside a closet entry if the location is such that a clear space of 6 inches to easily ignitable materials is maintained in front of the distribution panelboard, and the distribution panelboard door can be extended to its full open position (at least 90 degrees). A clear working space at least 30 inches wide and 30 inches in front of the distribution panelboard shall be provided. This space shall extend from floor to the top of the distribution panelboard.

(g) Branch-circuit distribution equipment shall be installed in each mobile home and shall include overcurrent protection for each branch circuit consisting of either circuit breakers or fuses.

(1) The branch circuit overcurrent devices shall be rated: (i) not more than the circuit conductors; and (ii) not more than 150 percent of the rating of a single appliance rated 10 amperes or more which is supplied by an individual branch circuit; but (iii) not more than the fuse size marked on the air conditioner or other motor-operated appliance.

(h) A 15-ampere multiple receptacle shall be acceptable when connected to a 20-ampere laundry circuit.

(i) When circuit breakers are provided for branch-circuit protection, 230-volt circuits shall be protected by 2-pole common or companion trip, or handle-tied paired circuit breakers.

(j) A metal nameplate on the outside adjacent to the feeder assembly entrance shall read: This Connection for 120/240 Volt, 3-Pole, 4-Wire, 60 Hertz_____ Ampere Supply. The correct ampere rating shall be marked in the blank space.

§ 280.805 Branch circuits required.

(a) The number of branch circuits required shall be determined in accordance with the following:

(1) *Lighting.* Based on 3 watts per square foot times outside dimensions of the mobile home (coupler excluded) divided by 115 volts times amperage to determine number of 15- or 20-ampere lighting area circuits, e.g.,

$$\frac{3 \times \text{Length} \times \text{Width}}{115 \times 15 \text{ (or } 20)} = \text{No. of 15 (or 20) ampere circuits}$$

(2) *Portable appliances.* For the small appliance load in kitchen, pantry, family room, dining room and breakfast rooms of mobile homes, two or more 20-ampere appliance branch circuits, in addition to the branch circuit specified in § 280.805 (a)(1), shall be provided for all receptacle outlets in these rooms, and such circuits shall have no other outlets. Receptacle outlets supplied by at least two appliance receptacle branch circuits shall be installed in the kitchen.

(3) *General appliances (Including furnace, water heater, range, and central or room air conditioner, etc.).* There shall be one or more circuits of adequate rating in accordance with the following: (i) Ampere rating of fixed appliances not over 50 percent of circuit rating if lighting outlets (receptacles, other than kitchen, dining area, and laundry, considered as lighting outlets) are on same circuit; (ii) For fixed appliances on a circuit without lighting outlets, the sum of rated amperes shall not exceed the branch-circuit rating for other than motor loads or 80 percent of the branch-circuit rating for air conditioning or other motor loads; (iii) The rating of a single portable appliance on a circuit having no other outlets shall not exceed 80 percent of the circuit rating; (iv) The rating of range branch circuit shall be based on the range demand as specified for ranges in § 280.811, Item B(5) of Method 1. For central air conditioning, see Article 440 of the National Electrical Code (NFPA No. 70—1975). (v) Where laundry facilities are provided in a mobile home, a 20-ampere branch circuit shall be provided within 6 feet of the intended location of the appliance. See § 280.804(j).

§ 280.806 Receptacle Outlets.

(a) All receptacle outlets shall be:

(1) Of grounding type;

(2) Installed according to Section 210-7 of the National Electrical Code (NFPA No. 70 ___ 1975) and

(3) Except when supplying specific appliances, be parallel-blade, 15-ampere, 125-volt, either single or duplex.

(b) All 120 volt single phase, 15 and 20 ampere receptacle outlets, including receptacles in light fixtures, installed outdoors and in bathrooms shall have ground-fault circuit protection for personnel. Feeders supplying branch circuits may be protected by a ground-fault circuit-interrupter in lieu of the provision for such interrupters specified above.

(c) There shall be an outlet of the grounding type for each cord-connected fixed appliance installed.

(d) Receptacle outlets required. Except in the bath and hall areas, receptacle outlets shall be installed at wall spaces 2 feet wide or more, so that no point along the floor line is more than 6 feet, measured horizontally, from an outlet in that space. In addition, a receptacle outlet shall be installed:

(1) Over or adjacent to counter tops in the kitchen (at least one on each side of the sink if counter tops are on each side and 12 inches or over in width).

(2) Adjacent to the refrigerator and free-standing gas-range space.

(3) At counter top spaces for built-in vanities.

(4) At counter top spaces under wall-mounted cabinets.

(5) In the wall, at the nearest point where a bar type counter attaches to the wall.

(6) In the wall at the nearest point where a fixed room divider attaches to the wall.

(7) In laundry area.

(8) At least one receptacle outlet shall be installed outdoors. Receptacle outlets located in compartments accessible from outdoors shall be considered outdoor receptacles and shall be protected as required in § 280.806(b).

(9) Adjacent to bathroom basins or integral with the light fixture over the bathroom basin.

(10) Receptacle outlets are not required in the following locations: (i) wall space occupied by built-in kitchen or wardrobe cabinets, (ii) wall space behind doors which may be opened fully against a wall surface, (iii) room dividers of the lattice type, less than 8 feet long, not solid within 6 inches of the floor, (iv) wall space afforded by bar type counters.

(e) Receptacle outlets shall not be installed in or within reach (30 inches) of a shower or bathtub space.

(f) Receptacle outlets shall not be installed above electric baseboard heaters.

§ 280.807 Fixtures and appliances.

(a) Electrical materials, devices, appliances, fittings, and other equipment installed, intended for us in, or attached to the mobile home shall be approved for the application and shall be connected in an approved manner when in service. Facilities shall be provided to securely fasten appliances when the mobile home is in transit. (See § 280.809.)

(b) Specifically listed pendant-type fixtures or pendant cords shall be permitted in mobile homes.

(c) If a lighting fixture is provided over a bathtub or in a shower stall, it shall be of the enclosed and gasketed type, listed for wet locations.

(d) The switch for shower lighting fixtures and exhaust fans located over a tub or in a shower stall shall be located outside the tub shower space. (See § 280.806(e).)

(e) Any combustible wall or ceiling finish exposed between the edge of a fixture, canopy, or pan and an outlet box shall be covered with noncombustible material.

(f) Every appliance shall be accessible for inspection, service, repair, or replacement without removal of permanent construction.

§ 280.808 Wiring methods and materials.

(a) Except as specifically limited in this Part, the wiring methods and materials specified in the National Electrical Code (NFPA No. 70—1975) shall be used in mobile homes.

(b) Nonmetallic outlet boxes shall be acceptable only with nonmetallic cable.

(c) Nonmetallic cable located 15 inches or less above the floor, if exposed, shall be protected from physical damage by covering boards, guard strips, or conduit. Cable likely to be damaged by stowage shall be so protected in all cases.

(d) Nonmetallic sheathed cable shall be secured by staples, straps, or similar fittings so designed and installed as not to injure any cable. Cable shall be secured in place at intervals not exceeding 4½ feet and within 12 inches from every cabinet, box or fitting.

(e) Metal-clad and nonmetallic cables shall be permitted to pass through the centers of the wide side of 2-inch by 4-inch studs. However, they shall be protected where they pass through 2-inch by 2-inch studs or at other studs or frames where the cable or armor would be less than 1½ inches from the inside or outside surface of the studs when the wall covering materials are in contact with the studs. Steel plates on each side of the cable, or a tube, with not less than No. 16 MSG wall thickness shall be required to protect the cable. These plates or tubes shall be securely held in place.

(f) Where metallic faceplates are used they shall be effectively grounded.

(g) If the range, clothes dryer, or similar appliance is connected by metal-clad cable or flexible conduit, a length of not less than three feet of free cable or conduit shall be provided to permit moving the appliance. Type NM or Type SE cable shall not be used to connect a range or a dryer. This shall not prohibit the use of Type NM or Type SE cable between the branch circuit overcurrent protective device and a junction box or range or dryer receptacle.

(h) Threaded rigid metal conduit shall be provided with a locknut inside and outside the box, and a conduit bushing shall be used on the inside. Rigid nonmetallic conduit shall be permitted. Inside ends of the conduit shall be reamed.

(i) Switches shall be rated as follows:

(1) For lighting circuits, switches shall have a 10-ampere, 120–125 volt rating; or higher if needed for the connected load.

(2) For motors or other loads, switches shall have ampere or horsepower ratings, or both, adequate for loads controlled. (An "AC general-use" snap switch shall be permitted to control a motor 2 horsepower or less with full-load current not over 80 percent of the switch ampere rating).

(j) At least 4 inches of free conductor shall be left at each outlet box except where conductors are intended to loop without joints.

(k) When outdoor or under-chassis line-voltage wiring is exposed to moisture or physical damage, it shall be protected by rigid metal conduit. The conductors shall be suitable for wet locations. Electrical metallic tubing may be used when closely routed against frames and equipment enclosures.

(l) The cables or conductors shall be Type NMC, TW, or equivalent.

(m) Outlet boxes of dimensions less than those required in Table 370–6(a) of the National Electrical Code (NFPA No. 70–1975), shall be permitted provided the box has been tested and approved for the purpose.

(n) Boxes, fittings and cabinets shall be securely fastened in place, and shall be supported from a structural member of the home, either directly or by using a substantial brace. Snap-in type boxes provided with special wall or ceiling brackets that securely fasten boxes in walls or ceilings shall be permitted.

(o) Outlet boxes shall fit closely to openings in combustible walls and ceilings, and they shall be flush with such surfaces.

(p) Appliances having branch-circuit terminal connections which operate at temperatures higher than 60°C (140°F) shall have circuit conductors as described in paragraph (p) (1) and (2) of this section:

(1) Branch-circuit conductors having an insulation suitable for the temperature encountered shall be permitted to run directly to the appliance.

(2) Conductors having an insulation suitable for the temperature encountered shall be run from the appliance terminal connections to a readily accessible outlet box placed at least one foot from the appliance. These conductors shall be in a suitable raceway which shall extend for at least 4 feet.

§ 280.809 Grounding.

(a) *General.* Grounding of both electrical and nonelectrical metal parts in a mobile home shall be through connection to a grounding bus in the mobile home distribution panelboard. The grounding bus shall be grounded through the green-colored conductor in the supply cord or the feeder wiring to the service ground in the service-entrance equipment located adjacent to the mobile home location. Neither the frame of the mobile home nor the frame of any appliance shall be connected to the neutral conductor in the mobile home.

(b) *Insulated neutral.* (1) The grounded circuit conductor (neutral) shall be insulated from the grounding conductors and from equipment enclosures and other grounded parts. The grounded (neutral) circuit terminals in the distribution panelboard and in ranges, clothes dryers, counter-mounted cooking units, and wall-mounted ovens shall be insulated from the equipment enclosure. Bonding screws, straps, or buses in the distribution panelboard or in appliances shall be removed and discarded.

(2) Connection of ranges and clothes dryers with 115/230-volt, 3-wire ratings shall be made with 4-conductor cord and 3-pole, 4-wire grounding type plugs, or by Type AC metal-clad cable or conductors enclosed in flexible metal conduit. For 115-volt rated devices, a 3-conductor cord and a 2-pole, 3-wire grounding-type plug shall be permitted.

(c) *Equipment grounding means.* (1) The green-colored grounding wire in the supply cord or permanent feeder wiring shall be connected to the grounding bus in the distribution panelboard or disconnecting means.

(2) In the electrical system, all exposed metal parts, enclosures, frames, lamp fixture canopies, etc., shall be effectively bonded to the grounding terminal or enclosure of the distribution panelboard.

(3) Cord-connected appliances, such as washing machines, clothes dryers, refrigerators, and the electrical system of gas ranges, etc., shall be grounded by means of an approved cord with grounding conductor and grounding-type attachment plug.

(d) *Bonding of noncurrent-carrying metal parts.* (1) All exposed noncurrent-carrying metal parts that may become energized shall be effectively bonded to the grounding terminal or enclosure of the distribution panelboard. A bonding conductor shall be connected between each distribution panelboard and an accessible treminal on the chassis.

(2) Grounding terminals shall be of the solderless type and approved as pressure-terminal connectors recognized for the wire size used. Star washers or other approved paint-penetrating fitting shall be used to bond terminals to chassis or other coated areas. The bonding conductor shall be solid or stranded, insulated or bare and shall be No. 8 copper mini-

V 40 244 DEC 18 75 XUM

mum, or equal. The bonding conductor shall be routed so as not to be exposed to physical damage. Protection can be afforded by the configuration of the chassis.

(3) Metallic gas, water and waste pipes and metallic air-circulating ducts shall be considered bonded if they are connected to the terminal on the chassis (see § 280.809) by clamps, solderless connectors, or by suitable grounding-type straps.

(4) Any metallic roof and exterior covering shall be considered bonded if (i) the metal panels overlap one another and are securely attached to the wood or metal frame parts by metallic fasteners, and (ii) if the lower panel of the metallic exterior covering is secured by metallic fasteners at a cross member of the chassis by two metal straps per mobile home unit or section at opposite ends. The bonding strap material shall be a minimum of 4 inches in width of material equivalent to the skin or a material of equal or better electrical conductivity. The straps shall be fastened with paint-penetrating fittings (such as screws and star washers or equivalent).

§ 280.810 Electrical testing.

(a) Dielectric Strength Test. The wiring of each mobile home shall be subjected to a 1-minute, 900-volt dielectric strength test (with all switches closed) between live parts (including neutral) and the mobile home ground. Alternatively, the test may be performed at 1,080 volts for 1 second. This test shall be performed after branch circuits are complete and after fixtures or appliances are installed. Fixtures or appliances which are listed shall not be required to withstand the dielectric strength test.

(b) Each mobile home shall be subjected to: (1) A continuity test to assure that metallic parts are properly bonded. (2) Operational test to demonstrate that all equipment is connected and in working order and (3) Polarity checks to determine that connections have been properly made.

§ 280.811 Calculations.

(a) The following method shall be employed in computing the supply-cord and distribution-panelboard load for each feeder assembly for each mobile home and shall be based on a 3-wire, 115/230-volt supply with 115-volt loads balanced between the two legs of the 3-wire system. The total load for determining power supply by this method is the summation of:

(1) Lighting and small appliance load as calculated below:

(i) Lighting Watts: Length times width of mobile home (outside dimensions exclusive of coupler) times 3 watts per square foot; e.g. Length × width × 3=lighting watts.

(ii) Small Appliance Watts: Number of circuits times 1,500 watts for each 20-ampere appliance receptacle circuit (See definition of "Appliance Portable" with note): e.g. Number of circuits × 1,500= small appliance watts.

(iii) Total Watts: Lighting watts plus, small appliance=total watts.

(iv) First 3,000 total watts at 100 percent plus remainder at 35 percent=watts to be divided by 230 volts to obtain current (amperes) per leg.

(2) Nameplate amperes for motors and heater loads (exhaust fans, air conditioners, electric, gas, or oil heating). Omit smaller of air conditioning and heating except include blower motor if used as air conditioner evaporator motor. When an air conditioner is not installed and a 40-ampere power supply cord is provided, allow 15 amperes per leg for air conditioning.

(3) 25 percent of current of largest motor in (2).

(4) Total of nameplate amperes for: Disposal, dishwasher, water heater, clothes dryer, wall-mounted oven, cooking units. Where number of these appliances exceeds three, use 75 percent of total.

(5) Derive amperes for free-standing range (as distinguished from separate ovens and cooking units) by dividing values below by 230 volts.

Name plate rating (in watts)	*Use (in watts)*
10,000 or less	80 percent of rating.
10,001 to 12,500	8,000.
12,501 to 13,500	8,400.
13,501 to 14,500	8,800
14,501 to 15,500	9,200.
15,501 to 16,500	9,600.
16,501 to 17,500	10,000.

(6) If outlets or circuits are provided for other than factory-installed appliances include the anticipated load. The following example is given to illustrate the application of this Method of Calculation:

Example. A mobile home is 70×10 feet and has two portable appliance circuits, a 1000 watt 230 volt heater, a 200 watt 115 volt exhaust fan, a 400 watt 115 volt dishwasher and a 7000 watt electric range.

Lighting and small appliance load:	*Watts*
Lighting 70×10×3	2,100
Small appliance 1,500×2	3,000
Total	5,100
1st 3,000 W at 100 pct	3,000
Remainder (5,100−3,000=2,100) at 35 pct	735
Total	3,735

$$\frac{3,735}{230}=16 \text{ A per leg}$$

1,000 W (heater) ÷230=4.4 A.
200 W (fan) ÷115=1.7 A.
400 W (dishwaster) ÷115=3.5 A.
7,000 W (range)×0.8÷230=24.0 A.

	Amperes per leg A	B
Lighting and appliances	16	16
Heater (230 V)	4	4
Fan (115 V)	2	
Dishwasher (115 V)		4
Range	24	24
Totals	40	48

NOTE.—Based on the higher current calculated for either leg, use one 50-A supply cord.

(b) The following is an optional method of calculation for lighting and appliance loads for mobile homes served by a single 3-wire 115/230 volt set of feeder conductors with an ampacity of 100 or greater. The total load for determining the feeder ampacity may be computed in accordance with the following Table instead of the method previously specified. Feeder conductors whose demand load is determined by this optional calculation shall be permitted to have the neutral load determined by Section 220–22 of the National Electrical Code. The loads identified in the Table as "other load" and as "Remainder of other load" shall include the following:

(1) 1500 watts for each 2-wire, 20-ampere small appliance branch circuit and each laundry branch circuit specified.

(2) 3 watts per square foot for general lighting and general-use receptacles.

(3) The nameplate rating of all fixed appliances, ranges, wall-mounted ovens, counter-mounted cooking units, and including 4 or more separately controlled space heating loads.

(4) The nameplate ampere or kVA rating of all motors and of all low-power-factor loads.

(5) The largest of the following: (i) air conditioning load; (ii) the 65 percent diversified demand of the central electric space heating load; (iii) the 65 percent diversified demand of the load of less than four separately-controlled electric -space heating units; (iv) the connected load of four or more separately-controlled electric space heating units.

OPTIONAL CALCULATION FOR MOBILE HOMES WITH 110-AMPERE OR LARGER SERVICE

Load (in kilowatt or kilovoltampere):	*Demand factor (percent)*
Air-conditioning and cooling including heat pump compressors	100
Central electric space heating	65
Less than 4 separately controlled electric space heating units	65
1st 10 kW of all other load	100
Remainder of other load	40

§ 280.812 Wiring of expandable units and dual units.

(a) Expandable or multiple unit mobile homes shall use fixed-type wiring methods and materials for connecting such units to each other.

(b) Expandable or multiple unit mobile homes not having permanently installed feeders and which are to be moved from one location to another, shall be permitted to have disconnecting means with branch circuit protective equipment in each unit when so located that after assembly or joining together of units the requirements of § 280.803 will be met.

§ 280.813 Outdoor outlets, fixtures, air-conditioning equipment, etc.

(a) Outdoor fixtures and equipment shall be listed or approved for outdoor use. Outdoor receptacles or convenience outlets shall be of a gasketed-cover type.

(b) A mobile home provided with an outlet designed to energize heating and/or air conditioning equipment located outside the mobile home, shall have permanently affixed, adjacent to the outlet, a metal tag which reads:

This Connection Is for Air Conditioning Equipment Rated at Not More Than ------ Amperes, at ------ Volts, 60 Hertz. A disconnect shall be located within sight of the appliance.

The correct voltage and ampere ratings shall be given. The tag shall be not less than 0.020 inch, etched brass, stainless steel, anodized or alclad aluminum or equivalent. The tag shall be not less than 3 inches by 1¾ inches minimum size.

§ 280.814 Painting of wiring.

During painting or staining of the mobile home, it shall be permitted to paint metal raceways (except where grounding continuity would be reduced) or the sheath of the nonmetallic cable. Some arrangement, however, shall be made so that no paint shall be applied to the individual wires, as the color coding may be obliterated by the paint.

§ 280.815 Polarization.

(a) The identified (white) conducter shall be employed for grounding circuit conductors only and shall be connected to the identified (white) terminal or lead on receptacle outlets and fixtures. It shall be the unswitched wire in switched circuits, except that a cable containing an identified conductor (white) shall be permitted for single-pole three-way or four-way switch loops where the connections are made so that the unidentified conductor is the return conductor from the switch to the outlet. Painting of the terminal end of the wire shall not be required.

(b) If the identified (white) conductor of a cable is used for other than grounded conductors or for other than switch loops as explained above (for a 230-volt circuit, for example), the conductor shall be finished in a color other than white at each outlet where the conductors are visible and accessible.

(c) Green-colored wires or green with yellow stripe shall be used for grounding conductors only.

§ 280.816 Examination of equipment for safety.

The examination or inspection of equipment for safety, according to this standard, shall be conducted under uniform conditions and by organizations properly equipped and qualified for experimental testing, inspections of the run of goods at factories, and service-value determinations through field examinations.

Subpart J—Transportation

§ 280.901 Scope.

Subpart J of this Standard covers the general requirement for designing the structure of the mobile home to fully withstand the adverse effects of transportation shock and vibration without degradation of the integrated structure or of its component parts and the specific requirements pertaining to the transportation system and its relationship to the structure.

§ 280.902 Definitions.

(a) "Chassis" means the entire transportation system comprising the following subsystems: drawbar and coupling mechanism, frame, running gear assembly, and lights.

(b) "Drawbar and Coupling Mechanism" means the rigid assembly, (usually an "A" frame) upon which is mounted a coupling mechanism, which connects the mobile home's frame to the towing vehicle.

(c) "Frame" means the fabricated rigid substructure which provides considerable support to the affixed mobile home structure both during transport and on-site; and also provides a platform for securement of the running gear assembly, the drawbar and coupling mechanism.

(d) "Running Gear Assembly" means the subsystem consisting of suspension springs, axles, bearings, wheels, hubs, tires, and brakes, with their related hardware.

(e) "Lights" means those safety lights and associated wiring required by applicable U.S. Department of Transportation regulations.

(f) "Transportation System," (Same as Chassis, above).

(g) "Highway," includes all roads and streets to be legally used in transporting the mobile home.

(h) "Length," for purposes of transportation only, means the distance from the extreme front of the mobile home to the extreme rear, including the drawbar and coupling mechanism, but not including expandable features that do not project from the body during transportation.

§ 280.903 General requirements for designing the structure to withstand transportation shock and vibration.

(a) The cumulative effect of highway transportation shock and vibration upon a mobile home structure may result in incremental degradation of its designed performance in terms of providing a safe healthy and durable dwelling. Therefore, the mobile home shall be designed, in terms of its structural, plumbing, mechanical and electrical systems, to fully withstand such transportation forces during its intended life. (See §§ 280.303 (c) and 280.305(a)).

(b) Particular attention shall be given to maintaining watertight integrity and conserving energy by assuring that structural components in the roof and walls (and their interfaces with vents, windows, doors, etc.) are capable of resisting highway shock and vibration forces during primary and subsequent secondary transportation moves.

(c) In place of an engineering analysis, either of the following may be accepted: (1) Documented technical data of suitable highway tests which were conducted to simulate transportation loads and conditions; or (2) acceptable documented evidence of actual transportation experience which meets the intent of this subpart.

§ 280.904 Specific requirements for designing the transportation system.

(a) *General.* The entire system (frame, drawbar and coupling mechanism, running gear assembly, and lights) shall be designed and constructed as an integrated, balanced and durable unit which is safe and suitable for its specified use during the intended life of the mobile home. In operation, the transportation system (supporting the mobile home structure and its contents) shall effectively respond to the control of the towing vehicle in terms of tracking and braking, while traveling at applicable highway speeds and in normal highway traffic conditions.

(NOTE: While the majority of mobile homes utilize a fabricated steel frame assembly, upon which the mobile home structure is constructed, it is not the intent of this standard to limit innovation. Therefore, other concepts, such as integrating the frame function into the mobile home structure, are acceptable provided that such design meets the intent and requirements of this part).

(b) *Specific requirements*—(1) *Drawbar.* The drawbar shall be constructed of sufficient strength, rigidity and durability to safely withstand those dynamic forces experienced during highway transportation. It shall be securely fastened to the mobile home frame by either a continuous weld or by bolting.

(2) *Coupling mechanism.* The coupling mechanism (which is usually of the socket type) shall be securely fastened to the drawbar in such a manner as to assure safe and effective transfer of the maximum loads, including dynamic loads, between the mobile home structure and the hitch-assembly of the towing vehicle. The coupling shall be equipped with a manually operated mechanism so adapted as to prevent disengagement of the unit while in operation. The coupling shall be so designed that it can be disconnected regardless of the angle of the mobile home to the towing vehicle. With the mobile home parked on level ground, the center of the socket of the coupler shall not be less than 20 inches nor more than 26 inches from ground level.

(3) *Chassis.* The chassis, in conjunction with the mobile home structure, shall be designed and constructed to effectively sustain the designed loads consisting of the dead load plus a minimum of 3 pounds per square foot floor load, (example: free-standing range, refrigerator, and loose furniture) and the superimposed dynamic load resulting from highway movement but shall not be required to exceed twice the dead load. The integrated design shall be capable of insuring rigidity and structural integrity of the complete mobile home structure and to insure against deformation of structural or finish members during the intended life of the home.

(4) *Running gear assembly.* (i) The running gear assembly, as part of the chassis, shall be designed to perform, as a balanced system, in order to effectively sustain the designed loads set forth in § 280.904(b)(3) and to provide for dur-

V 40 244 DEC 18 75 XUM

THURSDAY, DECEMBER 18, 1975

able dependable safe mobility of the mobile home. It shall be designed to accept shock and vibration, both from the highway and the towing vehicle and effectively dampen these forces so as to protect the mobile home structure from damage and fatigue. Its components shall be designed to facilitate routine maintenance, inspection and replacement.

(ii) Location of the running gear assembly shall be determined by documented engineering analysis, taking into account the gross weight (including all contents), total length of the mobile home, the necessary coupling hitch weight, span distance, and turning radius. The coupling weight shall be not less than 12 percent nor more than 25 percent of the gross weight.

(5) *Spring assemblies.* Spring assemblies (springs, hangers, shackles, bushings and mounting bolts) shall be capable of withstanding all the design loads as outlined in 280.904(b)(3) without exceeding maximum allowable stresses for design spring assembly life as recommended by the spring assembly manufacturer. The capacity of the spring system shall assure, that under maximum operating load conditions, sufficient clearance shall be maintained between the tire and mobile home frame or structure to permit unimpeded wheel movement and for changing tires.

(6) *Axles.* Axles, and their connecting hardware, shall be capable of withstanding all of the design loads outlined in § 280.904(b)(3) without exceeding maximum allowable stresses for design axle life as recommended by the axle manufacturer. The number of axles required to provide a safe tow and good ride characteristics shall be determined and documented by engineering analysis. Those alternatives listed in § 280.903(c) may be accepted in place of such an analysis.

(7) *Hubs and bearings.* Hubs and bearings shall meet the requirements of § 280.904(b)(3) and good engineering practice. Both of these components shall be accessible for inspection, routine maintenance and replacement of parts.

(8) *Tires, wheels and rims.* Tires, wheels and rims shall meet the requirements of § 280.904(b)(3). Tires shall be selected for anticipated usage.

(9) *Brake assemblies.* (i) The number, type, size and design of brake assemblies required to assist the towing vehicle in providing effective control and stopping of the mobile home shall be determined and documented by engineering analysis. Those alternatives listed in § 280.903(c) may be accepted in place of such an analysis.

(ii) Brakes on the towing vehicle and the mobile home shall be capable of assuring that the maximum stopping distance from an initial velocity of 20 miles per hour does not exceed 40 feet (U.S. Department of Transportation Regulations).

(10) *Lights and associated wiring.* Highway safety electrical lights and associated wiring shall conform to applicable federal requirements in terms of location and performance. The manufacturer shall have the option of meeting this requirement by utilizing a temporary light/wiring harness provided by the mobile home transportation carrier.

PART III:

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

PRESCRIPTION DRUGS

Reminder Labeling and Reminder Advertisements

V 40 244 DEC 18 75 XUM

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER C—DRUGS: GENERAL

[Docket No. 75N-0271]

REMINDER LABELING AND REMINDER ADVERTISEMENTS FOR PRESCRIPTION DRUGS

The Commissioner of Food and Drugs is amending, effective January 19, 1976, the regulations concerning reminder labeling and reminder advertisements under §§ 201.100 and 202.1 (21 CFR 201.100 and 202.1, formerly 21 CFR 1.106 and 1.105 respectively) to: (1) Delete the quantitative formula information requirement from reminder advertisements under § 202.1, (2) prohibit the use of reminder advertisements and reminder labeling, other than price lists and catalogs intended to convey price information to consumers, for prescription drug products whose labeling contains a boxed warning indicating a serious hazard associated with the use of the drug product, and (3) specify, under a new § 200.200 (21 CFR 200.200, proposed as 21 CFR 1.111), the required information to be included in reminder labeling and reminder advertisements whose sole purpose is to convey prescription price information to consumers. The regulation does not, however, require the public disclosure of prescription price information.

These amendments were proposed in notices published in the FEDERAL REGISTER of November 21, 1973 (38 FR 32140) and June 19, 1974 (39 FR 21165). In stating the comments and the Commissioner's response, the recodified section numbers are used.

In response to the November 21, 1973 proposal, 137 comments or inquiries were received from trade and professional associations, chain drug stores, individual pharmacists, university professors, individual consumers, manufacturers, consumer organizations, boards of pharmacy, and Federal and State agencies. The majority of comments were directed to proposed § 200.200. Some comments favored the objectives of the proposal but offered suggestions for modification based on experience with public disclosure, i.e., advertising or posting, of prescription drug prices. A few comments objected to the proposal without stating the reasons for such objections. Some comments expressed objections, based upon an erroneous interpretation of that proposal, that the regulation would require public disclosure of prescription drug prices. Two comments, one from a manufacturer and one from a professional association, were received on the June 19, 1974 proposal regarding the use of reminder advertisements and reminder labeling for prescription drugs whose labeling contains a boxed warning indicating a serious hazard associated with the use of the drug product. The comments submitted and the Commissioner's conclusions are as follows:

1. One consumer organization expressed the view that the Food and Drug Administration and the White House Office of Consumer Affairs "have launched a campaign to legalize the advertising of prescription prices on the grounds that price competition can be a spur to reducing health cost." The comment disagreed with the view that consumer "price shopping" is the most effective way of achieving a reduction in health costs. The comment stated that health costs can be reduced more effectively by a cooperative system of consumers, pharmacists, physicians, and other health care providers working together as this organization is attempting to do.

The Commissioner wishes to make it clear that the Food and Drug Administration has not "launched a campaign" on the issue of the advertising of prescription drug prices. The Federal Food, Drug, and Cosmetic Act requires the Food and Drug Administration to regulate all prescription drug advertising and labeling; therefore, this agency is obligated to promulgate whatever requirements are applicable for drug price disclosure. Retail pharmacies are neither required by the act to publicly disclose prescription drug price information, nor are they prohibited from posting price lists or otherwise publicly disclosing the prices charged for particular drug prescriptions. These amendments will ensure that the public disclosure of prescription prices, where the pharmacist elects to post or otherwise advertise prices for prescription drugs, meets all requirements of the act. The decision to engage in public disclosure of prescription prices is not for the Food and Drug Administration to make; these amendments merely constitute a mechanism by which this can be done consistent with the requirements for labeling and advertising under the Federal Food, Drug, and Cosmetic Act.

2. A number of comments objected to the detailed information which would be required under the proposed § 200.200 for reminder advertisements and reminder labeling when the only purpose is to provide consumers with information concerning the price charged for a prescription for a particular drug. The comments stated that price posting should be simple and readable.

The Commissioner agrees that the public disclosure of prescription prices should be simple and readable regardless of the type of media used to convey such information to the consumer. The final regulation has, therefore, been revised to simplify the requirements. The Commissioner concludes that all reminder advertisements and reminder labeling intended to provide consumers with information concerning the price charged for a prescription for a drug product shall contain the proprietary name of the drug product, if any; the established (generic) name of the drug product, if any; the drug product's strength if it is a single active ingredient product or if the drug product contains more than one active ingredient and a relevant strength can be associated with the product without indicating each active ingredient; the dosage form; and the price charged for a prescription for a specific quantity of the drug product. The price stated in the reminder advertisement or reminder labeling as that charged for a prescription shall include all charges applicable to the consumer including, but not limited to, the cost of the drug product, professional fees, and handling fees, if any. Other written, printed, or graphic matter is permitted in reminder advertisements or reminder labeling intended to provide prescription price information to consumers, provided such information is not false or misleading and contains no representation or suggestion concerning the drug product's safety, effectiveness, or indications for use. The Commissioner points out that it is not the intent of this regulation to prohibit the inclusion of a statement in reminder advertisements or reminder labeling that discounts or price reductions are available to certain groups of consumers, e.g., senior citizens.

3. Several comments argued that consumers need valid information reflecting "value" and not just price alone with regard to prescription drug expenditures, and that adequate information on which to make price-value comparisons and judgments is not required under the proposed § 200.200. The proposed regulation required that the price stated in the reminder advertisement or reminder labeling for a prescription include all charges to the consumer including, but not limited to, the cost of the drug product, professional fees, handling fees, and mailing fees, if any. The comments suggested that the regulation require a statement as to what professional and/or convenience services are provided by a pharmacy and, if provided, whether they are included as a component of the price charged for the prescription. One comment suggested that charges which are not regularly included in all sales transactions be listed separately, if at all, and that mailing fees be listed separately without repetition.

The Commissioner concludes that information relating to those professional and/or convenience services provided by a pharmacy may be included in reminder advertisements and reminder labeling intended to provide consumers with price information under § 200.200. As previously stated, the listed price must include all charges including professional and/or convenience services which are applicable to the consumer. The cost for those services which are not applicable to all consumers, e.g., delivery fees and mailing fees, if any, may be listed separately and without repetition. Therefore, § 200.200 has been revised accordingly. As noted in item 2. of this preamble, the reminder advertisement or reminder labeling may also specify that discounts or price reductions are available to specific groups of consumers, e.g., senior citizens.

4. A number of comments questioned the need for the established name of the drug product when its trade name is declared or when it is not marketed generically. Some comments recommended posting the drug product by its commonly prescribed name rather than by the trade name and established name, if any.

The Commissioner advises that the requirement for including the established name of the drug product, if any, in reminder advertisements and reminder labeling under § 200.200 is consistent with the mandate of the Federal Food, Drug, and Cosmetic Act to require labeling to contain the established name of a drug product and with the intent of Congress to associate the established name of a drug product with its proprietary name. This mandate and intent apply to single active ingredient products and to those products containing more than one active ingredient which have an established (generic) name regardless of whether the product is marketed generically. The Commissioner advises that there are few established names for products containing more than one active ingredient and concludes that, in the absence of an established name for a combination product, it would be impracticable to require the established name for each active ingredient, particularly on price boards or posters. In addition, the Commissioner concludes that requiring the established (generic) name of a drug product only when the product is marketed generically would be an administrative burden to the pharmacist. This would require that a pharmacist know when a drug product becomes available from multiple sources and to update his reminder advertisement or reminder labeling periodically to add the established name to each such drug product.

Further, the Food and Drug Administration would like to encourage generic thinking on the part of physicians, pharmacists, and consumers. This policy is furthered by established (generic) name listing, even though the drug product may not be available generically.

5. Comments similarly questioned the need for the established name and quantity of each active ingredient in the drug product.

The Commissioner concludes that requiring lengthy formula information may result in confusion to the consumer without any corresponding benefits. Therefore, the established name and quantity of each active ingredient for a drug product containing more than one active ingredient is not required for reminder advertisements and reminder labeling solely intended to convey prescription price information to consumers. Although section 502(e)(1)(A)(ii) of the Federal Food, Drug, and Cosmetic Act and 21 CFR 201.10 (a), (c)(1), and (h) regarding drug labeling and 21 CFR 202.1 (a) and (e)(2)(i) regarding drug advertising require the established name of each active ingredient, such requirements may be waived by regulation "to the extent that compliance * * * is impracticable * * *." The Commissioner has found, on the basis of samples of price posters and catalogs previously submitted and put on display in the office of the Hearing Clerk, that compliance may be impracticable, particularly on price boards or posters. This requirement has therefore been waived for reminder advertisements and reminder labeling solely intended to provide consumers with the price for a prescription for a drug product. However, the quantity of the active ingredient, i.e., drug product strength, shall be required for reminder advertisements and reminder labeling under § 200.200 for all drug products containing a single active ingredient and for those drug products containing more than one active ingredient to which a relevant strength figure can be associated with the product without indicating each active ingredient, e.g., product A contains chlorothiazide 250 milligrams and reserpine 0.125 milligram; product B contains chlorothiazide 500 milligrams and reserpine 0.125 milligram—relevant strengths of 250 milligrams and 500 milligrams could be indicated for products A and B respectively. The Commissioner concludes that a drug product's strength is essential information to a consumer in determining the price for a prescription for a particular drug product. Although a drug product may not be marketed in more than one strength, a medical practitioner may indicate a drug product's strength on a prescription.

6. Objections were submitted to the requirement that the name of the manufacturer, packer, or distributor of the drug product be indicated and in the same way that it appears on the label of the drug product. The comments stated that the firm name that appears on the label is often not the manufacturer of the drug product; therefore such information would be useless information to the consumer in making price comparisons between manufacturers. One comment argued that inclusion of the name of the "supplier" would endorse the view that generic drugs are "significantly differentiable."

The Commissioner sees no basis for concluding that indicating the name of the manufacturer, packer, or distributor, or supplier would endorse the view that generic drugs are significantly differentiable. However, he concurs in part with the comment that the name of the manufacturer, packer, or distributor is not essential for determining the price of a prescription for a drug product and has deleted this requirement in the final regulation. This regulation does not intend to provide information that would permit comparison of prices between manufacturers, nor does it, however, prohibit a pharmacy from including the name of the manufacturer, packer, or distributor in the reminder advertisement or reminder labeling, if the pharmacy chooses to do so. If included, the firm name may appear in an acceptable abbreviated form provided such abbreviation is not in conflict with that known to be used by any other firm.

7. Comments also objected to requiring designation of the dosage form when the drug product has only one dosage form.

The Commissioner concludes that, in light of medical practitioners' detailed and specific prescribing habit of indicating a drug product's dosage form on a prescription regardless of whether the product is available in more than one dosage form, it is in the public interest to require this information in reminder advertisements and reminder labeling solely intended to provide consumers with price information for a prescription for a drug product. The absence of dosage form information on a price board or poster when a prescription contains such information may be confusing to a consumer.

8. Comments stated that optional information, such as the National Drug Code (NDC) number and package and dosage form trade name, could tend to overload an advertisement with unnecessary information and become a visual distraction or be used by States to require information which would, as a practical matter, discourage advertising.

The Commissioner agrees in part with the comment but concludes that reminder advertisements and reminder labelinb intended to convey prescription price information to a consumer should not be prohibited from containing additional information which may be useful to a consumer. The final regulation under § 200.200 has been modified to state that other written, printed, or graphic matter may be included in reminder advertisements and reminder labeling provided such additional information is neither false nor misleading and contains no representation or suggestion concerning the drug product's safety, effectiveness, or indications for use. The Commissioner advises that if reminder advertisements and reminder labeling under § 200.200 become replete with information not of value to a consumer, or are burdened by trivial, useless requirements intended to discourage advertising, a proposal to amend the regulation will be justified to limit the amount of permissible additional information.

9. Two comments objected to the proposal to permit disclosure of the prices charged for prescription drugs receiving no higher than a "possibly effective" DESI evaluation. One comment also objected to disclosure of prescription prices for those drug products required to carry a boxed warning statement in their advertising and labeling. These comments stated that such drugs may not be the subject of reminder labeling and reminder advertisement under §§ 201.100 and 202.1, respectively. The comments argued that, if promotion of such drugs to physicians and pharmacists is not justified, then promotion of these same drugs to the general public is equally inappropriate.

The Commissioner advises that reminder labeling under § 201.100 and reminder advertisements under § 202.1 are intended to call attention to the name of the drug product, and thereby bring to the attention of the physician the availability of a drug product, but do not include indications or dosage recommendations for use of the drug product, whereas reminder advertisements and reminder labeling under § 200.200 are intended to convey price information on prescription drugs to a consumer. A consumer may purchase a prescription drug only upon a prescription from a medical practitioner. Price posting thus neither promotes nor induces purchase, but

V 40 244 DEC 18 75 5 XUM

only permits informed purchasing decisions after a drug has been prescribed. As long as a drug product is commercially available, a medical practitioner may prescribe it, and, therefore, conveying the price for such a product to a consumer should not be prohibited. Accordingly, no change in the regulation is warranted.

10. One comment objected to the use in proposed § 200.200 of the "sole purpose" wording in stating the conditions for exemption for prescription drug reminder labeling and reminder advertisements from the requirements of §§ 201.100 and 202.1. The comment contended that "those who choose to advertise drug product price information aimed at consumers by means of reminder advertisements and/or reminder labeling obviously have as their purpose creating demand for their particular services or products." The comment requested deletion of the "sole purpose" wording from the proposed § 200.200.

The Commissioner does not agree that the purpose of disclosing drug product price information is to create a demand for a particular product. He has determined that the use of these words is necessary to underscore that the sole purpose of reminder advertisements and reminder labeling under § 200.200 is to provide price information to a consumer. Therefore, no change in the regulation is necessary.

11. Comments were received arguing that the requirements for all forms of reminder advertisements and reminder labeling should be consistent. As proposed, § 200.200 would require the quantitative disclosure of the active ingredients, name of the manufacturer, packer or distributor, dosage form, and price information, but such information is not required under §§ 201.100 and 202.1. The comments differed as to whether the additional required information under § 200.200 should be added to §§ 201.100 and 202.1 or deleted from § 200.200. Some comments contended that it is just as important that reminder labeling and reminder advertisements under §§ 201.100 and 202.1, respectively, which are directed to a physician, contain quantitative ingredient information, dosage form, and price information as it is for this information to be conveyed to a consumer, and that §§ 201.100 and 202.1 should be revised to contain such information. Another comment urged that, if these regulations are truly to benefit the public, they must require that all reminder advertisements and reminder labeling created by manufacturers, packers, and distributors specify the price charged pharmacists for specific quantities of the drug product involved. The comment argued that, if consumer benefits warrant the imposition of the requirements on pharmacists, they warrant its imposition equally on manufacturers, packers, and distributors since pharmacists are "consumers" in fact and also serve as "purchasing agents" for the consumers they serve.

The Commissioner advises that the information required for reminder labeling and reminder advertisements under §§ 201.100 and 202.1, respectively, and for reminder advertisements and reminder labeling under § 200.200 is that information deemed necessary to fulfill the intent of the reminder advertisement or reminder labeling under these sections. The intent of reminder labeling under § 201.100 or reminder advertisements under § 202.1 is to bring to the attention of the medical practitioner the availability of a drug product by calling attention to the name of the drug product. The quantitative ingredient information, name of manufacturer, packer, or distributor, dosage form information and price information are not considered necessary information for fulfilling this intent. Such information may, however, be included in reminder labeling or reminder advertisements under §§ 201.100 and 202.1 as optional information. Further, any price information contained in these reminder advertisements or reminder labeling would not indicate the actual price that a pharmacy would pay for purchasing the drug product or the price a consumer would pay for a prescription since such prices are determined by factors over which a medical practitioner has no control, e.g., purchase of the drug product by the retail pharmacy direct from the manufacturer, packer, or distributor vs. purchase through a wholesaler, quantity of drug product purchased, dispensing fee, etc.

The intent of reminder advertisements and reminder labeling under § 200.200 is to provide consumers with information concerning the price charged for a prescription for a particular drug product. Price is, therefore, a necessity under § 200.200. Quantitative ingredient information, except for single active ingredient drug products, and the name of the manufacturer, packer, or distributor are not required in the final regulation as revised. The dosage form of a drug product is required and is discussed under paragraph 7 of this preamble.

12. One comment suggested that the Food and Drug Administration may be premature in its efforts to implement regulations which would "stifle any further exploration, testing, or examination of new methods and means of providing meaningful information to the consumer."

The proposal to promulgate § 200.200 was in response to numerous inquiries concerning the agency's policy on the posting of prescription prices and to correct misunderstandings as to the agency's requirements. Price disclosure, as part of labeling and advertising, whether in the form of a price list, catalog, or other promotional material and whether mailed, posted in a pharmacy, placed in a newspaper, or aired on radio or television, is subject to Food and Drug Administration regulation. Section 200.200 was promulgated as a separate section in order to enable a pharmacist to clearly understand the precise requirements of reminder advertisements and reminder labeling which are solely intended to provide consumers with information concerning the price charged by a pharmacy for a prescription for a drug product. In addition, by specifying the kinds of required information, the Commissioner intends to ensure that such reminder advertisements and reminder labeling contain all the information needed by a consumer to make effective price determinations.

The Commissioner encourages exploration, testing, and examination of new methods and means of providing meaningful information to the consumer. If problems arise, the Commissioner may restrict the flexibility permitted by this regulation at a later date (as noted in comment 8).

13. Comments were received recommending modification of the proposed regulations so as not to override or conflict with more stringent State and local requirements relating to advertising or price posting of prescription drugs.

The Commissioner acknowledges that this regulation would override State and local requirements which cannot be complied with simultaneously with this regulation, e.g., one which excludes data required to be included by this regulation. The Food and Drug Administration is, however, obligated under the Federal Food, Drug, and Cosmetic Act to assure that such advertising meets the requirements of the act. Section 200.200 provides a mechanism for public disclosure of prescription drug prices consistent with the requirements of the act and provides consumers with the information needed to make meaningful prescription drug price determinations. This regulation does not require the public disclosure of prescription drug prices and therefore does not inhibit States from prohibiting such advertising under their jurisdiction.

The Commissioner is aware of one State law which is in conflict with this final regulation but has not conducted a survey to determine whether there are other conflicting State or local laws. He invites any State or locality that now has or wishes to adopt an order which would conflict with this regulation to submit a petition to the Food and Drug Administration requesting amendment of the requirements of § 200.200.

14. Numerous comments expressed concern that possible price posting/advertising would favor the discount and large chain operations because the independent pharmacies would have to eliminate their professional services in order to compete with the low prices posted by discount and large chain operations. Several comments also expressed concern that these regulations might restrict or destroy the professionalism of the practice of pharmacy because of the possibility that professional services, to remain competitive, would be restricted or even eliminated and that pharmacist-patient interaction would be reduced by eliminating the need for direct consumer inquiry to the pharmacist concerning drug prices and pharmacy services.

The Commissioner concludes that, in the absence of data supporting the fears expressed by the comment, e.g., from States where price posting is already in effect, it is difficult to perceive how the disclosure of prescription drug prices will

result in an elimination of professional services or in any way interfere with a pharmacist's professional function. Also, the economics of the practices of pharmacy are very complex and many factors interrelate between the large discount chain operations and the independent pharmacies. It appears unlikely that any single action such as the posting of prices for prescription drugs will interfere with the professionalism associated with the practice of pharmacy.

15. One comment suggested stressing that any deviation from § 200.200 would result in the drug product being considered misbranded.

The Commissioner agrees with this comment and has modified § 200.200 by adding a new paragraph (c) to state that any reminder advertisement or reminder labeling intended to provide price information to consumers which is not in compliance with the provisions of this regulation shall be the subject of appropriate regulatory action. Such action may be taken against the product and/or the responsible person.

16. Three comments stated that since those organizations who have mail-order prescription service programs would have to revise their catalogs to comply with the provisions of proposed § 200.200, it is not in the public interest in a time of shortages and economic slowdown to destroy catalogs now in stock or in circulation.

The Commissioner has considered the economic impact that § 200.200 may have on organizations who publish catalogs or have other existing reminder advertisements or reminder labeling intended to provide prescription prices to a consumer. He has concluded that it is not unreasonable to expect some reminder labeling, e.g., catalogs, to be revised annually and possibly more frequently in order to provide consumers with up-to-date information on the availability of drug products and their current prices. Therefore, the effective date for revision of existing reminder advertisements and reminder labeling, including catalogs, to bring them into compliance with § 200.200 shall be 12 months from the effective date of this regulation or at the time of the next printing/revision, whichever occurs first.

17. One comment stated that, as published, the proposal prohibits reminder advertisements and reminder labeling from containing "representations or suggestions relating to the drug product" and that such wording is too narrow. The comment argued that communications to practitioners of information such as quality controls used in the production of particular drugs or the physical or chemical quality of a substance should not require accompanying prescribing information and should be covered by the exemptions of §§ 201.100 and 202.1. The comment further recommended revising the definition of reminder labeling and reminder advertisements under these sections to read "Those reminder advertisements (or reminder labeling) • • • or other written, printed or graphic matter otherwise containing no representations or suggestions relating to dosage or indications of the drug product."

Reminder labeling under § 201.100 and reminder advertisements under § 202.1 are permitted to have "other written, printed, or graphic matter" in addition to the required information, provided such "other written, printed, or graphic matter" contains no representation or suggestion relating to the advertised drug product. The Commissioner points out that this regulation in no way prohibits a manufacturer from communicating information on quality control procedures or the physical or chemical qualities of a substance to a physician by a means other than through reminder advertisements or reminder labeling. If information relating to quality control procedures or the physical or chemical quality of a substance is included in a reminder advertisement or reminder labeling in a manner that is false or misleading or implies safety or effectiveness or otherwise contains a representation or suggestion relating to the advertised drug, the reminder advertisement or reminder labeling would be in violation of the law. Each reminder advertisement or reminder labeling containing such information would have to be reviewed on an individual basis to determine compliance with §§ 201.100 and 202.1.

18. One comment referred to section 201(n) of the act and stated that this section specifically provides that any regulations regarding prescription drug advertising shall be under the procedure set forth in section 701(e) of the act.

The Commissioner advises that section 201(n) of the act does not have such a reference and believes that the comment meant to refer to section 502(n) of the act, which includes a reference to section 701(e). The reference to section 701(e) applies only to section 502(n)(3) concerning the promulgation of rules regarding information in brief summary relating to side effects, contraindications, and effectiveness of a drug. These regulations do not establish such requirements. Rather, they deal with advertisements which are exempt from the "brief summary" requirements. The promulgation of these regulations is therefore appropriate under the general rule making authority in section 701(a) of the act.

19. One comment expressed concern that the proposed regulations would prohibit the advertising of products such as vitamins or antibiotics because that would be a "representation or suggestion relating to the drug product." The comment stated that this proposed regulation is "at odds with the current advertising practices which categorize drug products."

The Commissioner advises that categorizing prescription drug products by the use of headings that suggest indications on a price list or other reminder advertisement or reminder labeling is prohibited under this regulation. Where indications for use of a drug are included in a price list, the list must contain a brief summary relating to side effects, contraindications, and effectiveness of the drug. Reminder advertisements and reminder labeling are exempt from the requirements of such a brief summary because they serve to call attention to the name of a drug product without indicating the use of the drug product. This regulation does not, however, prohibit the use of the terms "vitamin" (when a vitamin preparation is deemed to be a drug as set forth under §§ 250.109 and 250.110 (21 CFR 250.109 and 250.110)) or when such a product is offered solely as a drug) or "antibiotic" in listing a drug product if such a term is part of the drug product's proprietary or established (generic) name.

20. One comment was directed to the fact that the proposed regulations may stimulate and encourage mass advertising by pharmaceutical manufacturers in public media such as television, radio, and magazines to gain a greater market share for so-called lower cost equivalents, particularly if such consumer educational efforts have the blessing and encouragement of the Food and Drug Administration.

This regulation neither encourages nor discourages consumer educational efforts by pharmaceutical manufacturers. The industry may undertake whatever promotional efforts it deems advisable as long as they meet all applicable legal requirements.

21. One professional association commented that if the regulation relating to advertising of prescription prices is not eliminated, it should be amended to require that the name of the actual manufacturer be placed on the label of all drugs and medicines sold to licensed retail pharmacies, hospitals, and other facilities.

The Commissioner concurs that requiring the actual manufacturer's name on a label might well be useful if a means can be found to define the "actual manufacturer" and if the act is changed to include this requirement. The matter is being studied further. The possibility of requiring the actual manufacturer's name on a label of a drug product is not, however, relevant to the proposal and therefore no action need be taken in this final regulation.

22. Comments suggested that, if prices are posted for large quantities, i.e., 50 or 100 dosage units, the price should also be posted for one dosage unit so as not to be misleading to the consumer who may have the erroneous impression that lesser amounts will be a pro rata multiple of the posted quantity. It was also suggested that the quantities posted should be those normally prescribed. One comment recommended that the regulation express some guidance regarding permissible quantity claims in order to avoid improper use of price disclosures.

As stated in the preamble to the proposal, it is not the intent of this regulation to specify the format of reminder advertisements and reminder labeling under § 200.200. The Commissioner recognizes that there are other ways to include the required and optional information in the reminder advertisement or reminder labeling other than that indicated in the example given in the proposal. Therefore, there is no requirement as to which drug products are to be listed or what quantity of a drug product is to

V 40 244 DEC 18 75 XUM

be included in the reminder advertisement or reminder labeling. For example, if a pharmacy wishes to indicate the price for one tablet or one capsule, it may do so. The Commissioner believes that pharmacies will exercise good judgment in indicating the price for a given quantity of a drug product and, therefore, is of the opinion that the regulation should not express guidance regarding permissible quantities for which prices are to be posted. The Commissioner does not object to a statement in the reminder advertisement or reminder labeling that prices for quantities not stated are available from the pharmacy.

23. One comment stated that advertising a specific quantity of a specific drug for a specific price would tend to promote that quantity of drug to the general public.

The Commissioner rejects this argument. Section 200.200 relates to the disclosure of prices for prescriptions for drug products. The drug product, and usually the quantity, to be purchased are specified by the medical practitioner on the prescription. The patient is merely using a listing of prescription drug products and their prices as a means of determining what that particular prescription will cost.

24. Several comments expressed concern that encouragement of prescription drug price advertising would promote self-medication and self-prescribing and lead to drug abuse and misuse by consumers who pressure their physicians to prescribe larger quantities and cheaper drugs. Some comments requested prohibiting the posting of the prices of controlled substances or of any drug which, in the opinion of the Food and Drug Administration, is detrimental to the public health and safety. A few comments felt that the posting of prices places drugs in the same category as other common commodities. One comment stated that the only type of drug advertising should be that which is educational to the public.

The Commissioner does not agree with these comments. The purpose of § 200.200 is to assist persons in preparing reminder advertisements and reminder labeling to make public the prices they charge for prescriptions for drug products and to assure that such reminder advertisements and reminder labeling contain all of the information needed by a consumer to make a price determination. Further, this regulation is applicable to those drug products which are available to the consumer only on prescription from a medical practitioner. The Commissioner is not aware of any evidence that drug product price disclosure leads to drug abuse and misuse. Therefore, it cannot be concluded that price listing alone, exclusive of promotional features, of a drug product subject to prescription by State-licensed medical practitioners will contribute to these drug-related problems. In addition, since access to and use of prescription drugs are tightly controlled, the posting of the prices for such drugs simply does not place them in the same category as other common commodities on the market.

The Commissioner rejects the request to prohibit the posting of prices for controlled substances or of any drug which, in the opinion of the Food and Drug Administration, is detrimental to the public health and safety. A medical practitioner may prescribe any drug product which is in commercial distribution; therefore, the public disclosure of the price for a prescription for any such drug product, including a controlled substance, should not be prohibited.

The Commissioner does not agree that drug advertising should be limited to that which is educational to the public. Reminder advertisements and reminder labeling directed to a physician or a consumer are equally important and should be permitted provided they are in compliance with the requirements of the Federal Food, Drug, and Cosmetic Act.

25. Several comments stated that physicians and dentists are not required to post their fees and questioned why proposed § 200.200 was not applicable to all practitioners of the healing arts. One comment questioned whether the regulation was applicable to hospital pharmacists and, if so, whether the prices would be applicable to both the out-patient and hospitalized patient.

The Commissioner advises that § 200.200 does not require drug price posting by anyone; however, if physicians, pharmacists, or other practitioners of the healing arts post drug prices, they must do so in accordance with this regulation. The Food and Drug Administration does not have jurisdiction over the practice of these professions, but does have jurisdiction over the labeling and advertising of prescription drugs, including prescription drugs which have been shipped in interstate commerce and are being held for dispensing to patients, under section 301(k) of the act (21 U.S.C. 331 (k)). The Commissioner advises that § 200.200 will apply to all persons responsible for prescription drug advertising and labeling intended to convey price information to consumers.

26. Three comments pointed out the following typographical errors in the proposal: In § 202.1(e)(2)(i), line 13—the word "quality" should be changed to "quantity"; and in § 200.200(a)(1), the last four lines reading "no representation or suggestion * * * indications for use" are redundant with the statement in § 200.200(a)(4) and should be deleted.

The Commissioner agrees with these comments and the final regulations have been revised accordingly.

27. Several comments questioned whether all matters relating to prices charged for drugs and pharmaceutical services are within the jurisdiction of the Food and Drug Administration. One comment argued that enforcement of this regulation would be severely restricted since "FDA does not have any inspectional authority over pharmacies through the general inspection authority under the act."

The Commissioner advises that the Food and Drug Administration has jurisdiction over the labeling and advertising of prescription drugs. Price disclosure, as part of prescription drug labeling and advertising, is subject to Food and Drug Administration regulation. The Commissioner concludes that any deviation from the requirements of this regulation will result in misbranding and that section 704(a) of the Federal Food, Drug, and Cosmetic Act provides inspectional authority necessary for enforcement of this regulation.

28. One comment suggested that the boxed warning criteria be more specifically defined in the proposed regulation prohibiting reminder advertisements and reminder labeling for drug products that are required to contain boxed warning statements in their advertisements and labeling. The comment interpreted the proposal as not intending to cover those products that still carry a box stating the effectiveness status as determined by the NAS/NRC review, nor intending to cover products that carry a special boxed statement not related to fatalities or serious damage.

The Commissioner advises that the regulation covers only those drug products whose labeling contains a boxed warning indicating a serious hazard associated with the use of the drug product and is not intended to cover other types of existing boxed warnings or boxed statements. The wording in the regulation has been revised accordingly.

29. The Federal Trade Commission (FTC) published a proposal regarding disclosure regulations concerning retail prices for prescription drugs in the FEDERAL REGISTER of June 4, 1975 (40 FR 24031). This Food and Drug Administration regulation differs, as to required information, from the FTC proposed alternative definition of "price information" in that it does not require the established name and quantity of each active ingredient for multiple active ingredient drug products nor the name of the manufacturer, packer, or distributor for any drug product; see paragraphs 5 and 6 of this preamble. In addition, under this final regulation the price stated for a drug product includes all charges to the consumer including, but not limited to, the cost of the drug product, professional fees and handling fees, if any. In light of the comments and hearings on the FTC proposal, the Food and Drug Administration may review its position with respect to whether further information should be provided to the consumer for determining a price for a prescription and whether there is a need to revise this regulation at a later date.

30. Proposed §§ 201.100(f) and 202.1(e)(2)(i) contain the wording "If the Commissioner finds * * * incidence of fatalities or serious damage * * *." The Commissioner has made an editorial change in the final regulation by replacing the term "damage" with the more appropriate term "injury."

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(n), 502, 701(a), 52 Stat. 1041, 1050–1051 as amended by 76 Stat. 791, 1055 (21 U.S.C. 321(n), 352, 371(a))) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 200, 201, and 202 are amended as follows:

PART 200—GENERAL

1. In Part 200, a new Subpart E consisting of § 200.200 is added, to read as follows:

Subpart E—Prescription Drug Consumer Price Listing

§ 200.200 Prescription drugs; reminder advertisements and reminder labeling to provide price information to consumers.

(a) Prescription drug reminder advertisements and reminder labeling intended to provide price information to consumers are exempt from the requirements of §§ 201.100 and 202.1 of this chapter if all of the following conditions are met:

(1) The only purpose of the reminder advertisement or reminder labeling is to provide consumers with information concerning the price charged for a prescription for a particular drug product, and the reminder advertisement or reminder labeling contains no representation or suggestion concerning the drug product's safety, effectivness, or indications for use.

(2) The reminder advertisement or reminder labeling contains the proprietary name of the drug product, if any; the established (generic) name of the drug product, if any; the drug product's strength if the product contains a single active ingredient or if the product contains more than one active ingredient and a relevant strength can be associated with the product without indicating each active ingredient (the established name and quantity of each active ingredient are not required); the dosage form; and the price charged for a prescription for a specific quantity of the drug product.

(3) The reminder advertisement or reminder labeling may also include other written, printed, or graphic matter, e.g., identification of professional or convenience services provided by the pharmacy: *Provided*, That such information is neither false nor misleading and contains no representation or suggestion concerning the drug product's safety, effectiveness, or indications for use.

(4) The price stated in the reminder advertisement or reminder labeling as that charged for a prescription shall include all charges to the consumer including, but not limited to, the cost of the drug product, professional fees, and handling fees, if any. Mailing fees and delivery fees, if any, may be stated separately and without repetition.

(b) This exemption from §§ 201.100 and 202.1 of this chapter is applicable to all prescription drug reminder labeling and reminder advertisements solely intended to provide consumers with information regarding the price charged for prescriptions including price lists, catalogs, and other promotional material, whether mailed, posted in a pharmacy, placed in a newspaper, or aired on radio or television.

(c) Any reminder advertisement or reminder labeling intended to provide consumers with prescription price information which is not in compliance with this section shall be the subject of appropriate regulatory action. Such action may be taken against the product and/or the responsible person.

PART 201—LABELING

2. In Part 201, § 201.100(d)(2) is revised and a new paragraph (f) is added, to read as follows:

§ 201.100 Prescription drugs for human use.

* * * * *

(d) * * *

(2) The same information concerning the ingredients of the drug as appears on the label and labeling on or within the package from which the drug is to be dispensed.

* * * * *

(f) Reminder labeling which calls attention to the name of the drug product but does not include indications or dosage recommendations for use of the drug product is exempted from the provisions of paragraph (d) of this section. This reminder labeling shall contain only the proprietary name of the drug product, if any; the established name of the drug product, if any; the established name of each active ingredient in the drug product; and, optionally, information relating to quantitative ingredient statements, dosage form, quantity of package contents, price, the name and address of the manufacturer, packer, or distributor or other written, printed, or graphic matter containing no representation or suggestion relating to the drug product. If the Commissioner finds that there is evidence of significant incidence of fatalities or serious injury associated with the use of a particular prescription drug, he may withdraw this exemption by so notifying the manufacturer, packer, or distributor of the drug by letter. Reminder labeling, other than price lists and catalogs solely intended to convey price information including, but not limited to, those subject to the requirements of § 200.200 of this chapter, is not permitted for a prescription drug product whose labeling contains a boxed warning relating to a serious hazard associated with the use of the drug product. Reminder labeling which is intended to provide consumers with information concerning the price charged for a prescription for a particular drug product shall meet all of the conditions contained in § 200.200 of this chapter. Reminder labeling, other than that subject to the requirements of § 200.200 of this chapter, is not permitted for a drug for which an announcement has been published pursuant to a review of the labeling claims for the drug by the National Academy of Sciences/National Research Council (NAS/NRC), Drug Efficacy Study Group, and for which no claim has been evaluated as higher than "possibly effective." If the Commissioner finds the circumstances are such that reminder labeling may be misleading to prescribers of drugs subject to NAS/NRC evaluation, such reminder labeling will not be allowed and the manufacturer, packer, or distributor will be notified either in the publication of the conclusions on the effectiveness of the drug or by letter.

PART 202—PRESCRIPTION DRUG ADVERTISING

3. In Part 202, § 202.1(e)(2)(i) is revised to read as follows:

§ 202.1 Prescription drug advertisements.

* * * * *

(e) * * *

(2) * * *

(i) *Reminder advertisements.* Reminder advertisements are those which call attention to the name of the drug product but do not include indications or dosage recommendations for use of the drug product. These reminder advertisements shall contain only the proprietary name of the drug product, if any; the established name of the drug product, if any; the established name of each active ingredient in the drug product; and, optionally, information relating to quantitative ingredient statements, dosage form, quantity of package contents, price, the name and address of the manufacturer, packer, or distributor or other written, printed, or graphic matter containing no representation or suggestion relating to the advertised drug product. If the Commissioner finds that there is evidence of significant incidence of fatalities or serious injury associated with the use of a particular prescription drug, he may withdraw this exemption by so notifying the manufacturer, packer, or distributor of the drug by letter. Reminder advertisements, other than those solely intended to convey price information including, but not limited to, those subject to the requirements of § 200.200 of this chapter, are not permitted for a prescription drug product whose labeling contains a boxed warning relating to a serious hazard associated with the use of the drug product. Reminder advertisements which are intended to provide consumers with information concerning the price charged for a prescription for a drug product are exempt from the requirements of this section if they meet all of the conditions contained in § 200.200 of this chapter. Reminder advertisements, other than those subject to the requirements of § 200.200 of this chapter, are not permitted for a drug for which an announcement has been published pursuant to a review on the labeling claims for the drug by the National Academy of Sciencies/National Research Council (NAS/NRC), Drug Efficacy Study Group, and for which no claim has been evaluated as higher than "possibly effective." If the Commissioner finds the circumstances are such that a reminder advertisement may be misleading to prescribers of drugs subject to NAS/NRC evaluation, such advertisements will not

V 40 244 DEC 18 75 XUM

THURSDAY, DECEMBER 18, 1975

be allowed and the manufacturer, packer, or distributor will be notified either in the publication of the conclusions on the effectiveness of the drug or by letter.

* * * * *

Effective date. This regulation shall become effective on January 19, 1976, except that § 200.200 shall not be effective for existing reminder advertisements and reminder labeling intended to provide prescription price information to consumers until such advertisements and labeling are revised at the time of the next printing or until December 18, 1976, whichever occurs first.

(Secs. 201(n), 502, 701(a), 52 Stat. 1041, 1050–1051 as amended by 76 Stat. 791, 1055 (21 U.S.C. 321(n), 352, 371(a)).)

Dated: December 9, 1975.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

FEDERAL ELECTION COMMISSION

■

ADVISORY OPINIONS

V40244 DEC 18 75 XUM

FEDERAL ELECTION COMMISSION

[Notice 1975–95]

ADVISORY OPINIONS

The Federal Election Commission announces the publication today of Advisory Opinions 1975–36, 1975–54 and 1975–60. The Commission's opinions are in response to questions raised by individuals holding Federal office, candidates for Federal office and political committees, with respect to whether any specific transaction or activity by such individual, candidate, or political committee would constitute a violation of the Federal Election Campaign Act of 1971, as amended, of Chapter 95 or 96 of Title 26 United States Code, or of Sections 608, 610, 611, 613, 614, 615, 616, or 617 of Title 18 United States Code.

The Commission points out that these advisory opinions should be regarded as interim rulings which are subject to modification by future Commission regulations of general applicability. In the event that a holding in either opinion is altered by the Commission's regulations, the persons to whom the opinions were issued will be notified.

ADVISORY OPINION 1975–36

PAYMENT OF ADMINISTRATIVE COSTS INCURRED BY A CORPORATION ON BEHALF OF A POLITICAL ACTION COMMITTEE OPERATING AS A SEPARATE SEGREGATED FUND

The Federal Election Commission issues this Advisory Opinion under 2 U.S.C. 437f in response to a request submitted by the Committee for Thorough Agricultural Political Education. The request was published in the FEDERAL REGISTER on August 20, 1975 (40 FR 36534). Interested parties were given an opportunity to submit comments relating to the request. No comments were received.

The Committee for Thorough Agricultural Political Education (C-TAPE), a multicandidate political committee, requests an opinion as to whether the payment of an obligation of a predecessor committee would be a violation of the Federal Election Campaign of 1971, as amended. (FECA)

In 1972 and 1973, the Trust for Agricultural Political Education (TAPE) transferred funds in the amount of $1,931,541.09 to C-TAPE. C-TAPE was established by the Associated Milk Producers, Inc. (AMPI). The Commission is informed that in the normal course C-TAPE reimburses AMPI for expenses that AMPI incurs on its behalf. However, TAPE did not reimburse AMPI or its predecessor, Milk Producers, Inc. (MPI) for any expenses incurred during the period 1969 through March 1972. On June 19, 1975, AMPI billed C-TAPE for the TAPE expenses in the amount of $162,500 for that period. C-TAPE indicated that it considers the bill rendered for the expenses to be reasonable. C-TAPE has requested an advisory opinion on whether the payment of the bill from AMPI would violate the FECA.

It is the opinion of the Commission that C-TAPE's payment of the bill submitted by AMPI would not violate the FECA nor any of the provisions of Title 18, United States Code, which are within the advisory opinion jurisdiction of the Commission. C-TAPE must, of course, disclose the payment in the appropriate report.

The Commission's approval of the described transaction is conditioned on the validity of an assumption that the payment by C-TAPE is not made in satisfaction of any obligation previously incurred by AMPI in violation of applicable Federal law.

This advisory opinion is issued on an interim basis pending promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–54

APPLICATION OF CONTRIBUTION AND EXPENDITURE LIMITATIONS TO EACH ELECTION HELD IN A STATE

The Federal Election Commission renders this advisory opinion under 2 U.S.C. § 437f in response to a request submitted by Mr. Kent Shearer on behalf of the Utah Republican Central Committee. This request was made public by the Commission and published in the FEDERAL REGISTER on September 3, 1795 (40 FR 40679). Interested parties were given an opportunity to submit comments relating to the requests. No comments were received.

Mr. Shearer seeks an advisory opinion concerning the Utah nominating process. At the respective State Nominating Conventions held by the political parties, primary candidates are reduced to two individuals. If, however, one candidate receives 70 percent of the vote he or she becomes the nominee without a primary. The specific question is whether the limitations on contributions and expenditures contained in 18 U.S.C. 608 (b) and (c) would apply separately to each phase of the nominating process (i.e., convention and primary).

The contribution limitations established in 18 U.S.C. 608(b) (1) and (2) apply separately to each election for Senators and Representatives. 18 U.S.C. 608(b)(5). Election, as defined in 18 U.S.C. 591(a) means, *inter alia*, (1) a general, special, primary, or run-off election or (2) a convention or caucus of a political party held to nominate a candidate. The Commission is of the opinion that a caucus or convention of a political party, such as the Utah State Nominating Convention, which is held prior to a primary election but which does *not* select a nominee is *not* a separate election. Such a caucus or convention is, in essence, a step in the nominating process and will be considered a part of the primary election. In the event the convention nominates a candidate by the requisite number of votes the nominating process and therefore the primary process ends. Accordingly, in Utah, an individual or political committee may contribute to a candidate up to the applicable limit in 18 U.S.C. 608(b) with respect to the nominating process.

The expenditure limitations in 18 U.S.C. 608(c)(1) (C) and (E) apply "in the case of any campaign for nomination for election" for Senator or Representative. A candidate is, therefore, subject to a single expenditure limitation for the time period during which he or she is seeking the nomination, regardless of whether the process includes a convention, primary or other procedure.

This advisory opinion is issued on an interim basis only pending promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–60

RAFFLE AS FUNDRAISER FOR FEDERAL CANADIDATE

This advisory opinion is issued pursuant to 2 U.S.C. § 437f in response to a request for an advisory opinion submitted by Salvadore Gionfriddo, Chairman, Citizens for Moffett, and published as AOR 1975–60 in the September 18, 1975, FEDERAL REGISTER (40 FR 43166) and supplemented by a request published in the October 20, 1975, FEDERAL REGISTER (40 FR 49066). Interested parties were given an opportunity to submit written comments relating to the request. No comments were received.

The original request asked generally whether a raffle contemplated by supporters of Congressman Toby Moffett, which would be conducted in compliance with the laws of the State of Connecticut and featuring the sale of tickets to the general public, would be legitimate under the Federal Election Campaign Act of 1971, as amended (hereinafter FECA). Specifically the request asked:

a. Would such a raffle constitute a legal fundraising activity under the FECA?

b. Can a labor union serving under State law as a raffle sponsor, promote and operate the raffle?

c. Can union volunteers contribute their time without remuneration, during their normal time off from regular employment to promote such raffle activities?

d. If a labor union acts within State laws as the raffle sponsor and accordingly turns over the net proceeds to Congressman's campaign fund, should such funds be reported by the Congressman as the contributions of the union or as the contributions of individuals whose names and addresses were recorded at the time they purchased raffle tickets.

Mr. Gionfriddo, in further communication with the Commission, has indicated that a Democratic Town Committee has been designated as the official sponsor of the raffle. Since that portion of this request pertaining to union participation is moot, Mr. Gionfriddo has requested the Commission to issue an advisory opinion only on the first question of this request.

It is the opinion of the Commission that a raffle properly conducted under applicable State law would not violate the FECA. The Commission notes, however, that several provisions of Federal law specifically pertain to lotteries. The Postal Service has jurisdiction over 39 U.S.C. 3005. The several sections of

Chapter 61, Title 18, United States Code specifically pertain to lotteries. The Commission refers Mr. Gionfriddo to the Department of Justice which has jurisdiction over the entire chapter for any clarification of the applicability of this chapter to the fundraising raffle. The Federal Communications Commission has concurrent power with the Justice Department to enforce one of the sections of this chapter, 18 U.S.C. 1304.

In the supplemental request published in the October 20th REGISTER, Mr. Gionfriddo raised two additional questions. The first of these questions is

[I]f a raffle ticket purchaser chooses to pay by check, must the check be written to the sponsoring organization which is likely to be a union or Democratic Town Committee, or to the benefiting organization, Citizens for Moffett, or may it be written to either?

Since the union will not be a sponsor, this question is limited to whether the check should be made out to the Democratic Town Committee or to Citizens for Moffett. Because the raffle is a fundraising event for Congressman Moffett, the checks should be made out to Citizens for Moffett. If the checks are to be made out to the Democratic Town Committee, all solicitations must expressly and clearly state that the contributions or raffle ticket purchases will be used by Congressman Moffett's campaign. In addition, the drawer or contributor should, wherever possible, indicate clearly on the face of the instrument or otherwise direct that the proceeds of the check are to be considered a contribution from the drawer to Citizens for Moffett. In either situation, the Democratic Town Committee would be considered an intermediary or conduit. The Committee would have to report the original source and the intended recipient of such contribution to the Commission and to the intended recipient. 18 U.S.C. 608(b)(6).

In order to avoid any confusion, the Commission suggests that the checks be made out to Citizens for Moffett and that any checks made out to the Democratic Town Committee be returned with the request that they be issued payable to Citizens for Moffett.

The second question raised in the supplemental request is as follows:

[I]f the net total of funds raised exceeds the total debt of Citizens for Moffett, can Citizens for Moffett retain the surplus; if it cannot, should the surplus funds be retained by the sponsoring organization, returned to ticket purchasers, or disbursed in some other fashion?

If the purpose of this fundraiser is to retire pre–1975 campaign debts, the Commission sets forth the following guidelines which supplement the general procedures discussed in response to the previous question. Contributors purchasing tickets in excess of $100 must expressly earmark the contribution (as by notation on a check) for initial use to retire pre-1975 debts. If the contributions are so restricted, they will not be subject to the contribution limits of 18 U.S.C. 608(b). If any excess funds remain after liquidation of the pre-1975 debts, they may be used in any manner consistent with 2 U.S.C. 439a. Moreover, if the donors giving in excess of $100 provide specific written authorization, excess funds remaining after the repayment of the pre-1975 debt may be turned over to the 1976 campaign fund. Specific authorization is not required from persons contributing less than $100. A turnover of excess funds is subject to the limits of 18 U.S.C. 608(b). The Commission refers Mr. Gionfriddo to Advisory Opinion 1975–82 for a detailed discussion of fundraising to retire pre-1975 campaign deficits. (40 FR 57757).

If the purpose of the fundraiser is to retire a campaign debt incurred with respect to an election after January 1, 1975 the surplus may be retained by Citizens for Moffett. Contributions to retire debts incurred for elections after January 1, 1975, are subject to the limitations of 18 U.S.C. 608(b).

This advisory opinion is issued on an interim basis pending final promulgation by the Commission of rules and regulations or policy statements of general applicability.

Dated: December 12, 1975.

VERNON W. THOMSON,
Commissioner for the Federal Election Commission.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Commerce

Section 213.3314 is amended to show that one position of Special Assistant to the Assistant Secretary for Economic Development is reestablished under Schedule C.

Effective on December 19, 1975, § 213.3314(q)(11) is amended as set out below:

§ 213.3314 Department of Commerce.

* * * * * *

(q) *Office of the Assistant Secretary for Economic Development.* * * *

(11) One Special Assistant to the Assistant Secretary.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Regulation 18]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

This regulation fixes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period Dec. 21–27, 1975. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 910. The quantity of lemons so fixed was arrived at after consideration of the total available supply of lemons, the quantity of lemons currently available for market, the fresh market demand for lemons, lemon prices, and the relationship of season average returns to the parity price for lemons.

§ 910.318 Lemon Regulation 18.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantity of lemons that may be marketed during the ensuing week stems from the production and marketing situation confronting the lemon industry.

(i) The committee has submitted its recommendation with respect to the quantity of lemons it deems advisable

V40245 DEC 19 75 XUM

to be handled during the ensuing week. Such recommendation resulted from consideration of the factors enumerated in the order. The committee further reports the demand for lemons remains easier this week as the trade continues to buy with caution. Average f.o.b. price was $6.31 per carton the week ended December 13, 1975, compared to $7.98 per carton the previous week. Track and rolling supplies at 230 cars were up 60 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this regulation until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for lemons and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this regulation, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this regulation effective during the period herein specified; and compliance with this regulation will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on December 16, 1975.

(b) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period December 21, 1975, through December 27, 1975, is hereby fixed at 150,000 cartons.

(2) As used in this section, "handled", and "carton(s)" have the same meaning as when used in the said amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 18, 1975.

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-34549 Filed 12-18-75;11:41 am]

CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MILK), DEPARTMENT OF AGRICULTURE

[Milk Order No. 60]

PART 1060—MILK IN THE MINNESOTA-NORTH DAKOTA MARKETING AREA

Order Suspending Certain Provisions

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Minnesota-North Dakota marketing area.

Notice of proposed rulemaking was published in the FEDERAL REGISTER (40 FR 56674) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded opportunity to file written data, views, and arguments thereon.

After consideration of all relevant material, including the proposal set forth in the aforesaid notice, data, views, and arguments filed thereon, and other available information, it is hereby found and determined that for the months of December 1975, January and February 1976, the following provisions of the order do not tend to effectuate the declared policy of the Act:

The provisions to be suspended are as follows:

§ 1060.13 [Amended]

1. The parts of paragraph (c) (1) that read, "During March through June" and "During the months of July through February such handler may divert an aggregate quantity not exceeding 50 percent of the milk of all such producers whose milk has been received at a pool plant(s) for at least 3 days during the month."

2. The parts of paragraph (c) (2) that read, "During March through June" and "During the months of July through February such handler may divert an aggregate quantity not exceeding 50 percent of the milk of all such producers whose milk has been received at his pool plant(s) for at least 3 days during the month."

STATEMENT OF CONSIDERATION

This suspension action will permit unlimited diversion of producer milk under the Minnesota-North Dakota order during the months of December 1975 and January and February 1976.

The order provides that during any month of July through February a cooperative association may divert for its account a total quantity of milk not in excess of 50 percent of the milk of all member producers whose milk has been received at a pool plant(s) for at least 3 days during the month. Similarly, a handler in his capacity as the operator of a pool plant, may divert for his account the milk of producers (other than a member of a cooperative association that is a diverting handler during the same month) in a total quantity not exceeding 50 percent of the milk of all such producers whose milk has been received at his pool plant(s) for at least 3 days during the month. Provision is made for unlimited diversion during the months of March through June.

The purpose of the diversion provisions is to facilitate the orderly and efficient disposition of the market's reserves. The direct movement of milk from a producer's farm to a nonpool plant for disposition in manufacturing avoids the unnecessary expense of handling involved if the milk were required to be delivered first to the pool plant where normally received and then transferred to the nonpool plant.

This suspension action requested by Land O'Lakes, Inc., also has the support of Mid-America Dairymen, Inc., and the National Farmers Organization. The three cooperatives together represent a majority of producers supplying the fluid market.

This temporary suspension will extend for 3 additional months the period in which unlimited diversion is permitted. This action is needed under the circumstances applicable in the months of December 1975, and January and February, 1976. Heavy milk supplies on the market will necessitate movements to nonpool plants for manufacturing during these months in excess of the diversion limitations presently provided in the order.

If no suspension action is taken, inefficient handling would be necessary to assure producer milk status for a large quantity of the reserve milk handled under the order. Much of the milk that could be diverted directly from farms to nonpool plants for manufacture would need to move instead through pool supply plants to qualify as producer milk and then to nonpool plants. This would involve hauling to and from supply plants instead of single hauls from farms to nonpool plants. Also, it would involve the cost of handling the milk through supply plants.

A hearing has been held to consider modifications and/or merging of this order and certain other orders (39 FR 37164). This temporary suspension action is taken as an interim modification of the order pending the outcome of the hearing proceeding.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that under the circumstances described herein, the most efficient method of handling the market's reserve milk supply is movement directly from producers' farms to milk manufacturing plants. This suspension will allow such handling on an unlimited basis during December 1975 and January and February 1976, while the dairy farmers involved retain producer status. Interim action is necessary pending any amendatory procedures based upon a hearing held in November 1974, at which the diversion provisions of this order were reviewed.

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension. No views were received in opposition to the proposed suspension.

Therefore, good cause exists for making this order effective with respect to producer milk deliveries during December 1975, and January and February 1976.

It is therefore ordered, That the aforesaid provisions of the order are hereby suspended for the months of December 1975, and January and February 1976.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: December 19, 1975.

Signed at Washington, D.C., on December 15, 1975.

RICHARD L. FELTNER,
Assistant Secretary.

[FR Doc.75-34274 Filed 12-18-75;8:45 am]

Title 10—Energy

CHAPTER I—NUCLEAR REGULATORY COMMISSION

PART 20—STANDARDS FOR PROTECTION AGAINST RADIATION

PART 50—LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

Change of Terminology for "As Low As Practicable" Limits

On May 5, 1975, the Nuclear Regulatory Commission published in the FEDERAL REGISTER its decision in the rule making proceeding concerning numerical guides for design objectives and limiting conditions for operation to meet the criterion "as low as practicable" for radioactive material in light-water-cooled nuclear power reactor effluents, including amendments of 10 CFR Part 50 which became effective June 4, 1975.

In its decision, the Commission noted that during the pendency of the rule making, the International Commission on Radiological Protection, in ICRP Publication No. 22 has replaced the phrase "as low as practicable" with "as low as is reasonably achievable" in its recommendation on dose limitation. The Commission, in its decision, endorsed the attempt to make this basic concept of radiation protection more understandable and directed the staff to prepare and issue for public comment a proposed rule that would substitute the currently accepted phrasing "as low as is reasonably achievable" for the older, less precise terminology where it appears in the regulations.

In accordance with the Commission's directive the staff prepared proposed amendments of 10 CFR Parts 20 and 50 which would substitute the term "as low as is reasonably achievable" for the term "as low as practicable."

The notice of proposed rule making was published in the FEDERAL REGISTER on August 6, 1975 (40 FR 33029) inviting public comments by October 6, 1975.

Only one comment was received. The commenter expressed the view that some confusion and problems of practical application would result from the words "other societal and socioeconomic considerations" in the proposed amendments of §§ 20.1(c) and 50.34a(a). The commenter indicated that questions would be raised as to whether the quoted words are within the regulatory and statutory public health and safety concepts and whether the words really add anything to the regulations.

It is the Commission's view that the words "other societal and socioeconomic considerations" are consistent with the recommendation on dose limitation of the International Commission on Radiological Protection in ICRP Publication No. 22, serve to clarify the term "as low as is reasonably achievable", and should be included in the amendments.

Notice is hereby given that the proposed amendments are adopted without change and are set forth below.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552 and 553 of title 5 of the United States Code, the amendments to Title 10, Chapter I, Code of Federal Regulations, Parts 20 and 50 set forth below are published as a document subject to codification.

Effective Date. These amendments become effective on January 19, 1976.

(Sec. 161, Pub. L. 83-703, 68 Stat. 948 (42 U.S.C. 2201); Sec. 201(f), Pub. L. 93-438, 88 Stat. 1243 (42 U.S.C. 5841))

Dated at Bethesda, Maryland this 20th day of November 1975.

For the Nuclear Regulatory Commission.

LEE V. GOSSICK,
Executive Director for Operations.

1. Section 20.1 of 10 CFR Part 20 is amended by revising paragraph (c) to read as follows:

§ 20.1 Purpose.

* * * * * *

(c) In accordance with recommendations of the Federal Radiation Council, approved by the President, persons engaged in activities under licenses issued by the Nuclear Regulatory Commission pursuant to the Atomic Energy Act of 1954, as amended, and the Energy Reorganization Act of 1974 should, in addition to complying with the requirements set forth in this part, make every reasonable effort to maintain radiation exposures, and releases of radioactive materials in effluents to unrestricted areas, as low as is reasonably achievable. The term "as low as is reasonably achievable" means as low as is reasonably achievable taking into account the state of technology, and the economics of improvements in relation to benefits to the public health and safety, and other societal and socioeconomic considerations, and in relation to the utilization of atomic energy in the public interest.

2. Section 50.34a of 10 CFR Part 50 is amended by revising paragraph (a) to read as follows:

§ 50.34a Design objectives for equipment to control releases of radioactive material in effluents—nuclear power reactors.

(a) An application for a permit to construct a nuclear power reactor shall include a description of the preliminary design of equipment to be installed to maintain control over radioactive materials in gaseous and liquid effluents produced during normal reactor operations, including expected operational occurrences. In the case of an application filed on or after January 2, 1971, the application shall also identify the design objectives, and the means to be employed, for keeping levels of radioactive material in effluents to unrestricted areas as low as is reasonably achievable. The term "as low as is reasonably achievable" as used in this part means as low as is reasonably achievable taking into account the state of technology, and the economics of improvements in relation to benefits to the public health and safety and other societal and socioeconomic considerations, and in relation to the utilization of atomic energy in the public interest. The guides set out in Appendix I provide numerical guidance on design objectives for light-water-cooled nuclear power reactors to meet the requirement that radioactive material in effluents released to unrestricted areas be kept as low as is reasonably achievable. These numerical guides for design objectives and limiting conditions for operation are not to be construed as radiation protection standards.

* * * * * *

§ 50.36a and Appendix I [Amended]

3. Section 50.36a and Appendix I of 10 CFR Part 50 are amended by changing the term "as low as practicable" to "as low as is reasonably achievable" wherever it appears.

(Sec. 161, Pub. L. 83-703, 68 Stat. 948 (42 U.S.C. 2201); Sec. 201(f), Pub. L. 93-438, 88 Stat. 1243 (42 U.S.C. 5841)).

Title 12—Banks and Banking

CHAPTER III—FEDERAL DEPOSIT INSURANCE CORPORATION

SUBCHAPTER B—REGULATIONS AND STATEMENTS OF GENERAL POLICY

PART 329—INTEREST ON DEPOSITS

To Permit Payment of a Time Deposit or Portion Thereof Without Penalty Prior to Maturity in Certain Cases Involving the Death of the Depositor(s) or Owner(s)

Correction

In FR Doc. 75-33431 appearing at page 57664 in the issue for Thursday, December 11, 1975, the effective date was omitted from the preamble and should appear in the second column, at the end of the second full paragraph, as follows:

"The amendment will be effective December 15, 1975, and will apply to all withdrawals made on or after that date irrespective of the fact that the depositor died prior thereto."

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

[No. 75-1146]

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

PART 545—OPERATIONS

Mobile Facilities

DECEMBER 15, 1975.

The Federal Home Loan Bank Board on October 1, 1975, proposed amendments to § 545.14-4 of the Rules and Regulations for the Federal Savings and Loan System (12 CFR 545.14-4) for the purpose of clarifying certain provisions in the mobile facility regulations, to distinguish the mobile facility from the site where it conducts association business, and to require a description of the proposed facility, sites, and any improvements thereon in the application for Board approval of the mobile facility. Notice of such proposed Rulemaking was published in the FEDERAL REGISTER on October 8, 1975, (40 FR 47150) with an invitation for interested persons to submit written comments by November 10, 1975.

On the basis of its consideration of all relevant material presented by interested persons and otherwise available, the Board deems it desirable to adopt the proposed amendments as proposed, with one technical change to reflect the present name of the form referred to in § 545.14-4(d).

Accordingly, the Board hereby amends § 545.14-4 by deleting paragraph (c)(1) and renumbering paragraphs (c) (2), (3), (4), (5), and (6) as (c) (1), (2), (3), (4), and (5), respectively, and revising renumbered subdivisions (c) (1), (2), (4), and (5) and paragraph (d) thereof to read as set forth below.

Since these amendments clarify existing regulations and apply to rules of Board procedure or practice, the Board hereby finds that publication of the amendments for the 30-day period specified in 12 CFR 508.14 and 5 U.S.C. 553 (d) prior to the effective date thereof is unnecessary and hereby provides that said amendments shall become effective December 22, 1975.

§ 545.14-4 Mobile facility.

* * * * *

(c) *Action by the Board.* Each application by a Federal association which is an eligible association under the provisions of paragraph (b) of this section will be considered or processed pursuant to the provisions of this section. The Board's approval of any such application will be subject to the following provisions and any other conditions, requirements, and limitations the Board may specify in a particular case:

(1) The mobile facility shall be operated at two or more sites approved by the Board, each of which, at the time of filing of the application for permission to establish and operate the mobile facility, shall be more than 10 miles from the site of any home or branch office or agency of any other institution the accounts of which are insured by the Federal Savings and Loan Insurance Corporation, unless the applicant establishes to the satisfaction of the Board that a shorter distance is justified;

(2) Such facility shall transact association business at the same site on the same day or days (not to exceed 3 days) of each week, during such hours, aggregating a total of not less than 4 hours a day, as the association's board of directors may from time to time determine, but no association business shall be conducted at any site in the absence of such facility;

* * * * *

(4) The mobile facility shall not remain at any site during non-business hours, with the exception of the night before and the night following a day on which the facility is at the site to transact association business; and

(5) Without prior approval by the Board, operation of such facility shall not be continued at a site after the expiration of such period of time as the Board may prescribe with respect to operation of the facility at such site.

(d) *Application form; supporting information.* An application for permission to establish and operate a mobile facility shall be in form prescribed by the Board and shall be supported in accordance with the prescribed "Facility Application" form. Such application shall show that there is a need for such facility in the geographic area and at each proposed site and that it is not feasible to establish a full-time office there. Such application shall also contain a description of the proposed mobile facility and the proposed sites, including any improvements (such as affixed shell structures) planned for such sites. An application shall be deemed to be complete when the foregoing requirements of this paragraph (d) have been met.

* * * * *

(Sec. 5, 48 Stat. 132, as amended; 12 U.S.C. 1464. Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

J. J. FINN,
Secretary.

Title 14—Aeronautic and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75-NE-15; Amdt. 39-2462]

PART 39—AIRWORTHINESS DIRECTIVES

Sikorsky Model S-61L, S-61N and S-61NM Helicopters Certificated in All Categories

Pursuant to the authority delegated to me by the Administrator (31 FR 13697) an amendment to Amendment 39-2327 (40 FR 33434), AD 75-17-33, was adopted on October 2, 1975, and made effective immediately as to all known United States operators of Sikorsky Model S-61L, S-61N, and S-61NM helicopters. The amendment adopted on October 2, 1975, incorporated Sikorsky telegram SST6120CC036.1, dated October 2, 1975, into Amendment 39-2327, AD 75-17-33, as part of Sikorsky Service Bulletin No. 61B20-20, and extended the compliance time to November 3, 1975.

Since it was found that immediate corrective action was required, notice and public procedure thereon was impracticable and contrary to the public interest and good cause existed for making the amendment effective immediately as to all known U.S. operators of Sikorsky Model S-61L, S-61N, and S-61NM helicopters by individual telegrams, dated October 3, 1975. These conditions still exist and the amendment to Amendment 39-2327, AD 75-17-33, is hereby published in the FEDERAL REGISTER as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

Amendment 39-2327 (40 FR 33434), AD 75-17-33, required modifications on Sikorsky Model S-61 helicopters equipped with sliding baggage doors by October 3, 1975. Subsequent to the issuance of Amendment 39-2327, it was determined that an error in Service Bulletin No. S61B20-20 dated August 15, 1975, will preclude proper installation of the required stops to limit the travel of the bearing cage. Therefore, this telegram amends the AD to extend the compliance time to November 3, 1975, in lieu of October 3, 1975, and to include Sikorsky telegram SST6120 CC036.1, dated October 2, 1975, as part of Sikorsky Service Bulletin No. S61B20-20. This amends Amendment 39-2327 (40 FR 33434), AD 75-17-33.

This amendment becomes effective December 19, 1975, for all persons except those to whom it was made effective immediately by telegram dated October 3, 1975.

This amendment is made under the authority of Sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423) and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Burlington, Massachusetts, on December 9, 1975.

QUENTIN S. TAYLOR,
Director, New England Region.

[FR Doc.75-34171 Filed 12-18-75;8:45 am]

[Docket No. 74-NE-34; Amdt. 39-2461]

PART 39—AIRWORTHINESS DIRECTIVES

Sikorsky S-61L, S-61N and S-61NM Type Helicopters Certificated in All Categories

Amendment 39-1167 (36 FR 4689), AD 71-06-02, as amended by Amendment 39-1271 (36 FR 16186), Amendment 39-1948 (39 FR 31626) and Amendment 39-1978 (39 FR 34649) established, and then revised, a schedule of replacement times for components of S-61L and S-61N type helicopters certificated in all categories. After issuing Amendment 39-1978, a Type Certificate was granted to the manufacturer for a new model helicopter, the S-61NM, having a type design utilizing major components of model S-61L and S-61N helicopters. The manufacturer has also developed, and obtained approval of, new and modified parts and their replacement times, and has obtained approval of increased replacement times for other components. Therefore, AD 71-06-02 is being superseded by a new AD to include the model S-61NM and to add new components and replacement times to the schedule by referring to the latest revision of the Sikorsky Service Bulletin, No. 61B General-1F.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than thirty (30) days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations, is amended by adding the following new airworthiness directive:

SIKORSKY AIRCRAFT. Applies to S-61L, S-61N, and S-61NM helicopters certificated in all categories.

Compliance required as indicated.

As a result of the completion of a recent engineering evaluation program and the development of additional substantiating data, a new schedule of replacement times has been established for the components of S-61 helicopters.

(a) After the effective date of this AD, the replacement of S-61 components must be accomplished in accordance with the schedule of Section 2C of Sikorsky Service Bulletin No. 61B General-1F dated October 20, 1975, or later FAA approved revisions.

(b) The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Sikorsky Aircraft, Stratford, Connecticut 06602. These documents may also be examined at FAA, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, and at FAA Headquarters, 800 Independence Avenue, SW., Washington, D.C. 20591. A historical file on this AD which includes the incorporated material in full is maintained by the FAA at its Headquarters in Washington, D.C., and at the FAA, New England Region, Burlington, Massachusetts.

This supersedes Amendment 39-1167 (36 FR 4689), AD 71-06-02 as amended by Amendment 39-1271 (36 FR 16186), Amendment 39-1948 (39 FR 31626), and Amendment 39-1978 (39 FR 34649).

This amendment becomes effective January 2, 1976.

This amendment is made under the authority of Sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423) and Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Burlington, Massachusetts, on December 9, 1975.

QUENTIN S. TAYLOR,
Director, New England Region.

[FR Doc.75-34172 Filed 12-18-75;8:45 am]

[Airspace Docket No. 75-SO-133]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

On October 21, 1975, a notice of proposed rulemaking was published in the FEDERAL REGISTER (40 FR 49101), stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would designate the Lexington, N.C., transition area.

Interested persons were afforded an opportunity to participate in the rulemaking through the submission of comments. All comments received were favorable except those submitted by the United States Air Force (USAF). The USAF objected on the basis that a portion of the transition area would be within two VFR Low Altitude Training Routes. The centerlines of these routes are located approximately four miles southwest of the Lexington Municipal Airport and have been in existence for some time. To negate the use of these two routes, which provide invaluable aircrew training, would have a serious impact on the USAF mission.

A review of the proposal, in light of the comments received, disclosed the following:

1. Military aircraft operating on the training routes must have a ceiling of 3,000 feet and visibility of 5 miles. With these weather minimums, both military and civil aircraft in the vicinity of Lexington will be operating on a "see and be seen" basis, in accordance with Federal Aviation Regulations, Part 91.

2. The designation of the transition area does not preclude the USAF from utilizing the airspace involved.

Therefore, the objection by the USAF to the designation of the Lexington, N.C., transition area is not valid from an aeronautical standpoint.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, January 29, 1976, as hereinafter set forth.

In § 71.181 (40 FR 441), the following transition area is added:

LEXINGTON, N.C.

That airspace extending upwards from 700 feet above the surface within a 5.5-mile radius of Lexington Municipal Airport (latitude 35°46'47" N., longitude 80°18'20" W.)

Issued in East Point, Ga., on December 4, 1975.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.75-34177 Filed 12-18-75;8:45 am]

[Airspace Docket No. 75-EA-70]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Alteration of Transition Area

The Federal Aviation Administration is amending section 71.181 of Part 71 of the Federal Aviation Regulations so as to alter the Gloucester, Va., Transition Area (40 FR 500).

The Gloucester, Virginia, 700-foot floor transition area is currently in effect on a full-time basis. Night landing minima are not authorized by the instrument approach procedure to Gloucester Airport. The airspace action proposed herein would alter the time designation of the Gloucester transition area so as to be consistent with the hours that the instrument approach procedure is authorized, which would be sunrise to sunset.

Since the amendment is less restrictive in nature, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

In view of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective December 19, 1976, as follows:

1. Amend § 71.181 of Part 71, Federal Aviation Regulations so as to alter the description of the Gloucester, Virginia 700-foot floor transition area as follows: In the text, following "excluding the portion within the West Point, Va., transition area." add, "This transition area shall be in effect from sunrise to sunset, daily.".

Issued in Jamaica, N.Y., on December 3, 1975.

(Sec. 307(a), Federal Aviation Act of 1958, 72 Stat. 749 (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).

DUANE W. FREER,
Director, Eastern Region.

[FR Doc.75-34178 Filed 12-18-75;8:45 am]

[Airspace Docket No. 75-EA-71]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Alteration of Transition Area

The Federal Aviation Administration is amending section 71.181 of Part 71 of the Federal Aviation Regulations so as to alter the Ocean City, Md., Transition Area (40 FR 558).

V40245 DEC 19 75 XUM

The VOR–B special instrument approach procedure for Ocean City Airport, Ocean City, Md., has been revised. The revision includes a one-degree change in the final approach course and will require alteration of the Ocean City, Md., transition area description to reflect this change.

Since the amendment is less restrictive in nature, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

In view of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective December 19, 1975, as follows:

1. Amend Section 71.181 of Part 71 of the Federal Aviation Regulations so as to amend the description of the Ocean City, Md. Transition Area by deleting, "097°" and by inserting, "096°" in lieu thereof.

Issued in Jamaica, N.Y., on December 3, 1975.

Section 307(a) of the Federal Aviation Act of 1958 [72 Stat. 749; 49 U.S.C. 1348] and section 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)].

DUANE W. FREER,
Director, Eastern Region.

[FR Doc.75–34179 Filed 12–18–75;8:45 am]

[Airspace Docket No. 75–EA–77]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Alteration of Transition Area

The Federal Aviation Administration is amending section 71.181 of Part 71 of the Federal Aviation Regulations so as to alter the Wakefield, Va., Transition Area (40 FR 608).

A pending change to the NDB instrument approach procedure to Runway 20 at Wakefield Municipal Airport, Wakefield, Virginia, will require a change in the 700-foot floor transition area description. Essentially, the airspace action would reduce the size of the existing transition area extension and would reorient the final approach course ten degrees west of the present bearing.

Since the amendment is less restrictive in nature, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

In view of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT January 29, 1976, as follows:

1. Amend § 71.181 of Part 71, Federal Aviation Regulations by altering the description of the Wakefield, Virginia 700-foot floor transition area by deleting, "and within 3.5 miles each side of the 024° bearing from the Wakefield RBN lat. 36°58'59" N., long. 77°00'05" W., extending from the 5-mile radius area to 11.5 miles northeast of the RBN." and by substituting therefor, "and within 3 miles each side of the 013° bearing from the Wakefield RBN lat. 36°58'59" N., long. 77°00'05" W. extending from the 5-mile radius area to 8.5 miles northeast of the RBN.".

Issued in Jamaica, N.Y., on December 3, 1975.

Sec. 307(a), Federal Aviation Act of 1958, 72 Stat. 749 (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655 (c)).

DUANE W. FREER,
Director, Eastern Region.

[FR Doc.75–34180 Filed 12–18–75;8:45 am]

[Airspace Docket No. 75–WA–26]

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

Jet Route Revocation

The purpose of this amendment to Part 75 of the Federal Aviation Regulations is to revoke the small segment of J/HL 552 that is within the State of Maine. The Canadian Ministry of Transport will revoke their portion of this route, effective January 29, 1976, and has requested that simultaneous action be taken by the Federal Aviation Administration.

Because this action merely revokes a relatively small segment of a Canadian high level route, it is a minor matter on which the public would have no particular desire to comment. Therefore, notice and public procedure thereon are unnecessary.

In consideration of the foregoing, Part 75 of the Federal Aviation Regulations is amended, effective 0901 GMT, January 29, 1976, as hereinafter set forth.

In § 75.100 (41 FR 704) Jet Route No. 552, (title and text) is revoked.

This amendment is made under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on December 10, 1975.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

PART 103—TRANSPORTATION OF DANGEROUS ARTICLES AND MAGNETIZED MATERIALS

Carriage of Certain Hazardous Materials on Cargo-Only Aircraft as Only Means of Transportation

Correction

In FR Doc. 75–33834 appearing at page 58284 in the issue of Tuesday, December 16, 1975, make the following correction: On page 58285, § 103.19(a)., the fifth line should have appeared immediately after the second line.

CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER A—ECONOMIC REGULATIONS

[Regulation ER–941, Amdt. 5]

PART 240—INSPECTION OF ACCOUNTS AND PROPERTY

Interpretation

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., December 16, 1975.

Part 240 of the Board's Economic Regulations provides for inspection of certain properties of air carriers, foreign air carriers, and ticket agents. Section 240.1(c) prescribes the format for the identification card and credentials to be issued to Board employees authorized to perform such inspections.

This editorial amendment is being issued to change the format of the credentials slightly, in order to make it clear that the designated employees are special agents or auditors "of the Civil Aeronautics Board." No change is being made in the substantive authority of persons issued such credentials.

This editorial amendment is issued by the undersigned pursuant to delegation of authority from the Board to the General Counsel, in 14 CFR 385.19, and shall become effective on January 8, 1976. Procedures for review of this amendment are set forth in Subpart C of Part 385 (14 CFR 385.50 through 385.54).

Accordingly, the Board hereby revises § 240.1(c) to read as follows:

§ 240.1 Interpretation.

* * * * *

(c) The issuance in the form set forth below of an identification card and credentials to any such employee shall be construed to be an order and direction of the Board to such individual to inspect and examine lands, buildings, equipment, accounts, records, and memorandums in accordance with the authority conferred on the Board by the Act.

UNITED STATES OF AMERICA, CIVIL AERONAUTICS BOARD, WASHINGTON, D.C.

The holder hereof is authorized to investigate violations of the Federal Aviation Act, as amended, collect evidence in cases in which the regulatory authority of the Civil Aeronautics Board is or may be involved and perform other duties imposed upon him by law.

Under the Federal Aviation Act and Part 240 of the Economic Regulations of the Civil Aeronautics Board (14 CFR Part 240), the duly accredited special agents and auditors of the Board are empowered at all times to obtain access to all lands, buildings and equipment of any air carrier or foreign air carrier and to inspect, examine, and make notes and copies of all accounts, records, memorandums, documents, papers and correspondence kept or required to be kept by any air carrier, foreign air carrier or ticket agent.

The issuance of these credentials to the holder hereof constitutes an order and direction on the part of the Civil Aeronautics Board to such individual to carry out these duties as aforesaid and as more fully described in Part 240 of the Board's Economic Regulations.

Failure to honor these credentials will result in penalties as provided by law.

UNITED STATES OF AMERICA,
CIVIL AERONAUTICS BOARD,
WASHINGTON, D.C.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; 49 U.S.C. 1324.)

By the Civil Aeronautics Board:

Effective: January 8, 1976.

Adopted: December 16, 1975.

[SEAL] JAMES C. SCHULTZ,
General Counsel.

[Release Nos. 33–5654, 34–11917, 35–19296, IC–9080, AS–185]

PART 210—FORM AND CONTENT OF FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, AND INVESTMENT COMPANY ACT OF 1940

Subpart A—Accounting Series Releases

FINANCIAL REPORTING PRACTICES OF BANK HOLDING COMPANIES AND BANKS

In Securities Act Release No. 5620[1] the Commission proposed amendment of Article 9 of Regulation S–X [17 CFR 210.9–01 to 210.9–05] to conform certain reporting practices of bank holding companies and banks to generally accepted accounting principles as practiced in other industries. Comments on the proposal have been received and considered and with one modification the proposed amendment is now adopted. Regulation S–X which specifies the form and content of financial statements is amended by adding to the provisions applicable to banks (Rule 9–05) [§ 210.9–05] three subparagraphs relating to reporting of reserves for loan losses, classification of unearned income, and classification of certain debt instruments, sometimes referred to as capital debt.

As noted in Release 33–5620 these changes had been discussed from time to time with representatives of the banking community, Federal bank regulatory authorities, the American Institute of Certified Public Accountants, and the Internal Revenue Service. In addition, because of concerns that the change in reporting loan loss reserves would adversely affect the reserve accumulated for tax purposes, the Chief Accountant requested and received from the Internal Revenue Service a letter which said, in part:

> The Service has no requirement that the financial statements conform to the books in the case of additions to the bad debt reserves for banks already on the reserve method. We would deem it appropriate, however, that, if material, the disparity between the amount shown on the books and the amount shown on the financial statements be disclosed to the shareholder by way of a footnote or other method and the two amounts reconciled on the books.

The letters commenting on the proposal were favorable. It was suggested that the rule should provide for disclosure of the difference between the loan loss reserve stated on the financial statements and the reserve accumulated for tax purposes if material and such a change has been made. In addition the proposal to reclassify capital debt has been changed to make it clear that it includes subordinated indebtedness.

In connection with the provision that bonds, notes and debentures be reported as liabilities rather than capital, the recent proposal of the Federal bank regulatory authorities to amend their periodic Report of Condition (Call Report) reclassifies such debt in a similar manner. The description of that proposed revision states that the change "does not necessarily imply any supervisory change in the treatment of these notes by the banking agencies."

Commission action. The Commission hereby amends § 210.9–05 of 17 CFR Chapter II by the addition of new paragraphs (e), (f) and (g) as given below.

§ 210.9–05 Financial statements and schedules of banks.

* * * * *

(e) The valuation portion of the reserve for loan losses shall be reported as a deduction from loans receivable, the deferred tax portion as a deferred tax item, and the contingency portion as a part of undivided profits. If materially different from the valuation portion, the reserve accumulated under the Internal Revenue Code provisions shall be disclosed in a note and the two amounts reconciled.

(f) Bonds, notes, debentures and similar debt (including subordinated indebtedness) shall be reported as liabilities. Debt instruments may not be grouped with stockholders' equity under the caption "Capital."

(g) Unearned income shall be reported as a deduction from loans receivable.

(Secs. 6, 7, 8, 10 and 19(a) (15 U.S.C. 77f, 77g, 77h, 77j, 77s), Securities Act of 1933; secs. 12, 13, 15(d) and 23(a) (15 U.S.C. 78l,

[1] Notice of the proposed amendments was made in Securities Act Release No. 5620, Securities Exchange Act Release No. 11672, Public Utility Holding Company Act Release No. 19186 and Investment Company Act Release No. 8951, dated September 24, 1975. [40 FR 46117.]

V40245 DEC 19 75 XUM

78m, 78o(d), 78w), Securities Exchange Act of 1934; secs. 5(b), 14 and 20(a) (U.S.C. 79e, 79n, 79t), Public Utility Holding Company Act of 1935; secs. 8, 30, 31(c) and 38(a) (15 U.S.C. 80a-8, 80a-29, 80a-30(c), 80a-37(a)), Investment Company Act of 1940)

These amendments shall be effective with respect to financial statements filed after January 15, 1976, although they may be applied in statements filed prior to that time.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

DECEMBER 11, 1975.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE

[T.D. 75-315]

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

LASH-Type Barges

Section 4.81(g) of the Customs Regulations (19 CFR 4.81(g)) sets forth a simplified permit-to-proceed procedure for LASH-type barges which requires, among other things, that the barges be sealed. However, it has been determined that it is often hazardous to comply with the sealing requirements of that section. In view of this determination and the determination that the reporting and manifesting requirements set forth elsewhere in § 4.81(g) provide satisfactory control of the barges and the cargo thereon, it has been decided to eliminate the sealing requirement as unnecessary.

Accordingly, Part 4 of the Customs Regulations (19 CFR Part 4) is amended in the following manner:

§ 4.81 [Amended]

1. Paragraph (g) of § 4.81 of the Customs Regulations (19 CFR 4.81(g)) is amended by deleting the word "sealed" from the first sentence of that paragraph; by deleting the last six words, "and the barge shall be resealed", in subparagraph (1) of that paragraph; and by deleting subparagraph (5) of that paragraph in its entirety.

2. Paragraph (a) of § 4.81a of the Customs Regulations (19 CFR 4.81a(a)) is amended by deleting the second sentence. (R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624))

Inasmuch as this amendment merely relaxes present requirements and requires no public initiative, notice and public procedure thereon is found to be unnecessary, and good cause exists for dispensing with a delayed effective date under the provisions of 5 U.S.C. 553.

Effective date. This amendment will become effective December 19, 1975.

VERNON D. ACREE,
Commissioner of Customs.

Approved: December 3, 1975.

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

[FR Doc.75-34209 Filed 12-18-75;8:45 am]

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

[Docket No. 75F-0095]

PART 121—FOOD ADDITIVES

Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food

Sanitizing Solutions

The Commissioner of Food and Drugs is amending § 121.2547 *Sanitizing solutions* (21 CFR 121.2547) to provide for safe use of isopropyl alcohol as an optional ingredient in sanitizing solutions, effective December 19, 1975.

Notice was given by publication in the FEDERAL REGISTER of July 8, 1975 (40 FR 28656), that a food additive petition (FAP 5H3086) was filed by Ashland Chemical Co., Division of Ashland Oil, Inc., 5200 Blazer Pkwy., P.O. Box 2219, Columbus, OH 43216, proposing that § 121.2547(b)(9) be amended to provide for safe use of isopropyl alcohol as noted above.

The Commissioner, having evaluated the data in the food additive petition and other relevant material, concludes that the regulations should be amended as set forth below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))) and under authority delegated to the Commissioner (21 CFR 2.120), § 121.2547 is amended by revising paragraph (b)(9) as follows:

§ 121.2547 Sanitizing solutions.

* * * * *

(b) * * *

(9) An aqueous solution containing *n*-alkyl (C_{12}–C_{16}) benzyldimethylammonium chloride compounds having average molecular weights of 351–380 and consisting principally of alkyl groups with 12–16 carbon atoms with or without not over 1 percent each of groups with 8 and 10 carbon atoms. Additionally, the aqueous solution may contain isopropyl alcohol as an optional ingredient.

* * * * *

Any person who will be adversely affected by the foregoing order may at any time on or before January 19, 1976, file with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order, specify with particularity the provisions of the order deemed objectionable, and state the grounds for the objections. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Six copies of all documents shall be filed and should be identified with the Hearing Clerk docket number found in brackets in the heading of this order. Received objections may be seen in the above office during working hours, Monday through Friday.

Effective date. This order shall become effective December 19, 1975.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C 348(c)(1)).)

Dated: December 11, 1975.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.75-34207 Filed 12-18-75;8:45 am]

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 7393]

SUBCHAPTER A—INCOME TAX

[Income Tax Regs.]

PART 8—TEMPORARY INCOME TAX REGULATIONS UNDER SECTION 3 OF THE ACT OF OCTOBER 26, 1974 (PUBLIC LAW 93-483)

SUBCHAPTER B—ESTATE AND GIFT TAXES

[Estate Tax Regs.]

PART 24—TEMPORARY ESTATE TAX REGULATIONS UNDER SECTION 3 OF THE ACT OF OCTOBER 26, 1974 (PUBLIC LAW 93-483)

Transfers for Public, Charitable and Religious Uses

This document contains temporary income tax regulations (26 CFR Part 8) and estate tax regulations (26 CFR Part 24) under section 2055(e)(3) of the Internal Revenue Code of 1954 as added by section 3, Act of Oct. 26, 1974 (P.L. 93-483). These temporary regulations are to remain in force and effect until superseded by permanent regulations.

Section 2055(e)(2)(A) of the Code disallows an estate tax deduction for certain transfers to charity if the transfer is not in the form either of a charitable remainder trust that complies with section 664 of the Code or a pooled income fund that complies with section 642(c)(5) of the Code.

The new amendment to section 2055 is a relief provision which, in certain limited cases, extends until December 31, 1975, the transitional period originally allowed under the Tax Reform Act of 1969 to amend or conform a trust to the provisions of section 664 of the Code.

The relief provision applies to any interest for charitable purposes which passes under a will executed before September 21, 1974, or by an inter vivos trust created after July 31, 1969, and before September 21, 1974. The will or trust must be amended to meet the requirements of section 2055(e)(2)(A) by December 31, 1975, or judicial proceedings to amend the will or trust must be begun by that date.

The temporary regulations apply the relief provision to inter vivos transfers created after July 31, 1969, which are irrevocable at the date of death. However, in general, a trust amended pursuant to these temporary regulations is treated as a charitable remainder trust from the date it would be deemed created under section 664.

The temporary regulations make provision for judicial reformation as well as nonjudicial reformation by agreement of the parties provided the agreement is binding on all parties.

The temporary regulations provide that the amending procedure under section 2055(e)(3) is available only to charitable interests which, but for the disqualifying provisions of section 2055(e)(2)(A), otherwise qualify for a deduction under section 2055. A charitable interest cannot be created by the use of this relief provision.

Amendments to the regulations. In order to prescribe temporary income tax regulations (26 CFR Part 8) relating to charitable remainder trusts and temporary estate tax regulations (26 CFR Part 24) relating to transfers for public, charitable and religious uses pursuant to section 2055 of the Internal Revenue Code of 1954, as amended by section 3 of the Act of Oct. 26, 1974 (Pub. L. 93-483, 88 Stat. 1457), the following temporary regulations are hereby adopted:

1. A new § 8.1 is added as follows:

§ 8.1 Charitable remainder trusts.

(a) *Certain wills and trusts in existence on September 21, 1974.* In the case of a will executed before September 21, 1974, or a trust created (within the meaning of applicable local law) after July 31, 1969, and before September 21, 1974, which is amended pursuant to section 2055(e)(3) and § 24.1 of this Chapter (Temporary Estate Tax Regulations), a charitable remainder trust resulting from such amendment will be treated as a charitable remainder trust from the date it would be deemed created under § 1.664-1(a)(4) and (5) of this chapter (Income Tax Regulations), whether or not such date is after September 20, 1974.

(b) *Certain transfers to trusts created before August 1, 1969.* Property transferred to a trust created (within the meaning of applicable local law) before August 1, 1969, whose governing instrument provides that an organization described in section 170(c) receives an irrevocable remainder interest in such trust shall be deemed transferred to a trust created on the date of such transfer, provided that the transfer occurs after July 31, 1969 and prior to October 18, 1971, and pursuant to an amendment provided in § 24.1 of this chapter (Temporary Estate Tax Regulations), the transferred property and any undistributed income therefrom is severed and placed in a separate trust as of the date of the amendment.

2. A new § 24.1 is added as follows:

§ 24.1 Special rules applicable in the case of certain wills and trusts in existence on September 21, 1974.

(a) **In general,** in the case of a will executed before September 21, 1974, or a trust created (within the meaning of applicable local law) after July 31, 1969, and before September 21, 1974, if—

(1) At the time of the decedent's death a deduction is not allowable solely because of the failure of an interest in property which passes or has passed from the decedent to a person, or for a use, described in section 2055(a) to meet the requirements of section 2055(e)(2)(A), and

(2) The governing instrument is amended or conformed in accordance with this paragraph so that the interest is in a trust which is a charitable remainder annuity trust or a charitable remainder unitrust (described in section 664) or a pooled income fund (described in section 642(c)(5)), or the governing instrument is treated under paragraph (h) of this section as if it were amended, a deduction shall nevertheless be allowed.

(b) An amendment or conformation pursuant to this section must be made before January 1, 1976, or, if later, on or before the 30th day after the date on which judicial proceedings begun before January 1, 1976 (which are required to amend or conform the governing instrument) become final.

(c) A governing instrument may be amended or conformed under this section only where:

(1) The transfer is not in trust but passes under a will executed before September 21, 1974;

(2) The transfer is in the form of a testamentary trust created under a will executed before September 21, 1974;

(3) The transfer was in trust, which was created (within the meaning of applicable local law) after July 31, 1969, and before September 21, 1974, but only if, at the time of the creation of the trust, the governing instrument provides that an organization described in section 170(c) receives an irrevocable remainder interest in such trust;

(4) Property was transferred inter vivos after July 31, 1969, and before October 18, 1971, to a trust created (within the meaning of applicable local law) before August 1, 1969, which trust provides that an organization described in section 170(c) receives an irrevocable remainder interest in such trust, and the transferred property and any undistributed income therefrom is severed and placed in a separate trust before the applicable date specified in paragraph (b) of this section. An instrument governing a transfer under this subparagraph (4), which is amended pursuant to this section shall be treated as having made such transfer to a trust deemed created on the date of such transfer;

(5) In the case of a transfer to a pooled income fund made before September 21, 1974 (or a transfer made under a will which was executed before September 21, 1974), the instrument governing the transfer fails to satisfy the requirements of § 1.642(c)-5(b).

However, a governing instrument may not be amended pursuant to this section unless, at the time of the decedent's death, the interest is an irrevocable remainder interest for which a deduction, but for section 2055(e)(2)(A), would be allowable under section 2055(a) and the regulations thereunder. The provisions of section 508(d)(2)(A) (relating to disallowance of certain charitable, etc., deductions) shall not apply to such interest if the governing instrument is amended so as to comply with the requirements of section 508(e) (relating to governing instruments) by the applicable date described in paragraph (b) of this section.

(d) The decree resulting from any judicial proceedings begun to amend a governing instrument pursuant to paragraph (a) of this section must be binding, under local law, on all parties having an interest in the bequest or transfer as well as the fiduciary of the decedent's estate and trustee of the trust to be amended. In the event local law does not require judicial proceedings to amend or conform a governing instrument, a deduction may nevertheless be allowed if the governing instrument is amended or conformed by nonjudicial agreement between all parties having an interest in the bequest or transfer as well as the fiduciary of the decedent's estate and trustee of the trust to be amended provided that the agreement is binding, under local law, on all such parties. The judicial proceedings or nonjudicial agreement must also account for any distributions made from the deemed date of creation to the date of the amendment in the following manner:

(1) Where the amount of the distributions which would have been made by the trust to a recipient had the amendment pursuant to paragraph (a) of this section been in effect since the creation of the trust exceeds the amount of the distributions made by the trust prior to the amendment, the trust must pay an amount equal to such excess to the recipient;

(2) Where the amount of the distributions made to the recipient prior to the amendment pursuant to paragraph (a) of this section exceeds the amount of the distributions which would have been made by such trust if the amended provisions of such trust had been in effect from the time of creation of such trust, the recipient must pay an amount equal to such excess to the trust.

See § 1.664-1(d)(4) for rules relating to the year of inclusion in the case of an underpayment to a recipient and the allowance of a deduction in the case of an overpayment to a recipient.

(e) Where a charitable remainder trust (as described in § 1.664-1(a)(1)(iii)(a)) results from an amendment pursuant to this section, the trust will be treated as a charitable remainder trust for all purposes from the date it would be deemed created under § 1.664-1(a)(4) and (5), whether or not such date is after September 20, 1974. Subject to the limitations imposed by section 6511, the estate tax charitable deduction is allowable and the charitable remainder trust is exempt from Federal income taxation. For application of certain excise

V40245 DEC 19 75 XUM

taxes pursuant to section 4947(a)(2), see § 53.4947–1(c)(1)(iii) and (c)(6). In amending a governing instrument pursuant to paragraph (a) of this section, the exchange of a noncharitable beneficiary's interest in an unqualified transfer in trust for an interest in a qualified transfer in trust will not be treated as an act of self-dealing (described in section 4941) or a taxable expenditure (described in section 4945).

(f) If, on the due date for filing the estate tax return (including any extensions thereof), proceedings to amend or conform a governing instrument pursuant to paragraph (a) of this section have not become final, such return shall be filed with the tax computed as if no deduction were allowable under this section. When the proceedings to amend or conform such instrument have become final (within the applicable date described in paragraph (b) of this section), a deduction shall be allowed upon the filing of a claim for credit or refund (within the limitations of section 6511). In the case of a credit or refund as a result of an amendment, or conformation made pursuant to this section, no interest shall be allowed for the period prior to the expiration of the 180th day after the date on which the claim for credit or refund is filed.

(g) If a governing instrument is amended under this section then, except as provided in paragraph (h) (2) of this section, the amount of the deduction allowable under this section shall be the amount that equals the value of the interest which, under the rules of section 2055 (including the rules governing disclaimers) passes to, or for the use of, an organization described in section 2055(a).

(h) (1) In the case of a will executed before September 21, 1974, or a trust created (within the meaning of applicable local law) before such date and after July 31, 1969, that creates an interest for which a deduction would be allowable under section 2055(a) but for section 2055(e)(2)(A), if the date of death of the decedent is prior to January 1, 1976, and if on or before the filing date of the estate tax return (including any extension thereof)—

(i) The interest is in a charitable trust which, if a deduction under section 2055(a) had been allowed, would be in a trust described in section 4947(a)(1), or

(ii) Such interest passes directly to a person or for a use described in section 2055(a) (as, for example, by reason of the termination of an intervening interest),

the governing instrument shall be treated as if it were amended or conformed pursuant to paragraph (a) of this section and a deduction shall be allowed. See section 508(d)(2) and § 1.508(b) for the disallowance of such a deduction in the case of an interest in a trust described in section 4947(a)(1) if the governing instrument fails to meet the requirements of section 508(e) by the end of the taxable year of the trust in which the filing date of the estate tax return occurs. A governing instrument treated as amended under this paragraph may not thereafter be amended. The provisions of this paragraph shall not apply if the requirements of subdivision (i) or (ii) of this paragraph (h)(1) are satisfied as a result of an amendment of a dispositive provision of the governing instrument occurring since the date of death of the decedent.

(2) The amount of the deduction for a transfer which is treated under this paragraph as if it were amended will be determined as if the transfer were a charitable remainder annuity trust which provides an annuity of 6 percent of the initial fair market value payable from the date of death—

(i) In the case of a transfer providing a life estate, for the expected lives of the noncharitable beneficiaries as determined on the date of death of the decedent, or

(ii) In the case of a transfer providing a term of years, for the term of years as expressed in the governing instrument, but not to exceed 20 years.

Any distributions made to a recipient from the date of death of the decedent to the date on which the transfer is deemed to be amended (*i.e.*, the date the transfer satisfies the requirements of paragraph (h)(1) of this section) must be taken into account under this subparagraph (2) in determining the amount of the deduction to the extent that the adjustments in such distributions required by paragraph (d) of this section, determined as if the charitable remainder annuity trust were deemed created at the date of death of the decedent, have not been made on or before the filing date of the estate tax return.

Because of the need for immediate guidance with respect to the provisions contained in this Treasury decision, it is found impracticable to issue it with notice and public procedure thereon under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that secion.

(Sections 2055(e)(3) and 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).)

DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

Approved: December 15, 1975.

Title 29—Labor

SUBTITLE A—OFFICE OF THE SECRETARY OF LABOR

PART 97—SPECIAL FEDERAL PROGRAMS AND RESPONSIBILITIES UNDER THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

Indian Manpower Programs; Allowable Federal Costs; New Limitations Thereon

On October 9, 1975, the Department published at 40 FR 47744 three proposed amendments to 29 CFR 97.161 *Allowable Federal costs* for the Indian Manpower programs under the Comprehensive Employment and Training Act of 1973, as amended, 29 U.S.C. 801.

The Department accepted comments on the proposed amendments until November 12, 1975. Only three comments were received. One comment suggested that the proposed travel regulations be clarified without specifying what was not clear. The Department, however, believes that the proposed regulation is clear, and in the absence of specific suggestions is making no change. Two comments objected to the proposed regulation on space valuation as unduly restrictive. The Department has relaxed this requirement by revising § 97.161(f)(6)(i).

Accordingly 29 CFR 97.161 is amended as set forth below.

This revision shall become effective on January 19, 1976.

Signed at Washington, D.C., this 15th day of December, 1975.

JOHN T. DUNLOP,
Secretary of Labor.

§ 97.161 **Allowable Federal costs.**

* * * * *

(b) * * *

(3) No funds grants under this subpart may be used, either directly or indirectly, for purposes of obtaining consulting or technical assistance subgrants or contracts without prior written approval of the Division of Indian Manpower Programs. Requests for approval of such subgrants or contracts shall contain a detailed explanation as to the need for such consultant or technical assistance services and a reason why such services cannot be provided without such subgrants or contracts. The request shall also include a resume of the qualifications of the proposed consulting or technical assistance organization. The total proposed costs of such services must be reasonable in relation to the total administrative costs of the prime sponsor's grant.

* * * * *

(f) * * *

(6) * * *

(i) * * * The value of space owned by a prime sponsor or a member of a consortium and used for purposes of a section 302 program may be an allowable cost chargeable to the grant if the cost is approved in advance as reasonable by the Division of Indian Manpower Programs.

* * * * *

(f) * * *

(7) *Travel regulations.* The following travel regulations apply to all prime sponsors:

(i) *Advance approval.* All grantee, subgrantee or contractor payments for travel by employees, consultants, and members of boards or councils shall be approved in advance by the responsible official designated by the grantee.

(ii) *Out-of-State travel.* All out-of-State travel (in the case of multistate grantees, all travel out of the geographic

area of the grant) must be specifically approved in writing in advance by the Division of Indian Manpower Programs.

(iii) *Travel outside the geographic area of the grant* must be for programmatic purposes, viz.: job development, contract negotiations, administration of subgrants and contracts, etc. Travel outside the geographic area of the grant for nonprogrammatic purposes, viz.: training sessions, conferences, board meetings, consultation, etc., must be specifically approved in writing, in advance by the Division of Indian Manpower Programs.

(iv) *Travel policies.* All grantees, subgrantees and contractors are required to follow the travel policies set forth in the Standardized Government Travel Regulations (SGTR). Where a grantee, subgrantee or contractor has more restrictive requirements, the latter shall be followed.

(v) *Mileage costs.* Mileage costs for the use of privately owned automobiles shall be paid in accordance with prevailing rates in the community. In no event, however, shall the rates exceed those provided for in the SGTR.

(vi) *First-class travel.* Less than first-class travel accommodations shall be used in all instances except when:

(A) These accommodations do not exist or are not available within a reasonable time;

(B) Less than first-class travel would result in high overall costs because of required routing, time urgency, baggage differential, or other factors; or

(C) The physical condition of the traveler or other extenuating circumstances require the use of first-class travel.

(vii) *Per diem rates.* (A) Per diem rates shall be established by the prime sponsor based on the following factors:

(*1*) Cost of meals and lodging in the locality;

(2) Availability of meals and lodging at temporary duty locations without charge, or at nominal costs; and

(3) Extended duty at a place where the traveler may obtain accommodations at reduced rates.

(B) In no event shall per diem rates exceed the maximum established by the Standardized Government Travel Regulations for travel within the Continental United States and by the Civilian Personnel Per Diem Bulletin (Department of Defense) for travel within or to Hawaii and Puerto Rico.

[FR Doc.75-34296 Filed 12-18-75;8:45 am]

CHAPTER II—OFFICE OF THE ASSISTANT SECRETARY FOR LABOR-MANAGEMENT RELATIONS, DEPARTMENT OF LABOR

PART 204—STANDARDS OF CONDUCT

Reporting Requirements

On page 19993 of the FEDERAL REGISTER of May 7, 1975, there was published an amendment which revoked §§ 204.3 through §§ 204.25 and inserted a new §§ 204.3. Section 204.3 provides that labor organizations subject to Executive Order 11491 as amended by Executive Order 11616 file the same reports and on the same forms as required for labor organizations in the private sector under Parts 402, 403 and 408 of Chapter IV of Title 29. Labor organizations subject to the Executive Order were advised to continue to report on the G forms until such time as the revised LM forms were approved. Notice is hereby given that the LM forms are approved and labor organizations subject to the Executive Order shall file reports in accordance with 29 CFR 204.3.

Copies of the reporting forms are filed herewith and are available from the Office of Labor-Management Standards Enforcement, Room N5603, Department of Labor, 3rd and Constitution Avenue, NW., Washington, D.C. 20216.[1]

Effective date. The use of LM reporting forms as required by 29 CFR 204.3 is effective December 31, 1975. I find the following is good cause for not giving thirty days notice after publication in the FEDERAL REGISTER.

The regulation was published on May 7, 1975, and the proposed forms and instructions were published in the FEDERAL REGISTER on December 3, 1974, for notice and comment. There have subsequently been no important substantive changes in the forms or the instructions.

Pursuant to section 207 of the LMRDA labor organizations have ninety days from the end of their fiscal year to file the reports required by section 201 of the Act; consequently, a waiver of the 30-day delayed effective date will not impose an undue burden on the labor organizations.

In order to achieve a uniform basis for reporting and statistical data, use of the revised forms is required from the beginning of the calendar year. Approximately 70 percent of the reporting labor organizations have a fiscal year ending December 31.

The stock of the current labor organization annual report forms is virtually exhausted and is therefore insufficient to supply all the labor organizations whose fiscal year ends on December 31.

Weighing the inconvenience to the unions and the benefits to the Government, I find, pursuant to 5 U.S.C. 553(d)(3), this is good cause for requiring use of the LM forms for reporting information effective on December 31, 1975.

Signed at Washington, D.C. this 16th day of December, 1975.

PAUL J. FASSER, Jr.,
Assistant Secretary of Labor for Labor-Management Relations.

[1] Forms filed as part of the original document.

CHAPTER IV—OFFICE OF LABOR-MANAGEMENT STANDARDS ENFORCEMENT

LABOR ORGANIZATIONS

Reports

On pages 41934 and 41935 of the FEDERAL REGISTER of December 3, 1974, there was published a notice of proposed amendments to §§ 402.1, 402.3, and 402.4 of Part 402; § 403.4 of Part 403; §§ 408.6 and 408.8 of Part 408, of Chapter IV, Title 29.

The change to §§ 402.1 and 402.3 deleted dates which are no longer applicable to the filing of reports. Section 403.4 was changed to apply to labor organizations subject solely to Executive Order 11491, as amended, as well as to Postal Unions.

Section 408.6 was changed to provide for the filing of Form 1A, if required, at the same time the annual financial report was filed on behalf of a labor organization in Trusteeship.

Section 408.8 was changed to clarify the use of the Form 15A at the time a trusteeship is terminated.

In addition, in § 402.4 it was proposed to use a new Form 1A for reporting certain amendments to the information reports; and to make certain other changes in the LM—1, LM—2, LM—3, and LM—16 and to the instructions for completing the required forms.

The following are among the changes that were made on the reporting forms and in the instructions in response to comments received after publication of the proposed forms and instructions on December 3, 1974, in the FEDERAL REGISTER (39 FR 41934). An item for providing additional information was added on Forms LM–1 and LM–1A in response to comments in order to reduce the need for attaching separate sheets. A definition of "work permits" and "transfer fees" was added to the instructions for Forms LM–1, LM–2 and LM–3 to clarify the type of information desired in the question on those forms pertaining to fees and dues required. The question concerning the next regular election of officers which had previously been added to Forms LM–2 and LM–3 has also been added to the Form LM–1A. In response to several comments, a cash reconciliation worktable was added to the instructions for the Form LM–3 to assist filers in determining whether they have correctly filled out the financial information section of the form. The instructions for completing column (E) "fair market value" of Schedule 5 "fixed assets" on Form LM–2 was separated into "Cash on hand" and "Cash in banks" to provide separate information on these two categories of cash as is done in the present Form LM–2 in order to facilitate the collection of statistical data and "Statement C—Cash" was changed accordingly. In response to a comment objecting to our treatment of mortgages as inadequate, the definition of mortgages was made less restrictive.

V 40245 DEC 19 75 XUM

A number of minor editorial changes were also made in the forms and the instructions. The name of the Office of Labor-Management and Welfare-Pension Reports was changed to the Office of Labor-Management Standards Enforcement and the ZIP code was changed to reflect a reorganization and relocation of the Office. The letters "LM" before file numbers were dropped since they will no longer be used. On the statements on Form LM–2 a "cents" column was added with "XX" in it to make it clear to filers that amounts are to be given in dollars only. On Form LM–3 Item 42 "loans made by your organization" and Item 43 "payments for benefits" were reversed so that the order in which these items are listed would be the same as on the Form LM–2. Clarifying language was added at several places including Item 20 on Form LM–2 and Item 18 on Form LM–3 concerning the filing of Form LM–1A, LM–2, and LM–3; and regarding the city, county, and state where the union is chartered to operate.

The following comments are among those that were considered but were not acted upon. An objection was received to the concept of Form LM–1A which was rejected since it has been determined that Form LM–1A will perform a vital function in providing more accessible updating for public disclosure purposes of the information provided on Form LM–1 and will permit the disposal of outdated annual reports. Significant changes in format and information on Forms LM–2 and LM–3 were suggested so that the gathering of information for estimating Gross National Product could be improved. In general these comments were rejected because computer printouts could provide much of the requested information. The proposed instructions for reporting of expenses of union-used cars were objected to on the basis that they impose too great of a burden on the reporting unions. No changes were made to these instructions as the information requested has always been required but has not been specifically set forth. An objection to the question requiring unions to report any discovery of a loss or shortage of union funds or other property was rejected because the question will provide needed information. A request to extend the filing period and to increase the $10,000 base at which salaries to employees must be itemized was rejected since these matters are established by statute.

Copies of these forms, which are filed herewith, are available from the Office of Labor-Management Standards Enforcement, Room N–5603, Department of Labor, 3rd and Constitution Avenue NW., Washington, D.C. 20216.[1]

Effective date. These amendments and the requirements for the use of the reporting forms shall be effective on December 31, 1975. I find that the following constitutes good cause for making these regulations and use of the forms effective less than 30 days after publication in the FEDERAL REGISTER:

The regulations and proposed forms and instructions were published in the FEDERAL REGISTER on December 3, 1974, for notice and comment, and there have subsequently been no important substantive changes in the forms or the instructions.

Pursuant to section 207 of the LMRDA labor organizations have ninety days from the end of their fiscal year to file the reports required by section 201 of the Act; consequently, a waiver of the 30-day delayed effective date will not impose an undue burden on the labor organizations.

In order to achieve a uniform basis for reporting and statistical data, use of the revised forms is required from the beginning of the calendar year. Approximately 70% of the reporting labor organizations have a fiscal year ending December 31.

The stock of the current labor organization annual report forms is virtually exhausted, and is therefore insufficient to supply all the labor organizations whose fiscal year ends on December 31.

Weighing the inconvenience to the unions and the benefits to the government, I find, pursuant to 5 U.S.C. 553(d)(3), there is good cause for making these amendments to the regulations and the requirement for the use of the reporting forms effective on December 31, 1975.

Interested persons were invited to submit written comments before January 10, 1976. No written objections were received to the proposed regulations and they are hereby adopted without change and are set forth below.

Signed at Washington, D.C., this 16th day of December 1975.

PAUL J. FASSER, JR.,
Assistant Secretary of Labor for Labor-Management Relations.

PART 402—LABOR ORGANIZATION INFORMATION REPORTS

§§ 402.1, 402.3 [Amended]

1. Sections 402.1 and 402.3 of Part 402 are amended by deleting from both sections the words "not later than December 14, 1959, or" and "whichever is later."

2. Section 402.4 of Part 402, Chapter IV, Title 29 is revised to read as follows:

§ 402.4 Subsequent reports.

Every labor organization shall update the information filed in its information report (Form LM–1), by filing two copies of Form LM–1A, entitled "Report of Current Status: Labor Organization Information Supplement," together with two copies of any documents called for by that form, at the time such labor organization files its first annual financial report following the effective date of this section as amended. Subsequently, two copies of a Form LM–1A together with documents prescribed by the instructions to that form shall be filed for each reporting period in which there have been changes in the constitution and bylaws or in the practices or procedures for which separate statements must be filed pursuant to subsection 201(a)(5) (A) through (M) of the Labor-Management Reporting and Disclosure Act. Such subsequent reports shall be filed when the labor organization files its annual financial report as provided in Part 403 of this chapter. Reports on Form LM–1A shall be signed by the president and treasurer or corresponding principal officers of the labor organization filing the reports.

PART 403—LABOR ORGANIZATION ANNUAL FINANCIAL REPORTS

§ 403.4 [Amended]

3. Section 403.4(b) of Part 403, Chapter IV, Title 29 is amended by adding the words "subject solely to Executive Order 11491, as amended, or" after the words "A local labor organization" in the first clause.

PART 408—LABOR ORGANIZATION TRUSTEESHIP REPORTS

4. Section 408.6 of Part 408, Chapter IV, Title 29 is revised to read as follows:

§ 408.6 Amendments to the Labor Organization Information Report filed by or on behalf of the subordinate labor organization.

During the continuance of a trusteeship, the labor organization which has assumed trusteeship over a subordinate labor organization, shall file with the Office of Labor-Management and Welfare-Pension Reports on behalf of the subordinate labor organization any change in the information required by Part 402 of this chapter by filing the Form LM–1A, if required, at the same time it files the annual financial report referred to in § 408.5.

5. Section 408.8 of Part 408, Chapter IV, Title 29 is revised to read as follows:

§ 408.8 Terminal trusteeship information report.

There shall be filed at the same time that the terminal trusteeship financial report is filed a terminal trusteeship information report on Form LM–16. If in answer to Item 6 of Form LM–16, there was (a) a convention or other policy determining body to which the subordinate organization sent delegates or would have sent delegates if not in trusteeship or (b) an election of officers of the labor organization assuming trusteeship, Form LM–15A should be used to report the required information with respect thereto.

(Sections 201, 208, 301, 73 Stat. 524, 529, 530, 29 U.S.C. 431, 438, 461 and Secretary's Order No. 11–72 (May 12, 1972))

[FR Doc.75–34298 Filed 12–18–75;8:45 am]

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 75–052]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Passaic River, N.J.

This amendment changes the regulations for the Gregory Avenue drawbridge across the Passaic River, mile 14.0, to permit the draw to be maintained in a permanently closed position. This amendment was circulated as a public notice dated April 9, 1975 by the Commander, Third Coast Guard District, and was published in the FEDERAL REGISTER as a notice of proposed rule making (CGD 75–052) on April 4, 1975, (40 FR 15093). Five responses were received. Three had no objection, while two objected. A thorough on-site survey of these objections found them to be without substantial foundation. The objectors were requested to comment again based on these findings. No response was received from either of them.

Accordingly, Part 117 of Title 33 of the Code of Federal Regulations is amended by revising paragraph (f)(2) of § 117.225 to read as follows:

§ 117.225 Navigable waters in the State of New Jersey; bridges where constant attendance of draw tenders is not required.

* * * * * * *

(f) * * *

(2) *Passaic River.* Passaic and Bergen Counties highway bridges at Gregory Avenue, Second Street and West Eighth Street, Passaic. The draws need not open for the passage of vessels, and paragraphs (b) through (e) of this section shall not apply to these bridges.

* * * * * * *

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937 (33 U.S.C. 499, 49 U.S.C. 1655(g)(2)); 49 CFR 1.46(c)(5), 33 CFR 1.05–1(c)(4))

Effective date. This revision shall become effective on January 19, 1976.

Dated: December 12, 1975.

R. I. PRICE,
Rear Admiral, U.S. Coast Guard of, Office of Marine Environment and Systems.

[FR Doc.75–34225 Filed 12–18–75;8:45 am]

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5564; AA–890]

ALASKA

Revocation of Executive Order No. 2553; Amendment of Public Land Order No. 5554

By virtue of the authority vested in the President, and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), and section 14(h) of the Alaska Native Claims Settlement Act of December 18, 1971, 85 Stat. 688, 704 (hereinafter referred to as the Act), it is ordered as follows:

1. Executive Order No. 2553 of March 21, 1917, which withdrew lands in Alaska, covered by U.S. Survey No. 484 in connection with the U.S. Wireless Telegraph Service, is hereby revoked in its entirety, except as to the following described lands, which are now under the jurisdiction of the Federal Aviation Administration:

SEWARD MERIDIAN

T. 26 S., R. 19 W. (Fractional), U.S. Survey No. 484;
Beginning at M.C. No. 1 of U.S. Survey No. 484; thence S. 88°29' E., 3,564 ft. to Corner No. 1, the true point of beginning; thence S. 55°26' E., 175 ft. to Corner No. 2; thence N. 35°17' E., 125 ft. to Corner No. 3; thence N. 55°26' W., 175 ft. to Corner No. 4; thence S. 35°17' W., 125 ft. to the point of beginning; containing approximately ½ acre.

2. Public Land Order No. 5554 of December 10, 1975, withdrawing certain lands so that the Natives of Kodiak, Inc., may select from those lands under the provisions of section 14(h)(3) of the Act, is hereby amended to include the lands revoked in paragraph 1 of this order, and the said lands are expressly made subject to all of the terms and conditions of that order. The total areas described in Public Land Order No. 5554, as amended by this order, still aggregate approximately 46,080 acres, of which the Natives of Kodiak, Inc., may select no more than 23,040 acres.

JACK O. HORTON,
Assistant Secretary of the Interior.

DECEMBER 16, 1975.

[FR Doc.75–34214 Filed 12–18–75;8:45 am]

[Public Land Order 5563]

ALASKA

Amendment of Executive Order No. 5389, as Amended

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

Executive Order No. 5389 of July 7, 1930, as amended by Public Land Order No. 399 of August 20, 1947, which withdrew certain public lands in Alaska containing hot or medicinal springs, is hereby further amended and modified to the extent necessary to permit the withdrawal of lands under sections 11(a)(3) and 14(h) of the Alaska Native Claims Settlement Act of December 18, 1971, 85 Stat. 688, 696, 704, and selections under sections 12 or 14(h) of that Act, and all withdrawals heretofore made pursuant to sections 11(a)(3) or 14(h) of that Act, and not revoked, are hereby affirmed as of the date of this order.

JACK O. HORTON,
Assistant Secretary of the Interior.

DECEMBER 16, 1975.

[FR Doc.75–34213 Filed 12–18–75;8:45 am]

[Public Land Order 5562]

ALASKA

Amendment of Executive Order No. 5327, as Amended

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

Executive Order No. 5327 of April 15, 1930, as amended, which withdrew deposits of oil shale and lands containing such deposits owned by the United States, so far as it relates to lands in the State of Alaska, is hereby further amended and modified to the extent necessary to permit the withdrawal of lands under sections 11(a)(3) and 14(h) of the Alaska Native Claims Settlement Act of December 18, 1971, 85 Stat. 688, 696, 704, and selections under sections 12 or 14 of that Act, and all withdrawals heretofore made pursuant to sections 11(a)(3) or 14(h) of that Act and not revoked, are hereby affirmed as of the date of this order.

JACK O. HORTON,
Assistant Secretary of the Interior.

DECEMBER 16, 1975.

[FR Doc.75–34212 Filed 12–18–75;8:45 am]

[Public Land Order 5561]

ALASKA

Withdrawal for Classification or Reclassification of Some Areas Withdrawn by Section 11 of Alaska Native Claims Settlement Act

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. Except as otherwise provided in paragraph 3 of this order, all those lands withdrawn by section 11(a)(1) of the Alaska Native Claims Settlement Act of December 18, 1971, 85 Stat. 688, 696, (hereinafter referred to as the Act), and all those lands withdrawn by the Secretary of the Interior under the provisions of section 11 of the Act which are withdrawn as of December 16, 1975, are hereby further withdrawn from settlement, entry, location, or disposal under the public land laws including the mining and mineral leasing laws and from selection by the State of Alaska under the Alaska Statehood Act, 72 Stat. 339, but not from disposal under the Act. The lands are reserved for the purpose of completing the administration of the Act.

2. On March 31, 1976, all those lands not under pending application for Native selection shall become available for State selection unless otherwise provided in any statute, regulation, court decree, contract, or public land order.

3. Public Land Order No. 5252 of September 16, 1972, which identifies lands that may be selected by the State of Alaska following selection by the appropriate regional corporations, is not affected by this order.

4. Prior to the conveyance of any lands described in paragraph 1 of this order, the lands shall remain subject to administration by the Secretary of the Interior under applicable laws and regulations and his authority to make contracts and to grant leases, permits, rights-of-way, or easements shall not be impaired by this order. Applications for leases under the Mineral Leasing Act,

[1] Forms filed as part of the original document.

V401245 DEC 19 75 XUM

supra, will be rejected until this order is modified or the lands are appropriately classified to permit mineral leasing.

JACK O. HORTON,
Assistant Secretary of the Interior.

DECEMBER 16, 1975.

Title 47—Telecommunication

CHAPTER I—FEDERAL

[FCC 75-1336]

COMMUNICATIONS COMMISSION

PART 0—COMMISSION ORGANIZATION

Privacy Act of 1974

1. The subject amendment is designed to further implement the Privacy Act of 1974, Pub. L. 93-579, December 31, 1974, 5 U.S.C. 552a by providing a means of administrative review in the event that a determination is made denying an individual access to his or her records. The Commission feels that such an opportunity to seek administrative review is consuming alternative course of action preferable to the more costly and time set out in the Act which requires a person who has had his or her request for access rejected to seek relief through the district courts of the United States.

2. Authority to amend Commission Rules is contained in sections 4(i), (j) and 303(r) of the Communications Act, as amended, 47 U.S.C. 154(i), (j) and 303(r).

3. Because the subject amendment is procedural in nature, compliance with the prior notice and effective date requirements of 5 U.S.C. 553 is not required.

4. In view of the foregoing, *It is ordered*, That the amendment to Part 0 of the rules set out below is adopted, effective December 24, 1975.

Adopted: December 9, 1975.

Released: December 16, 1975.

(Secs. 4, 5, 308, 48 Stat., as amended, 1066, 1068, 1082 (47 U.S.C. 154, 155, 303))

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

Section 0.555(e) is added to read as follows:

§ 0.555 Disclosure of record information to individuals.

* * * * *

(e) In the event that a determination is made denying an individual access to his or her records for any reason, such individual may either:

(1) Seek administrative review of the adverse determination. Such a request shall be in writing and should be addressed to the system manager who made the initial decision. In addition, the request for review shall state specifically why the initial decision should be reversed.

(2) Seek judicial relief in the district courts of the United States pursuant to paragraph (g)(1)(B) of the Act.

[FR Doc.75-34241 Filed 12-18-75;8:45 am]

[Docket No. 20360; RM-2342]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations, Table of Assignments, Calif.

1. The Commission has before it for consideration the notice of proposed rulemaking adopted February 14, 1975 (40 FR 7945), inviting comments on a proposal to assign Channel 265A to Palm Springs, California, as its second FM channel assignment. This proceeding was instituted by a petition from KPSI Radio Corporation, licensee of AM Station KPSI, Palm Springs. Supporting comments were filed by the petitioner. No oppositions were submitted.

2. Palm Springs, population 20,936,[1] is located in Riverside County, population 459,074, approximately 110 miles east of Los Angeles and 87 miles north of the United States-Mexico boundary. It is a popular tourist center in the Upper Coachella Valley in Riverside County. Local aural service is provided by three AM stations—KCMJ (Class II, unlimited-time), KDES (Class III, unlimited-time); and KPSI (Class IV, unlimited-time) licensed to petitioner; and FM Station KDES-FM (Channel 284). Channel 265A could be assigned to Palm Springs in conformity with the Commission's minimum mileage separation requirements.

3. Petitioner has adduced sufficient evidence to support the assignment of a second FM channel to Palm Springs. Relevant economic data were set forth in the notice. Certain additional facts are provided by petitioner regarding Palm Springs' significant growth during the last few years. We are told that as of 1972, the city's permanent population was 23,100 and in 1973, that total had risen to 25,850. From 1970 to 1973, Palm Springs' population increased 23.5% according to data furnished by petitioner. The city also continues to be an important tourist center as evidenced by statistics furnished regarding airport passenger traffic and retail sales.

4. The assignment of Channel 265A to Palm Springs will cause preclusion on co-Channel 265A as stated in the notice, affecting four cities without FM assignments. Each of the affected cities, however, either already receives adequate service from nearby stations or will receive city-grade service from the assignment herein. In addition, Channel 292A would be available for future assignment to any of the communities should there be a demand.

[1] Population figures are from the 1970 U.S. Census, unless otherwise indicated.

5. The present assignment will result in an intermixture of classes of channels at Palm Springs. However, as petitioner notes, a facility site can be selected on high terrain so as to achieve parity of coverage area with the existing Class C channel. Thus we do not believe that an undesirable competitive situation would result. Petitioner has reaffirmed its intention to apply for a construction permit and to build a station promptly if its application is granted.

6. We believe that the public interest would be served by the assignment of Channel 265A to Palm Springs as a second FM channel. Pursuant to the United States-Mexican FM Broadcasting Agreement, Mexican concurrence has been obtained.

7. In view of the foregoing and pursuant to authority contained in sections 4(i), 5(d)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules; *it is ordered*, That effective January 30, 1976, the FM Table of Assignments, § 73.202(b) of the rules is amended to read as follows for the city listed below:

City:	*Channel No.*
Palm Springs, Calif.	265A, 284

8. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 5, 303, 307, 48 Stat., as amended, 1066, 1068, 1082, 1083 (47 U.S.C. 154, 155, 303, 307))

Adopted: December 11, 1975.

Released: December 16, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Customs Service

[19 CFR Part 152]

CERTAIN FOOTWEAR

Determination of the American Selling Price

Notice is hereby given that under the authority of R.S. 251, as amended (19 U.S.C. 66), sections 336, 624, 46 Stat. 701, as amended, 759 (19 U.S.C. 1336, 1624), and 77A Stat. 332 (19 U.S.C. 1202 (Schedule 7, Part 1, Subpart A, Headnote 3(b), Tariff Schedules of the United States)), it is proposed to amend section 152.24 of the Customs Regulations (19 CFR 152.24) to set forth procedures for determining the American selling price of footwear classifiable under item 700.60, Tariff Schedules of the United States (19 U.S.C. 1202).

Section 152.24(a) of the Customs Regulations provides that the value of certain types of footwear provided for in item 700.60, Tariff Schedules of the United States, shall be appraised on the basis of the American selling price of like or similar domestic footwear. The proposed amendment provides that in order to ensure consideration of their merchandise in making a determination regarding the existence or nonexistence of an American selling price, domestic producers of such footwear should furnish the Area Director, New York Seaport Area with catalogs, price lists, and, if requested by the Area Director, samples of their footwear products to enable the United States Customs Service to make the most accurate determination possible in regard to the applicability of an American selling price. The proposal would also require importers of footwear classifiable under item 700.60, Tariff Schedules of the United States, to furnish the appropriate Customs officer at the port of entry with a sample from the first commercial shipment of each make of such footwear. The samples would then be forwarded to the Area Director, New York Seaport Area, for determination of the American selling price.

Once the Area Director has made a determination regarding the existence or nonexistence of an American selling price, the proposed amendment provides that the importer or domestic producers may, if they disagree with the determination, request that the Area Director seek advice or guidance from Headquarters, United States Customs Service.

Accordingly, it is proposed to amend § 152.24 of the Customs regulations (19 CFR 152.24) by adding a new paragraph (c) to read as follows:

§ 152.24 American selling price.

* * * * *

(c) *Determination of American selling price of footwear classifiable under item 700.60, Tariff Schedules of the United States.*—(1) *Submission of samples, catalogs, and price lists by domestic producers.* In order to ensure consideration of their merchandise in making a determination regarding the existence or nonexistence of an American selling price, domestic producers of footwear of the same class or kind as that classifiable under item 700.60, Tariff Schedules of the United States (19 U.S.C. 1202), should furnish the Area Director, New York Seaport Area, with all catalogs and price lists covering such footwear. If any catalogs or price lists furnished to the Area Director have been revised or amended, such revisions or amendments should be forwarded promptly to the Area Director, New York Seaport Area. At the request of the Area Director, New York Seaport Area, domestic producers should furnish samples of footwear of the same class or kind as that provided for in item 700.60. Accompanying the catalogs and price lists shall be a certification by the domestic producer, in substantially the following form, verifying that the footwear products covered are freely offered for sale for domestic consumption at the prices shown:

CERTIFICATION

I hereby certify that the enclosed information on production and price of footwear truly and accurately represents a presently produced article, freely offered for sale for domestic consumption to all purchasers at _____ (place where the greatest number of individual sales takes place), in the ordinary course of trade, in the usual wholesale quantities, without restrictions as to the disposition, use, or resale price of the merchandise by the purchasers.

I further certify that I will submit information regarding any change in the status of this product as it occurs.

_____
(signed)

_____
(title)

_____
(company)

_____
(date)

The Area Director may, at his discretion, request the Regional Director (Investigations) to verify by investigation all representations made in regard to any samples, catalogs, and price lists submitted.

(2) *Submission of samples by importers.* Importers of footwear classifiable under item 700.60, Tariff Schedules of the United States, shall furnish the appropriate Customs officer at the port of entry with a sample from the first commercial shipment of each make of such footwear imported into the United States. The samples will then be forwarded to the Area Director, New York Seaport Area, for determination of the American selling price.

(3) *Notification of Area Director's determination.* When the Area Director, New York Seaport Area, has determined the American selling price applicable to a particular sample, or has determined that the footwear is not like or similar to a domestic product, and therefore not subject to appraisement on the basis of American selling price, he shall notify the importer and domestic producers of such footwear of this determination. He shall not provide information with respect to the manufacturer, importer, or price of the imported product.

(4) *Examination of samples.* Within 15 days of notification of the Area Director's determination in regard to the applicability of an American selling price, the importer and domestic producers shall have an opportunity to examine representative samples of the footwear submitted by the importer and domestic producers which were considered by the Area Director in making his determination.

(5) *Request by importer or domestic producers that the Area Director seek internal advice.* The importer or domestic producers may, if they disagree with the Area Director's determination regarding the applicability of an American selling price, request that the Area Director seek internal advice from Headquarters, United States Customs Service, in accordance with the procedures set forth in section 177.11 of this chapter, provided the request by the importer or the domestic producers is received within 30 days of notification of the Area Director's determination.

Data, views, or arguments with respect to the foregoing proposal may be addressed to the Commissioner of Customs, Attention: Regulations Division, Washington, D.C. 20229. To ensure consideration of such communications, they must be received not later than January 19, 1976.

Written material or suggestions submitted will be available for public inspection in accordance with § 103.8(b) of the Customs Regulations (19 CFR

V40245 DEC 1975 XUM

103.8(b)), at the Regulations Division, Headquarters, United States Customs Service, Washington, D.C. during regular business hours.

G. R. DICKERSON,
Acting Commissioner of Customs.

Approved: November 5, 1975.

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

Internal Revenue Service

[26 CFR Parts 1, 20]

TRANSFERS FOR PUBLIC, CHARITABLE AND RELIGIOUS USES

Notice of Proposed Rule Making

Notice is hereby given that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any comments pertaining thereto which are submitted in writing (preferably six copies) to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224, by January 23, 1976. Pursuant to 26 CFR 601.601 (b), designations of material as confidential or not to be disclosed, contained in such comments, will not be accepted. Thus, persons submitting written comments should not include therein material that they consider to be confidential or inappropriate for disclosure to the public. It will be presumed by the Internal Revenue Service that every written comment submitted to it in response to this notice of proposed rule making is intended by the person submitting it to be subject in its entirety to public inspection and copying in accordance with the procedures of 26 CFR 601.702(d)(9). Any person submitting written comments who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit a request, in writing, to the Commissioner by Jan. 23, 1976. In such case, a public hearing will be held, and notice of the time, place, and date will be published in a subsequent issue of the FEDERAL REGISTER, unless the person or persons who have requested a hearing withdraw their requests for a hearing before notice of the hearing has been filed with the Office of the Federal Register. The proposed regulations are to be issued under the authority contained in sections 2055 (e)(3) and 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) and the Estate Tax Regulations (26 CFR Part 20) to conform such regulations to the provisions of section 2055 (e)(3) as added by section 3, Act of Oct. 26, 1974 (P.L. 93-483).

Section 2055 (e) (2) (A) of the Code disallows an estate tax deduction for certain transfers to charity if the transfer is not in the form either of a charitable remainder trust that complies with section 664 of the Code or a pooled income fund that complies with section 642 (c) (5) of the Code.

The new amendment to section 2055 is a relief provision which, in certain limited cases, extends until December 31, 1975, the transitional period originally allowed under the Tax Reform Act of 1969 to amend or conform a trust to the provisions of section 664 of the Code.

The relief provision applies to any interest for charitable purposes which passes under a will executed before September 21, 1974, or by an intervivos trust created after July 31, 1969, and before September 21, 1974. The will or trust must be amended to meet the requirements of section 2055 (e) (2) (A) by December 31, 1975, or judicial proceedings to amend the will or trust must be begun by that date.

The proposed regulations apply the relief provision to inter vivos transfers created after July 31, 1969, which are irrevocable at the date of death. However, in general, a trust amended pursuant to these temporary regulations is treated as a charitable remainder trust from the date it would be deemed created under section 664.

The proposed regulations make provision for judicial reformation as well as nonjudicial reformation by agreement of the parties provided the agreement is binding on all parties.

The proposed regulations provide that the amending procedure under section 2055(e)(3) is available only to charitable interests which, but for the disqualifying provisions of section 2055(e)(2)(A), qualify for a deduction under section 2055. A charitable interest cannot be created by the use of this relief provision.

Proposed amendments to the regulations. To conform the Income Tax Regulations (26 CFR Part 1) and the Estate Tax Regulations (26 CFR Part 20) to the provisions of section 3 of the Act of Oct. 26, 1974 (Pub. L. 93-483, 88 Stat. 1457), such regulations are amended as follows:

PARAGRAPH 1. Paragraph (f) of § 1.664-1 is amended by revising the heading of subparagraph (3) and by adding a new subparagraph (4) at the end thereof. These revised and added provisions read as follows:

§ 1.664-1 Charitable remainder trusts.

* * * * * *

(f) *Effective Date.* * * *

(3) *Amendment of certain trusts created after July 31, 1969.* * * *

(4) *Certain wills and trusts in existence on September 21, 1974.* (i) In the case of a will executed before September 21, 1974, or a trust created (within the meaning of applicable local law) after July 31, 1969, and before September 21, 1974, which is amended pursuant to section 2055 (e) (3) and § 20.2055-2(g), a charitable remainder trust resulting from such amendment will be treated as a charitable remainder trust from the date it would be deemed created under § 1.664-1(a) (4) and (5), whether or not such date is after September 20, 1974.

(ii) Property transferred to a trust created (within the meaning of applicable local law) before August 1, 1969, whose governing instrument provides that an organization described in section 170(c) receives an irrevocable remainder interest in such trust shall be deemed transferred to a trust created on the date of such transfer, provided that the transfer occurs after July 31, 1969, and prior to October 18, 1971, and pursuant to an amendment provided in § 20.2055-2(g), the transferred property and any undistributed income therefrom is severed and placed in a separate trust as of the date of the amendment.

PAR. 2. Section 20.2055 is amended by adding a new paragraph (3) at the end of subsection (e) and by amending the historical note. These added and amended provisions read as follows:

§ 20.2055 Statutory provisions; transfers for public, charitable and religious uses.

SEC. 2055. *Transfers for public, charitable and religious uses.*

* * * * * *

(e) Disallowance of deductions in certain cases. * * *

(3) In the case of a will executed before September 21, 1974, or a trust created before such date, if a deduction is not allowable at the time of the decedent's death because of the failure of an interest in property which passes from the decedent to a person, or for a use, described in subsection (a), to meet the requirements of subparagraph (A) of paragraph (2) of this subsection, and if the governing instrument is amended or conformed on or before December 31, 1975, or, if later, on or before the 30th day after the date on which judicial proceedings begun on or before December 31, 1975 (which are required to amend or conform the governing instrument), become final, so that the interest is in a trust which is a charitable remainder annuity trust, a charitable remainder unitrust (described in section 664), or a pooled income fund (described in section 642(c)(5)), a deduction shall nevertheless be allowed. The Secretary or his delegate may, by regulation, provide for the application of the provisions of this paragraph to trusts whose governing instruments are amended or conformed in accordance with this paragraph, and such regulations may provide for any adjustments in the application of the provisions of section 508 (relating to special rules with respect to section 501(c)(3) organizations), subchapter J (relating to estate, trusts, beneficiaries, and decedents), and chapter 42 (relating to private foundations) to such trusts made necessary by the application of this paragraph. If, by the due date for the filing of an estate tax return (including any extension thereof), the interest is in a charitable trust which, upon allowance of a deduction would be described in section 4947(a)(1), or the interest passes directly to a person or for a use described in subsection (a), a deduction shall be allowed as if the governing instrument was amended or conformed under this paragraph. If the amendment or conformation of the governing instrument is made after the due date for the filing of the estate tax return (including any extension thereof), the deduction shall be allowed upon the filing of a timely claim for credit or refund (as provided for in section 6511) of an overpayment resulting from the application of this paragraph. In the case of a credit or refund as a result of an amendment or conformation made pursuant to this paragraph, no interest shall be allowed for the period prior to the expiration of the 180th day after the date on which the claim for credit or refund is filed.

* * * * * *

(Sec. 2055 as amended by sec. 1, Act of Aug. 6, 1956 (Pub. L. 1011, 84th Cong., 70 Stat. 1075); sec. 30(d), Technical Amendments Act 1958 (72 Stat. 1631); sec. 201(d), Tax Reform Act 1969 (83 Stat. 580); sec. 101(c), Excise Estate, and Gift Tax Adjustment Act 1970 (84 Stat. 1836); sec. 3, Act of Oct. 26, 1974 (Pub. L. 93-483, 88 Stat. 1457))

PAR. 3. § 20.2055-2 is amended by adding a sentence at the end of paragraph (a) and by adding a new paragraph (g) immediately following § 20.2055-2(f). These added and amended provisions read as follows:

§ 20.2055-2 Transfers not exclusively for charitable purposes.

(a) *Remainders and similar interests.* * * * See paragraph (g) of this section for special rules relating to certain wills and trusts in existence on September 21, 1974.

* * * * *

(g) *Special rules applicable in the case of certain wills and trusts in existence on September 21, 1974.* (1) In general, in the case of a will executed before September 21, 1974, or a trust created (within the meaning of applicable local law) after July 31, 1969, and before September 21, 1974, if—

(i) At the time of the decedent's death a deduction is not allowable solely because of the failure of an interest in property which passes or has passed from the decedent to a person, or for a use, described in section 2055(a) to meet the requirements of section 2055(e)(2)(A), and

(ii) The governing instrument is amended or conformed in accordance with this paragraph so that the interest is in a trust which is a charitable remainder annuity trust or a charitable remainder unitrust (described in section 664) or a pooled income fund (described in section 642(c)(5)), or the governing instrument is treated under paragraph (g)(3) of this section as if it were amended, a deduction shall nevertheless be allowed.

(2) An amendment or conformation pursuant to this paragraph must be made before January 1, 1976, or, if later, on or before the 30th day after the date on which judicial proceedings begun before January 1, 1976 (which are required to amend or conform the governing instrument) become final.

(3) A governing instrument may be amended or conformed under this paragraph only where:

(i) The transfer is not in trust but passes under a will executed before September 21, 1974;

(ii) The transfer is in the form of a testamentary trust created under a will executed before September 21, 1974;

(iii) The transfer was in trust, which was created (within the meaning of applicable local law) after July 31, 1969, and before September 21, 1974, but only if, at the time of the creation of the trust, the governing instrument provides that an organization described in section 170(c) receives an irrevocable remainder interest in such trust;

(iv) Property was transferred inter vivos after July 31, 1969, and before October 18, 1971, to a trust created (within the meaning of applicable local law) before August 1, 1969, which trust provides that an organization described in section 170 (c) receives an irrevocable remainder interest in such trust, and the transferred property and any undistributed income therefrom is severed and placed in a separate trust before the applicable date specified in paragraph (g)(2) of this section. An instrument governing a transfer under this subdivision (iv), which is amended pursuant to this paragraph, shall be treated as having made such transfer to a trust deemed created on the date of such transfer;

(v) In the case of a transfer to a pooled income fund made before September 21, 1974 (or a transfer made under a will which was executed before September 21, 1974), the instrument governing the transfer fails to satisfy the requirements of § 1.642(c)-5(b).

However, a governing instrument may not be amended pursuant to this paragraph unless, at the time of the decedent's death, the interest is an irrevocable remainder interest for which a deduction, but for section 2055(e)(2)(A), would be allowable under section 2055(a) and the regulations thereunder. The provisions of section 508(d)(2)(A) (relating to disallowance of certain charitable, etc., deductions) shall not apply to such interest if the governing instrument is amended so as to comply with the requirements of section 508(e) (relating to governing instruments) by the applicable date described in paragraph (g)(2) of this section.

(4) The decree resulting from any judicial proceedings begun to amend a governing instrument pursuant to paragraph (g)(1) of this section must be binding, under local law, on all parties having an interest in the bequest or transfer as well as the fiduciary of the decedent's estate and trustee of the trust to be amended. In the event local law does not require judicial proceedings to amend or conform a governing instrument, a deduction may nevertheless be allowed if the governing instrument is amended or conformed by nonjudicial agreement between all parties having an interest in the bequest or transfer as well as the fiduciary of the decedent's estate and trustee of the trust to be amended, provided that the agreement is binding, under local law, on all such parties. The judicial proceedings or nonjudicial agreement must also account for any distributions made from the deemed date of creation to the date of the amendment in the following manner:

(i) Where the amount of the distributions which would have been made by the trust to a recipient had the amendment pursuant to paragraph (g)(1) of this section been in effect since the creation of the trust exceeds the amount of the distributions made by the trust prior to the amendment, the trust must pay an amount equal to such excess to the recipient;

(ii) Where the amount of the distributions made to the recipient prior to the amendment pursuant to paragraph (g)(1) of this section exceeds the amount of the distributions which would have been made by such trust if the amended provisions of such trust had been in effect from the time of creation of such trust, the recipient must pay an amount equal to such excess to the trust.

See § 1.664-1(d)(4) for rules relating to the year of inclusion in the case of an underpayment to a recipient and the allowance of a deduction in the case of an overpayment to a recipient.

(5) Where a charitable remainder trust (as described in § 1.664-1(a)(1)(iii)(a)) results from an amendment pursuant to this paragraph, the trust will be treated as a charitable remainder trust for all purposes from the date it would be deemed created under § 1.664-1(a)(4) and (5), whether or not such date is after September 20, 1974. Subject to the limitations imposed by section 6511, the estate tax charitable deduction is allowable and the charitable remainder trust is exempt from Federal income taxation. For the application of certain excise taxes pursuant to section 4947(a)(2) see § 53.4947-1(c)(1)(iii) and (c)(8). In amending a governing instrument pursuant to paragraph (g)(1) of this section, the exchange of a noncharitable beneficiary's interest in an unqualified transfer in trust for an interest in a qualified transfer in trust will not be treated as an act of self-dealing (described in section 4941) or a taxable expenditure (described in section 4945).

(6) If, on the due date for filing the estate tax return (including any extensions thereof), proceedings to amend or conform a governing instrument pursuant to paragraph (g)(1) of this section have not become final, such return shall be filed with the tax computed as if no deduction were allowable under this paragraph. When the proceedings to amend or conform such instrument have become final (within the applicable date described in paragraph (g)(2) of this section), a deduction shall be allowed upon the filing of a claim for credit or refund (within the limitations of section 6511). In the case of a credit or refund as a result of an amendment or conformation made pursuant to this paragraph, no interest shall be allowed for the period prior to the expiration of the 180th day after the date on which the claim for credit or refund is filed.

(7) If a governing instrument is amended under this paragraph, then, except as provided in paragraph (g)(8)(ii) of this section, the amount of the deduction allowable under this section

V40245 DEC 1975 D XUM

shall be the amount that equals the value of the interest which, under the rules of section 2055 (including the rules governing disclaimers) passes to, or for the use of, an organization described in section 2055(a).

(8)(i) In the case of a will executed before September 21, 1974, or a trust created (within the meaning of applicable local law) before such date and after July 31, 1969, that creates an interest for which a deduction would be allowable under section 2055(a) but for section 2055(e)(2)(A), if the date of death of the decendent is prior to January 1, 1976, and if on or before the filing date of the estate tax return (including any extension thereof)—

(A) The interest is in a charitable trust which, if a deduction under section 2055(a) had been allowed, would be in a trust described in section 4947(a)(1), or

(B) Such interest passes directly to a person or for a use described in section 2055(a) (as, for example, by reason of the termination of an intervening interest),

the governing instrument shall be treated as if it were amended or conformed pursuant to paragraph (g)(1) of this section and a deduction shall be allowed. See section 508(d)(2) and § 1.508–2(b) for the disallowance of such a deduction in the case of an interest in a trust described in section 4947(a)(1) if the governing instrument fails to meet the requirements of section 508(e) by the end of the taxable year of the trust in which the filing date of the estate tax return occurs. A governing instrument treated as amended under this subdivision (i) may not thereafter be amended. The provisions of this subparagraph shall not apply if the requirements of subdivision (A) or (B) of this subdivision (ii) are satisfied as a result of an amendment of a dispositive provision of the governing instrument occuring since the date of death of the decedent.

(ii) The amount of the deduction for a transfer which is treated under this paragraph as if it were amended will be determined as if the transfer were a charitable remainder annuity trust which provides an annuity of 6 percent of the initial fair market value payable from the date of death—

(A) In the case of a transfer providing a life estate, for the expected lives of the noncharitable beneficiaries as determined on the date of death of the decedent, or

(B) In the case of a transfer providing a term of years, for the term of years as expressed in the governing instrument, but not to exceed 20 years.

Any distributions made to a recipient from the date of death of the decedent to the date on which the transfer is deemed to be amended (i.e., the date the transfer satisfies the requirement of paragraph (g)(8)(i) of this section) must be taken into account under this subdivision (ii) in determining the amount of the deduction, to the extent that the adjustments in such distributions required by paragraph (g)(4) of this section, determined as if the charitable remainder annuity trust were deemed created at the date of death of the decedent, have not been made on or before the filing date of the estate tax return.

DEPARTMENT OF THE INTERIOR

Geological Survey

[30 CFR Part 250]

DILIGENCE IN OUTER CONTINENTAL SHELF OIL AND GAS OPERATIONS

OCS Order and Guidelines

To insure diligence in the development and production of oil and gas resources from the Outer Continental Shelf, the regulations found in 30 CFR 250.12 have been proposed to be amended to clarify the intent of granting suspension of operations or production.

In order to implement the modified regulations, it is proposed to issue an OCS Order for each active OCS area outlining the specific requirements under which the Area Oil and Gas Supervisor may approve a suspension of production. Also, it is further proposed to provide guidelines to all Area Oil and Gas Supervisors to assure uniformity of enforcement of the provisions of the OCS Order.

Interested persons are invited to submit written comments, suggestions, and objections concerning the proposed OCS Order and guidelines to the Director, U.S. Geological Survey, National Center, Mail Stop 101, 12201 Sunrise Valley Drive, Reston, Virginia 22092, on or before January 19, 1976.

W. A. RADLINSKI,
Acting Director.

DECEMBER 12, 1975.

[FR Doc.75–34198 Filed 12–18–75;8:45 am]

[30 CFR Part 250]

OUTER CONTINENTAL SHELF

Regulation of Operations

The Department of the Interior has undertaken a complete review of applicable regulations and lease terms to determine what changes could be made to ensure that lessees show adequate diligence in the exploration, development, and production of oil and gas from OCS lands under lease.

This review indicated that the Department has sufficient authority to assure diligence on the OCS under existing regulations. However, it became apparent that clarification of some of the regulations is needed. In order to accomplish this, it is proposed to amend 30 CFR 250.12 to clarify and prescribe certain standards of conduct regarding suspensions of production of oil and gas leases in the Outer Continental Shelf. The proposed amendments: (1) formally recognize the Oil and Gas Supervisor's authority to grant a suspension of production if one is necessary to comply with provisions of the National Environmental Policy Act of 1969, 83 Stat. 852,42 U.S.C. 4321–4335, and (2) specifically provide the conditions under which an Oil and Gas Supervisor must terminate a suspension. The proposed amendments are issued pursuant to the Outer Continental Shelf Lands Act (43 U.S.C. 1331–1343).

Upon adoption of the amended regulations, an OCS Order will be issued in each active OCS area to provide more specific implementation actions. To insure clarification of intent and uniformity of enforcement, guidelines further elaborating on the proposed OCS Order will be furnished to the Area Oil and Gas Supervisors.

Comments on the proposed amendment to the regulations are invited. Interested persons may submit written comments, suggestions, and objections to the Director, U.S. Geological Survey, National Center, Mail Stop 101, 12201 Sunrise Valley Drive, Reston, Virginia 22092, on or before January 19, 1976. The proposed Order and guidelines are being published concurrently as a Notice with an invitation to comment.

It is proposed that § 250.12 be amended by adding a a sentence to paragraph (d)(1) which describes those actions that will result in a termination of a suspension of operations or production in paragraph (d), and by adding a new paragraph (d)(4) which recognizes the Oil and Gas Supervisor's authority to grant a suspension of operation of production to comoly with the National Environmental Policy Act as follows:

§ 250.12 **Regulation of Operations.**

* * * * *

(d) * * *

(1) * * * A suspension of operations or production shall terminate prior to the end of the period originally granted by the Supervisor when proper development of the lease ceases to be facilitated by the suspension; or adequate transportation facilities become available to the lease; or when the circumstances which justified the granting of the suspension no longer exist.

* * * * *

(4) The Supervisor is authorized, either in writing or orally with written confirmation, to suspend any operation, including production, to facilitate the preparation of environmental impact statements or analyses or for any other purpose necessary for the implementation of the National Environmental Policy Act of 1969, 83 Stat. 852, 42 U.S.C. 4321 et seq.

It is hefeby certified that the economic and inflationary impacts of these proposals have been carefully evaluated in accordance with OMB Circular A–107.

JACK W. CARLSON,
Assistant Secretary of the Interior.

DECEMBER 12, 1975.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 993]

HANDLING OF DRIED PRUNES PRODUCED IN CALIFORNIA

Proposed Amendment of Administrative Rules and Regulations

Notice is hereby given of a proposal to revise paragraph (a) of § 993.128 of Subpart—Administrative Rules and Regulations (7 CFR 993.101–993.174). The subpart is operative pursuant to the marketing agreement, as amended, and Order No. 993, as amended (7 CFR Part 993), regulating the handling of dried prunes produced in California. The amended marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The proposal was recommended by the Prune Administrative Committee and would revise some of the boundaries of the seven independent producer election districts in § 993.128(a). The districts are for the purpose of obtaining nominations for producer members to represent independent producers on the Committee. The proposal would shift Napa and Stanislaus Counties from their current districts (Districts 3 and 6, respectively) to District 4, with which they are contiguous and, for the most part, culturally similar. By making this realignment, the seven districts will have insofar as practicable, equal representation by number of independent producers and production of dried prunes by such producers as required by § 993.28.

Consideration will be given to any written data, views, or arguments pertaining to the proposal which are received by the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250 not later than January 2, 1976. All written submissions made pursuant to this notice should be made in quadruplicate and will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposal is to revise paragraph (a) of § 993.128 of Subpart—Administrative Rules and Regulations (7 CFR 933.101–993.174) to read as follows:

§ 993.128 **Nominations for membership.**

(a) *Districts.* In accordance with the provisions of § 993.28, the districts referred to therein are described as follows:

(1) *District No. 1.* That portion of Sutter County south of a line extending along Nuestro Road, easterly to the Yuba County line and westerly to the Colusa County line.

(2) *District No. 2.* The county of Butte, and all that portion of Sutter County not included in District No. 1.

(3) *District No. 3.* The counties of Del Norte, Humboldt, Lake, Marin, Mendocino, Siskiyou, Sonoma, and Trinity.

(4) *District No. 4.* The counties of Alameda, Contra Costa, Napa, San Francisco, San Mateo, Santa Cruz, Solano, Stanislaus, and that portion of Santa Clara County north of a straight line extending along Miramonte Avenue, northeasterly to the Stanislaus County line, and southwesterly to the Santa Cruz County line.

(5) *District No. 5.* The counties of Monterey, San Benito, and all that portion of Santa Clara County not included in District No. 4.

(6) *District No. 6.* The counties of Amador, Fresno, Merced, Placer, Sacramento, San Joaquin, San Luis Obispo, Tulare, Yuba, and all the counties in the area not included in Districts Nos. 1 through 5, inclusive, and in District No. 7.

(7) *District No. 7.* The counties of Colusa, Glenn, Shasta, Tehama, and Yolo.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 75–SO–125]

TRANSITION AREA

Notice of Proposed Designation

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would designate the New Port Richey, Fla., transition area.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before January 19, 1976, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

The official docket will be available for examination by interested persons at the Federal Aviation Administration, Southern Region, Room 645, 3400 Whipple Street, East Point, Ga.

The New Port Richey transition area would be designated as:

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the West Pasco Airport (Lat. 28°11'15" N., Long. 83°37'50" W.).

The proposed designation is required to provide controlled airspace protection for IFR operations at the West Pasco Airport. An instrument approach procedure to the airport, utilizing the St. Petersburg VORTAC, is proposed in conjunction with the designation of the transition area. If the proposed designation is acceptable, the airport operating authorization will be changed from VFR to IFR.

Issued in East Point, Ga., on October 6, 1975.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

PHILLIP M. SWATEK,
Director, Southern Region.

[Airspace Docket No. 75–SO–154]

[14 CFR Part 71]

TRANSITION AREA

Notice of Proposed Designation

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would designate the Manteo, N.C., transition area.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before January 19, 1976, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

The official docket will be available for examination by interested persons at the Federal Aviation Administration, Southern Region, Room 645, 3400 Whipple Street, East Point, Ga.

The Manteo transition area would be designated as:

That airspace extending upwards from 700 feet above the surface within a 5-mile radius of Manteo Airport (latitude 35°55'07" N., longitude 75°41'43" W.); within 3 miles each side of the 343° bearing from the Manteo RBN (latitude 35°54'58" N., longitude 75°41'42" W.), extending from the 5-mile radius area to 8.5 miles north of the RBN.

The proposed designation is required to provide controlled airspace for IFR operations at Manteo Airport. A prescribed instrument approach procedure to this airport, utilizing the Manteo (private) nondirectional radio beacon, is proposed in conjunction with the designation of this transition area.

DEC 19 75 V 40 245 XUM

Issued in East Point, Ga., on December 4, 1975.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

PHILLIP M. SWATEK,
Director, Southern Region.

[Airspace Docket No. 75-EA-75]

[14 CFR Part 71]

DESIGNATION OF TRANSITION AREA

Notice of Proposed Rule Making

The Federal Aviation Administration is considering amending § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a Berlin, N.J., Transition Area.

A new VOR instrument approach procedure has been developed for Kettlerun Airpark, Berlin, New Jersey, to provide controlled airspace for IFR arrivals and departures at Kettlerun Airpark, and will require designation of a 700-foot floor transition area.

Interested parties may submit such written data or views as they may desire. Communications should be submitted in triplicate to the Director, Eastern Region, Attn: Chief, Air Traffic Division, Department of Transportation, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, New York 11430. All communications received on or before January 19, 1976, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements may be made for informal conferences with Federal Aviation Administration officials by contacting the Chief, Airspace and Procedures Branch, Eastern Region.

Any data or views presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested parties at the Office of Regional Counsel, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, New York.

The Federal Aviation Administration, having completed a review of the airspace requirements for the terminal area of Berlin, New Jersey, proposes the airspace action hereinafter set forth:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designating a Berlin, New Jersey transition area as follows:

BERLIN, N.J.

That airspace extending upward from 700 feet above the surface within a 7-mile radius of the center 39°49'20" N., 74°53'35" W. of Kettlerun Airpark, Berlin, N.J. and within 2 miles each side of the Millville, N.J. VORTAC 011° radial, extending from the 7-mile radius area to 13 miles north of the VORTAC.

Issued in Jamaica, N.Y., on December 3, 1975.

Sec. 307(a), the Federal Aviation Act of 1958, 72 Stat. 749 (49 .S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).

DUANE W. FREER,
Director, Eastern Region.

[FR Doc.75-34183 Filed 12-18-75;8:45 am]

[Airspace Docket No. 75-CE-18]

[14 CFR Part 71]

ALTERATION OF FEDERAL AIRWAY

Notice of Proposed Rule Making

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation Regulations that would cap Federal Airway V-13W at 9,000 feet MSL between Des Moines and Fort Dodge, Iowa, to accommodate operations in the Boone Military Operations Area.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Central Region, Attention: Chief Air Traffic Division, Federal Aviation Administration, 601 E. 12th Street, Kansas City, Mo. 64106. All communications received on or before January 19, 1976 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue, SW., Washington, D.C. 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

Request for copies of this Notice of Proposed Rule Making should be addressed to the Federal Aviation Administration, Office of Information Services, Attention: Public Information Center, AIS-230, 800 Independence Avenue, S.W., Washington, D.C. 20591.

The proposed amendment would cap Federal Airway V-13W at 9,000 feet MSL between Des Moines and Fort Dodge, Iowa, to accommodate operations within the Boone Military Operations Area which would be used by Iowa Air National Guard units for air combat and air intercept training.

Little or no inconvenience to en route traffic is anticipated as a result of this action. The great majority of traffic utilizing this airway operates at or below 8,000 feet MSL.

Issued in Washington, D.C., on December 15, 1975.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[EDR-288B; Docket 28422]

CIVIL AERONAUTICS BOARD

[14 CFR Part 288]

EXEMPTION OF AIR CARRIERS FOR MILITARY TRANSPORTATION

Extension of Time

DECEMBER 15, 1975.

The Board, by circulation of Notice of Proposed Rulemaking EDR-288, dated October 20, 1975, published at 40 FR 49794, October 24, 1975, gave notice that it has under consideration an amendment of Part 288 of its Economic Regulations (14 CFR Part 288). The amendment would adjust the minimum rates for Logair and Quicktrans domestic cargo charters performed by air carriers for the Department of Defense and contracted for by the Military Airlift Command (MAC). Interested persons were invited to participate in the rulemaking by submission of twelve (12) copies of written data, views, or arguments to the Docket Section of the Board on or before November 24, 1975, and reply comments on or before December 9, 1975. By EDR-288A, the time for filing comments and reply comments was extended until December 8, 1975, and December 22, 1975, respectively.

By letter dated December 12, 1975, MAC has requested an additional extension of time for filing reply comments until January 5, 1976. In support of the request, MAC states that as of the date of its letter, it had not as yet received a copy of the comments filed in the proceeding by Saturn Airways, and does not expect to be in receipt of such comments before December 15 so that it would be unable to analyze the comments and prepare a response by the date reply comments are presently due. In addition, MAC requests the extension because of unexpected additional work resulting from the negotiations presently under way in the Transatlantic, Transpacific, and Latin American Service Mail Rates Investigation, Docket 26487. MAC, therefore, requests an extension of time for filing reply comments until January 5, 1976.

The undersigned finds that good cause has been shown for an extension of time for filing reply comments.

Accordingly, pursuant to the authority delegated in Section 385.20(d) of the Board's Organization Regulations (14 CFR Part 385), the undersigned hereby extends the time for submitting reply comments to January 5, 1976.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 49 U.S.C. 1324).

[SEAL] SIMON J. EILENBERG,
Acting Associate General Counsel, Rules.

CONSUMER PRODUCT SAFETY COMMISSION

[16 CFR Part 1700]

[Petition Nos. PP 75-4, 5, 6]

HUMAN PRESCRIPTION DRUGS IN ORAL DOSAGE FORMS

Proposed Exemptions From Child Protection Packaging Requirements

The purpose of this document is to propose exempting three drug preparations (described below) from 16 CFR 1700.14(a)(10), which prescribes child-resistant packaging requirements for human prescription drugs in oral dosage forms.

BACKGROUND

In the FEDERAL REGISTER of April 16, 1973 (38 FR 9431), and under provisions of the Poison Prevention Packaging Act of 1970 (15 U.S.C. 1471), the Commissioner of the Food and Drug Administration promulgated a regulation (21 CFR 295.2(a)(10)), effective April 16, 1974, establishing child protection packaging requirements for human prescription drugs in oral dosage forms. This action followed a determination that the degree or nature of hazard to children in the availability of these substances, by reason of their packaging, was such that special packaging was required to protect children from serious personal injury or serious illness resulting from handling, using, or ingesting these substances and that the required special packaging was technically feasible, practicable, and appropriate.

In the document's preamble, the Commissioner announced that he would consider requests for exemptions from the packaging requirements and, if reasonable grounds were furnished, would publish proposed exemptions in the FEDERAL REGISTER.

Effective May 14, 1973, section 30(a) of the Consumer Product Safety Act (15 U.S.C. 2079(a)) transferred functions under the Poison Prevention Packaging Act of 1970 to the Consumer Product Safety Commission.

Subsequently, on August 7, 1973 (38 FR 21247), the Consumer Product Safety Commission revised and transferred the regulations under the Poison Prevention Packaging Act of 1970 (21 CFR Part 295 became 16 CFR Part 1700). Accordingly, the exemptions proposed below involve 16 CFR 1700.14(a)(10) instead of 21 CFR 295.2(a)(10).

PETITION

On July 18, 1974, the Consumer Product Safety Commission received a petition (dated June 13, 1974) from Lederle Laboratories, Pearl River, N.Y., requesting three exemptions from the packaging requirements of § 1700.14(a)(10). Reasons given in support of the exemptions were that special packaging is unavailable and an accidental ingestion would not pose a hazard to a child.

The petitioner requests that the following be exempted:

1. *Achromycin V Pediatric Drops.* This drug is a liquid, flavored preparation for oral administration, containing 1,000 mg of tetracycline hydrochloride in a 10-cc plastic bottle with dropper fixture built into the neck finish. The company conducted acute oral toxicity studies in adult, weanling, and newborn rats to determine a median lethal dosage. Results indicated an LD50 of 3,827 mg/kg of tetracycline hydrochloride in newborn rats.

The petitioner's extrapolation of these data in rats to a 20-kg child ingesting the entire contents of one bottle results in a dosage of 50 mg/kg, which would represent one-sixtieth of the dose that caused no deaths and only minor signs of toxicity in newborn rats.

Data for children younger than 5 years of age from the National Clearinghouse for Poison Control Centers for the period 1969 through 1973 reveal 79 ingestions of the product with no hospitalizations or fatalities reported.

2. *Declomycin Pediatric Drops.* This drug is a liquid, flavored preparation containing 600 mg of demethylchlortetracycline hydrochloride in a 10-cc bottle with separate dropper.

Results of toxicity studies conducted by the company in adult, weanling, and newborn rats indicate an acute oral LD50 of 2,107 mg/kg in newborn rats. The petitioner's extrapolation of these data obtained in rats to a 20-kg child's ingestion of the entire contents results in a dosage of 30 mg/kg, which would represent one-thirtieth of the dose that caused no deaths and only minor signs of toxicity in newborn rats.

Data for children younger than 5 years of age obtained from the National Clearinghouse for Poison Control Centers for the period 1969 through 1973 reveal 55 ingestions of the product with no hospitalizations or fatalities reported.

3. *Nilstat Oral Drops.* This drug is a liquid, flavored preparation containing 4,800,000 units of nystatin in a 48-cc bottle with separate dropper.

Acute oral toxicity studies of the product conducted by the company in dosages of up to 5,000,000 units of nystatin per kg resulted in few signs of toxicity and no deaths in the tested population of adult, weanling, and newborn rats.

Data from the National Clearinghouse for Poison Control Centers for the period 1969 through 1973 reveal 63 ingestions of the product and a similar one also containing nystatin with no hospitalizations of fatalities reported.

(Copies of the petition and the briefing document thereon prepared by CPSC staff may be seen in the Office of the Secretary, 10th floor, 1750 K Street NW., Washington, D.C.)

CONCLUSIONS AND PROPOSAL

Having considered the petition, information pertinent to the requested exemptions obtained by CPSC staff, and reports from the National Clearinghouse for Poison Control Centers, and having consulted, pursuant to section 3 of the Poison Prevention Packaging Act of 1970, with the Technical Advisory Committee on Poison Prevention Packaging, established in accordance with section 6 of the act, the Consumer Product Safety Commission concludes that exemptions covering the above-described products should be proposed as set forth below.

The Commission's decision to propose the exemptions is based principally on (1) human experience data that indicate the lack of serious personal injury or serious illness involving the subject substances and (2) acute oral toxicity studies conducted in laboratory rats that demonstrate minimal toxicity for these substances.

The Commission finds no substantial basis for the petitioner's claim of special packaging unavailability since various forms of child-resistant packaging suitable for these types of containers have passed the protocol standards for testing special packaging (16 CFR 1700.20).

The Commission emphasizes that this proposal is limited to exempting only from the child-resistant packaging requirements for prescription drugs imposed by § 1700.14(a)(10) and is further limited to only those products described below.

Accordingly, pursuant to provisions of the Poison Prevention Packaging Act of 1970 (secs. 2(4), 3, 5, Pub. L. 91-601, 84 Stat. 1670-72; 15 U.S.C. 1471(4), 1472, 1474) and under authority vested in the Commission by the Consumer Product Safety Act (sec. 30(a), Pub. L. 92-573, 86 Stat. 1231; 15 U.S.C. 2079(a)), the Commission proposes that 16 CFR 1700.14(a)(10) be amended by adding three new subdivisions (ix), (x), and (xi), as follows:

§ 1700.14 Substances requiring special packaging.

(a) • • •

(10) *Prescription drugs.* Any drug for human use that is in a dosage form intended for oral administration and that is required by Federal law to be dispensed only by or upon oral or written prescription of a practitioner licensed by law to administer such drug shall be packaged in accordance with the provisions of § 1700.15 (a), (b), and (c), except for the following:

• • • • • •

(ix) Achromycin V Drops, Pediatric, containing no more than 1,000 milligrams of tetracycline hydrochloride per package and no other substances subject to special packaging requirements under this section.

(x) Declomycin Drops, Pediatric, containing no more than 600 milligrams of demethylchlortetracycline hydrochloride per package and no other substances subject to special packaging requirements under this section.

(xi) Nilstat Oral Drops, containing no more than 4,800,000 units of nystatin per package and no other substances subject to special packaging requirements under this section.

• • • • • •

Because the Commission finds merit in the petitioner's exemption requests, publication of this proposal in the FEDERAL REGISTER shall have the effect of suspending 16 CFR 1700.14(a)(10) only as it applies to the drugs described above pending review of comments and completion of action on this proposal. This proposal

V 40 245 DEC 19 75 D XUM

shall in no other way abrogate or restrict the special packaging requirements for human prescription oral drugs.

Interested persons are invited to submit, on or before February 17, 1976, written comments regarding this proposal. Comments received after this date will be considered to the extent practicable. Comments and any accompanying data or material should be submitted, preferably in five copies, addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Comments may be accompanied by a memorandum or brief in support thereof. Received comments and accompanying data may be seen in the Office of the Secretary, 10th floor, 1750 K Street NW., Washington, D.C., during working hours Monday through Friday.

Dated: December 15, 1975.

SHELDON D. BUTTS,
Acting Secretary,
Consumer Product Safety Commission.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 76]

[Docket No. 20561]

CABLE TELEVISION SYSTEM

Definition of System and Creation of Classes; Extension of Time

1. The Motion Picture Association of America, Inc., (MPA) has requested a further extension of time to file reply comments in the captioned proceeding (40 FR 55868) from December 19, 1975 to January 15, 1976. By Order of November 20, 1975 we granted an earlier request for an extension of time by MPA from the original due date of November 28, 1975 until December 19, 1975.

2. In support of its instant request, MPA urges that: this proceeding encompasses four separate and complex subjects; it has taken a substantial amount of time to review and analyze the voluminous comments filed herein; MPA is losing the services of present house counsel and must retain outside counsel who will need additional time to prepare reply comments; and the Christmas-New Year's holidays permit fewer available working days for the preparation of reply comments.

3. In view of the foregoing, it appears that good cause exists for the requested time extension.

Accordingly, it is ordered, That the date for filing reply comments in the captioned proceeding is extended to January 15, 1976.

This action is taken by the Chief, Cable Television Bureau pursuant to authority delegated by § 0.288(a) of the Commission's Rules.

Adopted: December 11, 1975.

Released: December 12, 1975.

FEDERAL COMMUNICATIONS COMMISSION

[SEAL] DAVID D. KINLEY,
Chief, Cable Television Bureau.

FEDERAL RESERVE SYSTEM

[12 CFR Part 225]

[Reg. Y]

BANK HOLDING COMPANIES

Purchase or Redemption by Bank Holding Companies of Their Own Shares

The Board of Governors has become aware of a number of instances in which bank holding companies have redeemed or repurchased a substantial portion of their outstanding voting shares in connection with a transfer of control of the holding company. Typically, such cases involve closely held holding companies, and the funds used to repurchase the outstanding shares are borrowed by the holding company, either from a third party or from the selling shareholder himself. Following the repurchase or redemption, the selling shareholder transfers the few remaining shares he holds to a new purchaser for nominal or minimum consideration. The new purchaser thus acquires control of a holding company encumbered with indebtedness that substantially represents the cost of acquisition of the holding company itself.

In such cases, the repurchase or redemption of shares by the holding company serves no corporate purpose; rather, it is intended solely to facilitate a transfer of control by the controlling shareholder or shareholder group. In certain cases that have come to the Board's attention, moreover, the volume of debt incurred by the holding company involved in such a "bootstrapping" transaction has rendered the holding company insolvent or has caused it to be in unsafe or unsound condition. The Board recognizes that there are many legitimate reasons why bank holding companies may wish to repurchase or redeem their own shares, and believes that a requirement that holding companies obtain prior Board approval for all such transactions may be unduly burdensome and unnecessary to cure the "bootstrapping" problem. For this reason, the Board has determined to initiate this rulemaking proceeding to propose a requirement that bank holding companies give prior notification to the appropriate Federal Reserve Bank of an intention to repurchase or redeem shares where the consideration to be paid, when aggregated with the consideration paid for all other repurchases or redemptions during the preceding five years, would equal 10 per cent of the holding company's current net worth. The Board may, as an alternative, consider imposing such a prior notice requirement with respect to all proposed repurchases or redemptions by bank holding companies, or, alternatively, with respect to those involving the incurring of debt or a transfer of control.

Where such notice discloses that consummation of the proposed repurchase or redemption would violate applicable law or would create an unsafe or unsound condition in the holding company, the Board would, in appropriate cases, invoke its authority under the Financial Institutions Supervisory Act of 1966 (section 8 (b) of the Federal Deposit Insurance Act) to institute cease-and-desist proceedings against the company in order to prevent the repurchase or redemption.

For the foregoing reasons, the Board proposes to amend Regulation Y as follows:

Part 225 of Regulation Y is amended by adding thereto a new § 225.6, as follows:

§ 225.6 Corporate practices.

(a) *Purchase or redemption by a bank holding company of its own shares.* No bank holding company shall purchase or redeem any shares of its outstanding voting securities without giving at least 60 days prior notice thereof to its Federal Reserve Bank if the consideration to be paid for such purchase or redemption, when aggregated with the consideration paid for all other such purchases or redemptions over the preceding five-year period, would equal 10 per cent or more of said holding company's consolidated net worth as of the date of such notice. The 60-day period shall begin to run from the date such notice is received by the Reserve Bank, which shall promptly acknowledge receipt thereof in writing. Each notice filed hereunder shall furnish the following information: (1) the title of the security to be purchased or redeemed, (2) the number of shares of that security to be purchased or redeemed, the total number of such shares outstanding as of the date of the notice, and the number of all other such shares purchased or redeemed over the preceding five-year period, (3) the consideration to be paid for the shares to be purchased or redeemed, and the consideration paid for all other such shares purchased or redeemed over the preceding five-year period, (4) the date upon which or the period of time during which the purchase or redemption will occur, (5) the names of the persons from whom the shares are to be purchased or redeemed, and the names of persons from whom all other such shares were purchased, (6) if debt is to be incurred or has been incurred by the company or a subsidiary in connection with the purchase or redemption or any other such purchase or redemption over the preceding five years, a description of the terms of the debt, including the identity of the obligee, and the interest rate, maturity and repayment schedule of the debt, (7) if a transfer of control is involved, a description of the terms of the transfer, including the identity of the transferee and a copy of any agreements relating to such transfer, and (8) a current and pro forma consolidated balance sheet of the holding company. The Reserve Bank may permit a purchase or redemption to be accomplished prior to the expiration of the 60-day period if it determines that the repurchase or redemption would not constitute an unsafe or unsound practice and would not violate any applicable law, rule, regulation or order, or any condition imposed by, or written agreement with, the Board.

This notice of proposed rulemaking is issued under the authority of sections 5(b) and 5(c) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1844(c) and (d)), and section 8(b) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818(b)).

To aid in the consideration of this matter by the Board, interested persons are invited to submit relevant data, views, or arguments in writing on the proposal and the alternatives described above, to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than January 15, 1976. Such material will be made available for inspection and copying upon request except as provided in § 261.6(a) of the Board's Rules Regarding Availability of Information (12 CFR 261.6(a)).

By order of the Board of Governors, December 10, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

HEALTH SPAS

Extension of Time To Propose Disputed Issues of Fact on Proposed Trade Regulation Rule

Notice of opportunity to propose disputed issues of fact regarding the proposed Trade Regulation Rule concerning Health Spas was published in the FEDERAL REGISTER on August 18, 1975 (40 FR 34615). The Notice also set forth the text of the proposed rule and a statement of reason for the proposed rule.

In response to a motion by Commission staff counsel supporting the Health Spa Rule, the Presiding Officer has determined, pursuant to the authority of Section 1.13(c)(1) of the Commission's Procedures and Rules of Practice, to extend the time for proposing disputed issues of fact for a period of ninety days beyond the present closing date of December 19, 1975. Accordingly, the record in this matter will remain open for that purpose until March 18, 1976.

Proposed disputed issues of fact concerning the proposed Rule should be filed with the Special Assistant Director for Rulemaking, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580.

Issued: December 16, 1975.

ROGER J. FITZPATRICK,
Presiding Officer.

INDUSTRY COMMITTEES FOR VARIOUS INDUSTRIES IN PUERTO RICO

Appointment To Investigate Conditions and Recommend Minimum Wage Rates; Notice of Hearings

1. Pursuant to section 5 of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 205), Reorganization Plan No. 6 of 1950 (3 CFR 1949–53 Comp., p. 1004), and 29 CFR 511, I hereby appoint the following industry committees for the indicated industries:

Committee Number	*Industry*
129–A	Education industry in Puerto Rico
129–B	Hospital and related institutions industry in Puerto Rico
130	Laundry and cleaning industry in Puerto Rico

2. These industries are defined as follows:

(a) The education industry in Puerto Rico is defined as follows: The operation of preschools, elementary or secondary schools, or institutions of higher education, or schools for mentally or physically handicapped or gifted persons, regardless of whether public or private or operated for profit or not for profit: *Provided, however,* That the industry shall not include any activity to which the Fair Labor Standards Act of 1938 would have applied prior to the Fair Labor Standards Amendments of 1966.

(b) The hospital and related institutions industry in Puerto Rico is defined as follows: The performance of activities in connection with the operation of hospitals, nursing homes, sanitariums, rest homes, convalescent homes, and related institutions primarily engaged in the care of persons who are sick, aged, or the mentally ill or defective who reside on the premises of such institutions, regardless of whether or not such a hospital or institution is public or private or operated for profit or not for profit: *Provided, however,* That the industry shall not include any activity to which the Fair Labor Standards Act of 1938 would have applied prior to the Fair Labor Standards Amendments of 1966.

(c) The laundry and cleaning industry in Puerto Rico is defined as follows: Laundering, dry cleaning, and incidental work such as repair of clothing and fabrics on which such work is done and the work done in family and commercial power laundries, linen supply and industrial launderers, diaper services, self-service laundries, hand laundries, cleaning and dyeing plants, and rug cleaning and repairing plants:

Provided, however, That the industry shall not include any activities to which the Fair Labor Standards Act of 1938 would have applied prior to the Fair Labor Standards Amendments of 1966.

3. Pursuant to section 8 of the Fair Labor Standards Act of 1938 (29 U.S.C. 208), Reorganization Plan No. 6 of 1950 (3 CFR 1949–1953 Comp., p. 1004), and 29 CFR Part 511, I hereby:

(a) Convene the above-appointed industry committees;

(b) Refer to the industry committees the question of the minimum rates of wages to be fixed for the above-mentioned industries in Puerto Rico;

(c) Give notice of the hearings to be held by the several committees at the times and place indicated. The committees shall investigate conditions in the industries, and the committees, or any authorized subcommittee thereof, shall hear witnesses and receive such evidence as may be necessary or appropriate to enable the committees to perform their duties and functions under the aforementioned Act.

Industry Committee No. 129–A will meet in executive session to commence its investigation at 9 a.m. and begin its public hearing at 10 a.m. on Monday, March 1, 1976. Following this hearing Industry Committee No. 129–B will immediately convene to conduct its investigation and begin its public hearing.

Industry Committee No. 130 will meet in executive session to commence its investigation at 9 a.m. and begin its public hearing at 10 a.m. on Monday, March 8, 1976.

The hearings will take place in the offices of the Wage and Hour Division on the seventh floor of the Condominio San Albert Building, 1200 Ponce de Leon Avenue, Santurce, Puerto Rico.

4. The rate or rates recommended by the committees shall not exceed the rates prescribed by section 6(b) of the Act, namely, $2.20 an hour during the year beginning January 1, 1976, nor $2.30 an hour after December 31, 1976.

Each industry committee shall recommend to the Administrator of the Wage and Hour Division of the Department of Labor the highest minimum wage rates for the industry which it determines, having due regard to economic and competitive conditions, will not substantially curtail employment in the industry, and will not give any industry in Puerto Rico a competitive advantage over any industry in the United States outside of Puerto Rico, the Virgin Islands or American Samoa; except that each committee shall recommend the minimum rates prescribed in section 6(b), unless there is substantial documentary evidence including pertinent unabridged profit and loss statements and balance sheets for a representative period of years which establishes that the industry or a predominant portion thereof, is unable to pay the wage.

5. Whenever an industry committee finds that a higher minimum wage may be determined for employees engaged in certain activities in the industry than may be determined for other employees in that industry, the committee shall recommend such reasonable classifications within the industry as it determines to be necessary for the purpose of fixing for each classification the highest minimum wage rate that can be determined for it under the principles set forth herein and in 29 CFR 511.10 which will not give a competitive advantage to any group in the industry. No classification shall be made, however, and no minimum wage rate shall be fixed solely on a regional basis or on the basis of age or sex. In determining whether there should be classifications within an industry, in making such classification, and in determining the minimum wage rates for such classifications, the industry committee shall consider, among other relevant factors, the following: (a) Competitive conditions as affected by transportation, living, and production costs; (b) wages

V 40245 DEC 19 75 XUM

established for work of like or comparable character by collective labor agreements negotiated between employers and employees by representatives of their own choosing; and (c) wages paid for work of life or comparable character by employers who voluntarily maintain minimum wage standards in the industry.

6. The Administrator shall prepare an economic report for the industry committees containing such data as he is able to assemble pertinent to the matters referred to them. Copies of such reports may be obtained at the national and Puerto Rican offices of the Wage and Hour Division of the U.S. Department of Labor as soon as they are completed and prior to the hearings. The industry committees shall take official notice of the facts stated in the economic reports to the extent that they are not refuted at the hearing.

7. The procedure of industry committees shall be governed by 29 CFR Part 511. Interested persons wishing to participate in the hearings shall file prehearing statements, as provided in 29 CFR 511.8 containing the data specified in that section not later than 10 days before the first hearing date set for each committee as set forth in this notice of hearing, i.e., February 20, 1976 for matters to be considered by Industry Committees No. 129–A and 129–B; and February 27, 1976 for matters to be considered by Industry Committee No. 130.

Signed at Washington, D.C. this 16th day of December 1975.

JOHN T. DUNLOP,
Secretary of Labor.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF STATE

Agency for International Development

ADVISORY COMMITTEE ON VOLUNTARY FOREIGN AID

Notice of Meeting

Pursuant to Executive Order 11769 and the provisions of Section 10(1)(2), Public Law 92-463, Federal Advisory Committee Act, notice is hereby given of the meeting of the Advisory Committee on Voluntary Foreign Aid which will be held on January 16, 1976, from 9:30 a.m. to 12:30 p.m. and 2:00 p.m. to 4:00 p.m., in Room 5951, New State Building, 21st and Virginia Avenue NW., Washington, D.C.

The purpose of the meeting is to consider the findings, recommendations and implications of the Filer Commission Report as they relate to voluntary agencies, A.I.D. and the Advisory Committee, and such other matters related to the foreign assistance advisory concerns of the Committee as may be appropriate.

The session will be open to the public. Any interested person may attend, appear before, or file statements with the Committee in accordance with procedures established by the Committee and to the extent time available for the meeting permits. Written statements may be filed before or after the meeting.

Mrs. Harriett S. Crowley will be the A.I.D. representative at the meeting. Information concerning the meeting may be obtained from Mr. Robert S. McClusky, Telephone: AC 202-632-1892. Persons desiring to attend the meeting should enter the New State Building through the 21st Street entrance.

Dated: December 16, 1975.

HARRIETT S. CROWLEY,
Acting Assistant Administrator for Population and Humanitarian Assistance.

[Amdt. to Delegation of Authority No. 98]

DEPUTY ADMINISTRATOR AND ASSISTANT ADMINISTRATORS

Delegation of Authority

Pursuant to the authority delegated to me by Delegation of Authority No. 104 of November 3, 1961, as amended, from the Secretary of State (25 F.R. 10608) and in accordance with the provisions of section 624(b) of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2384), it is directed as follows:

In the event of the absence, death, resignation, or disability of the Administrator, the following designated officers of the Agency for International Development shall, in the order of succession indicated, act as Administrator:

(1) Deputy Administrator,

(2) Assistant Administrator for Program and Policy Coordination,

(3) Assistant Administrator for Program and Management Services,

(4) Assistant Administrator, International Development Coordination.

(5) Assistant Administrator, Bureau for Latin America,

(6) Assistant Administrator, Bureau for Near East,

(7) Assistant Administrator, Bureau for Asia,

(8) Assistant Administrator, Bureau for Africa.

This Delegation of Authority amends and supersedes Delegation of Authority No. 98 of September 28, 1973 (38 FR 27628, October 5, 1973).

This Delegation of Authority is effective immediately.

Dated: November 11, 1975.

DANIEL PARKER,
Administrator.

DEPARTMENT OF THE TREASURY

Office of the Secretary

(APP-2-04-O:D:T VK/RF)

INDUSTRIAL VEHICLE TIRES FROM CANADA

Antidumping Proceeding Notice

On November 13, 1975, information was received in proper form pursuant to sections 153.26 and 153.27, Customs Regulations (19 CFR 153.26 and 153.27), indicating a possibility that industrial vehicle tires from Canada, are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 162 et seq.).

For purposes of this notice, the term industrial vehicle tires means press-on, solid, rubber tires, cured or bonded to steel base bands, used on off-the-highway work vehicles, whether or not self-propelled.

There is evidence on record concerning injury to or likelihood of injury to or prevention of establishment of an industry in the United States. Available information indicates substantial declines in the ratio of profit to sales and in employment levels in the domestic industry over the period 1974–1975. Other information indicates that imports of the subject merchandise from Canada commenced in April 1975 and during the period April–October 1975 obtained 4 percent of the United States market. The share of the U.S. market held by domestic manufacturers correspondingly declined during the same period. Also information indicates that domestic manufacturers are being undersold by the Canadian exporters on most sizes of industrial vehicle tires.

Having conducted a preliminary investigation as required by § 153.29 of the Customs Regulations (19 CFR 153.29) and having determined as a result thereof that there are grounds for so doing, the U.S. Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

A summary of information from all sources is as follows: The information received tends to indicate that the prices of merchandise sold for eploration to the United States are less than the prices for home consumption.

This notice is published pursuant to § 153.30 of the Customs Regulations (19 CFR 153.30).

JAMES B. CLAWSON,
Acting Assistant Secretary of the Treasury.

DECEMBER 15, 1975.

[FR Doc.75-34186 Filed 12-18-75;8:45 am]

MELAMINE IN CRYSTAL FORM FROM JAPAN

Antidumping Proceeding Notice

On November 14, 1975, information was received in proper form pursuant to sections 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), indicating the possibility that melamine in crystal form from Japan is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act").

There is evidence on record concerning injury or likelihood of injury to or prevention of establishment of an industry in the United States. This information indicates that a significant increase in U.S. market share on the part of Japanese imports has occurred, while the share of the U.S. market held by domestic producers has suffered a corresponding decline. Other information indicates that the capacity utilization of the U.S. industry has declined substantially over the period CY 1974–September 1975. Also information indicates that the margin by which domestic producers are being undersold by Japanese imports would be eliminated were the price differential between prices in the Japanese home mar-

V40245 DEC 19 75 XUM

ket and for export to the United States eliminated.

Having conducted a preliminary investigation as required by § 153.29 of the Customs Regulations (19 CFR 153.29) and having determined as a result thereof that there are grounds for so doing, the U.S. Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

A summary of price information received from all sources is as follows: The information received tends to indicate that the merchandise sold for export to the United States are less than the prices for home consumption.

This notice is published pursuant to § 153.30 of the Customs Regulations (19 CFR 153.30).

JAMES B. CLAWSON,
Acting Assistant Secretary of the Treasury.

JUSTICE DEPARTMENT

FEDERAL ADVISORY COMMITTEE ON FALSE IDENTIFICATION

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act (Pub. L. 92-463, 5 USC Appendix I) that the tenth meeting of the Federal Advisory Committee on False Identification will be held at 9:30 a.m., Thursday, January 8, 1976, at the Briefing and Conference Center of the Department of Justice (opposite Room 1315), 10th and Constitution Avenue, NW., Washington, D.C.

The Committee was established by the Attorney General to study the criminal use of false identification at Federal, state, and local levels and to recommend measures to prevent such use.

At the plenary session of the January 8th meeting, the Committee will begin considering possible solutions to the criminal use of false identification. A list of many potential solutions will be distributed to Committee members. This list will contain summaries of solutions, and relevant information concerning their cost, time of implementation, administrative difficulty and other data. Members will then be asked to vote to rank these solutions according to preference so that the most desirable ones may be identified for further investigation. Following the plenary session each of the Committee's five Task Forces will continue their deliberations. Each agency or organization (or individual, if applicable) which is a member of the Committee will have one vote regardless of the number of representatives it sends to the Committee's meetings. An exception will be made only in cases where such a procedure clearly would be unfair. For example, both the Passport Office and the Visa Office of the State Department will have one vote each, despite the fact that both are a part of the State Department. Similarly, both the Social Security Administration and the Division of Vital Statistics, Department of Health, Education and Welfare (HEW), will have one vote, although both are a part of HEW. Any comments on such a voting procedure or objections thereto, should be made in writing to David J. Muchow at the address below, on or before January 8, 1976. A copy of the Committee's membership list is available upon request.

The meeting, which will adjourn at approximately 2:00 p.m., is open to the public. The Committee welcomes a broad spectrum of ideas from the public to assist the Committee in its efforts to protect each citizen's right to privacy and to aid in preventing the criminal use of false identification.

Further information concerning this meeting may be obtained from David J. Muchow, General Crimes Section, Criminal Division, Department of Justice, Room 516, Federal Triangle Building, 315 9th Street, NW., Washington, D.C. 20530, telephone (202) 739-3738. Minutes of the meeting will be available for public inspection two weeks after the meeting in Room 516, Federal Triangle Building.

RICHARD L. THORNBURGH,
Assistant Attorney General.

Law Enforcement Assistance Administration

ADVISORY COMMITTEE TO THE ADMINISTRATOR ON STANDARDS FOR THE ADMINISTRATION OF JUVENILE JUSTICE

Meeting

Notice is hereby given that the Advisory Committee to the Administrator on Standards for the Administration of Juvenile Justice, a subdivision of the National Advisory Committee on Juvenile Justice and Delinquency Prevention, will meet on Thursday, January 8, 1976, at the Ramada Inn, New Orleans Airport, 1021 Airline Highway, Kenner, Louisiana. The meeting is scheduled to begin at 9:00 a.m. and will adjourn by 5:00 p.m.

Discussion will focus on draft standards concerning the jurisdiction and organization of the family court, the right of juveniles to be represented by counsel in proceedings before the family court, the appropriate delinquency jurisdiction of the Federal courts, and alternative strategies for implementing the standards on juvenile justice and delinquency prevention.

The meeting will be open to the public.

For further information, please contact: Milton L. Luger, Assistant Administrator of the Law Enforcement Assistance Administration for the Office of Juvenile Justice and Delinquency Prevention, 633 Indiana Avenue, NW., Room 446, Washington, D.C. 20531.

GERALD H. YAMADA,
Attorney-Advisor, Office of General Counsel.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

MID-ATLANTIC OUTER CONTINENTAL SHELF OFFSHORE NEW JERSEY AND DELAWARE

Notice of Public Hearing Regarding Proposed Mid-Atlantic Oil and Gas Lease Sale Offshore New Jersey and Delaware

In accordance with 43 CFR 3301.4, a public hearing will be held beginning at 9:00 a.m., on January 27, 1976, in the Grand Ballroom of the Sheraton Deauville Hotel and Motor Inn located on Boardwalk at Brighton in Atlantic City, New Jersey, for the purpose of receiving comments and suggestions relating to a proposed Mid-Atlantic oil and gas lease sale offshore New Jersey and Delaware. The hearing will extend through January 30, 1976, if necessary.

The hearing will provide the Secretary with additional information from both public and private sectors to help evaluate fully the potential effects of the possible offering of 154 tracts on the total environment, marine resources, recreation, economic, and other resources in the Mid-Atlantic area during the exploration, development, and production phases of the leasing program.

The hearing will also provide the Secretary, under Section 102(2)(C) of the National Environmental Policy Act of 1969, with the opportunity to receive additional comments and views of interested State and local agencies.

A draft envrionmental statement concerning the proposed lease sale (OCS Sale No. 40) was made available to the public on December 10, 1975. Single copies of this statement can be obtained at the New York Outer Continental Shelf Office, Bureau of Land Management, Six World Trade Center, Suite 600D, New York, New York 10048, and from the Office of Public Affairs, Bureau of Land Management (130), Washington, D.C. 20240.

Copies of the draft environment statement are also available for review in the following public libraries: New York Public Library, 5th Avenue and 42nd Street, New York City; Nassau Library System, Garden City, Long Island, New York; Suffolk Cooperative Library System, Bellport, Long Island, New York; Free Library of Philadelphia, Logan Square, Philadelphia, Pennsylvania; Wilmington Institute Free Library and New Castle County Free Library, Wilmington, Delaware; Rehoboth Beach Public Library, Rehoboth Beach, Delaware; Enoch Pratt Free Library, Baltimore, Maryland; Eastern Shore Area Library, Salisbury, Maryland; Trenton Free Public Library, Trenton, New Jersey; Atlantic City Free Public Library, Atlantic City, New Jersey; and Norfolk Public Library System, Norfolk, Virginia.

Interested individuals, representatives of organizations, and public officials wishing to testify at the hearing are requested to contact the Manager, New York Outer Continental Shelf Office, Bureau of Land Management, at the above address by 4:45 p.m., January 19, 1976. Written comments from those unable to attend the hearing also should be addressed to the Manager, New York Outer Continental Shelf Office, Bureau of Land Management, at the above address. The Department will accept written testimony and comments on the draft environmental statement until February 12, 1976. This should allow ample time for those unable to testify at the hearing to make their views known and for the submission of supplemental materials by those presenting oral testimony. Time limitations make it necessary to limit the length of oral presentations to ten minutes. An oral statement may be supplemented, however, by a more complete written statement which may be submitted to the hearing officer at the time of presentation of the oral statement. Written statements presented in person at the hearing will be considered for inclusion in the hearing record. To the extent that time is available after presentation of oral statements by those who have given advance notice, the hearing officer will give others present an opportunity to be heard.

After testimony and comments have been received and analyzed, a final environmental statement will be prepared.

CURT BERKLUND,
Director, Bureau of Land Management.

Approved: December 17, 1975.

ROYSTON C. HUGHES,
Assistant Secretary of the Interior.

[INT-FES 75-102]

NUECES RIVER PROJECT, TEXAS

Notice of Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Deartment of the Interior has prepared a final environmental statement for the authorized Nueces River Project, Texas.

The environmental statement concerns a water storage project for the purposes of municipal and industrial water supplies plus fish and wildlife and recreation benefits. Choke Canyon Dam would be located on the Frio River in Live Oak County, Texas.

Copies are available for inspection at the following locations:

Office of Assistant to the Commissioner—Ecology, Room 7620, Bureau of Reclamation, Department of the Interior, Washington, D.C. 20240, telephone (202) 343-4991

Division of Engineering Support, Technical Services Branch, E&R Center, Denver Federal Center, Denver, Colorado 80225, telephone (303) 234-3007.

Office of the Regional Director, Bureau of Reclamation, Herring Plaza, Box H-4377, Amarillo, Texas 79101, telephone (806) 376-2404

Austin Planning Office, Bureau of Reclamation, Post Office Box 1946, Austin, Texas 78767, telephone (512) 397-5841

Single copies of the final statement may be obtained on request to the Commissioner of Reclamation, Regional Director, or Austin Planning Officer. Please refer to the statement number above.

Dated: December 16, 1975.

STANLEY D. DOREMUS,
Deputy Assistant Secretary of the Interior.

COYOTE DAMAGE CONTROL: CATTLE, SHEEP AND GOATS

Report on Emergency Use of M-44 Devices During October 1975

Notice is hereby given on the emergency use of M-44 devices by the Department of Interior's operational predator damage control program for the month of October. This use is in compliance with the experimental use permit (No. 6704-EXP-6G) issued by the Environmental Protection Agency pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (7 U.S.C. 135-135k), and in accordance with 40 CFR 162.19, as promulgated in the FEDERAL REGISTER on January 31, 1974 (39 FR 3939). This report is made pursuant to FEDERAL REGISTER notice of June 20, 1974 (39 FR 2216G).

Actual M-44 use of October 1975 is as follows:

M-44.—Emergency use, October 1975

State	Number of counties	Number of ranches	Number of cattle, sheep, and goats, protected	Number of M-44's used
Arizona	3	20	1,382	248
Nevada	1	1	1,000	39
New Mexico	12	28	15,017	952
Montana	16	26	17,282	486
Oklahoma	1	1	60	4
Oregon	7	31	2,503	166
Texas	29	131	33,823	1,294
Utah	1	3	155	30
Wyoming	2	4	2,251	76
Total	72	235	73,673	3,315

The M-44 device took 280 coyotes on 105 of 235 emergency areas. Other species taken with this device included 14 red foxes, 5 gray foxes, 5 feral dogs, 17 raccoons, 10 opossums, 4 skunks, 2 ringtails, and 1 armadillo.

All of the above use of M-44 devices as a supplemental tool to attempt to resolve coyote depredation on cattle, sheep and goats was conducted by trained Service personnel in accordance with the "Procedure For Advance Identification and Approval of Areas For the Possible Emergency Use of Sodium Cyanide Delivered by the M-44 Device for the Control of Depredating Canids", as it appears in the FEDERAL REGISTER, Volume 39, No. 120, Thursday, June 20, 1974.

GEORGE W. MILIAS,
Acting Director U.S. Fish and Wildlife Service.

ENDANGERED SPECIES PERMIT

Notice of Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (P.L. 93-205).

Applicant:

Texas Memorial Museum, Vertebrate Paleontology Laboratory, University of Texas at Austin, Austin, Texas 78757.

Wann Langston, Jr., Director

OMB NO. 42-R1578

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE

FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

1. APPLICATION FOR (Indicate only one)
☐ IMPORT OR EXPORT LICENSE ☒ PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED.
to salvage carcasses of dead or mortally injured specimens of Alligator mississippiensis in Texas for preservation for scientific purposes and to salvage from domestic zoo collections the remains of any other species of crocodilians defined as endangered or threatened species for preservation as scientific specimens

3. APPLICANT. (If new, complete address and phone number of individual, business, agency, or institution for which permit is requested)
Wann Langston, Jr., Director
Vertebrate Paleontology Laboratory
Texas Memorial Museum
University of Texas at Austin
Route 4 Box 189
Austin, Texas 78757 (512)836-0440#253

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING

☒ MR. ☐ MRS. ☐ MISS ☐ MS.	HEIGHT	WEIGHT
	5'10"	175
DATE OF BIRTH	COLOR HAIR	COLOR EYES
7/10/1921	red-gray	blue

MR. GENE HESTER/*Permits, U.S. Fish and Wildlife Service, P.O. Box 19183, Washington, D.C. 20036.*

DEAR MR. HESTER: Herewith is the application for a permit to salvage alligator specimens in Texas which you were kind enough to discuss with me during my recent visit to Washington. As I read the instruction sheet (FS-9 Act. 74) other crocodilians can be included in this single application, although the primary purpose is to obtain a permit for alligators. I have accordingly added the taxa of crocodilians which appear on page 2 of 50 CFR 17 (subpart B). It is my impression, however, that other crocodilians, especially the American crocodile (*Crocodylus acutus*) are classed as endangered, but I fail to find these on the lists available to me. As it is hoped that this institution may act as a depository for specimens of all crocodilian species that may become available as salvage specimens, if there is in fact a more extensive list, I should like to have a copy, so that I can apply for additional permits if required.

I presume that since this permit is for scientific research no fee will be charged.

I hope the accompanying material is in order, but should you have questions that can be cleared up by phone, please call me at (512) 836-0440 ext. 253.

I enjoyed our brief conversation, which clarified a number of questions that had been bothering me. Thanks for your time.

Sincerely yours,

WANN LANGSTON, JR.,
Director, Vertebrate Paleontology Laboratory.

ATTACHMENT 1

ITEM #8 (Form 3-200). The State of Texas currently requires a permit to collect and hold living or dead specimens of *Alligator mississippiensis*. This permit may be issued only if a required federal permit has been granted (state permits are issued only to individuals). I have discussed the possibility that a federal permit may not be required under P.L. 93-205 to engage in salvage of dead or dying animals inside the State of Texas, but I am informed that the State Attorney General has ruled that a federal permit is necessary in any case. The Texas Fish and Wildlife Department is willing to cooperate with us in all respects once the necessary permits are in hand. Upon receipt of the federal permit, I will apply for the required Texas documents. These provisions apply only to the American alligator, no state permit being required for salvage of zoo specimens of other species.

ATTACHMENT 2

ITEM #12 (Form 3-200). Reference 50 CFR #17-22.

17-22(1). This application requests permission to salvage specimens of the American alligator (*Alligator mississippiensis*), a threatened and endangered species. Owing to the accidental and uncertain occurrences of salvage specimens, it is impossible to estimate the number or condition of specimens to be obtained. Since this is a conservation practice, it is hoped to accumulate as many specimens as possible.

17-22(2). A salvage specimen is an animal already dead by natural or accidental causes either in the wild or in captivity.

17-22(3). This application does not anticipate removal of living wildlife from its natural habitats or from zoo collections, so 17-22(3) does not apply.

17-22(4). As the permit would include captive animals in zoos, the origin of the individuals includes the total range of *A. mississippiensis*. It should be noted, however, that the geographic origin of such animals is usually uncertain or unknown prior to 1973.

17-22(5). Specimens obtained under this permit will be permanently preserved either as wet preservations or skeletal preparations by the Texas Memorial Museum, an administrative unit of The University of Texas at Austin. The specimens will be located at the Museums Vertebrate Paleontology Laboratory which is situated at the University's Balcones Research Center. The address of the Laboratory is Route 4, Box 189, Austin, Texas 78757.

The Vertebrate Paleontology Laboratory maintains the largest comparative osteological research collection of extant species in the south-central U.S. The collection now numbering about 3,650 catalogued specimens with essential data is actively curated and professionally supervised according to currently accepted standards of systematics collection management. Specimens in the collection are available for study by qualified researchers, are used in class demonstrations at the University and where wet preservations are involved, may be used for dissection in anatomical studies.

17-22(6). Live material is not to be covered by this permit, so 17-22(8) does not apply.

17-22(7). There are no contracts relating to the subject of this application. I am assured of the full cooperation of the Texas Parks and Wildlife Department (see copy of letter attached). The Department will issue a Texas permit to collect and keep salvage specimens once a federal permit has been obtained. They will notify the Laboratory when specimens are discovered and will deliver carcasses to the Laboratory when convenient.

17-22(8). Salvage specimens become available from time to time but there is at present no program for preserving their remains for scientific research; salvable specimens in Texas are simply being destroyed. However, since the alligator is a threatened species in Texas, it is important to insure the preservation of as large a sample as possible (there is at present no significant statistical sample of preserved material at any museum in the state). It is by analyses and comparisons of large samples of crocodilians that the paleontologist (for example) can have a better basis for inferences about extinct crocodilians.

To be included under this permit are also certain other species of crocodilians classed as endangered. Only specimens which die in captivity are involved. These include the following: Crocodile, Cuban (*Crocodylus rhombifer*), Crocodile, Morelet's (*C. moreletti*), Crocodile, Nile (*C. niloticus*), Crocodile, Orinoco (*C. intermedius*), Gavial (*Gavialis gangeticus*), Yacare (*Caiman yacare*). Zoo mortality in these species is apparently not very high, but when a death occurs, it is important to have a valid permit to conserve the remains before they are destroyed.

Addendum to Application for Federal Fish and Wildlife Permit to salvage specimens of *Alligator mississippiensis* and other threatened or endangered species of crocodiles. [50 CFR 17.22(a)(8)(iii)]

The proposed salvage operations will over the years provide a pool of statistical material of *Alligator mississippiensis* and other species of crocodilians. The statistical data will provide a better idea of morphological variability in the species than now exists. Such data can be expected to contribute to the solution of systematic questions concerning the possible existence of morphologically definable populations in the American alligator. These data will also provide a useful guide to the estimation of variability in extinct crocodilian populations which is of great importance to paleontologists.

Specimens which are suitable may be used in studies of the gross anatomy of crocodilians with a view to learning more about the functional morphology of the species and by inference adding to the overall body of knowledge about extinct crocodilians.

Stomach contents, when available in carcasses, will provide additional information on the relationship between individual size, seasonality, and preferred diet of *Alligator mississippiensis* in the wild.

The essential need now is to preserve specimens (see 50 CFR 17.22(c)(3)) so that these will be available for scientific research in the future.

WANN LANGSTON, JR.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or before January 19, 1976, will be considered.

Dated: December 15, 1975.

C. R. BAVIN,
Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

OUTER CONTINENTAL SHELF

Guidelines to OCS Order No. 14

Introduction. The purpose of OCS Order No. "14" is to assure diligence in the development of the OCS's natural resources by allowing limited suspensions of operations or production while the operator is waiting for the installation of equipment or granting of permits necessary for the production or transportation of oil and gas from a lease. The standards in the Order are to be strictly applied, and a suspension should be granted only if the supervisor is satisfied that it will promote the development of the lease.

Although the supervisor may approve a request for suspension on several separate grounds, it is not intended that separate suspensions should be granted each time an operator meets the requirements of a separate category. For example, if an operator is waiting for equipment, but will also need a permit, whenever possible he should be required to do both at the same time, and should not get separate or successive suspensions for each.

Some of the types of factors that reflect on the operator's good faith and his actions to expedite production from the lease are listed below. These and other similar factors should be considered by the supervisor when he decides whether to grant a suspension request.

For ease of reading, the relevant part of the draft Order is repeated within quotation marks, before the associated guidelines are presented.

SUSPENSIONS OF PRODUCTION TO FACILITATE PROPER DEVELOPMENT

A. . . . is waiting for completion of drilling platform construction and installation or delivery of equipment or facilities which are necessary for production and for which the lessee has signed a contract that specifies a delivery date; or

Guidelines. 1. Incomplete construction, or undeliverd equipment or facilities, is not by itself sufficient justification for granting a suspension. The operator shall show to the satisfaction of the supervisor:

(a) that the undelivered or incompletely installed equipment is essential for producing oil and gas from the lease; and

(b) that the operator has made a timely and diligent effort to obtain the equipment;

(c) that the delivery or completion date in the contract is reasonable. To decide whether the time for delivery or completion stated in the contract is reasonable, the supervisor should compare it with the time needed to perform similar contracts. Of course, he shall also consider any other information that may aid him in making his determination.

2. As a condition for the suspension, the supervisor shall require the operator to continue doing any useful activity that will promote the early production of oil and gas from lease.

B. has pending before any Federal, State or local government authority, an application for a permit which is necessary before the lessee can produce oil or gas from the lease; or

Guidelines. 1. When granting suspensions under this provision it is important for the supervisor to be sure the provision is not being abused. The operator must show to the satisfaction of the supervisor that a bona fide application with a reasonable chance of success is involved. Successive applications made within a short period of time on the same or nearly the same terms as applications for permits or prices previously denied should not, for example, be considered bona fide applications.

2. Whenever possible, if more than one permit or license is necessary before the lessee can produce from the lease, the supervisor shall require that the operator submit all of the applications at the earliest possible time. Separate consecutive suspensions should not normally be granted for different applications when such applications can be acted upon during a single suspension period.

3. If other useful activity can be performed while the application is under review, and the investment in that activity will not be lost if the application is not granted, the supervisor should require that the useful activity be continued while the permit application is pending.

C. has submitted to the Department of the Interior a development plan or unitization agreement for the lease and is waiting for the Department to complete action on the plan or agreement; or

Guidelines. 1. The operator must show to the satisfaction of the supervisor that a bona fide application or agreement with a reasonable chance of success is involved.

2. If other activity can be done while the permit application is under review, and the investment in such activity will not be lost if the permit is not granted, the supervisor shall require that the useful activity be continued while the permit application is pending.

D. has submitted to the Department of the Interior and is actually conducting a geological and geophysical exploration or development program that includes drilling to develop sufficient reserves to produce either from the lease alone or in connection with other leases. For purposes of receiving a suspension under this provision, drilling activity on one lease may be determined by the supervisor to be activity on all leases which are to be considered as a unit for purposes of providing sufficient reserves to establish economic justification for the construction

V40245 DEC 19 75 XUM

of a pipeline necessary to transport such reserves from the subject leases.

Guidelines. 1. The purpose of this provision is to allow a suspension of a lease while the lessee is actively attempting to prove up enough reserves to justify a pipeline. To grant a suspension under these conditions, the supervisor shall require a report from the lessee showing:

(a) the specific leases to be considered as a unit for purposes of justifying the construction of a pipeline.

(b) the quantity of reserves already found on each lease.

(c) the minimum quantity of reserves required to justify the pipeline.

(d) an economic analysis showing how the estimated minimum quantity of reserves was determined and the assumptions used in arriving at the determination.

2. Mere proposals for further exploration do not meet the requirements of this section.

SUSPENSION OF PRODUCTION BECAUSE OF LACK OF TRANSPORTATION FACILITIES

A. . . . is waiting for the completion of pipeline construction, or delivery of pipeline equipment or facilities which are necessary for the transportation of oil and gas and for which the lessee has signed a contract that specifies the completion or delivery date, or

Guidelines. 1. An incomplete pipeline or undelivered equipment or facilities is not by itself sufficient justification for granting a suspension. The operator shall show to the satisfaction of the supervisor:

(a) that the undelivered or incompletely installed equipment is essential for producing oil and gas from the lease; and

(b) that the operator has made a timely and diligent effort to obtain the equipment; and

(c) that the delivery or completion date in the contract is reasonable. To decide whether the time for delivery or completion stated in the contract is reasonable, the supervisor should compare it with the time needed to perform similar contracts. He should also consider any other information that may aid him in making this determination.

2. As a condition for the suspension, the supervisor shall require the operator to continue doing any activity that will promote the early production of oil and gas from the lease.

B. . . . has pending before any Federal, State, local government authority an application or a permit which is necessary before the lessee can transport oil and gas from the lease, or

1. The operator must show to the satisfaction of the supervisor that a bona fide application with a reasonable chance of success is involved. Successive applications made within a short period of time on the same or nearly the same items as applications for permits or prices previously denied should not, for example, be considered bona fide applications.

2. Whenever possible, if more than one permit or license is necessary before the lessee can produce from the lease, the supervisor shall require that the operator submit all of the applications at the earliest possible time. Separate consecutive suspensions should not normally be granted for different applications can be acted upon during a single suspension period.

3. If other useful activity can be performed while the application is under review, and the investment in that activity will not be lost if the application is not granted, the supervisor should require that the useful activity be continued while the permit application is pending.

C. . . . has a contract to use an existing pipeline, but is unable to use the pipeline for reasons beyond the lessee's control.

Guidelines. 1. The operator must show that he has not caused or contributed to his inability to use the pipeline. Suspension of rights to operate by State agencies or acts of God may justify a suspension under this section.

2. If a suspension is granted, the supervisor shall require the operator to seek alternative means of transportation.

UNITED STATES
DEPARTMENT OF THE INTERIOR
GEOLOGICAL SURVEY
CONSERVATION DIVISION

OCS ORDER NO. 14

EFFECTIVE ----------

APPROVAL OF SUSPENSIONS OF PRODUCTION

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.12(d).

If the supervisor in his discretion approves a request for suspension of production pursuant to 30 CFR 250.12(d) (i) and (ii), the terms of the lease will not be deemed to expire as long as the suspension remains in effect.

The supervisor may not approve a request for a suspension to facilitate proper development or for lack of transportation facilities unless he is satisfied that the lessee: (1) has made the request in good faith; and (2) is taking and will continue to take all reasonable actions to expedite the production of oil and gas from the lease.

1. *Suspension of Production to Facilitate Proper Development.* A lease on which a well has been drilled and determined by the supervisor to be capable of being produced in paying quantities according to the provisions of OCS Order No. 4 and thereafter temporarily abandoned or permanently plugged and abandoned is being properly developed if the lessee:

A. Is waiting for completion of drilling platform construction and installation, or delivery of equipment or facilities which are necessary for production and for which the lessee has signed a contract that specifies a delivery date; or

B. Has pending before any Federal, State, or local government authority, an application for a permit which is necessary before the lessee can produce oil or gas from the lease; or

C. Has submitted to the Department of the Interior a development plan or unitization agreement for the lease and is waiting for the Department to complete action on the plan or agreement; or

D. Has submitted to the Department of the Interior and is actually conducting a geological and geophysical exploration or development program, that includes drilling to develop sufficient reserves to produce either from the lease alone, or in connection with other leases. For purposes of receiving a suspension under this provision, drilling activity on one lease may be determined by the supervisor to be activity on all leases which are to be considered as a unit for purposes of providing sufficient reserves to establish economic justification for the construction of a pipeline necessary to transport such reserves from the subject lease.

2. *Suspension of Production Because of Lack of Transportation Facilities.* A lease on which a well has been drilled and determined by the supervisor to be capable of being produced in paying quantities, according to the provisions of OCS Order No. 4, and thereafter temporarily abandoned or permanently plugged and abandoned, cannot be produced because of lack of transportation facilities if the lessee:

A. Is waiting for the completion of pipeline construction, or delivery of pipeline equipment or facilities which are necessary for the transportation of oil and gas and for which the lessee has signed a contract that specifies the completion or delivery date; or

B. Has pending before any Federal, State, or local government authority an application or a permit which is necessary before the lessee can trasport oil and gas from the lease; or

C. Has a contract to use an existing pipeline, but is unable to use the pipeline for reasons beyond the lessee's control.

Oil and Gas Supervisor

Approved: December 12, 1975.

EDDIE R. WYATT,
Acting Chief, Conservation Division.

INDIANA DUNES NATIONAL LAKESHORE ADVISORY COMMISSION

Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Indiana Dunes National Lakeshore Advisory Commission will be held at 10:00 a.m., CST, on Friday, January 16, 1976,, at the Red Lantern Inn Banquet Room, Lake Front Drive, Beverly Shores, Indiana.

The Commission was established by Public Law 89-761 to meet and consult with the Secretary of the Interior on matters related to the administration and development of the Indiana Dunes National Lakeshore.

The members of the Commission are as follows:

Mr. William L. Lieber (Chairman)
Mrs. Anna R. Carlson
Mr. Harry W. Frey
Mrs. Ione F. Harrington
Mr. John A. Hillenbrand II
Mr. Harold G. Rudd
Mr. John R. Schnurlein
Mr. George H. Williams (Secretarial Consultant)

Matters to be discussed at this meeting include:

1. Status of Lakeshore construction contracts.

2. Status of Congressional legislation on expansion of Indiana Dunes National Lakeshore.

3. Plans for dedication of West Beach facilities.

4. State Park/Lakeshore joint ventures.

5. Coordination between State of Indiana, city of Gary, Northwestern Indiana Regional Planning Commission and National Park Service regarding West Beach facilities relating to the problem of egress and ingress.

6. Bicentennial comprehensive plan and status.

7. Land Acquisition Report.

The meeting will be open to the public. It is expected that about 90 persons will be able to attend the session in addition to commission members. Interested persons may make written statements. Such requests should be made to the official listed below prior to the meeting.

Further information concerning this meeting may be obtained from James R. Whitehouse, Superintendent, Indiana Dunes National Lakeshore, Route 2, Box 139-A. Chesterton, Indiana 46304, telephone area code 219, 926-7561.

Minutes of the meeting will be available for public inspection three weeks after the meeting at the office of the Indiana Dunes National Lakeshore located at the intersection of State Park Road and U.S. Highway 12 (Kemil Road), Chesterton, Indiana.

MERRILL D. BEAL,
Regional Director, Midwest Region, National Park Service.

Dated: December 9, 1975.

PEAKS OF OTTER SEWAGE TREATMENT, BLUE RIDGE PARKWAY, VA.

Notice of Informal Public Meeting

Due to the failure of present sewage treatment measures to meet Environmental Protection Agency requirements, the National Park Service has scheduled a public meeting for the purpose of identifying viable alternative sewage treatment methods and their respective impacts on the human environment at the Blue Ridge Parkway's Peaks of Otter Recreation Area, Milepost 86, near Bedford, Virginia.

National Park Service representatives will be available at the Bedford Municipal Building on January 13 and 14, 1976, between the hours of 10 a.m. and 8 p.m. for the purpose of receiving comments and recommendations from interested citizens. Preparation of an environmental assessment and determination whether an environmental impact statement will be required will follow this public consultation.

A summary of preliminary data and identified alternatives is available upon request from the Superintendent, Blue Ridge Parkway, P.O. Box 7606, Asheville, North Carolina 28807.

Dated November 25, 1975.

ROBERT STANTON,
Acting Regional Director, Southeast Region.

DEPARTMENT OF AGRICULTURE

[Designaiton Number A275]

Farmers Home Administration

WASHINGTON

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Chelan County, Washington, as a result of a severe hailstorm and cloudburst July 7, 1975.

Therefore, the Secretary has designated this area as eligible for Emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Law 94-68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Daniel J. Evans that such designation be made.

Applications for Emergency loans must be received by this Department no later than February 9, 1976, for physical losses and September 9, 1976, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rule making and invite public participation.

Done at Washington, D.C., this 12th day of December, 1975.

FRANK B. ELLIOTT,
Administrator,
Farmers Home Administration.

PROPOSED DOLORES NATIONAL WILD AND SCENIC RIVER

Notice of Availability of Draft Environmental Statement

CROSS REFERENCE: For a document issued jointly by the Forest Service, Department of Agriculture, and the Department of the Interior on the subject of the proposed Dolores National Wild and Scenic River, see FR Doc. 75-34224 appearing in the notices section of this issue under the Office of the Secretary, Department of the Interior.

[Department Organization Order 10-3]

DEPARTMENT OF COMMERCE

ASSISTANT SECRETARY FOR DOMESTIC AND INTERNATIONAL BUSINESS

Organization

This order effective November 17, 1975 supersedes the materials appearing at 39 FR 27484 of July 29, 1974, 40 FR 12534 of March 19, 1975, and 40 FR 42765 of September 16, 1975.

Section 1. Purpose.—.01 This order prescribes the scope of authority of the Assistant Secretary for Domestic and International Business and prescribes the general functions of the Domestic and International Business Administration (DIBA). The organizational structure of DIBA and the assignment of functions therein are prescribed in Department Organization Order 40-1.

.02 This revision incorporates the provisions of previous amendments; reflects the establishment of the position of Deputy Assistant Secretary for Field Operations (subparagraph 3.03f.); restores a delegation inadvertently omitted (subparagraph 4.01 l.); delegates to the Assistant Secretary for Domestic and International Business certain of the Secretary's authorities under the Trade Act of 1974 and Executive Order 11846 (subparagraphs 4.01y. and 4.01z.); and deletes the delegation with respect to adjustment assistance certification of firms and communities and studies and information activities under Section 264 of the Trade Act of 1974.

Section 2. Administrative designation.—The position of Assistant Secretary of Commerce, established by Public Law 80-191 (15 U.S.C. 1505), shall continue to be designated the Assistant Secretary for Domestic and International Business. The Assistant Secretary is appointed by the President by and with the advice and consent of the Senate.

Section 3. Scope of Authority.—.01 The Domestic and International Business Administration is hereby continued as a primary operating unit of the Department of Commerce.

.02 The Assistant Secretary for Domestic and International Business shall be the head of the Domestic and International Business Administration.

.03 The Assistant Secretary for Domestic and International Business shall be assisted by the *Deputy Assistant Secretary for Domestic and International Business* who shall perform such duties as the Assistant Secretary shall assign, and shall assume the duties of the Assistant Secretary during the latter's absence. In addition, the Assistant Secretary shall be assisted by the following DIBA officials in carrying out his responsibilities:

a. The *Deputy Assistant Secretary for International Economic Policy and Research.*

b. The *Deputy Assistant Secretary for Domestic Commerce.*

c. The *Deputy Assistant Secretary for International Commerce* who shall also be the *National Export Expansion Coordinator.*

d. The *Deputy Assistant Secretary for Resources and Trade Assistance.*

e. The *Deputy Assistant Secretary for East-West Trade.*

f. The *Deputy Assistant Secretary for Field Operations.*

Section 4. Delegation of Authority. .01 Pursuant to the authority vested in the Secretary of Commerce, and subject to such policies and directives as the Secretary may prescribe, the Assistant Secretary, DIB, is hereby delegated the authority of the Secretary of Commerce under:

a. The Act of February 14, 1903 (15 U.S.C. 1512 et seq.; 15 U.S.C. 171 et seq.) as amended, to foster, promote, and develop the foreign and domestic commerce of the United States, and related provisions;

b. The Defense Production Act of 1950, as amended (50 U.S.C. App. 2061 et seq.), conferred on the Secretary under Executive Order 10480, dated August 14, 1953, as amended, including authority to issue or modify orders restricting surface

transportation and discharge of certain commodities or for the prohibition of movement of American carriers to certain designated destinations, which authority has heretofore been implemented by the issuance of Transportation Orders T-1 and T-2, except the authority to create new agencies within the Department of Commerce;

c. Headnote 2, subpart B, part 6, schedule 6 of the Tariff Schedules of the United States (19 U.S.C. 1202) relating to the development, maintenance, and publication of a list of bona fide motor-vehicle manufacturers, and authority to promulgate rules and regulations pertaining thereto under Section 501(2) of Title V of the Automotive Products Trade Act of 1965 (19 U.S.C. 2031);

d. Executive Order 11490 of October 28, 1969, as it relates to the development of national emergency preparedness plans and programs concerning production functions and to the regulation and control of exports and imports under the jurisdiction of the Department, in support of national security, foreign policy, and economic stabilization objectives;

e. The National Security Act of 1947 (50 U.S.C. 401 et seq.), as amended, as it relates to mobilization preparedness responsibilities assigned thereunder;

f. The Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98-98h), as amended, with respect to the acquisition of stocks of materials for defense purposes;

g. Executive Order 11179 of September 22, 1964, as amended by Executive Order 11725 of June 27, 1973, with respect to the establishment and training of the National Defense Executive Reserve;

h. Executive Order 10421 of December 31, 1952, providing for the physical security of facilities important to the national defense;

i. The Foreign Assistance Act of 1961, as amended (22 U.S.C. 2151 et seq.), and Section 302 of Executive Order 10973 of November 3, 1961, issued pursuant thereto, relating to drawing the attention of private enterprise to investment opportunities abroad;

j. The delegation of authority, dated June 25, 1962, from the United States Information Agency under Section 5(e) of Executive Order 11034 of June 25, 1962, as amended by Executive Order 11380 of November 8, 1967, insofar as said delegation pertains to U.S. participation in trade missions abroad under the Mutual Educational and Cultural Exchange Act of 1961, as amended (22 U.S.C. 2451 et seq.);

k. The Act of October 18, 1962, as amended (46 U.S.C. 1122b), which authorized mobile trade fairs;

l. The China Trade Act of 1922, as amended (15 U.S.C. 141 et seq.), and Section 941 of the Internal Revenue Code of 1954, as amended (26 U.S.C. 941), as it relates to certification of special dividend distributions.

m. Section 4221 of the Internal Revenue Code of 1954, as amended, and the Tariff Act of 1930, as amended (19 U.S.C. 1309), insofar as they relate to findings with respect to exemptions from taxes and import duties on supplies and equipment for aircraft;

n. Section 402 of the Act of June 30, 1949 (40 U.S.C. 512) as it relates to the authority of the Secretary of Commerce with respect to the importation of foreign excess property, Section 601 of the Act of June 30, 1949 (40 U.S.C. 473) relating to the importation into the U.S. of surplus property sold in foreign areas before July 1, 1949, as delegated to the Secretary of Commerce pursuant to F.L.C. Reg. 8 (44 CFR 308.15);

o. The Educational Scientific and Cultural Materials Importation Act of 1966 (19 U.S.C. 1202);

p. Headnote 6(d) of Schedule 7, part 2, subpart E of the Tariff Schedule of the United States (19 U.S.C. 1202), added by Public Law 89-805, pertaining to the allocation of quotas for duty-free importation into the customs territory of the United States of watches and watch movements, among producers located in the Virgin Islands, Guam, and American Samoa, respectively;

q. The Export Administration Act of 1969 (50 U.S.C. App. 2401 et seq.), as amended, and extended by the Equal Export Opportunity Act (Public Law 92-412, 86 Stat. 644), and the Export Administration Act Amendments of 1974 (Public Law 93-500, 88 Stat. 1552) and the authority under those Acts delegated to the Secretary of Commerce by Executive Order 11533 of June 4, 1970, as continued in effect by Executive Orders 11683 of August 29, 1972, 11798 of August 14, 1974, and 11818 of November 5, 1974, except that the following power, authority, and discretion shall be reserved to the Secretary:

1. The determinations required by section 7(c) with respect to the publication or disclosure of confidential information obtained under the provisions of the Act, and

2. The submission of reports to the President and to the Congress required by Section 10 of the Act;

r. Executive Order 10978 of December 5, 1961 regarding the Presidential "E" Award, "E" Certificate of Service, and "E Star" Award, except final selection of recipients;

s. Executive Order 11322 of January 5, 1967, and Executive Order 11419 of July 29, 1968, as they relate to the exportation from the United States of commodities and products to or on behalf of Southern Rhodesia.

t. Executive Order 11651 of March 3, 1972, regarding Textile Trade Agreements;

u. The Act of October 27, 1972 (Public Law 92-598; 84 Stat. 271) relating to the participation of the U.S. in the International Exposition on the Environment to be held in Spokane, Washington, in 1974;

v. The Foreign Investment Study Act of 1974 (Public Law 93-479, 88 Stat. 1450), which provides for a comprehensive, overall study of foreign direct investments in the United States. The functions thereunder shall be carried out in close coordination with the Bureau of Economic Analysis (Department Organization Order 35-1A, subparagraph 3.01 d.), including thereunder to the extent feasible the division or assignment of responsibilities. Any regulations established to carry out functions under the Act and reports to be submitted to the Congress are to be issued by the Secretary;

w. Section 6 of the Federal Water Pollution Control Act amendments of 1972 (Public Law 92-500; 86 Stat. 816; 33 U.S.C. 1251 nt. (Supp. III 1973)) relating to the preparation of a report from the Secretary of Commerce to the President and to the Congress on the effects of pollution abatement on international trade;

x. Executive Order 11858, of May 7, 1975, relating to foreign investment in the United States;

y. Sections 135 and 104 of the Trade Act of 1974 (88 Stat. 1978, 19 U.S.C. 2101 et seq.) and Section 4(d) of Executive Order 11846 of March 27, 1975, relating to industry policy and sector advisory committtees and the identification of product sectors of manufacturing; and

z. Sections 5(b) and 5(c) of Executive Order 11846 of March 27, 1975, relating to quantitative import restrictions and monitoring imports under orderly marketing agreements.

.02 The Assistant Secretary may exercise other authorities of the Secretary as applicable to performing the functions assigned in this order.

.03 The Assistant Secretary may redelegate his authority, subject to such conditions in the exercise of such authority as he may prescribe.

Section 5. Functions.—The Assistant Secretary, acting as such and as head of DIBA, shall be the principal officer of the Department to conduct Commerce activities aimed at promoting progressive business policies and growth and at strengthening the international economic position of the United States. In this respect he shall:

a. Propose general Federal policies for the Secretary to establish for promoting the business economy;

b. Develop and implement new programs to accomplish national objectives for improving and expanding the economic strength of the United States.

c. Conduct Commerce programs involving the expansion of international commerce, including research, analysis and the development of program and policy initiatives in the areas of international trade, finance and investment; expansion of East-West trade and other commercial relations; promotion of business-consumer relations; competitive assessment; domestic and international labor-management relations; import quota administration; export administration; the collection, analysis and dissemination of selected information on various industries, commodities and markets; the preparation and execution of plans for industrial mobilization readiness; and participation in domestic and international trade fairs and exhibitions as is necessary to the performance of DIBA's functions.

V 40 245 DEC 19 75 XUM

d. Consult with and encourage cooperation and participation of the business community in the Department's domestic and international business programs;

e. Coordinate the Department's domestic and international business programs with other Federal agencies; and

f. Provide executive secretariat services and administrative support to the Foreign-Trade Zones Board.

Section 6. Savings Provision.—All rules, regulations, orders, determinations, authorizations, contracts, grants, agreements, proceedings, hearings, investigations, or other actions issued, undertaken, pending or entered into by or for DIBA shall continue and remain in full force and effect until they expire in due course or are revoked or amended by appropriate authority.

GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary for Administration.

[DEPARTMENT ORGANIZATION ORDER 10-4; Amendment 1]

ASSISTANT SECRETARY FOR ECONOMIC DEVELOPMENT

Organization

This order effective November 17, 1975 amends the material appearing at 40 FR 56702 of December 4, 1975.

Department Organization Order 10-4, dated September 30, 1975, is hereby amended as shown below. The purpose of this amendment is to revise the delegation to the Assistant Secretary for Economic Development made under Chapters 3 and 4 of the Trade Act of 1974 so that the Assistant Secretary can certify firms and communities as eligible to receive adjustment assistance and conduct studies and information activities under Section 264 of the Act.

Section 4. Delegation of Authority.—Subparagraph .01e. is revised to read as follows:

"e. Chapters 3 and 4 of Title II of the Trade Act of 1974 (P.L. 93-618, 88 Stat. 1978, 19 U.S.C. 2101 et seq.) as they pertain to the certification of eligibility of firms and communities to apply or be considered for adjustment assistance, the termination of such certification, the provision of adjustment assistance to such firms and communities as are certified eligible to apply or be considered for adjustment assistance, and the studies, information activities, and assistance in preparation of petitions required under Section 264 of the Act in response to investigations and affirmative findings of the International Trade Commission, except that reports to be submitted to the President shall be issued by the Secretary."

GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary for Administration.

[Department Organization Order 35-1B]

BUREAU OF ECONOMIC ANALYSIS

Organization

Section 1. Purpose.—.01 This order prescribes the organization and assignment of functions within the Bureau of Economic Analysis (BEA).

.02 The only significant change made in BEA's organization and assignment of functions is the creation of the Management Services Division to provide administrative support services to BEA (paragraph 8.01).

Section 2. Organization Structure.—The organization structure and line of authority of BEA shall be as depicted in the attached organization chart. A copy of the chart is on file with the original of this document with the Office of the Federal Register.

Section 3. Office of the Director.—.01 The *Director of the Bureau of Economic Analysis* shall develop policies and plans for and direct and manage the operations of BEA.

.02 The *Deputy Director* shall assist the Director in all aspects of the management of BEA, and perform the duties of the Director during the latter's absence.

.03 Staff Elements. a. The *Chief Statistician* shall monitor and improve the data sources and statistical estimating techniques used in the work of BEA, and advise the Director in these fields.

b. The *Chief Economist* shall analyze economic developments and problems, advise the Director with regard to them, and with regard to the economic research program of BEA.

Section 4. Associate Director for National Economic Accounts.—The *Associate Director for National Economic Accounts* shall plan and coordinate the systems of national economic accounts maintained by BEA, including the national income and product, wealth, government, and input-output accounts, and advise the Director in this field. The Associate Director shall have and coordinate the following units:

.01 The *Government Division* shall maintain, improve, and interpret the Federal, State, and local government accounts of the United States within the economic accounting framework; cooperate in the translation of the unified budget into economic accounting terms for publication in the Budget of the United States and the Economic Report of the President; prepare forecasts of Government receipts and expenditures for use in BEA's analyses of the economic outlook; and conduct research in the quantitative study of public finance.

.02 The *Interindustry Economics Division* shall maintain, improve, and interpret (1) the input-output accounts of the United States which show the flows of goods and services from each industry to other industries and to final markets in the economy, and the gross national product originating in each industry for given years, and (2) the time series of the gross national product originating in each of the industries of the Nation; conduct research in input-output techniques, including regional input-output techniques; and prepare special studies of the economic repercussions of changes in consumer, investment, foreign, and Government markets on the output of the Nation's industries and the incomes originating in them.

.03 The *National Income and Wealth Division* shall maintain, improve, and interpret the national income and product and wealth accounts of the United States, including national income, by type of income, industrial source and legal form; gross national product and its components; personal income and its components, disposition, and size distribution; the sources and uses of savings; national wealth by type of asset and ownership; and do research in the techniques required to interpret the national income and product and wealth accounts.

Section 5. Associate Director for National Analysis and Projections.—The *Associate Director for National Analysis and Projections* shall plan and coordinate the national economic analysis and projection programs of BEA, including the development of econometric models of the United States economy and the preparation of econometric forecasts; monitor econometric techniques used in BEA; coordinate BEA activities which relate to the overall effort of the Government to study the problems of economic growth; and advise the Director in these fields. The Associate Director shall have and coordinate the following units:

.01 The *Business Outlook Division* shall maintain, improve, and interpret data on past, current, and prospective domestic business investment in new plant and equipment; conduct designated surveys required to correct this information; maintain and improve econometric models of the U.S. economy designed to forecast short- and long-term changes in economic activity, and to assess the likely impact on economic activity of alternative fiscal, monetary, and other Government economic policies; and study problems relating to the Nation's economic growth.

.02 The *Current Business Analysis Division* shall conduct a continuing study of current business activity; prepare and publish in the *Survey of Current Business* regular interpretations of the business situation; conduct research required for assembling (for publication in the *Survey* and its *Business Statistics Supplement*) a detailed and comprehensive set of data produced by BEA and other agencies for use in evaluating the business situation; and be responsible for coordinating the press releases of BEA.

.03 The *Statistical Indicators Division* shall develop and publish reports such as *Business Conditions Digest, Defense Indicators,* and *Long-Term Economic Growth;* conduct research relating to the system of economic indicators (leading, coincident, and lagging) and to the methods and applications of seasonal and other time series adjustments; conduct analysis relating to the behavior of economic indicators; and provide services relating to the seasonal adjustment of time series.

Section 6. Associate Director for Regional Economics.—The *Associate Director for Regional Economics* shall plan and coordinate the regional economic measurement and analysis program of BEA and advise the Director in this field. The Associate Director shall have and coordinate the following units:

.01 The *Regional Economic Analysis Division* shall maintain and improve regional economic projections; conduct research in regional economics, with special attention to the factors determining the levels and rates of growth of regional economic activity; develop analytical techniques for regional economic impact studies; and conduct special analyses of regional economics in cooperation with Government agencies and private groups.

.02 The *Regional Economic Measurement Division* shall maintain and improve the regional economic accounts of the United States including personal income by type of income and industrial source for each of the States, metropolitan areas, and counties of the Nation; conduct research in regional economic measurement techniques; and maintain a regional economic information system.

Section 7. Associate Director for International Economics.—The *Associate Director for International Economics* shall plan and coordinate the international economic program of BEA and advise the Director in this field. The Associate Director shall have and coordinate the following units:

.01 The *Balance of Payments Division* shall maintain, improve, and interpret the balance of payments accounts of the United States and their current and capital components, including detail by foreign geographic area, to aid in understanding the effects of the balance of payments on the U.S. economy, and the role of the United States in the world economy; conduct designated surveys to obtain basic data necessary to construct the balance of payments accounts, including surveys of the foreign transactions of Government agencies; conduct research in the techniques required to interpret the balance of payments accounts; and prepare forecasts of the balance of payments of the United States.

.02 The *Foreign Demographic Analysis Division* shall conduct specialized studies of the population, manpower, economics, and social systems of foreign countries, involving the compilation and evaluation of relevant data; prepare estimates and projections; and prepare special analytical and interpretive reports and monographs.

.03 The *International Investment Division* shall maintain, improve, and interpret data on United States direct investments abroad, foreign direct investments in the United States, and income flows associated with such investments, including the transactions of foreign affiliates; conduct designated surveys required to obtain this information; conduct research in the techniques required to interpret international investment; and maintain and develop a data system on U.S. direct investments.

Section 8. Support Divisions.—.01 The *Management Services Division* shall provide budget, management analysis, and local administrative services; and shall arrange for and facilitate the provision of other administrative management services by the Office of the Secretary, including financial accounting and personnel services.

.02 The *Computer Systems and Services Division* shall maintain, coordinate, and improve the use of automatic data processing equipment by BEA, including the conduct of feasibility studies; prepare automatic data processing systems and programs; and provide data processing services for BEA.

Effective date: October 24, 1975.

GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary for Administration.

[Department Organization Order 35-2A: Amendment 1]

BUREAU OF THE CENSUS

Department Organization Order

This order effective November 18, 1975 amends the material appearing at 40 FR 42765 of September 16, 1975.

Department Organization Order 35-2A, dated August 4, 1975, is hereby amended as shown below. The purpose of this amendment is to update the citation on the Executive Order regarding collection of census information for emergency planning purposes.

Section 3. Delegation of Authority.—Subparagraph .01c is revised to read as follows:

"c. Section 904 of Executive Order 11490, which directs the Secretary to provide for the collection and reporting of census information on the status of human and economic resources, including population, housing, agriculture, manufacture, mineral industries, business, transportation, foreign trade, construction, and governments, as required for emergency planning purposes; and otherwise plan for and maintain a capability for damage assessment purposes, as set forth therein."

GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary for Administration.

[FR Doc.75-34272 Filed 12-18-75;8:45 am]

[Department Organization Order 40-1]

DOMESTIC AND INTERNATIONAL BUSINESS ADMINISTRATION

Organization

This order effective November 17, 1975 supersedes the materials appearing at 40 FR 8978 of March 4, 1975, 40 FR 12532 of March 19, 1975, 40 FR 31651 of July 28 March 19, 1975, 40 FR 31651 of July 28, 1975 and 40 FR 56705 of December 4, 1975.

Section 1. Purpose.—.01 This order prescribes the organization and assignment of functions within the Domestic and International Business Administration (DIBA). Department Organization Order 10-3 prescribes the functions of DIBA and the scope of authority of the Assistant Secretary for Domestic and International Business.

.02 This revision incorporates the provisions of prior amendments, reflects the establishment of the position of Deputy Assistant Secretary for Field Operations and a new field structure in the Office of Field Operations: District and Satellite Offices in place of Regional and District Offices (Section 10 and paragraph 10.05 and Exhibit 2 respectively); provides for the realignment of functions in the Bureau of East-West Trade and changes in office names (Section 9.); abolishes the Office of Trade Adjustment Assistance because of the transfer of adjustment assistance certification of firms and communities and other functions to the Economic Development Administration; and provides Bureau status for International Economic Policy and Research because of its line functions (Section 5.).

Section 2. Organization and Structure.—The principal organization structure and line of authority of DIBA shall be as depicted in the attached organization chart (Exhibit 1). A copy of the chart is on file with the original of this document with the Office of the Federal Register.

Section 3. Office of the Assistant Secretary for Domestic and International Business.—.01 The *Assistant Secretary for Domestic and International Business* determines policy, directs the programs and is responsible for all activities of DIBA.

.02 The *Deputy Assistant Secretary for Domestic and International Business* shall perform such duties as the Assistant Secretary shall assign; shall carry out the Assistant Secretary's responsibilities in connection with the Defense Production Act of 1950 as amended and extended; shall be the principal assistant and advisor to the Assistant Secretary on public affairs, and administrative matters; shall direct the activities of the Office of Public Affairs and the Directorate of Administrative Management; and shall assume the duties of the Assistant Secretary during the latter's absence.

Section 4. Staff Offices.—.01 The *Office of Public Affairs* shall advise DIBA officials and organizational elements on

V40245 DEC 19 75 XUM

all public affairs and information service matters; provide centralized information services for DIBA; conduct and be responsible for all DIBA publications programs, consonant with the provisions of Department Organization Order 20–9, "Office of Publications"; provide speech writing and scheduling services for DIBA; and maintain liaison for DIBA with the Departmental Office of Publications, the Departmental Office of Communications, and the news and trade media consonant with the provisions of Department Organization Order 15–3, "Office of Communications."

.02 The *Directorate of Administrative Management* shall provide administrative management services for all DIBA organizational components. The functions of the Directorate shall be carried out through the principal organizational elements as prescribed below:

a. The *Office of Personnel* shall develop and administer personnel management programs including recruitment, placement, employee development, classification, labor-management relations, equal employment opportunity, and employee relations and provide liaison with the Departmental Office of Personnel.

b. The *Office of Management and Systems* shall provide management, organization and systems analysis, including management studies and surveys and organizational planning studies; conduct a position management program; coordinate ADP systems development and the DIBA program management information system; perform the committee management, directives management, records disposition management, forms management, files management, and reports management functions for DIBA; coordinate GAO and Departmental audits within DIBA; coordinate DIBA activity under the Freedom of Information Act and the Privacy Act of 1974; and provide liaison with the Departmental Office of Organization and Management Systems.

c. The *Office of Administrative Support* shall provide administrative and support services including personnel, physical and document security, safety, correspondence control, and space management; shall provide procurement liaison; and shall coordinate and process communications between the Department of Commerce and posts abroad, consistent with any administrative agreements between the Assistant Secretary for Domestic and International Business and the Assistant Secretary for Administration.

d. The *Office of Budget* shall develop the DIBA program structure and program memorandum; assess program effectiveness; formulate, present, and execute the budget for DIBA; effect financial and budgetary controls; prepare budget reports; and provide liaison with the Departmental Office of Budget and Program Analysis.

Section 5. Bureau of International Economic Policy and Research.—The *Deputy Assistant Secretary for International Economic Policy and Research* shall determine the objectives of the Bureau—a mainline component of DIBA—assist and advise the Assistant Secretary in the research, analysis and formulation of international economic and commercial programs and policies relating to trade, finance and investment, and competitive assessment; shall initiate and review research studies on developments affecting U.S. trade and commercial interests abroad and provide statistical information and analysis on the foreign trade of the U.S. and of foreign countries; shall be responsible for development and coordination of policy formulation within DIBA; represent the Department in international trade and other negotiations; and supervise the Department's interagency policy role in such organizations as the National Security Council, the Council on International Economic Policy, the Office of the Special Trade Representative, and the National Advisory Council on International Monetary and Financial Policies. The Deputy Assistant Secretary shall be assisted by a Deputy Director who shall perform the functions of the Deputy Assistant Secretary in the latter's absence. The functions of the Bureau shall be carried out through its principal organizational elements as prescribed below:

.01 The *Office of International Trade Policy* shall be responsible for the development and implementation of the Department's positions on all aspects of U.S. international trade policy, including trade legislation and International Trade Commission findings, trade negotiations, consultations with industry, and trade and commercial policy relations with individual countries, regional economic groupings, and international organizations. For all such trade policy matters, the Office shall represent the Department on interagency committees, and in international meetings on trade policy matters; analyze and comment on relevant legislative proposals; prepare the Department's positions on International Trade Commission findings, bilateral trade policy issues and bilateral trade negotiations; manage the consultations with U.S. industry in support of multilateral trade negotiations; analyze and act on international trnsportation and insurance problems affecting U.S. business; maintain relationships and representation with business and trade groups; and, through appropriate channels, make representations to foreign governments on behalf of U.S. business on the maintenance of their full rights under the terms of treaties and international agreements of the United States. In carrying out these responsibilities, the Office shall coordinate international trade policy issues among the DIBA components.

.02 The *Office of International Finance and Investment* shall be responsible for the development and implementation of the Department's policies relating to international investment, finance, monetary affairs, U.S. and foreign taxation, standards, patent and copyright protection, and related matters arising from the international commercial and invetsment operations of U.S. firms. The Office shall also carry out DIBA's responsibilities for the conduct of a study of foreign direct investment in the United States in 1974.

.03 The *Office of Competitive Assessment* shall assess the competitiveness of American industry in domestic and international markets. This shall include studies of specific industries, sectors, and functions of the American economy and major foreign economies for the purpose of anticipating shifts in competitive conditions, and analyses of key competitive factors within and across industries in the U.S. and abroad.

.04 The *Office of Economic Research* shall conduct research studies on developments affecting U.S. trade and commercial interests abroad; shall be responsible for the development and coordination of econometric models concerned with longer-term U.S. trade and invetsment projections; and shall serve as liaison with U.S. Government research and intelligence agencies as well as with private research groups.

.05 The *Office of Foreign Investment in the United States* shall obtain, consolidate and analyze information on foreign investment in the United States; improve procedures for the collection and dissemination of information on such foreign investment; based on close observation of foreign investment in the U.S., prepare reports and analyses of trends and significant developments in appropriate categories of such investment; compile data and prepare evaluations of significant inward investment transactions; submit to the interagency Committee on Foreign Investment in the United States, appropriate reports, analyses, data and recommendations on foreign investment in the U.S.; and obtain information and assistance from other Federal departments and agencies in order to carry out the Secretary's functions and activities under Executive Order 11858.

Section 6. Bureau of International Commerce (BIC). The *Deputy Assistant Secretary for International Commerce* shall assist and advise the Assistant Secretary on export expansion, and shall serve as National Export Expansion Coordinator. Within the framework of overall DIBA goals, the Deputy Assistant Secretary shall determine the objectives of the Bureau—a mainline component of DIRA—formulate policies and programs for achieving those objectives, and direct the execution of Bureau programs. The Deputy Assistant Secretary shall provide a coordinated DIBA response to the economic situation and business opportunities in Near East countries including Saudi Arabia, Iran, Egypt, Israel, Lebanon, Syria, Iraq, Jordan, Kuwait, the United Arab Emirates, Libya, Morocco, Tunisia, and Algeria. The Deputy Assistant Secretary shall be assisted by a *Deputy Director* who shall perform the functions of the Deputy Assistant Secretary in the latter's absence. The functions of the Bureau shall be carried out through its principal organizational elements as prescribed below:

.01 The *Office of Market Planning* shall provide principal planning and strategy development for the Bureau; shall develop and review the Bureau's role, objectives, and operating plans on a worldwide basis; shall identify those sectors of U.S. industry with the greatest

export growth potential and examine foreign markets offering the greatest export opportunities to U.S. industry; shall develop guidelines for allocation of resources for DIBA-sponsored export programs; shall establish "intensive promotion cycles" for BIC export expansion activities; shall measure and evaluate Bureau programs; shall be responsible for programs to represent the interests of the Department to other agencies with regard to the official representation of U.S. commercial interests abroad; and shall coordinate country commercial programs and the Office of Field Operations/BIC agreement.

.02 The *Office of Export Development* shall conduct activities in the United States designed to stimulate export marketing in all segments of the domestic economy which have the capability to export; shall develop promotional activities for increasing national awareness of export potentials and benefits, and for improving Government/business cooperation in export development; shall be the focal point for the export expansion activities involving DIBA district offices; shall provide information on commercial participants in world trade and furnish specific trade investment opportunities to U.S. businessmen; shall assist qualified U.S. firms in achieving maximum participation in major systems and development projects abroad; shall provide coordination for DIBA participation in domestic trade fairs; shall encourage foreign direct capital investments and licensing by foreign firms in the United States; and shall provide information and other services consistent with U.S. balance of payments policies and objectives to U.S. firms undertaking investments overseas.

.03 The *Office of International Marketing* shall provide overseas marketing assistance to U.S. companies through a variety of informational and promotional techniques; shall plan and implement individual country programs to support the marketing needs of U.S. business on a targeted industry, product, and market basis, and shall maintain appropriate information services for all such activities; shall direct the exhibitions program at commercial trade fairs and U.S. trade centers; and shall have responsibility for carrying out any activities resulting from the participation of the United States in the International Exposition on the Environment at Spokane, Washington.

Section 7. Bureau of Resources and Trade Assistance.—The *Deputy Assistant Secretary for Resources and Trade Assistance* shall determine the objectives of the Bureau—a mainline component of DIBA—formulate the policies and programs for achieving those objectives, and direct execution of the programs. The Deputy Assistant Secretary shall be assisted by a *Deputy Director* who shall perform the functions of the Deputy Assistant Secretary in the latter's absence. The functions of the Bureau shall be carried out through its principal organizational elements as prescribed below:

.01 The *Office of Import Programs* shall deal with import problems involving industries experiencing difficulties from import competition and on problems in the field of international trade in primary commodities. For such import-impacted industries, and as otherwise required, it shall maintain interagency relationships and coordinate legislative comment, international negotiations, and representation with business and trade groups. It shall process applications for duty free importation of educational, scientific and cultural materials; process applications to import foreign excess property into the United States; perform staff work pertaining to the allocation of watches and watch movements among producers in the Virgin Islands, Guam, and American Samoa; provide executive secretarial services and administrative support to the Foreign-Trade Zones Board; analyze information pertaining to international trade in selected industrial products and analyze developments affecting U.S. imports of or international trade in primary commodities; and represent the Department in U.S. Government participation in international agreements and arrangements on commodities and industrial products.

.02 The *Office of Textiles* shall conduct studies and analyses of the fiber, textile and apparel sector of the industrial economy; provide interpretive data on trends affecting the sector's economic stability, and recommend appropriate Government action to improve the economic position of the sector; participate in administration and negotiation of international and bilateral textile agreements; and coordinate interagency relations, legislative comment, and liaison with relevant industry and trade groups.

Section 8. The Bureau of Domestic Commerce.—The *Deputy Assistant Secretary for Domestic Commerce* shall determine the objectives of the Bureau—a mainline component of DIBA—formulate policies and programs for achieving those objectives, and direct execution of the Bureau's programs. The Deputy Assistant Secretary shall be assisted by a *Deputy Director* who shall perform the functions of the Deputy Assistant Secretary in the latter's absence. The functions of the Bureau shall be carried out through its principal organizational elements as prescribed below:

.01 The *Office of Industrial Mobilization* shall perform national defense and industrial mobilization functions, as follows: assist in achieving, through administration of priorities and allocations and other means, an adequate supply of strategic, critical, and other products and materials for defense and defense-supporting activities and essential civilian needs, including the timely completion of current military, atomic energy, and space programs for production, construction, and research and development; and participate in the development of national plans to assure maximum readiness of the industrial resources of the United States, including the means for administering them, to meet any future demands of any national emergency.

.02 The *Office of Business and Legislative Issues* shall provide analyses and quantitative assessments of domestic business and legislative issues that support, supplement or complement activities of other elements of the Domestic and International Business Administration, the Department, or other agencies of the Government engaged in developing and evaluating domestic business policy options.

.03 The *Office of Business Research and Analysis* shall collect, maintain, and analyze domestic and international data on individual commodities and industries, such as production, pricing, inventories, marketing, labor, financing, taxation, and location and size of companies, exclusive of data related to the fiber, textile, and apparel sector of the industrial economy, which shall be the responsibility of the Bureau of Resources and Trade Assistance. (The fiber, textile and apparel sector of the industrial economy shall be the responsibility of the Bureau of Domestic Commerce insofar as required for the administration of the Defense Production Act of 1950, as amended.) This information will be used in support of policy decisions and program actions by the Bureau of Domestic Commerce, the Department of Commerce, and other areas of the Government. The Office shall monitor problem commodities for short supply export controls.

The Office shall also certify U.S. firms as "bona fide motor-vehicle manufacturers" qualified to trade under the provisions of the U.S.-Canadian Automotive Agreement, and prepare the President's Annual Report to Congress concerning implementation of the Automotive Products Trade Act of 1965.

.04 The *Office of Ombudsman for Business* shall serve as a focal point for business assistance, consultation, and advice; receive and respond to inquiries from business and industry, the Congress, other agencies of the Government, and the public; identify and take action to clarify business concerns involving Government policies and programs; serve as the Department's contact in consumer affairs matters with other Government agencies, business and public organizations. In carrying out its functions, the Office shall not represent, intervene on behalf of, or otherwise seek to assist business and individuals on specific matters, cases, or issues before Federal regulatory agencies or before Federal departments exercising a regulatory function with respect thereto; nor shall it participate in, intervene in regard to, or in any way seek to influence, the negotiation or renegotiation of the terms of contracts between business and the Government.

Section 9. The Bureau of East-West Trade.—The *Deputy Assistant Secretary for East-West Trade,* shall determine the objectives of the Bureau—a mainline component of DIBA—formulate policies and programs for achieving those objectives and direct execution of the programs. The Deputy Assistant Secretary (DAS) shall be assisted by a *Deputy Director* who shall perform the functions of the DAS in the latter's absence. (The Office of the DAS shall include a *Hearing Commissioner* who shall conduct hearings and perform other duties with re-

V40245 DEC 19 75 XUM

spect to administrative compliance proceedings involving Export Administration violations cases, in accordance with the rules set forth in the Export Administration Regulations.) The objectives, policies and programs of the Bureau of East-West Trade shall relate to the U.S.S.R., People's Republic of China, Poland, Romania, Czechoslovakia, Hungary, Bulgaria, Albania, East Germany, the Soviet zone of Berlin, Cuba, Mongolia and certain other areas of the world with similar economic/political structures, and, where necessary for export administration purposes, shall relate to other countries. The Office shall provide necessary secretariat and support services to the Export Administration Review Board and to the Advisory Committee on Export Policy. The functions of the Bureau shall be carried out through its principal organizational elements as prescribed below:

.01 The *Office of East-West Trade Development* shall, with regard to the countries and areas specified, be responsible for developing and implementing program recommendations with regard to trade and other commercial relations; preparing market assessments on Centrally Planned Economy (CPE) countries; gathering information bearing on commercial relations and providing advisory services and information for U.S. firms or industrial groups; developing and disseminating studies of market potential for U.S. trade with these countries and areas; developing and executing programs for U.S. trade promotional events and trade missions to the specified countries and areas; and coordinating activities relating to foreign commercial services and commercial representation in these countries.

.02 The *Office of East-West Country Affairs* shall maintain familiarity with and develop and disseminate information and advice on the economic and political conditions and policies and the U.S. trade and commercial relations with the countries and areas listed in Section 9; maintain contacts on East-West trade matters with foreign government officials in the U.S.; develop and provide country information and advice to other elements of the Bureau, the Department, the U.S. chairmen of joint trade commissions and members of interagency committees; and provide executive secretariat services to U.S. joint commercial commissions.

.03 The *Office of East-West Policy and Planning* shall formulate, analyze and make recommendations about legislative and policy issues arising in East-West trade activities; coordinate East-West trade policy review with international trade, finance and other organizations; monitor and maintain liaison with East-West trade-related national and international organizations; propose and monitor contracts for analyses of East-West trade matters and develop and provide statistical data services for the Bureau.

.04 The *Office of Export Administration* shall administer and, in conjunction with the Department's Office of the General Counsel, enforce the regulations and programs required to carry out Departmental responsibilities under the Export Administration Act of 1969, as amended; develop policies and measures for the administration of U.S. exports of commodities and technical data; seek, in collaboration with other Federal agencies, the adoption by foreign countries of such controls over their exports as will assist the policies of the United States with respect to trade between the free world and the specified countries and areas, and with such other areas as national security, foreign policy and short supply may require; shall have coordinating responsibilities for all short supply activities within DIBA and provide secretariat and support services to the Operating Committee of the Advisory Committee on Export Policy, and Technical Advisory Committees established under the Export Administration Act of 1969, as amended.

Section 10. Office of Field Operations.—The *Deputy Assistant Secretary for Field Operations* shall head the Office which shall serve as the Department's principal medium of contact with the business community at local levels for the functions listed below, most of which will be performed through District Offices and subordinate Satellite Offices located throughout the country (Exhibit 2). A copy of Exhibit 2 is on file with the original of this document with the Office of the Federal Register.

.01 Ascertaining the needs and desires for information and assistance relevant to the private economy that fall within the scope of Commerce's responsibilities, arranging or participating in the effective delivery of Commerce's business-related information products, and assisting in the planning and design of additional business information;

.02 Providing local assistance and service to business communities in utilizing information and related business aids of Commerce and of other agencies, and performing the field work and services involved in the programs of DIBA, and for other organizations of Commerce as may be arranged from time to time;

.03 Promoting participation of the general business community in the rsolution of economic and business problems of the Nation;

.04 Publishing the "Commerce Business Daily"; and

.05 Through the District or Satellite Offices located in the ten Uniform Federal Regional Council Cities, serving as the Department's principal coordinator at the regional level for Federal Preparedness Planning, Crisis Management and Emergency Operations. Accordingly, the Office Directors in the ten cities (i.e., Boston, New York, Philadelphia, Atlanta, Chicago, Dallas, Kansas City, Denver, San Francisco and Seattle), having been designated Regional Emergency Coordinators, acting in accordance with instructions and guidance issued by the Director, Departmental Office of Emergency Readiness, through the Office of Field Operations, shall represent the Secretary and shall be the principal advisory and contact point for the Department for emergency readiness matters in their respective areas.

GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary for Administration.

[FR Doc.75-34273 Filed 12-18-75;8:45 am]

[Department Organization Order 25-5A; Amendment 3]

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Organization

This order effective November 19, 1975 further amends the materials appearing at 39 FR 27486 of July 29, 1974, 40 FR 36608 of August 21, 1975 and 40 FR 42764 of September 16, 1975.

Department Organization Order 25-5A, dated July 9, 1974, is hereby further amended as shown below. The purpose of this amendment is to delegate to the Administrator of NOAA the authority pertaining to disaster warnings that was delegated to the Secretary of Commerce by the Secretary of Housing and Urban Development.

Section 3. Delegation of Authority.—A new subparagraph .01cc. is added to read as follows:

"cc. The functions relating to section 202 of the Disaster Relief Act of 1974 (42 U.S.C. 5132) specified in the delegation of authority from the Secretary of Housing and Urban Development (40 FR 42769), effective September 16, 1975, which pertains to disaster warnings for meteorological catastrophes."

GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary for Administration.

[FR Doc.75-34270 Filed 12-18-75;8:45 am]

[Department Organization Order 20-7; Amendment 1]

OFFICE OF ORGANIZATION AND MANAGEMENT SYSTEMS

Organization

This order effective November 23, 1975, amends the material appearing at 37 FR 6416 of March 29, 1972.

Department Organization Order 20-7, dated March 19, 1972, is hereby amended as shown below.

The purpose of this amendment is to establish a new Information Management Division. The recent growth in the requirements placed on the Department in the area of information management, including the Federal Advisory Committee Act, the Freedom of Information Act as amended, and the Privacy Act of 1974, have made necessary the establishment of a separate organizational entity to handle this area of responsibility.

Section 5. Organization.—A new paragraph .05 is added to read:

".05 The *Information Management Division* shall develop policies, procedures, standards, and relevant rules and orders to assure Department compliance with the provisions of the Freedom of Information Act as amended, the Privacy Act of 1974, and the Federal Advisory Committee Act; monitor policy compliance by units of the Department; review the units' implementation of the rules and orders; function as the focal point in coordination with the Department's Office of General Counsel for the Department's administration of the three statutes; and serve as the principal staff component of the Department on information management and committee management functions."

GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary for Administration.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Center for Disease Control

IMMUNIZATION PRACTICES ADVISORY COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pulbic Law 92-463), the Center for Disease Control announces the following Committee meeting:

Name: Immunization Practices Advisory Committee. Dates: January 29-30, 1976. Place: Room 207, Building 1, Center for Disease Control, 1600 Clifton Road NE., Atlanta, Georgia 30333. Time: 8:30 a.m. Type of Meeting: Open.

Contact Person: H. Bruce Dull, M.D., Executive Secretary of Committee, Building 1, Room 2118, Center for Disease Control, 1600 Clifton Road NE., Atlanta, Georgia 30333. Phone: 283-3701 (FTS) or 404-633-3311, ext. 3701.

Purpose: The Committee is charged with advising on the appropriate uses of immunizing agents for public health practice.

Agenda: The Committee will consider the current status of polio vaccine in the prevention and control of polio in the United States. It will also continue its regular review of recommendations on the use of vaccines in public health practice.

Agenda items are subject to change as priorities dictate.

The meeting is open to the public for observation and participation. A roster of members and other relevant information regarding the meeting may be obtained from the contact person listed above.

Dated: December 9, 1975.

DAVID SENCER,
Director, Center for Disease Control.

Food and Drug Administration

[Docket No. 75N-0359]

EXEMPTIONS FROM PERFORMANCE STANDARDS FOR ELECTRONIC PRODUCTS

Meeting

The Commissioner of Food and Drugs announces a meeting to be held January 29, 1976 to discuss development of a protocol with United States Government departments and agencies to facilitate procurement of electronic products for which exemption from performance standards is sought.

The Commissioner issued in the FEDERAL REGISTER of September 30, 1975 (40 FR 44846) a proposed rule to establish procedures for manufacturers to apply for exemptions from performance standards issued under the Radiation Control for Health and Safety Act of 1968. According to the act, such exemptions may be granted to manufacturers of electronic products intended for use by United States Government departments or agencies provided there are procurement specifications governing radiation emissions and provided the product is of a type used solely or predominantly by United States Government departments or agencies.

Since publication of the proposal, it has become apparent that the proposed procedures may result in excessive procurement delays if the procuring Federal agency and the Bureau of Radiological Health (the Bureau) have not previously discussed the procurement specifications in those instances when the procuring agency expects there would be a conflict with standards issued under the act. Presently, there are standards for television receivers, microwave ovens, cold-cathode gas discharge tubes, diagnostic x-ray systems, cabinet x-ray systems (including baggage inspection systems), and laser products.

The Bureau desires to establish a protocol with United States Government departments and agencies whereby there could be consultation with the Bureau during development of procurement specifications for products regulated under the act. Such consultation would involve determination of the need for an exemption, the option of issuing a variance instead of an exemption, and radiation safety criteria to be incorporated in the procurement specifications if an exemption is required. Early discussions between the procuring agency and the Bureau would be advantageous to both the agency and the manufacturer to whom the contract is eventually awarded, since it will facilitate the processing of exemption applications when they are warranted.

A meeting to discuss interagency protocols described above will be held on January 29, 1976, at 9 a.m., in Rm. 416 of the Bureau of Radiological Health, 12720 Twinbrook Parkway, Rockville, MD 20852. This meeting is limited to representatives of United States Government departments and agencies that foresee a need for electronic products that may not meet Federal radiation safety standards issued under the Radiation Control for Health and Safety Act of 1968. United States Government departments or agencies that plan to send an individual representative to the meeting should so indicate in writing to the Bureau of Radiological Health (HFX-460), 5600 Fishers Lane, Rockville, MD 20852. If the Bureau has not been contacted by January 9, 1976, it will be assumed that the agency will not be represented at the meeting.

Dated: December 12, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.75-34206 Filed 12-18-75;8:45 am]

[Docket No. 75N-0075]

NATIONAL SHELLFISH SAFETY PROGRAM

Procedures for Promulgating Final Regulations

In the FEDERAL REGISTER of June 19, 1975 (40 FR 25916), the Commissioner of Food and Drugs issued proposed rules to ensure the safety and wholesomeness of fresh and frozen molluscan shellfish (oysters, clams, and mussels) sold in interstate commerce. The comment period was to close October 17, 1975, but was extended to November 13, 1975 by a notice published in the FEDERAL REGISTER of November 7, 1975 (40 FR 52051). This notice is to inform the public that the Commissioner will issue a revised proposed regulation which will provide for a 90-day comment period, and he will hold public hearings prior to publication of the final regulation.

The Commissioner has made a preliminary review of the comments received in response to the June 19, 1975 proposal and has concluded that there is considerable confusion about the intent and interpretation of the proposed regulations. In the interest of developing regulations that are understandable, reasonable, and enforceable, the Commissioner has decided to issue a revised proposed regulation that will incorporate his tentative conclusions.

The preamble to the revised proposed regulation will summarize each type of comment submitted in response to the proposal and the Commissioner's tentative conclusions on each type of comment. A comprehensive articulation of the reasons for the Commissioner's decision on each issue will accompany his tentative conclusions.

No specific date has been set for publication of the revised proposed regulation because of uncertainties about the time required to deal with all the issues raised by the comments received. However, it is intended that publication will be sometime during the summer of 1976.

During the comment period after the forthcoming revised proposed regulation, public hearings will be held to permit interested persons to present data, information, and views on this matter. The time, date, place, and procedures for these public hearings will be announced in subsequent notices published in the FEDERAL REGISTER.

The final regulation will be based upon substantive information presented at the public hearings and the comments received in response to the revised proposed regulation.

Until such time as a final regulation becomes effective, the Food and Drug Administration's participation in the National Shellfish Sanitation Program will continue on the same basis as it has in the past.

Dated: December 17, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

ADVISORY COUNCIL ON WOMEN'S EDUCATIONAL PROGRAMS

Notice of Public Meetings of the Advisory Council on Women's Educational Programs

Notice is hereby given, pursuant to Public Law 92-463, that the next meeting of the Legislation Committee of the Advisory Council on Women's Educational Programs will be held from 1:00 p.m. to 6:00 p.m. on January 6, 1976, in Room 817 of the Riviere Building at 1832 M Street, N.W., Washington, D.C., and that the next meeting of the Council's Executive Committee will be held from 9:00 a.m. to 1:00 p.m. on January 7, 1976, at the same address.

The Advisory Council on Women's Educational Programs is established pursuant to Public Law 93-380 Section 408(f)(1). The Council is mandated to (a) advise the Commissioner with respect to general policy matters relating to the administration of the Women's Educational Equity Act of 1974; (b) advise and make recommendations to the Assistant Secretary concerning the improvement of educational equity for women; (c) make recommendations to the Commissioner with respect to the allocation of any funds pursuant to Section 408 of Public Law 93-380, including criteria developed to insure an appropriate distribution of approved programs and projects throughout the Nation; and (d) develop criteria for the establishment of program priorities.

The meetings of both committees shall be open to the public. The agenda for the Legislation Committee will include discussions of the Women's Educational Equity Act of 1974 and of other pending education legislation.

The agenda for the Executive Committee meeting will include a discussion of plans and policies.

Records will be kept of all Council proceedings and will be available at the Council offices at Suite 821, 1832 M Street, N.W., Washington, D.C.

Signed at Washington, D.C. on December 16, 1975.

JOY R. SIMONSON,
Executive Director.

Office of the Assistant Secretary for Health

NATIONAL PROFESSIONAL STANDARDS REVIEW COUNCIL

Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), announcement is made of the following Council meeting:

Name: National Professional Standards Review Council. Date and Time: January 12, 1976 (10:00 a.m. to 5:00 p.m.), January 13, 1976 (9:00 a.m. to 1:00 p.m.). Place: Auditorium (first floor), DREW North Building, 330 Independence Avenue SW., Washington, D.C.

Purpose of Meeting: The Council was established to advise the Secretary of Health, Education, and Welfare on the administration of Professional Standards Review (Title XI, Part B, Social Security Act). Professional Standards Review is the procedure to assure that the services for which payment may be made under the Social Security Act are medically necessary and conform to appropriate professional standards for the provision of quality health care. The Council's agenda will include discussion of a variety of issues relevant to the implementation of the PSRO program.

Meeting of the Council is open to the public. Public attendance is limited to space available.

Any member of the public may file a written statement with the Council before, during, or after the meeting. To the extent that time permits, the Council Chairman may allow public presentation of oral statements at the meeting.

All communications regarding this Council should be addressed to William D. Coughlan, Staff Director, National Professional Standards Review Council, Office of Quality Standards, Room 16A-09, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852.

Dated: December 11, 1975.

WILLIAM B. MUNIER,
Executive Secretary, National Professional Standards Review Council.

Office of Education

TEACHER CORPS PROJECTS

Notice of Closing Date for Receipt of Applications

Notice is hereby given that pursuant to the authority contained in Part B-1 of The Education Professions Development Act (Title V of the Higher Education Act of 1965, as amended, 20 U.S.C. 1101-1107a), applications are being accepted for Teacher Corps projects for Fiscal Year 1976. Applications must be received by the Application Control Center on or before January 21, 1976.

A. *Applications sent by mail.* An application sent by mail should be addressed as follows: U.S. Office of Education, Grant and Procurement Management Division, Application Control Center, 400 Maryland Avenue SW., Washington, D.C. 20202, Attention: 13.489. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than January 16, 1976, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. In establishing the date of recipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

B. *Hand delivered applications.* An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m., Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Applications will not be accepted after 4:00 p.m. on the closing date.

C. *Program information and forms.* Information and application forms may be obtained from the Teacher Corps, 400 Maryland Avenue SW., Washington, D.C. 20202.

D. *Applicable regulations.* The regulations applicable to this program include the Office of Education General Provisions Regulations (45 CFR Part 100a). Funding criteria applicable to this program were published in the FEDERAL REGISTER.

(Catalog of Federal Domestic Assistance Number 13.489; Teacher Corps—Operations and Training)

(20 U.S.C. 1101-1107a)

Dated: December 17, 1975.

T. H. BELL,
U.S. Commissioner of Education.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Disaster Assistance Administration

OKLAHOMA

[FDAA-491-DR]
[NFD-314]

Notice of Major Disaster and Related Determinations

Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that on December 10, 1975, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Oklahoma resulting from severe storms and tornadoes occurring on December 5, 1975, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93-288. I therefore declare that such a major disaster exists in the State of Oklahoma.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285, I hereby appoint Mr. Joe D. Winkle, HUD Region VI, to act as the Federal Coordinating Officer for this declared major disaster.

I do hereby determine the following areas of the State of Oklahoma to have been adversely affected by this declared major disaster:

The Counties of:

Latimer Tulsa

Dated: December 10, 1975.

THOMAS P. DUNNE,
Administrator, Federal Disaster Assistance Administration.

(Catalog of Federal Domestic Assistance No. 14.701, Disaster Assistance.)

Office of the Secretary

[Docket No. D-75-395]

ACTING SECRETARY OF HOUSING AND URBAN DEVELOPMENT

Order of Succession

During any period when, by reason of absence, disability, or vacancy in office, neither the Secretary of Housing and Urban Development nor the Under Secretary is available to exercise the powers or perform the duties of the Office of the Secretary, the appointees to the positions listed below are authorized to act as Secretary, with all the powers, functions, and duties assigned to or vested in him: *Provided*, That none of the named officials shall act as Secretary unless all of the appointees listed before such official's title in this designation are unable to act by reason of absence, disability, or vacancy in the office:

1. General Counsel.
2. Assistant Secretary for Policy Development and Research.
3. Assistant Secretary for Community Planning and Development.
4. Assistant Secretary for Housing Production and Mortgage Credit—FHA Commissioner.
5. Assistant Secretary for Housing Management.
6. Assistant Secretary for Fair Housing and Equal Opportunity.
7. Assistant Secretary for Administration.
8. Assistant Secretary for Legislative Affairs.

This designation supersedes the designation effective December 23, 1969 (34 FR 20360, December 30, 1969) and the designation effective October 9, 1973 (38 FR 27853, October 9, 1973).

(Sec. 7(d) of the Department of HUD Act, 42 U.S.C. 3535(d); Executive Order 11274, 31 FR 5243; Executive Order 11490, 34 FR 17567)

Effective date. This order is effective December 19, 1975.

CARLA A. HILLS,
Secretary of Housing and Urban Development.

[FR Doc.75-34275 Filed 12-18-75;8:45 am]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

SOUTHERN REGION AIR TRAFFIC CONTROL ADVISORY COMMITTEE

Notice of Meeting

Notice is hereby given that the Southern Region Air Traffic Control Advisory Committee will hold a meeting at 9 a.m. est, January 29, 1976, at the Aviation Hall, Air Host Inn, Atlanta Airport, Atlanta, Georgia. The following agenda items are scheduled for this meeting:

1. Terminal Control Areas
2. Military Operations Areas and Low Level Operations
3. Significant ATC Procedural Changes
4. Atlanta ARTCC Delay Reduction Program
5. Warning and Restricted Area Utilization
6. Expanded Radar Service Program
7. ATC Automation
8. Atlantic Offshore Routes
9. 25 kHz Frequency Assignment Plan

The meeting will be open to the public. Interested persons are invited to attend the meeting and participate by making oral or written statements concerning the respective topics, their substance, and issues. Written statements should be submitted in duplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320 and will be made a part of the record of the proceedings. Persons wishing to make oral statements at the meeting must notify Mr. Lonnie D. Parrish, Chairman, Southern Region Air Traffic Control Advisory Committee, by January 14, 1976, that they desire to be heard and indicate the amount of time requested for their initial statements. Presentations will be scheduled on a first come, first served basis as time permits. Requests for further information should be made to the Chairman, Southern Region Air Traffic Control Advisory Committee.

Issued in East Point, Ga., on December 4, 1975.

LONNIE D. PARRISH,
Chairman, Southern Region Air Traffic Control Advisory Committee.

National Highway Traffic Safety Administration

[Docket No. EX75-27; Notice 1]

BRITISH LEYLAND U.K. LTD.

Petition for Temporary Exemption From Federal Motor Vehicle Safety Standards

The Truck and Bus Division of British Leyland U.K. Limited, Leyland, Preston PR5 15N, England, has petitioned for an exemption until April 1, 1976, from four Federal motor vehicle safety standards for eight double-decker buses. The basis for the petition is that British Leyland is otherwise unable to sell a motor vehicle whose overall level of safety is equivalent to or exceeds the overall level of safety of non-exempted motor vehicles (49 CFR 555.6(d)).

Petitioner intends to supply eight prototype model double-decker buses to the Metropolitan Transit Authority of New York City for use in a demonstration project funded by the State of New York and the U.S. Department of Transportations' Urban Mass Transit Administration. The purpose of the project is to evaluate public acceptance of the double-decker concept as well as the benefits of rider safety, economics, and service that

V40245 DEC 19 75 XUM

buses of this type provide. They will be placed in regularly scheduled service on short-haul, high-density MTA inner-city bus routes. If the project is successful, it is contemplated that additional orders will be placed, but for vehicles that are engineered for total compliance with the Federal standards. If the project is unsuccessful, MTA will not withdraw the buses from service, but will continue to operate them through the remainder of their service life. The buses are adaptations of the company's "Atlantean" AN-68 model which is represented as having "a proven record of safe operation based on millions of passenger miles of service."

In accordance with the regulations, British Leyland has provided (i) a detailed analysis of how the vehicle provides in its opinion, an overall level of safety equivalent to or exceeding the overall safety of non-exempted vehicles, including a description of how its bus fails to meet the four standards from which it requests exemption, (ii) comparative test results showing the extent of failure to meet the standards and (iii) descriptions of safety features that the bus offers that are not required by the Federal standards. Each standard will be discussed separately below.

Standard No. 102, *Transmission Shift Sequence, Starter Interlock and Transmisison Braking Effect*. Paragraph § 3.1.2 requires a supplemental braking effect when the bus speed is below 25 mph. The bus meets the requirement in its home-market configuration. Its contract with MTA, however, specifies that the buses be equipped with a special five-speed automatic transmission to provide a smoother and more comfortable ride for the passengers. With this transmission, however, the supplemental braking effect is not available until the vehicle speed is 23 mph or lower. Petitioner submits that the usual operating speed of the vehicle will be 10 mph to 20 mph and that there will be no diminution of safety. Even in the 23 mph to 25 mph range, petitioner argues that the difference is so slight as to be negligible. Passenger protection should be enhanced with the automatic transmission which is smoother than the standard one and "will provide substantially greater protection to standing passengers against the hazard of losing balance and being jolted as the vehicle shifts gears."

Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment*. The bus is said to meet the Federal vehicle lighting standard in all respects except for photometrics of the combination rear stop, turn signal, back up and tail lamps, and the front side marker lamps. Although the vehicle meets ECE requirements, British Leyland estimates that in general the intensity levels set by Standard No. 108 are 20 percent higher. A precise comparative evaluation is difficult because the photometric test points of the ECE and US systems differ. The company argues that, given the condition under which the vehicles will operate, an equivalent level of safety is provided, saying the buses will be operated "over streets which are well lighted and where vehicle traffic is subject to a maximum degree of control, the small variation in candle power between these lamp units and those required by the standard would produce no measureable difference in operational safety."

Motor Vehicle Safety Standard No. 121, *Air Brake Systems*. There are several aspects of this standard that concern the petitioner.

A. S5.3.1 *Stopping Distances*. This paragraph requires in part that air braked vehicles stop from 20 mph within 54 feet, on wet pavement, when loaded to GVWR, or at unloaded vehicle weight plus 500 pounds. The British Leyland buses require 70 feet when laden, and 57 feet when unladen, otherwise there will be lock-up at the rear axle. Petitioner believes that its level of performance is equivalent to that of non-exempted buses.

B. S5.3.3 *Brake Actuation Time*. This paragraph requires that front and rear air brake systems be capable of actuation to emergency stopping pressure (60 psi) within 0.40 second from the first movement of the service brake control by the operator. The rear brake system on the British Leyland bus requires 0.46 second, and petitioner argues that the 0.06 second difference is marginal. The front brake system, however, requires only 0.18 second, exceeding the minimum of 0.40 second by a margin of 0.22 second, and petitioner thus argues that the overall system provides a level of safety equivalent to that provided by conforming vehicles.

C. S5.3.4 *Brake Release Time*. This paragraph measures brake release performance in terms of the time required for air pressure in the brake chambers to fall from 95 psi to 5 psi. This must occur in not more than 0.55 second. Petitioner's rear brake system exceeds this by 0.25 second. However, petitioner can comply when the range is 60 psi to 5 psi. It claims that the maximum air pressure level consistent with safe braking performance for its vehicle is the range between 30 and 45 psi, and "thus, in actual operation, petitioner's vehicles provide equivalent performance to those which meet the S5.3.4 specification in this respect."

D. S5.1.2.1 *Reservoirs*. The combined volume of British Leyland's service and emergency brake reservoirs does not conform to the capacity specification of this paragraph, but the combined capacity of the three reservoirs in its system allegedly exceeds the capacity level of the single reservoir system used in complying vehicles. Petitioner believes that the independent functioning by each reservoir system provides a higher level of safety than the single reservoir system found in most American buses.

Motor Vehicle Safety Standard No. 217, *Bus Window Retention and Release*. Petitioner requests an exemption from requirements pertaining to number and location of emergency exits. It argues that the standard is inappropriate as applied to the upper level of double-decker buses. The buses are fitted with three "emergency exits" on the upper level which are hinged "push-out" type window exits of sufficiently large dimensions (57¾" x 24¾") to permit rapid egress by passengers. On the lower level, emergency exits of an identical nature, number and size are found. The bus is also equipped with entry/exit doors at its middle and front sections which are sufficiently wide (3 feet 8 inches) to permit rapid egress by a double stream of passengers. Petitioner claims that it provides a total area of emergency egress of 8,702 square inches, almost double the emergency exit area required by this standard, and thus provides an equivalent overall level of safety.

With respect to safety features not required by Federal standards, British Leyland states that its channel section steel undercarriage is stronger than the "standard American transit bus [which] is built with an aluminum understructure." The British Leyland engine is separated from the passenger compartment by a full-width steel bulkhead while in the American bus the engine is integral to the main vehicle structure. The vehicle is thus able, according to British Leyland, to withstand greater stress and impact force than the counterpart American transit bus. Wider doors, one-step entry/exit platform, and a fire extinguisher are other safety features mentioned.

The company argues that an exemption would be in the public interest and consistent with the objective of the National Traffic and Motor Vehicle Safety Act because of superior carrying capacity and fuel economy that the buses provide.

This notice of receipt of a petition for a temporary exemption is published in accordance with the NHTSA regulations on this subject (49 CFR 555.7), and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Interested persons are invited to submit comments on the petition for exemption of British Leyland U.K. Ltd. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street, SW., Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials, and all comments received, are available for examination in the docket both before and after the closing date. Comments received after the closing date will also be filed and will be considered to the extent practicable. Notice of final action on the petition will be published in the FEDERAL REGISTER.

Comment closing date: January 19, 1976.

(Sec. 3, Pub. L. 92-548, 86 Stat. 1159 (15 U.S.C. 1410); delegations of authority at 49 CFR 1.51 and 49 CFR 501.8)

Issued on December 15, 1975.

ROBERT L. CARTER,
Associate Administrator,
Motor Vehicle Programs.

CIVIL AERONAUTICS BOARD

[Order 75-12-69; Docket 28632]

SOCIETE ANONYME BELGE D'EXPLOITATION DE LA NAVIGATION AERIENNE

Order of Investigation and Suspension

Adoped by the Civil Aeronautics Board at its office in Washington, D.C. on the 5th day of December, 1975

By tariff revisions filed pursuant to an order from the Government of Belgium for effect December 19, 1975, Societe Anonyme Belge d'Exploitation de la Navigation Aerienne (Sabena) proposes reduced fares from the United States to Belgium during the period April 1 through December 31, 1976, for persons of Belgian heritage. The fares, proposed at a discount of 50 percent from the round-trip normal economy fare, are intended to promote travel to Belgium during the commemoration of the 25th anniversary of King Baudouin's coronation, and would be available only to persons born in Belgium but now residing permanently abroad, children or grandchildren of native-born Belgians, and their spouses. The proposal carriers a 14/45-day minimum/maximum-stay requirement, with the additional stipulation that the date of at least one of several listed commemorative events be included in the stay.[1]

Upon consideration of all relevant matters, the Board has concluded that the proposed fares may be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and should be investigated. The Board further concludes that the fares should be suspended pending investigation.

Extension of a special discount to a limited group of U.S. residents based upon their national origin presents a *prima facie* case of unjust discrimination which is inconsistent with U.S. law. Moreover, to the extent the Government of Belgium, and Sabena, wish to promote observance of King Baudouin's 25th coronation anniversary, the promotional fares adopted by the members of the International Air Transport Association (IATA), including both the U.S.-and Belgian-flag cariers, and approved by both Governments, would appear to provide an adequate facility for the promotion of such travel.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, and particularly sections 204(a), 403, 801 and 1002(j) thereof,

It is ordered, That:

1. An investigation be instituted to determine whether the provisions in Rule 296, on 10th Revised Page 82-F, to Passenger Fares Tariff No. PF-4, C.A.B. No. 44, issued by Air Tariffs Corporation, Agent, and practices affecting such provisions, are or will be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and, if found to be unlawful, to take appropriate action to prevent the use of such provisions or rules, regulations, or practices;

2. Pending hearing and decision by the Board, the tariff provisions specified in paragraph 1 above are suspended and their use deferred from December 19, 1975 to and including December 19, 1976, unless otherwise ordered by the Board, and that no changes be made therein during the period of suspension except by order or special permission of the Board;

3. The suspension ordered in paragraph 2, above shall not stay the cancellation of 8th and 9th Revised Pages 82-F to Passenger Fares Tariff No. PF-4, C.A.B. No. 44;

4. This order shall be submitted to the President[2] and shall become effective on December 19, 1975;

5. The investigation ordered herein be assigned for hearing before an Administrative Law Judge of the Board at a time and place hereafter to be designated;

6. Copies of this order be filed in the aforesaid tariff and be served upon Societe Anonyme Belge d'Exploitation de la Navigation Aerienne; and

7. Except to the extent granted herein, the complaint of Pan American World Airways, Inc., in Docket 28562, be and hereby is dismissed.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.75-34251 Filed 12-18-75;8:45 am]

[1] Pan American World Airways, Inc., has submitted a late-filed complaint against the proposed fares, requesting suspension and investigation on the grounds of unjust discrimination.

[2] This order was submitted to the President on December 5, 1975.

CIVIL SERVICE COMMISSION

FARM CREDIT ADMINISTRATION

Revocation of Authority To Make Noncareer Executive Assignment

Under authority of § 9.20 of Civil Service Rule IX (5 CFR 9.20), the Civil Service Commission revokes the authority of the Farm Credit Administration to fill by noncareer executive assignment in the excepted service the position of Deputy Director of Credit Service, Credit Service.

FEDERAL EMPLOYEES PAY COUNCIL

Notice of Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that the Federal Employees Pay Council will meet at 2:00 p.m. on Wednesday, January 7, 1976. This meeting will be held in room 5A06A of the U.S. Civil Service Commission building, 1900 E Street, NW., and will consist of continued discussions on future comparability adjustments for the statutory pay systems of the Federal Government, which are defined in section 5301 of title 5, United States Code.

The Chairman of the U.S. Civil Service Commission is responsible for the making of determinations under section 10(d) of the Federal Advisory Committee Act as to whether or not meetings of the Federal Employees Pay Council shall be open to the public. He has determined that this meeting will consist of exchanges of opinions and information which, if written, would fall within exemptions (2) or (5) of 5 U.S.C. 552(b). Therefore, this meeting will not be open to the public.

For the President's Agent:

RICHARD H. HALL,
Advisory Committee Management Officer for the President's Agent.

COUNCIL ON ENVIRONMENTAL QUALITY

ENVIRONMENTAL IMPACT STATEMENTS

Notice of Availability

Environmental impact statements received by the Council on Environmental Quality from December 8 through December 12, 1975. The date of receipt for each statement is noted in the statement summary. Under Council Guidelines the minimum period for public review and comment on draft environmental impact statements in forty-five (45) days from this FEDERAL REGISTER notice of availability (February 2, 1976). The thirty (30) day period for each final statement begins on the day the statement is made available to the Council and to commenting parties.

Copies of individual statements are available for review from the originating agency. Back copies will also be available at cost from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

DEPARTMENT OF AGRICULTURE

Contact: Dr. Fowden G. Maxwell, Coordinator of Environmental Quality Activities, Office of the Secretary, U.S. Department of Agriculture, Room 359-A, Washington, D.C. 20250, 202-447-3965.

SOIL CONSERVATION SERVICE

Draft

Mud Creek Watershed, Cullman County, Ala., December 8: The proposed plan is for watershed protection and flood prevention in Cullman County, Alabama. The project entails the application of land treatment measures on 2,350 acres of cropland, 3,720 acres of pastureland, and 4.7 miles of channel work. Adverse impacts include increased sedimentation and stream turbidity, and the loss of 69 acres of flood plain forest. Temporary increases in air and noise pollution would also result. (ELR Order No. 51772.)

Cadron Creek Watersheds, several counties Ark., December 8: The proposed project consists of watershed protection, flood prevention, and recreation for North Fork Cadron Creek, East Fork Cadron Creek, and Lower Cadron Creek Watersheds. Adverse impacts include the inundation of 1,163 acres by sediment pools and 3,922 acres by detention pools, and the relocation of 15 people. Project activities will decrease woodland habitat by 989 acres. (ELR Order No. 51769.)

Middle Walnut Watershed Project, several counties Kans., December 12: Proposed is a project for watershed protection, flood prevention, and public recreation in Butler, Cowley, Sedgwick, and Sumner Counties, Kansas. Adverse impacts of the project include the elimination of agricultural use and terrestrial wildlife habitat use of 518 acres, the interruption of agricultural and terrestrial wildlife habitat, use of 1,225 acres by periodic flooding, the elimination of 167 acres of agricultural land for dams and spillways, and the relocation of 15 persons. (ELR Order No. 51811.)

Choctaw Bayou Watershed, West Baton Rouge County, La., Point Coupee, La., Iberville, La., December 8: The proposed plan consists of land treatment and structural measures on 110,000 acres of land to provide flood protection and improve drainage in the Choctaw Bayou over a 50-year period. Adverse impacts include increase in soil erosion and a temporary lowering of water quality. A potential loss of 1,200 acres of forest land and habitat could occur as a result of the project. (ELR Order No. 51773.)

Crabtree Creek Watershed, Durham County, N.C., Wake County, N.C., December 8: The proposed action involves the completion of a watershed project in Wake and Durham Counties, North Carolina for flood prevention. Adverse effects include the loss of 817 acres of wildlife habitat and the permanent inundation of 16 miles of perennial and intermittent channels. The clearing and permanent inundation of 1.3 acres in Schenck Memorial Forest Natural Area will also result, as well as the destruction of Cool Mill Site. (ELR Order No. 51776.)

Bush River Watershed Project, Prince Edward County, Va., December 8: Proposed is a project for watershed protection, flood prevention, water supply, and fish and wildlife development in Prince Edward County, Virginia. The project will consist of land treatment on 19,810 acres of the watershed and eight dams. Project implementation will result in inundation of 26 miles of streams and the inundation or restricted use of 3,076 acres of land presently in forest land, cropland, and pastureland. Terrestrial wildlife habitat will also be reduced. (ELR Order No. 51771.)

DEPARTMENT OF DEFENSE

ARMY CORPS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Development, Attn: DAEN-CWR-P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue, SW., Washington, D.C. 20314, 202-693-6795.

Draft

John Martin Dam and Reservoir, Arkansas River, Bent County, Colo., December 9: This statement concerns the identification of those impacts resulting from the continuing operation and maintenance program at John Martin Dam and Reservoir and the anticipated effects resulting from implementation of the updated John Martin Master Plan (November 1974). Adverse effects have been the development of sterile sediment beds, erosion of the shcreline and barren sediment beds, and some inundation of vegetation. (Albuquerque District) (ELR Order No. 51784.)

Panama City Harbor and Grand Lagoon, Maintenance, Bay County, Fla., December 9: Proposed is the continued maintenance to the authorized depths of the Federal navigation channels into Panama City Harbor and Grand Lagoon, Florida. Maintenance dredging will result in a temporary increase of turbidity, and the loss of non-motile organisms inhabiting the channel and disposal areas. There will also be an increase in potential sources of pollution associated with the growth of channel traffic and industrial development. (Mobile District) (ELR Order No. 51785.)

Great Lakes-St. Lawrence Seaway, Winter Program, Michigan, December 9: (ELR Order No. 51790.)

Abiquiu Dam and Reservoir, O&M, Rio Arriba County, N. Mex., December 10: Proposed is the continued operation and maintenance of Abiquiu Dam and Reservoir for flood damage reduction and sediment retention. The project also includes the development of recreation facilities and zoning of project lands. Approximately 1,500 acres of interspersed grassland and juniper woodland would be converted to a standing aquatic system, and archeological sites may be inundated. (Albuquerque District) (ELR Order No. 51800.)

Final

Foster City Development, San Mateo County, Calif., December 12: The Estero Municipal Improvement District, Foster City has applied for a Dept. of the Army Permit to place approximately 2,470,000 cu. yds. of fill on 5 areas totalling 382 acres in Foster City, San Mateo County. The 5 areas are proposed to be used for residential, city center, and light industrial development. The alteration of land use would eliminate wildlife habitat, and increase the chance of air quality degradation. (San Francisco District) Comments made by: USDA, HEW, HUD, DOI, DOT, EPA, AHP, and State and local agencies. (ELR Order No. 51813.)

Napa River Flood Control Project, Napa County, Calif., December 12: The proposed flood control project entails channel widening and realignment, dredging, riprap on portions of the riverbanks, and construction of concrete step-walls through the central urban area of the city of Napa, California. Acquisition of 577 acres of former tidelands will be used to mitigate permanent loss of fish and wildlife due to degradation, permanent removal of 10 buildings (3 residential and 7 commercial), temporary loss of foliage due to the removal of plant materials, and temporary construction disruption (including noise, traffic congestion and loss of recreational opportunity). (San Francisco District) Comments made by: DOT, USCG, USDA, DOC, HEW, HUD, DOI, EPA, AHP. (ELR Order No. 51815.)

Allatoona Dam and Lake, Bartow, Cherokee, and Cobb Counties, Ga., December 10: The project involves the continuation and maintenance of an existing multipurpose dam and reservoir located on the Etowah River in Barton, Cherokee and Cobb Counties. The project provides flood control, hydroelectrical power generation, recreational opportunities and regulation of stream flow for navigation. Adverse impacts include those of large releases of water for short periods of time as a result of peak power production, and of discharges in late summer containing low dissolved oxygen levels and causing concern downstream. (Mobile District) Comments made by: EPA, DOI, DOC, DOT, USDA, HUD, and State agencies. (ELR Order No. 51797.)

Dworshak Dam and Reservoir, Clearwater County, Idaho, December 10: The proposed action is the completion, operation, and management of Dworshak Dam and Reservoir, a multiple-purpose water resource project located in Clearwater County. The project has been under construction since 1963 and is 84% complete. Project purposes are flood control and power production with additional benefits to recreation. Adverse impacts are the loss of 54 miles of river, and negative effects on aesthetics and recreation with reservoir drawdown. (Walla Walla District) Comments made by: DOI, USCG, EPA, FPC, USDA, PRBC, and State and local agencies, and one individual. (ELR Order No. 51798.)

Marquette and Presque Isle Harbors, Maintenance, Michigan, December 10: The statement concerns continued maintenance dredging of Marquette Harbor and Presque Isle Harbor in Marquette, Michigan in order to afford continued use of the harbor. Adverse impacts include: air and water contamination, disruption of the benthic habitat, increased turbidity, and in the case of an on-land disposal facility for Presque Harbor, altered land use. (St. Paul District) Comments made by: EPA, USDA, HEW, DOC, DOI, DOT, and State and local agencies, and individuals. (ELR Order No. 51795.)

Berry's Creek Embankment and Facilities, Permit, Bergen County, N.J., December 12: The statement concerns the issuance of a permit to the New Jersey Sports and Exposition Complex to construct an embankment and other facilities in the Hackensack Meadowlands, adjacent to Berry's Creek. Approximately 35 acres of mercury contaminated marsh will be permanently lost due to activities within Berry's Creek Tidal Marsh. Development of the sports complex will result in increased economic development of the area along with increased noise and air pollution from the traffic volume and parking facility. The elimination of some marsh area would necessitate a change in the habitat of native terrestrial wildlife and birds. (New York District) Comments made by: HUD, AHP, HEW, FPC, DOC, EPA, DOI, DOT, and State and local agencies. (ELR Order No. 51808.)

Huron Harbor, Operations and Maintenance, Erie County, Ohio, December 10: The project entails maintenance of the 3523-foot west pier, the 1450-foot east breakwater, the 200-foot steel sheet pile shore protection and the existing 25-foot project depth in the lake approach and entrance channel. Polluted sediments dredged from the harbor will be deposited in an open lake dumping site in 1975 and in a diked disposal facility (now under construction) in 1976. Adverse impacts include annual disruption of the aquatic ecosystem, adverse effects upon water quality, recreation, aesthetics, and boat traffic during dredging. (Buffalo District) Comments made by: EPA, DOI, USDA, DOT. (ELR Order No. 51796.)

Wishart Point, Maintenance Dredging, Accomack County, Va., December 10: The statement concerns the maintenance dredging of a channel 60 feet wide and 6 feet deep from the Delaware Bay-Chesapeake Bay Waterway at Four Mouths through Balcast Narrows and across Powell's Bay and Bogues Bay to Wishart Point, a distance of about 2 miles. Adverse impacts include removal of organisms at the site of dredging and disturbance of disposal site. (Norfolk District) Comments made by: EPA, DOI, DOC, USCG, AHP, and State agencies. (ELR Order No. 51794.)

Tacoma Harbor Project, Washington, Pierce County, Wash., December 10: Proposed is the maintenance dredging of Tacoma Harbor. Three sections of the Blair Waterway will be dredged to a depth of 40 feet; dredged spoil will be placed behind dikes on an 82 acres disposal site. Adverse impacts will include the effects upon the benthic community. (Seattle District) Comments made by: OEO, EPA, NMFS, DOC, DOI, USCG, HUD, and State and local agencies. (ELR Order No. 51793.)

ENVIRONMENTAL PROTECTION AGENCY

Contact: Mr. Sheldon Meyers, Director, Office of Federal Activities, Room 3630 Waterside Mall, Washington, D.C. 20460, 202-755-0940.

Draft

Water Quality Program (Phase I), San Francisco Bay, Calif., December 12: Proposed is a Water Quality Management Plan designed to eliminate six shallow shoreline discharges of treated, chlorinated sewage from the eastern shore of Lower and South San Francisco Bay. The existing Irvington and Newark sewage treatment plants will be abandoned and replaced by untreated sewage pump stations. New discharge locations will increase the transport and dispersion of pollutants from the Lower Bay to the Central Bay and Pacific Ocean. Adverse effects include damage to bottom organisms, and traffic disruption and other construction associated impacts. (ELR Order No. 51807.)

FEDERAL MARITIME COMMISSION

Draft

Cargo Transport, U.S. Gulf/Atlantic to Far East, December 8: The statement concerns FMC's investigation of the transport of containerized cargoes between various U.S. Atlantic/Gulf and Far East ports. The proceeding, Docket No. 73-38: Council of North American Shipping Association, et. al. v. American Mail Lines Ltd. et. al. was instituted to determine if transport of these cargoes by rail to and from Far East ports under joint rail-water through rates is contrary to sections of the Shipping Act, 1916 and violative of Section 8 of the Merchant Marine Act of 1920. By the Rail-water mode less energy is consumed but pollutant emissions would increase by approximately 2,891 short tons over the U.S. (ELR Order No. 51774.)

FEDERAL POWER COMMISSION

Contact: Dr. Richard F. Hill, Acting Advisor on Environmental Quality, 441 G Street NW., Washington, D.C. 20426, 202-386-6084.

Final

Helms Project, Calif., December 10: This action entails consideration of an application for license and amendment of license by Pacific Gas and Electric Company to construct a pumped storage project to be located in California. Adverse impacts of the project would include removal of 300 acres of Sierra N.F. from commercial timber production, loss of aquatic habitat and biota, increased public use of certain areas, aesthetic impacts on this rather pristine area, and disturbance of wildlife during construction. Comments made by: AHP, USDA, COE, DOC, DOI, DOT, EPA, NRC, and State agencies, private groups, and individuals. (ELR Order No. 51804.)

DEPARTMENT OF HEW

Contact: Mr. Charles Custard, Acting Director, Office of Environmental Affairs, Office of the Assistant Secretary for Administration and Management, Room 3718 HEW-North, Washington, D.C. 20202, 202-963-4456.

Final

U.S. Navy Aqueduct, Florida Keys, Dade, and Monroe Counties, Fla., December 12: The statement concerns a proposal for the U.S. Navy to turn their water supply system over to the Florida Keys Aqueduct Authority (FKAA) so that FKAA may expend the capacity of the present system to meet the needs of the rest of the Keys. The property consists of 289.11 acres in Dade County where wells are located and related equipment used to obtain and transport the water to the Florida Keys. Providing additional fresh water to the Keys will permit a human population increase in Monroe County that will bring about land development and associated air and water pollution. Comments made by: USDA, GSA, DOI, DOT, EPA, DOC, and State and local agencies. (ELR Order No. 51814.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Room 7258, 451 7th Street, S.W., Washington, D.C. 20410, 202-755-6308.

Final

Inner Harbor West Urban Renewal, Baltimore, Baltimore County, Md., December 9: Proposed is a project for urban renewal encompassing 68 acres of land bordering on the southern end of the Central Business District of Baltimore. Roughly 1,300 housing units are planned of which approximately 80 to 100 units are slated for rehabilitation under the City's homesteading project. There are potential noise problems associated with automobile and truck traffic should I-395 be constructed. There will also be a potential negative impact on the housing market. Comments made by: DOI, HEW, DOC, EPA, and State agencies. (ELR Order No. 51786.)

Cromwell Road Low-Rent Housing, Chattanooga, Hamilton County, Tenn., December 11: The Chattanooga Housing Authority is requesting an Annual Contribution Contract (ACC) for 200 units of low-rent public housing to meet the need for replacement housing as a result of displacement by an Urban Renewal Project. The units are to be built on a 90 acre tract on Cromwell Road in Chattanooga, Tennessee. Adverse impacts include those associated with the nearby airport and railroad, the absence of water and sewer facilities, lack of adequate recreation facilities in the immediate area, and the lack of public transportation to serve the project. Comments made by: EPA, TVA, HEW, USDA, DOI, and State agencies. (ELR Order No. 51806.)

Section 104(h). The following are Community Development Block Grant statements prepared and circulated directly by applicants pursuant to section 104(h) of the 1974 Housing and Community Development Act. Copies may be obtained from the office of the appropriate local chief executive. (Copies are not available from HUD.)

Draft

Water & Sewer Project, Brawley Co. Water District, Imperial County, Calif., December 8: The proposed project consists of installation of water and sewer facilities to service the area encompassed by the Brawley Water County District, California. The district en-

V40245 DEC 19 75 D XUM

tails approximately 316 acres and would particularly affect the Central Imperial County area. Adverse effects include minor disruptions during construction, possible increased population, and air quality deterioration. (ELR Order No. 51778.)

Low-Income Multi-Service Center, Livermore, Alameda County, Calif., December 9: The proposed project is construction of an office building and development of relative off-street parking area in Livermore, California, to serve the Low-Income Multi-Service Center. Adverse effects will consist of increased levels of noise and air pollution. (ELR Order No. 51791.)

Edenvale 11th Addition, Eden Prairie, Hennepin County, Minn., December 8: Proposed is the provision by HUD of mortgage insurance for single family homes and multifamily housing projects, Edenvale Planned Unit Development, Eden Prairie. Adverse effects of development are removal of farm land from production and increased demand for facilities and services. Increase in noise pollution and auto traffic are also expected, as well as disturbance of the ecological system by construction. (ELR Order No. 51781.)

Charles H. Wilson Regional Park, Torrance, Calif., Los Angeles County, Calif., December 10: The statement concerns a Community Development Block Grant to the City of Torrance for the development of Charles H. Wilson Community Park. The 44 acre site is part of a Heavy Manufacturing zoned 46.6 acre parcel. Adverse impacts expected from the project include increased traffic, noise and congestion in the area. (ELR Order No. 51805.)

Final

Water Line Extension, Marshall County, Tenn., December 8: The project is the construction of a 9.3 mile long water line extension in Marshall County, Tennessee. The service area encompasses approximately 3,945 acres and 250 people. Construction of the line will require the disruption of Springplace Road (F.A.S. 4329) in four places and the crossing of existing fence rows and private driveways. Comments made by: EPA, USDA, and State and local agencies. (ELR Order No. 51779.)

NW Texarkana Sewer Mains, Tex., December 12: The project seeks to provide sewer utilities to the residents in the area north of I-30, east of Summerhill Road, and west of Richmond Road excluding the Richmond Pines subdivision. The sewer mains will collect into one main running roughly north-south parallel to Cowhorn Creek ending at I-30 until completion of the Cowhorn Creek Outfall. Adverse impacts of the project include the disturbance of area ecology, the silting in Cowhorn Creek, site scaring, traffic disruption, construction noise, and air quality degradation, all of which are expected to be temporary. Comments made by: COE, EPA, and State agencies. (ELR Order No. 51812.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director Environmental Project Review, Room 7260, Department of the Interior, Washington, D.C. 20240, 202-343-3891.

BUREAU OF LAND MANAGEMENT

Draft

OCS Sale No. 40, Mid-Atlantic States, New Jersey and Delaware, December 10: The statement concerns the leasing of 154 tracts (876,750 acres) of Outer Continental Shelf lands. The tracts are located offshore New Jersey and Delaware 54 to 108.5 miles from shore. All tracts offered pose some degree of pollution risk to the environment due to accidental or chronic oil spillage. Socioeconomic effects from onshore development may cause ocal problems. (ELR Order No. 501792.)

Final

OCS Lease Sale, Gulf of Mexico, December 12: The statement concerns the lease sale of 135 tracts offshore Texas, Louisiana, Mississippi, Alabama, and Florida which would add 698,077 acres under federal lease in the Gulf. Development of the tracts would require an estimated 150 to 400 wells from 20 to 50 platforms and require 50 to 100 miles of pipeline. The possibility of an oil spill will be increased. Comments made by: EPA, DOC, DOD, ERDA, DOI, and State agencies. (ELR Order No. 51809.)

BUREAU OF RECLAMATION

Draft

Narrows Unit, Pick-Sloan Missouri Basin Program, Morgan County, Colo., December 9: This project entails construction of Narrows Dam and Reservoir to store and regulate flows in the South Platte River, and to provide irrigation, flood control, recreation, fish and wildlife enhancement, and municipal and industrial needs. Adverse impacts include the inundation of 15.5 miles of natural stream and 15,000 acres of agriculture and wildlife lands, and the loss of vegetation in the reservoir. Approximately 220 families will be displaced. (ELR Order No. 51788.)

Final

Completion of Lyman Project, Wyo., December 9: The proposed action is the construction of an earthfill dam on Smiths Fork to complete southwestern Wyoming's Lyman Project. The adverse effects of this project would include the direct loss of 300 acres of diverse wildlife habitat for numerous species, the inundation of about 172 acres of timber, the elimination of 1.8 miles of fishery habitat, an increase in evaporation loss of 25 acre-feet annually, short-term increases in sedimentation, esthetic degradation in the area, and possible minor earth slipouts in the dam embankment. Comments made by: AHP, USDA, USA, EPA, HEW, HUD, DOI, and State and local agencies and private groups. (ELR Order No. 51787.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, 400 7th Street, S.W., Washington, D.C. 20590, 202-426-4357.

Draft

Motor Carrier Reform Act, December 8: The proposed Motor Carrier Reform Act is intended to bring about a more efficient use of resources by motor carriers regulated by the Interstate Commerce Commission. The statement indicates that enactment would result in the conservation of fuel and decreased traffic congestion. (ELR Order No. 51768.)

FEDERAL HIGHWAY ADMINISTRATION

Draft

I-70 Widening, Kansas City, Wyandotte County Kans., December 10: Proposed is the widening of Interstate 70 from 94th Street to 10th Street in Kansas City. The improvement would consist of the addition of one lane in each direction between I-435 and I-635 and two lanes in each direction between I-635 and I-670. An additional 60 acres of land will be required for right-of-way, and from 2 to 52 families will be displaced. Construction disruption will result. (ELR Order No. 51803.)

US-36 Improvement, Kansas-Mo. State Line West, Brown, and Doniphan Counties, Kans. December 12: Proposed is the improvement of US-36, extending from the Kansas-Missouri State Line at St. Joseph, Missouri, to a point one mile east of the Brown-Doniphan County Line and one mile south of the existing US-36. Adverse effects include the removal of 1,600 acres of cropland from production, the acquisition of private residences with resultant displacement of people, and increases in noise and air pollution. (ELR Order No. 51810.)

West Cornhusker Highway, Lincoln, Lancaster County, Nebr., December 8: The proposed roadway improvement involves the upgrading and reconstruction of a 1.3 mile segment of West Cornhusker Highway and North West First Street in Lincoln, Nebraska. Construction will require an additional 12 acres of right-of-way and will require the relocation of twelve families and two businesses. A 4(f) statement is included concerning Oak Lake Park. (ELR Order No. 51770.)

SH 63, Ashland, Saunders County, Nebr., December 10: The statement concerns the reconstruction of State Highway 63 to provide a more direct, flood free, all-weather route to Ashland, Nebraska. The segment will be from 0.86 to 3.6 miles long and require six to 52 acres of right-of-way, depending upon the alternative chosen. Adverse impacts include dislocation of families and businesses, water pollution during construction, and vegetation loss. (ELR Order No. 51802.)

U.S. 220, I-85 to I-40 (Supplement), Guilford County, N.C., December 8: Proposed is a freeway connection between I-85 and I-40 in Greensboro, North Carolina. The 1.83 mile project will provide an at-grade intersection at the northern end until a future freeway extension is constructed. Adverse impacts include the disruption and relocation of 44 families, 3 businesses, and 1 church, the commitment of 87 acres of land, and the relocation of approximately 50 cemetery graves. (ELR Order No. 51780.)

Final

I-70, Dosstero-West (I 70-2(11)), Garfield and Eagle Counties, Colo., December 10: Proposed is the design and construction of a 20 mile section of Interstate 70 beginning about two miles east of Glenwood Springs and extending easterly to near Gypsum, Colorado. Adverse impacts of the project include encroachments into the Colorado River in certain areas of the canyon, displacement of small picnic areas, and physical changes in the canyon from rock cuts, excavation, and tunnels, or construction of long and high bridges. A 4(f) statement is included. Comments made by: HUD, COE, DOI, USDA, DOT, and State and local agencies. (ELR Order No. 51801.)

Final

S.R. 500, Melbourne, Florida, Brevard County, Fla., December 8: Proposed is the reconstruction of six miles of S.R. 500 from two to four lanes. Adverse impacts will include the taking of additional right-of-way, and the displacement of people; noise levels will increase. A 4(f) statement will be filed for the encroachment upon Melbourne Country Club and Babcock Park. Comments made by: USDA, DOI, HEW, EPA, and State and local agencies. (ELR Order No. 51775.)

I-474, Peoria and Tazewell, Peoria, and Tazewell Counties, Ill. December 12: The project involves the construction of I-474, a four lane highway facility in Peoria and Tazewell Counties. I-474 will be the complimentary interstate beltline route for I-74 in the greater Peoria area. Adverse impacts are the displacement of families, increased air and noise pollution, and the use of land for right-of-way purposes. Comments made by: HUD, DOI, USDA, EPA, DPT, and State and local agencies. (ELR Order No. 51816.)

Skipanon Bridge, S.H. 105, Warrenton, Clatsop County, Oreg., December 8: The proposed project will remodel or replace the Skipanan River Bridge at Warrenton. The existing bridge, containing a floatout span, has been found to be in violation of the original 1916 Federal permit which required fast-opening bascule bridge, opening on demand. Three alternatives and involve minor disturbance to the river streambed during involve repeated disturbance to the river streambed during construction. Long term alteration of upstream river use boating and development activities may occur. (85 pages) Comments made by: COE, DOC, DOI, EPA, and State and local agencies, and private groups. (ELR Order No. 51782.)

Washington Forest Highway 7, Snohomish Co., Snohomish County, Wash., December 8: The statement refers to the proposed construction of Washington Forest Highway 7, Mountain Loop Highway, beginning at Barlon Pass in Snohomish County, and extending northerly 23 miles connecting to SR 530 in Darrington. The purpose of the road is to provide good access between Granit Falls and Darrington, completing an 85 mile scenic loop highway. Adverse impacts include the permanent loss of 75 acres of vegetation and wildlife habitat, the temporary loss of 160 acres, and some increase in stream turbidity. Thirteen families will be displaced and a total of 52 lots will be taken. (Region 10) Comments made by: EPA, DOI, USDA, DOC, COE, and State agencies, organizations, and individuals. (ELR Order No. 51783.)

I-64 Appalachian Corridor "L", Raleigh County, W. Va. December 8: The statement discusses the anticipated social, economic, and environmnetal effects of seven proposed alternates schemes for I-64, Beckley to Bragg, and WVA Turnpike, Appalachian Corridor "L" from Beckley to Bradley. Adverse effects of the projects will be right-of-way acquisition, increased levels of air, noise and water pollution, and disturbance to wildlife. The exact number of miles, acres and displacements will not be known until one option is chosen. Comments made by: HEW, FPC, COE, AHP, USDA, DOC, EPA, DOI, and State and local agencies. (ELR Order No. 51777.)

FEDERAL AVIATION ADMINISTRATION

The Council has been requested by the Department of Transportation to clarify DOT's intention, concerning the release and circulation, on November 13, 1975 of the EIS for the Concorde.

The EIS was released by the Secretary at the time he announced his decision to hold a public hearing on January 5, 1976, and to make a final decision within thirty days thereafter. However, it was not DOT's intention to file the EIS formally as a final statement at that time. The Final EIS, revised if necessary, will be filed with CEQ subsequent to the public hearing.

Comments on the EIS released by the Department on November 13 may be submitted to DOT until January 13, 1976. The thirty day minimum review period for the final EIS will begin as of the date that it is formally filed by DOT with CEQ.

GARY L. WIDMAN,
General Counsel.

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Notice of Public Hearings

Correction

In FR Doc. 75-33284, appearing at page 57711, in the issue for Thursday, December 11, 1975, the date and Federal Register citation in the first line of the first paragraph should read "October 21, 1975 (40 FR 49103)".

FEDERAL COMMUNICATIONS COMMISSION

RADIO TECHNICAL COMMISSION FOR MARINE SERVICES

Notice of Renewal

The Federal Communications Commission has determined that renewal of the Radio Technical Commission for Marine Services (RTCM) as an advisory committee of the Federal Government is necessary and in the public interest. Pursuant to the Federal Advisory Committee Act (P.L. 92-463), notice of renewal is hereby provided.

The purpose of the RTCM is to advance the art and science of marine telecommunications through study, investigation, appropriate recommendations to the Federal Government and industry, and promotion of ideas and exchange of information. The RTCM has been renewed for an additional two-year period extending until January 1, 1978.

FEDERAL COMMUNICATIONS COMMISSION
VINCENT J. MULLINS,
Secretary.

[FR Doc.75-34240 Filed 12-18-75;8:45 am]

STANDARD BROADCAST APPLICATIONS READY AND AVAILABLE FOR PROCESSING

Notice is hereby given, pursuant to § 1.571(c) of the Commission's rules, that on January 23, 1976, the standard broadcast applications listed in the attached Appendix will be considered as ready and available for processing. Pursuant to § 1.227(b)(1) and § 1.591(b) of the Commission's rules, an application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on January 22, 1976, which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and tendered for filing at the offices of the Commission in Washington, D.C., by the close of business on January 22, 1976. The attention of prospective applicants is directed to the fact that some contemplated proposals may not be eligible for consideration with an application appearing in the attached Appendix by reason of conflicts between the listed applications and applications appearing in previous notices published pursuant to § 1.571(c) of the Commission's rules.

The attention of any party in interest desiring to file pleadings concerning any pending standard broadcast applications, pursuant to section 309(d)(1) of the Communications Act of 1934, as amended, is directed to § 1.580(i) of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

Adopted: December 10, 1975.

Released: December 12, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

MOTOR CARRIER SERVICES INFORMATION

Applications Accepted for Filing

DECEMBER 15, 1975.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's Rules and Regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (see § 309(c) of the Communications Act of 1934) or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning any of these applications within 30 days of the date of this notice.

In order for an application filed under Part 21 of the Commission's Rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier: (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule. [See § 1.227(b)(3) and 21.30(b) of the Commission's Rules.]

FEDERAL COMMUNICATIONS COMMISSION
[SEAL] VINCENT J. MULLINS,
Secretary.

APPLICATIONS ACCEPTED FOR FILING:

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE:

20963–CD–P–(3)–76, Burlington, Brighton & Wheatland Telephone Company (KUO636), C.P. to replace transmitter operating on 158.10 MHz at Loc. No. 1: McHenry Street, 1.73 miles South of Burlington; additional facilities to operate on 158.10 MHz at a new Loc. No. 4: Hwy. E, 2 mi. E. of Somers; and same facilities at a new Loc. No. 5: Near County Trunk, 2.25 miles NW. of Delavan, Wisconsin.

20964–CD–P–76, South Georgia Telephone Company (KIY751), C.P. to relocate and change antenna system operating on 152.54 MHz located at 200 Martin Street, Folkston, Georgia.

20965–CD–P–(2)–76, General Telephone Company of the Southwest (KLB326), C.P. to change antenna system operating on 152.63 MHz and for additional facilities to operate on 152.81 MHz located 1 mi. NE. of Sutton County Courthouse in Sonora, Texas.

20966–CD–P–(2)–76, Susquehanna Mobile Communications, Inc. (KGC599), C.P. to change antenna system operating on 454.250 and 454.275 MHz at Loc. No. 1: WHP-TV Site, Blue Mountain near Harrisburg, Pennsylvania.

20967–CD–P–(5)–76, Aircall, Inc. (KIY779), C.P. to change antenna system operating on 152.24 MHz at Loc. No. 1: On top of Spivey Mountain, Asheville; chg. antenna system operating on 454.100 MHz at Loc. No. 2: 216 Haywood Street, Asheville; additional facilities operating on 152.24 MHz at a new Loc. No. 3: High Hickory Knob, 2.5 miles South of Swannanoa; additional facilities oper. on 152.24 MHz at new Loc. No. 4: Chambers Mountain, 2 miles N. of Clyde; and same facilities at a new Loc. No. 5: Jumpoff Mountain, 3 miles West of Hendersonville, North Carolina.

20968–CD–P–76, Simon Rubinsky (KRS640), C.P. for additional facilities to operate on 158.70 MHz at a new Loc. No. 3: Hwy. No. 281, 2 mi. S. of Edinburg, Texas.

20969–CD–P–76, Camden Mobile Communications, Inc. (KUO643), C.P. to relocate and change antenna system operating on 152.03 MHz located on Hwy. 97, 0.7 mi. N. of Camden, South Carolina.

20970–CD–P–76, Harvey Jacquin d.b.a. Radio Communications Company (KSV972), C.P. to relocate and change antenna system operating on 454.275 MHz located 2.5 miles NNW. of Union, Missouri.

20971–CD–P–(2)–76, James W. Corn d.b.a. Omnicom (KOF914), C.P. to relocate and change antenna system operating on 454.05 and 454.30 MHz, Control located 1314 North Russell, Missoula, Montana.

20972–CD–P–76, General Telephone Company of the Northwest, Inc. (KTS244), C.P. for additional facilities to operate on 454.625 MHz located at 13013 NE. 65th Street, Kirkland, Washington.

20973–CD–TC–76, Romain Telephone Company, Inc. Consent to Transfer of Control from Romain Telephone Company, Inc., Transferor to Great Southwest Telephone Corporation, Transferee. Station: KLB755, Plains, Texas.

POINT TO POINT MICROWAVE RADIO SERVICE:

1314–CF–P–76, The Mountain States Telephone and Telegraph Company (new), Oak Creek, Colorado: Lat. 40°16'33" N., Long. 106°57'25" W. C.P. for a new station on frequency 2121.6V MHz toward Oil Well Hill passive reflector on azimuth 246.5°, and from passive reflector to Mt. Werner, Colorado on azimuth 44.1°.

1315–CF–P–76, Same (WHB70), Mt. Werner, 5.1 Miles East of Steamboat Springs, Colorado. Lat. 40°27'20" N., Long. 106°44'23" W. C.P. to change coordinates, add frequency 2171.6V MHz toward Oil Well Hill passive reflector on azimuth 224.3°, and from passive reflector to a new station at Oak Creek, Colorado on azimuth 66.5°.

1316–CF–P–76, Southwestern Bell Telephone Company (KOA62), 4 Miles SW. of Beeville, Texas. Lat. 28°23'14" N., Long. 97°48'43" W. C.P. to add frequency 4090V MHz toward Orange Grove, Texas on azimuth 207.9°.

1317–CF–P–76, Same (KOA63), 7.2 Miles NW. of Orange Grove, Texas. Lat. 28°00'50" N., Long. 98°02'04" W. C.P. to add frequencies 3710H MHz toward Rabb, Texas on azimuth 122.1°, and 4050V MHz toward Beeville, Texas on azimuth 27.8°.

1318–CF–P–76, Same (KOA64), Rabb, 5 Miles NW. of Robstown, Texas. Lat. 27°50'20" N., Long. 97°43'15" W. C.P. to add frequencies 3750H MHz toward Orange Grove, Texas on azimuth 302.2°, and 3750H MHz toward Corpus Christi, Texas on azimuth 99.0°.

1319–CF–P–76, Same (KKW21), 401 North Broadway, Corpus Christi, Texas. Lat. 27°47'35" N., Long. 97°23'48" W. C.P. to add frequency 3710H MHz toward Rabb, Texas on azimuth 279.1°.

1329–CF–P–76, Michigan Bell Telephone Company (KYZ99), 0.9 Mile South of Perkins, Michigan. Lat. 45°57'48"N., Long. 87°04'22" W. C.P. to add antenna and frequencies 3730V, 3810V, 3890V, 3970V MHz toward Escanaba, Michigan on azimuth 178.0°; 4050H MHz toward LaBranch, Michigan on azimuth 254.7°; and 3730H, 3810H, 3890H, 4130H MHz toward Forsyth, Michigan on azimuth 334.6°; modify antenna and receive station data.

1330–CF–P–76, Same (KQI64), 1005 First Street, Escanaba, Michigan. Lat. 45°44'40" N., Long. 87°03'43" W. C.P. to add antenna and frequencies 3770V, 3850V, 3930V, 4010V MHz toward Perkins, Michigan on azimuth 358.0°; modify receive station data.

1331–CF–P–76, Same (KQI65), Forsyth, 2 Miles NE. of Little Lake, Michigan. Lat. 46°18'27" N., Long. 87°18'32" W. C.P. to modify receive station data and add frequencies 3770H, 3850H, 3930H MHz toward Perkins, Michigan on azimuth 154.4°, and 3770H, 3850H, 3930H, 4170H MHz toward Marquette, Michigan on azimuth 346.0°.

1332–CF–P–76, Same (KQE89), 209 North Third Street, Marquette, Michigan. Lat. 46°32'41" N., Long. 87°23'40" W. C.P. to add antenna and frequencies 3730H, 3810H, 3890H MHz toward Forsyth, Michigan on azimuth 166.0°; modify receive station data.

1333–CF–P–76, Michigan Bell Telephone Company (KQO78), 0.9 Miles NW of LaBranche, Michigan. Lat. 45°53'01" N., Long. 87°29'06" W. C.P. to add frequencies 4090H, 4170H MHz toward Perkins, Michigan on azimuth 74.4°, and 4090H MHz toward Iron Mountain, Michigan on azimuth 261.2°.

1334–CF–P–76, Same (KQA32), On Millie Hill, Iron Mountain, Michigan. Lat. 45°49'17" N., Long. 88°02'42" W. C.P. to add frequencies 4050H, 4130H MHz toward LaBranche, Michigan on azimuth 80.8°.

1323–CF–MP–76, Southern Pacific Communications Co. (WAU252), 0.3 Miles SW of Cooksville, Maryland. Lat. 39°19'06" N., Long. 77°01'33" W. Mod. C.P. to add 6226.9V towards Crownsville, Maryland on azimuth 132.1 degrees and to delete 6345.5H towards American University, Washington, D.C.

1324–CF–MP–76, Same (WAU268), 210 North Charles Street, Baltimore, Maryland. Lat. 39°17'29" N., Long. 76°36'55" W. Mod. C.P. to change frequency and polarization on 5974.8V to 6226.9H towards Crownsville, Maryland on azimuth 180.6 degrees and to increase antenna structure height.

1326–CF–MP–76, Same (WAU271), Southern end of Bacon Ridge Road, Crownsville Maryland. Lat. 39°01'50" N. Long. 76°-37'08" W. Mod. C.P. to add 5945.2V towards Cooksville, Maryland and to change frequency and polarization on 6197.2V to 6004.5H towards Baltimore, Maryland on azimuth 0.6 degrees.

1327–CF–MP–76, Same (WAU272), 7600 Preston Drive, Landover, Maryland. Lat. 38°56'15" N., Long. 76°51'42" W. Mod. C.P. to change frequency and polarization on 5974.8H to 6197.2V towards Washington, D.C. on azimuth 256.3 degrees.

1328–CF–MP–78, Same (WAU273), 1801 K Street NW., Washington, D.C. Lat. 38°54'10" N., Long. 77°02'33" W. Mod. C.P. to change frequency 10755V to 5974.8V towards Landover, Maryland on azimuth 76.1 degrees and to delete 10755V towards American University, increase antenna height.

1338–CF–P–76, American Microwave & Communications, Inc. (KQL45), Bates, 5.5 miles NE of Iron River, Michigan. Lat. 46°06'08" N., Long. 88°32'30" W. CP to change frequencies to 6041.6H MHz, 6100.9H MHz and 6160.2H MHz toward Covington, Michigan.

1339–CF–P–76, Same. (KQL46), 0.5 mile West of Covington, Michigan. Lat. 46°32'02" N., Long. 88°32'37" W. CP to change frequencies to 6278.8H MHz, 6308.4V MHz, 6338.1H MHz and 6397.4H MHz toward Bergland, Michigan.

1340–CF–P–76, Same. (KQM30), 1.25 miles SW of Houghton, Michigan. Lat. 47°06'35" N., Long. 88°35'50" W. C.P. to change frequencies to 6041.6H MHz, 6100. 9H MHz & 6160.2H MHz toward Calumet, Michigan; change to 6041.6V MHz, 6100.9V MHz and 6160.2V MHz toward L'Anse, Michigan.

1341–CF–P–78, Same. (KQM82), Bergland, Michigan. Lat. 46°40'37" N., Long. 89°34'45" W. C.P. to add 5952.6V MHz, 6041.6H MHz, 6100.9H MHz and 6160.2H MHz toward Ironwood, Michigan.

1342–CF–P–76, Same. (KQN97), Ironwood, Michigan. Lat. 46°25'45" N., Long. 90°08'-51" W. C.P. to change frequencies to 6308.-4H MHz and 6367.7H MHz toward Ashland, Wisconsin.

1343–CF–P–76, Same. (new), 940 36th Street, Wyoming, Michigan. Lat. 42°53'55" N., Long. 85°41'18" W. C.P. for a new station on 5974.8V MHz toward Walker, Michigan.

1344–CF–P–76, Same. (WAH–28), 6.1 Miles West of Walker, Michigan. Lat. 42°58'31" N., Long. 85°47'27" W. C.P. to add 6197.2H MHz toward Muskegon, Michigan.

1345–CF–P–76. Eastern Microwave, Inc. (KEM35), Ingraham Hill, 3.3 Miles SSW of Binghamton, New York. Lat. 42°03'43" N., Long. 75°57'03" W. C.P. to add 6137.9V MHz, via power split, toward a new point of communication at Owego, New York.

MAJOR AMENDMENTS:

1265–CF–P–76, United States Transmission Systems, Inc. (new), Owings, South Carolina. Amended to change 6226.9V to 5945.2V towards Moore, South Carolina; correct coordinates to read Lat. 34°38'44" N. Long. 82°07'29" W.

[FCC 75-1347]

AGREEMENTS BETWEEN SHORT-SPACED FM STATIONS

Commission Reaffirms Policy

DECEMBER 15, 1975.

Section 73.213(a) of our rules provides for an increase in the authorized facilities (height above average terrain and effective radiated power) of existing FM stations which are presently separated from other co-channel or first-adjacent channel FM stations by a distance less than the minimum distance required by section 73.207 of the rules. In essence, section 73.213(a) specifies the maximum spaced FM stations based upon the prescribed mileage bracket applicable to the particular FM stations. In adopting this rule, we rejected the proposal of permitting such an increase in facilities solely on the basis of an agreement between the short-spaced stations. However, in paragraph 19 of our *Fourth Report and Order* in Docket No. 14185, 40 FCC 868 (1964), we agreed to consider, on an *ad hoc* basis, increases in the facilities of short-spaced FM stations beyond the maximum facilities provided for in section 73.213(a) of the rules, where a mutual agreement exists between the stations. As stated in paragraph 19 of that document, this agreement must include a showing as to how the public interest will be served by full implementation of the agreement.

Since 1964, we have received numerous applications with accompanying agreements proposing facilities which are in excess of the maximums permitted by section 73.213(a) of the rules. At this point, we feel that it is necessary to reaffirm our intention to adhere to the policy that a public interest showing be part of any such proposal. We continue to believe that this policy is consistent with our stated intention of an efficient and orderly development of the FM broadcast service. Consequently, in order to simplify the processing of these applications and aid applicants who are contemplating entering into such an agreement, we are issuing this Public Notice to clarify the guidelines which are used in evaluating a particular agreement.

We will take into consideration the additional areas and populations which will receive primary service assuming *full* implementation of the agreement. By contrast, we will also consider the areas and populations which will receive interference[1] as a result of the mutual increases in facilities. In this regard, it will be necessary to determine the availability of other aural services to the interference areas created by full implementation of the agreement. Once the initial application is granted to increase facilities in line with an agreement found to be in the public interest, subsequent applications for incremental increases in authorized facilities looking toward full implementation of the agreement will be routinely granted.

In no event will a proposal be favorably considered which provides for facilities in excess of maximum power and antenna heghaimilittt
antenna height limitations set forth in section 73.211(b) of the rules. Furthermore, it must be reiterated that the agreements contemplated in the *Fourth Report and Order, supra*, pertain only to increases in facilities and *not* transmitter permissible facilities for existing short-site relocations. Therefore, notwithstanding any restriction contained in an agreement to the contrary, the relocation of transmitter sites will continue to be governed by section 73.213(f)(2)(ii) of the rules. In this regard, site change proposals falling within the applicant's present mileage bracket will be routinely granted with facilities up to the maximum contemplated by such agreement.

It should also be noted that these guidelines are only general in nature and do not, in any way, preclude us from requesting additional information when warranted. In addition, we wish to reemphasize that these agreements are intended only to provide a limited means by which some existing FM stations, authorized under previous allocation standards, may increase their facilities; agreements will not be favorably considered where an applicant proposes, for the first time, to create a mileage separation shortage under section 73.207(a) of the rules. The provision for such agreements does not constitute a departure from the FM allocation standards set forth in our *First Report and Order* in Docket No. 14185, 33 FCC 309 (1962). Accordingly, except for the limited provision for agreements discussed herein, FM allocation, including the nature and extent of interference protection accorded commercial FM stations, will continue to be determined solely by the mileage separation, power, and antenna height limitations set forth in sections 73.207, 73.211 and 73.213 of the rules, without regard to the concept of protected and interfering contours previously employed.

Action by the Commission December 9, 1975. Commissioners Wiley (Chairman), Lee, Reid, Hooks, Quello, Washburn and Robinson.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.75-34243 Filed 12-18-75;8:45 am]

FEDERAL ENERGY ADMINISTRATION

CASES FILED WITH THE OFFICE OF EXCEPTIONS AND APPEALS

Week of November 28 to December 5, 1975

Notice is hereby given that during the week of November 28 to December 5, 1975, the appeals and applications for exception or other relief listed in the Appendix to this notice were filed with the Federal Energy Administration's Office of Exceptions and Appeals.

Under the FEA's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the FEA action sought in such cases may file with the FEA written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first.

MICHAEL F. BUTLER,
General Counsel.

DECEMBER 12, 1975.

[1] For the purposes of these showings only, the normally protected service area is considered to be the area within the 1 mV/m (60 dBu) contour, and interference within the service area is considered to exist when the ratio of desired to undesired signals is less than 10 to 1 for co-channel stations and less than 2 to 1 for first-adjacent channel stations. The F (50,50) curves should be used for service contours, and the F (50,10) curves should be used for interfering contours.

V 40 245 DEC 19 75 XUM

APPENDIX.—*List of cases received by the Office of Exceptions and Appeals, Nov. 28–Dec. 5, 1975*

Date	Name of applicant	Case No.	Location	Type of submission
1975				
Dec. 1	Benton Airport. (If granted: Benton Airport would receive an increase in its base period use of aviation fuel based on an increase in services at Benton Airport.)	FEE-2096	Benton, Kans.	Exception to increase its base period use of aviation fuel.
Do	E&C Aero Services, Inc. (If granted: E&C Aero Services, Inc., would receive an increase in its base period use of aviation fuel based on increased demand for the product at E&C Aero Services, Inc.)	FEE-2097	St. Louis, Mo.	Do.
Do	Edgington Oil Co. (If granted: Edgington Oil Co. would receive an extension of the entitlement exception relief granted in FEA's Sept. 18, 1975, decision and order.)	FEE-2089	Long Beach, Calif.	Extension of FEA's entitlement exception relief, Edgington Oil Co., 2 FEA, par. 83,276 (Sept. 18, 1975).
Do	Fletcher Oil & Refining Co. (If granted: Fletcher Oil & Refining Co. would receive an extension of the entitlement exception relief granted in FEA's Nov. 11, 1975, decision and order.)	FEE-2094	Wilmington, Calif.	Extension of FEA's entitlement exception relief, Fletcher Oil & Refining Co., 2 FEA, par. —— (Nov. 11, 1975).
Do	Golden Flame Fuel Co. (If granted: Golden Flame Fuel Co. would be permitted to increase its selling price for fuel oil. The exception request is based on the firm's assertion that its May 15, 1973, margin on fuel oil sales is low.)	FEE-2098	Uniontown, Pa.	Price exception (sec. 212.93).
Do	Mount Hawley Aviation, Inc. (If granted: Mt. Hawley Aviation, Inc., would receive an increase in its base period use of aviation fuel based on exceptional growth in air traffic experienced at the Mount Hawley Airport.)	FEE-2095	Peoria, Ill.	Exception to increase its base period use of aviation fuel.
Do	NGL Supply, Inc. (C&H Refinery, Inc.). (If granted: NGL Supply, Inc., would receive an extension of the entitlement exception relief granted in FEA's Nov. 14, 1975, decision and order.)	FEE-2092	Washington, D.C.	Extension of FEA's entitlement exception relief, NGL Supply, Inc., 2 FEA, par. —— (Nov. 14, 1975).
Do	Placid Refining Co. (If granted: Placid Refining Co. would receive an extension of the stay relief granted in FEA's Oct. 17, 1975, decision and order pending the determination of its appeal.)	FES-0036	do	Extension of FEA's Oct. 17, 1975, decision and order, Placid Refining Co., 2 FEA, par. —— (Oct. 17, 1975).
Do	Pryor Oil Co. (If granted: Pryor Oil Co. would be assigned a new supplier to replace its base period supplier, Triton, Inc.)	FEE-2101	Griffin, Ga.	Exception to change supplier based on the supplier's decreased allocation, fraction.
Do	Pryor Oil Co. (If granted: Pryor Oil Co. would be permitted to replace the existing supplier of motor gasoline at various Federal installations under an 8(a) contract.)	FEE-2102	do	Exception to change suppliers under an 8(a) contract.
Do	Rock Island Refining Corp. (If granted: Rock Island Refining Corp. would not be required to purchase entitlements for its receipts of old oil in excess of the adjusted national old oil supply ratio for the months of December 1975, and January and February 1976.)	FEE-2093	Indianapolis, Ind.	Exception to FEA's entitlements program.
Do	Union Oil Co. of California. (If granted: Union Oil Co. of California would be permitted to increase its May 15, 1973, selling price for JP-4 aviation fuel on the basis that its May 15, 1973, selling price was below competitive levels.)	FEE-2100	Los Angeles, Calif.	Price exception (sec. 212.82).
Do	Wallack Brothers Co. (If granted: Wallack Brothers Co. would be assigned a new, lower-priced supplier of Varsol I.)	FEE-2099	New Haven, Conn.	Exception to change suppliers.
Do	Wickett Refining Co. (If granted: FEA's Oct. 24, 1975, decision and order would be rescinded and Wickett Refining Co. would not be required to purchase entitlements for its receipts of old oil in excess of the adjusted national old oil supply ratio.)	FEA-0678	Fort Worth, Tex.	Appeal of FEA's exception decision and order, Wickett Refining Co., 2 FEA par. 83, 343 (Oct. 24, 1975).
Dec. 2	Arizona Fuels Corp. (If granted: Arizona Fuels Corp. would be assigned a supply of crude oil from Tenneco Oil Co. to increase the level of operation of its Fredonia, Ariz., refinery.)	FEE-2090	Salt Lake City, Utah	Exception to Dec. 1 rule for crude oil supplier/purchaser relationships (211.63(a)).
Do	Lakeside Refining Co. (If granted: Lakeside Refining Co. would not be required to purchase entitlements for its receipts of old oil in excess of the adjusted national old oil supply ratio.)	FEE-2078	Kalamazoo, Mich.	Exception to the old oil entitlements program.
Dec. 3	Charter Oil Co. (If granted: Charter Oil Co. would be permitted to file amended forms FEA P-102-M-O for the months of January through June 1975 to receive an adjustment in its entitlement purchase obligation.)	FEE-2091	Jacksonville, Fla.	Exception to the reporting requirements of the old oil entitlements program.
Do	Kerr-McGee Corp. (If granted: The decision and order issued by the FEA Office of Regulatory Programs on Sept. 26, 1975, would be rescinded and Kerr-McGee Corp. would receive an increased allocation of crude oil under the refiners' buy/sell list to account for its expanded refinery capacity.)	FEA-0679	Oklahoma City, Okla.	Appeal of the crude oil allocation order issued by the FEA on Sept. 26, 1975.
Do	New England Petroleum Corp. (If granted: New England Petroleum Corp. would receive an extension of the entitlement relief granted in FEA's Nov. 17, 1975 Decision and Order.)	FEE-2103	Washington, D.C.	Extension of FEA's entitlement exception relief, New England Petroleum Corp., 2 FEA par. — (Nov. 17, 1975).
Dec. 4	Berry Holding Co. (If granted: FEA's November 10, 1975 Interpretation would be rescinded and certain wells owned by the Berry Holding Co. would qualify as stripper wells under 10 CFR 210.32.)	FEA-0680	Taft, Calif.	Appeal of FEA's Nov. 10, 1975 Interpretation pertaining to classification as a stripper well.
Do	Exxon Co., USA (If granted: FEA's November 17, 1975 Decision and Order which granted exception relief from the Entitlements Program to the New England Petroleum Corp. would be rescinded. FEA's November 17, 1975 Decision and Order which was issued to New England Petroleum Corp. would be stayed pending final determination of Exxon's appeal.)	FEA-0681, FES-0081	Washington, D.C.	Appeal of FEA's Nov. 17, 1975 Decision and Order, New England Petroleum Corp., 2 FEA, par. — (Nov. 17, 1975.) Stay requested.
Do	NGL Supply, Inc. (If granted: NGL Supply, Inc. would receive an extension of the entitlement exception relief granted in FEA's Nov. 14, 1975 Decision and Order.)	FEE-2104	Tulsa, Okla.	Extension of FEA's entitlement exception relief, NGL Supply, Inc., 2 FEA, par. — (Nov. 14, 1975).
Do	North American Petroleum. (If granted: North American Petroleum would receive a stay of its obligations to purchase entitlements in November pending the sale of its October entitlements.)	FES-0087	Abilene, Tex.	Request for a stay of entitlement purchase obligation.

FOOD INDUSTRY ADVISORY COMMITTEE

Notice of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770) notice is hereby given that the Food Industry Advisory Committee will meet Tuesday, January 13, 1976 at 1:30 p.m., Westward V Room, The Americana Hotel, Miami Beach, Florida.

The Committee was established to advise the Administrator, FEA, about food-service interests and problems as these relate to national energy conservation programs.

The agenda is as follows:

1. Chairman's report, a. New membership, b. Proposed 1976 focus.
2. Energy conservation updates, a. Current status, b. Future emphasis.
3. Task force reports, a. Energy consumption data, b. Future Planning, c. Audit programs, d. Transportation, e. Retail grocery stores, f. Foodservice operations, g. Industrial education.
4. General discussion.

The meeting is open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Lois Weeks, Director, Advisory Committee Management, (202) 961-7022, at least 5 days before the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

Minutes of the meeting will be made available for public inspection at the Federal Energy Administration, Washington, D.C.

Issued at Washington, D.C. on December 17, 1975.

MICHAEL F. BUTLER,
General Counsel.

[FR Doc.75-34519 Filed 12-18-75;9:11 am]

INDUSTRIAL EDUCATION SUBCOMMITTEE OF THE FOOD INDUSTRY ADVISORY COMMITTEE

Notice of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770) notice is hereby given that the Industrial Education Subcommittee to the Food Industry Advisory Committee will meet Tuesday, January 13, 1976 at 9:30 a.m., at the Sea View Motel, 9909 Collins Avenue, Miami Beach, Florida.

The Committee was established to advise the Administrator, FEA, about food-service interests and problems as these relate to national energy conservation programs.

The agenda is as follows:

1. Distribution of the guide to energy conservation for food service.
2. State energy conservation seminar for food service.
3. Distribution of energy audit for meat packing and baking.

The meeting is open to the public. The Chairman of the Subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Lois Weeks, Director, Advisory Committee Management, (202) 961-7022 at least 5 days before the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

Minutes of the meeting will be made available for public inspection at the Federal Energy Administration, Washington, D.C.

Issued at Washington, D.C. on December 17, 1975.

MICHAEL F. BUTLER,
General Counsel.

[Independent Ocean Freight Forwarder License No. 1404]

FAR EXPRESS CO.

Order of Revocation

By letter dated November 3, 1975, Fabio A. Ruiz R. d/b/a Far Express Company, 2310 Galiano Street, Coral Gables, Florida 33134 was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 1404 would be automatically revoked or suspended unless a valid surety bond was filed with the Commission on or before December 2, 1975.

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.9 of Federal Maritime Commission General Order 4, further provides that a license will be automatically revoked or suspended for failure of a licensee to maintain a valid bond on file.

Fabio A. Ruiz R. d/b/a Far Express Company has failed to furnish a valid surety bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (revised) Section 5.01(c) (dated 6/30/75):

It is ordered, That Independent Ocean Freight Forwarder License No. 1404, issued to Fabio A. Ruiz R. d/b/a Far Express Company, be returned to the Commission for cancellation.

It is further ordered, That Independent Ocean Freight Forwarder License No. 1404 be and is hereby revoked effective December 2, 1975.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon Fabio A. Ruiz R. d/b/a Far Express Company.

LEROY F. FULLER,
Director, Bureau of Certification and Licensing.

[FR Doc.75-34286 Filed 12-18-75;8:45 am]

SAN FRANCISCO PORT COMMISSION AND INTERMODAL CARGO SERVICES, INC.

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before January 8, 1976. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Richard A. Bobier, Chief Counsel, Port of San Francisco, Ferry Building, San Francisco, California 94111.

Agreement No. T-3197, between the San Francisco Port Commission (Port) and Intermodal Cargo Services, Inc., (ICS), is a five-year agreement for the operation by ICS of an off-dock eastbound container consolidation freight station and distribution center at Pier 26, San Francisco, California, for the distribution, consolidation and storage of OCP container cargo. ICS will collect monthly storage for the Port using rates quoted in Port of San Francisco Tariff 3-C. ICS will collect all other charges according to the rates published in the San Francisco Bay Carloading Tariff No. 1-C and Tariff No. 2-C.

By Order of the Federal Maritime Commission

FRANCIS C. HURNEY,
Secretary.

Dated: December 16, 1975.

FEDERAL POWER COMMISSION

NATIONAL GAS SURVEY COORDINATING COMMITTEE

Meeting

Conference Room 5200, Federal Power Commission, Union Plaza Building, 825 North Capitol Street, NE., Washington, D.C. 20426, January 20, 1976, 9:30 a.m.

Presiding: Mr. Frederick W. Lawrence, Director, National Gas Survey; Mr. Allan R. Rexinger, Coordinating Committee, Coordinating Representative and Secretary, Federal Power Commission.

1 Call to Order—Mr. Frederick W. Lawrence.

2 Introductory Remarks—The Honorable Richard L. Dunham, Chairman, Federal Power Commission.

3 Introduction of Coordinating Committee Chairman—Dr. John J. Schanz, Jr., Resources for the Future, 1755 Massachusetts Avenue, NW., Washington, D.C., and Introduction of Coordinating Committee Vice Chairman—Mr. Harry Perry, National Economic Research Associates, Inc., 1211 Connecticut Avenue, NW., Washington, D.C.

4 Work Status Report of Technical Advisory Committees on (a) Supply, (b) Transmission, Distribution & Storage, (c) Conservation, (d) Finance, (e) Curtailment Strategies, and (f) Research & Development—Dr. John J. Schanz, Jr.

5 Discussion of (a) Common Problems, (b) Staffing, (c) Performance, (d) Assumptions and Methodologies—Dr. John J. Schanz, Jr.

6 Preparation, Processing and Review of Drafts and Final Reports—Dr. John J. Schanz, Jr.

7 National Gas Survey Time Table—Mr. Frederick W. Lawrence.

8 Discussion of Advisory Committee Input to Next Executive Advisory Committee Meeting—Dr. John J. Schanz, Jr.

9 Discussion of Scheduling Next Executive Advisory Committee Meeting Date—Dr. John J. Schanz, Jr.

10 Scheduling of Next Coordinating Committee Meeting Date—Mr. Frederick W. Lawrence.

11 Other Business—Mr. Frederick L. Lawrence.

12 Adjournment—Mr. Frederick W. Lawrence.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or if oral, at the time and in the manner permitted by the committee.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-34189 Filed 12-18-75;8:45 am]

NATIONAL GAS SURVEY; SUPPLY-TECHNICAL ADVISORY TASK FORCE-FOREIGN GAS SUPPLY

Meeting

Conference Room 5200, Federal Power Commission, Union Plaza Building, 825 North Capitol Street, NE., Washington, D.C. 20426. January 7, 1976, 9:30 a.m.

Presiding: Randolph E. Mathura, Coordinating Representative and Secretary, Federal Power Commission.

1 Call to Order and Introductory Remarks—Randolph E. Mathura.

2 Introduction of Technical Advisory Task Force Chairman—George D. Carameros, Jr., Executive Vice President, The El Paso Company, Houston, Texas, and Introduction of Technical Advisory Task Force Vice Chairman—Amanullah R. Khan, Executive Advisor, International Programs, Institute of Gas Technology, Chicago, Illinois.

3 Task Force Working Session—George D. Carameros, Jr.

(a) Review Workscope and Define Objectives.

(b) Develop Work Plan and Completion Dates.

(c) Assignment of Work to Committee Members.

(d) Selection of Next Meeting Date.

(e) Discussion of Administrative and Other Matters.

(f) Comments and Discussion from Non-Task Force Attendees.

4 Adjournment—Randolph E. Mathura.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or if oral, at the time and in the manner permitted by the committee.

KENNETH F. PLUMB,
Secretary.

[Docket No. RI75-129]

C. CRADY DAVIS ET AL.

Settlement

DECEMBER 16, 1975.

Take notice that on December 3, 1975 C. Crady Davis, et al., ("Owners"), Southern Union Gathering Company ("Gathering Company"), and the Staff of the Federal Power Commission ("Staff"), filed with the Presiding Administrative Law Judge documents designed to settle this proceeding. The Presiding Administrative Law Judge certified the record in the case to the Commission on December 5, 1975 (issued December 9, 1975).

In the Settlement Documents, the parties recite, inter alia, that the basic contract under which Owners sell gas from four wells in the San Juan Basin Area to Gathering Company was terminated pursuant to its own terms, effective 11:59 p.m., April 30, 1973; that in July 1974 Owners and Gathering Company began a series of discussions relating to the execution of a renewal contract; that these discussions were not successful; and that on March 20, 1975, Owners filed a unilateral rate increase to the national new gas rate established by FPC Opinion No. 699-H, alleging that Gathering Company was guilty of failure to negotiate in good faith to formulate a renewal contract and that as a result Owners were eligible for the new gas rate; and that Gathering Company denied that it failed to negotiate in good faith towards formulation of a renewal contract.

On April 17, 1975 the Commission issued an order suspending Owners' unilateral rate increase until September 20, 1975. On April 18, 1975 the Commission issued an order in this proceeding setting Owners' unilateral rate increase for hearing. A hearing was held on July 9 and 10, 1975.

The documents filed by the parties further recite that after the hearing Owners and Gathering Company had a series of discussions concerning settlement of the matters in dispute. As a result of these discussions and a change in the circumstances which Gathering Company previously felt prevented it from executing a renewal contract acceptable to Owners, Gathering Company and Owners executed a renewal contract, dated as of September 20, 1975, covering the subject sale and a Drilling Agreement, dated September 20, 1975, obligating Owners to drill two new wells on the dedicated acreage. Owners filed the renewal contract with the Commission as a supplement to their Rate Schedule on November 28, 1975.

All of the parties have requested the Commission to find that the rate increase filed by Owners is just and reasonable. They have also requested the Commission to determine the effective date of such just and reasonable rate, Owners and Gathering Company contending that the proper effective date is September 20, 1975, the effective date of the renewal contract between Owners and Gathering Company, and the Staff contending that the proper effective date is November 28, 1975, the date on which the renewal contract was filed with the Commission.

Any person desiring to comment on said certification should file comments thereon with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20546, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such comments should be filed on or before December 22, 1975. Replies to comments should be filed on or before January 5, 1976. Comments will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make commentors parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

V 40 245 DEC 19 75 XUM

[Docket No. ER76-329]

CENTRAL VERMONT PUBLIC SERVICE CORP.

Supplemental Filing

DECEMBER 17, 1975.

Take notice that on December 10, 1976, Central Vermont Public Service Corporation tendered for filing revenue comparisons for the 12 months ending December 31, 1976, the 12 months succeeding the proposed effective date, and revenue comparisons for calendar year 1974, the test year in the company's current rate proceeding, Docket E-9040. This filing comprises a supplement of the company's fuel clause filing of December 2, 1976.

The company states that copies of this filing have been sent to all parties receiving the filing of December 2, 1976.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 24, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-34370 Filed 12-18-75;8:45 am]

[Docket No. ER76-123]

FLORIDA POWER CORP.

Supplemental Filing and of Settlement Rates

DECEMBER 17, 1975.

Take notice that on December 10, 1975, the Florida Power Corporation (Florida Power) tendered for filing updated studies for the 12 month period ending September 30, 1975 (Period I) and for calendar year 1976 (Period II). Florida Power states that this satisfies deficiency assessed by the Federal Power Commission in its letter of September 29, 1975, to the company whereby the Commission notified the company that in its filing of September 12, 1975, its submittal of Period I data failed to meet the regulation requiring data from the most recent 12 consecutive months for which actual data are available (See 18 CFR 35.13(b)(4)(iii)).

On December 10, 1975, Florida Power also tendered for filing settlement rates to the following rural electric cooperatives: Seminole Electric Cooperative, Inc., Clay Electric Cooperative, Inc., Glades Electric Cooperative, Inc., Suwannee Valley Electric Cooperative, Inc., Sumter Electric Cooperative, Inc., Central Florida Electric Cooperative, Inc. ,Withlacoochee Electric Cooperative, Inc., Talquin Electric Cooperative, Inc., TriCounty Electric Cooperative, Inc., and Peace River Electric Cooperative, Inc.; to the following municipal customers: Alachua, Bartow, Bushnell, Chattahoochee, Fort Meade, Lake Helen, Leesburg, Mount Dora, Newberry, Ocala, Quincy, Wauchula, and Williston, Florida; and to one investor-owned utility, Reedy Creek Utility Co., Inc.

Florida Power states that the settlement rates involve an increase over present rates of $5.4 million, or 8.7 percent on the 1975 basis used for the settlement. Florida Power requests a waiver of the Commission's notice requirements to permit these rates to become effective on January 1, 1976.

Florida Power states that copies of this filing were sent to its wholesale customers and the Florida Public Service Commission.

Any person desiring to be heard or to make any protests with reference to said filing should, on or before December 23, 1975, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The documents filed by Florida Power are on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

OFFICE OF THE FEDERAL REGISTER

HOW TO USE THE FEDERAL REGISTER

Public Briefings

"The FEDERAL REGISTER—What It Is and How to Use It" will be the topic of two briefings to be offered by the Office of the Federal Register on January 21 and 22, 1976. These sessions will begin at 9:30 a.m. and will be held in the FEDERAL REGISTER Conference Room, 8th Floor, 1100 L Street, N.W., Washington, DC. The briefings are open to the general public and Federal agency personnel and should be helpful to anyone who uses the FEDERAL REGISTER.

The sessions will last approximately 2 hours and will cover the following areas:

1. A brief history of the FEDERAL REGISTER.
2. The difference between legislation and regulations.
3. An introduction to the finding aids of the Office of the FEDERAL REGISTER.
4. The relationship of the FEDERAL REGISTER and the CODE OF FEDERAL REGULATIONS.
5. Important elements of a typical FEDERAL REGISTER document.

In addition, attendees will undertake a practical, problem-solving exercise. There will be ample time for questions.

The Office of the Federal Register does not interpret specific agency regulations and the sessions will not provide a forum for the discussion of substantive questions. Rather, the briefings are designed as an introduction for the person who discovers that he or she must use Federal Register publications to keep track and to gain an understanding of Federal regulations.

Space is limited and reservations are required. If additional briefings are necessary to accommodate all persons wishing to attend, a schedule will be announced. Reservations will be accepted by mail or by telephone on 202-523-5240. Mail reservations to: Ms. Denise Normandin, Office of the Federal Register, National Archives and Records Service, Washington, DC 20408.

FRED J. EMERY,
Director of the Federal Register.

DECEMBER 15, 1975.

FEDERAL RESERVE SYSTEM

CHEMICAL NEW YORK CORP.

Proposed Acquisition of Van Deventer & Hoch

Chemical New York Corporation, New York, New York, has applied, pursuant to § 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to acquire voting shares of Van Deventer & Hoch, Glendale, California. Notices of the application were published on October 29 and November 3, 1975 in the Los Angeles Times and the Wall Street Journal, respectively, newspapers circulated in Glendale, California.

Applicant states that the proposed subsidiary would engage in the following activities: 1) serving as investment adviser, as defined in Section 2(a)(20) of the Investment Company Act of 1940, to an investment company registered under the Act; 2) providing portfolio investment advisory and portfolio investment management services; 3) furnishing general economic information and advice, general economic statistical forecasting services and industry studies; and 4) acting in an agency capacity with respect to both discretionary accounts (managing agency accounts) and accounts where the approval of the client would be necessary before any investment change is made. Applicant states that such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of New York.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than January 13, 1976.

Board of Governors of the Federal Reserve System, December 11, 1975.

[SEAL] GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.75-34227 Filed 12-18-75;8:45 am]

BEAVER BANCSHARES, INC.

Formation of Bank Holding Company

Beaver Bancshares, Inc., Beaver, Oklahoma, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 80 per cent or more of the voting shares of The Bank of Beaver City, Beaver, Oklahoma. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received no later than January 5, 1976.

Board of Governors of the Federal Reserve System, December 17, 1975.

FIDUCIARY INVESTMENT COMPANY OF NEW JERSEY

Formation of Bank Holding Company

Fiduciary Investment Company of New Jersey, Newark, New Jersey, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 50.2 per cent or more of the voting shares of Security National Bank of New Jersey, Newark, New Jersey. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of New York. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than January 5, 1976.

Board of Governors of the Federal Reserve System, December 17, 1975.

[SEAL] GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

UNITED MISSOURI BANCSHARES, INC.

Acquisition of Bank

United Missouri Bancshares, Inc., Kansas City, Missouri, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent of the voting shares (less directors' qualifying shares) of The Park Bank of St. Joseph, Missouri, St. Joseph, Missouri. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than January 7, 1976.

Board of Governors of the Federal Reserve System, December 16, 1975.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-7]

CERTAIN ELECTRONIC AUDIO AND RELATED EQUIPMENT

Notice of Deletion

This notice is in reference to a Notice of Prehearing Conference and Rescheduled Hearing for United States International Trade Commission Investigation No. 337-TA-7, Certain Electronic Audio and Related Equipment, issued by me as presiding officer on Thursday, November 20, 1975, and published in the FEDERAL REGISTER on Wednesday, November 26, 1975 (40 FR 54883).

The following words are hereby ordered to be deleted from the above-cited Notice of Prehearing Conference and Rescheduled Hearing:

. . . and, if so whether or not an exclusion order or a cease and desist order should be issued.

Issued: December 11, 1975.

DANIEL MINCHEW,
Presiding Officer,
U.S. International Trade Commission.

[FR Doc.75-34205 Filed 12-18-75;8:45 am]

[Investigation No. 337-TA-16]

CERTAIN ANGOLAN ROBUSTA COFFEE

On December 12, 1975, the United States International Trade Commission received a motion (United States International Trade Commission Motion Docket No. M-170) from counsel for complaints to withdraw the complaint and terminate Investigation No. 337-TA-16, Certain Angolan Robusta Coffee, as a settlement between the parties to the investigation has been reached. The Commission has also been informed by counsel for complainants that a stipulation and order of dismissal with prejudice of the antitrust action in the United States District Court for the Southern District of New York (74 Civ. 5191 (L.F.M.)), an action containing many issues similar to those before the Commission, has been ordered.

Upon the basis of these aforementioned actions, I hereby order as follows:

(1) The necessity to respond to numbers one through five of Presiding Officer's Intructions issued by me on December 9, 1975, is postponed indefinitely;

(2) Number six of the above-mentioned Presiding Officer's Instructions need not be responded to, as it is subsumed by the following orders;

(3) The complainants submit by December 16, 1975, all documents which constitute the settlement before the United States District Court for the Southern District of New York in 74 Civ. 5191 (L.F.M.) and the proposed settlement before the Commission in this investigation and any other documents relevant thereto but not received by the Commission;

(4) The complainants submit by December 16, 1975, all stipulations, judgments, and orders issued by Judge McMahon in the above-cited United States District Court for the Southern District of New York action;

(5) All parties other than the moving parties submit by December 23, 1975, their responses to the United States International Trade Commission Motion Docket No. M-170;

(6) All parties submit by December 23, 1975, a brief and possible stipulations regarding procedures to be followed in the Commission's consideration of Motion Docket No. M-170; and

(7) All parties submit by December 23, 1975, briefs on the effect of the settlement agreement, and the effect of a possible termination by the Commission of its investigation, on the public interest.

Dated: December 15, 1975.

WILL E. LEONARD,
Presiding Officer.

[337-TA-10]

CERTAIN ULTRA-MICROTOME FREEZING ATTACHMENTS

Notice of Hearing

Notice is hereby given that the United States International Trade Commission

DEC 19 75 XUM V40245 D

will hold a public hearing under Section 337 of the Tariff Act of 1930, as amended (88 Stat. 2053), in connection with investigation 337–TA–10, Certain Ultra-Microtome Freezing Attachments, January 9, 1976, at 10 a.m., e.s.t., at the U.S. International Trade Commission Building located at 701 E Street NW., Washington, D.C., for the purpose of allowing complainant American Optical Corporation to show cause why the investigation should not be terminated.

Requests from interested parties and persons for appearances at the hearing should be received by the Secretary of the U.S. International Trade Commission, in writing, at his office in Washington, D.C. 20436, not later than January 2, 1976.

Any objection and request for reconsideration of this action must be filed on or before December 29, 1975. Such objection and request for reconsideration shall be accompanied by a statement setting forth the facts relied upon in support of such objection and request and shall be served on the other parties to this investigation.

Notice of the institution of the investigation was published in the FEDERAL REGISTER on August 19, 1974 (39 FR 29975), with an assigned docket number 337–L–74. By notice published in the FEDERAL REGISTER on June 4, 1975 (40 FR 24076), this investigation was assigned new docket number 337–TA–10.

By Order of the Commission.

Issued: December 16, 1975.

KENNETH R. MASON,
Secretary.

[Docket No. P–558–A]

SAN DIEGO GAS AND ELECTRIC CO.

Notice of Receipt of Partial Application for Construction Permits and Facility Licenses: Time for Submission of Views on Antitrust Matters

The San Diego Gas and Electric Company, pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, has filed one part of an application, dated Ocotber 29, 1975, in connection with their plans to construct and operate two generating units utilizing two pressurized water reactors. Each reactor will be designed for initial operation at approximately 2800 megawatts thermal, with a net electrical output of approximately 900 megawatts. The facility, designated as the Sundesert Nuclear Plant, Units 1 and 2, will be located in Riverside County, California, about 16 miles southwest of Blythe, California, and 50 miles north-northwest of Yuma, Arizona. The portion of the application filed contains the information requested by the Attorney General for the purpose of an antitrust review of the application as set forth in 10 CFR Part 50, Appendix L.

The remaining portion of the application consisting of a Preliminary Safety Analysis Report accompanied by an Environmental Report, pursuant to Section 2.101 of Part 2, is expected to be filed in July, 1976. Upon receipt of the remaining portions of the application dealing with radiological health and safety and environmental matters, separate notices of receipt will be published by the Commission including an appropriate notice of hearing.

The San Diego Gas and Electric Company has invited other Southern California utilities to participate in the ownership and capacity of these units. As utilities indicate their interest, additional antitrust information will be submitted for them.

A copy of the partial application is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555; the Palo Verde Valley District Library, 125 West Chanslorway, Blythe, California 92255; the Federal Archives and Records Center, 24000 Avila Road, Laguna, California 92677; and the U.S. Nuclear Regulatory Commission, Region V, Inspection and Enforcement, 1990 North California Boulevard, Walnut Creek, California 94596. Docket No. P–558–A has been assigned to the application and it should be referenced in any correspondence relating to it.

Any person who wishes to have his views on the antitrust matters of the application presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Office of Antitrust and Indemnity, Office of Nuclear Reactor Regulation on or before February 3, 1976.

Dated at Bethesda, Maryland, this 1st day of December, 1975.

For the Nuclear Regulatory Commission.

ROBERT A. CLARK,
Chief Gas Cooled Reactors Branch Division of Reactor Licensing.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–11919; File No. SR–MCC–75–3]

MIDWEST CLEARING CORPORATION

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on November 24, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

OLD RULE

Proxies and Communications to Holders of Eligible Securities

Rule 12. Notice to Participants

Section 1. When the Corporation is advised of a proposed meeting of holders of an eligible security, the Corporation will request from each Participant with a clearing free or loan free position in the security as of the close of business on the record date therefor advice as to the number of proxies desired by such Participant. Unless the Participant responds within the period specified in the request, proxies and proxy materials will not be sent to that Participant. Notices to Participants hereunder may be combined with notices by MSTC to MSTC Participants.

Transmittal of Proxies

Section 2. When the Corporation receives a timely response to a request made pursuant to Section 1, the Corporation will use its best efforts to obtain the requested number of executed proxies through MSTC, in the manner provided for in the MSTC Rules, and to cause such proxies to be transmitted to the requesting Participant, together with one copy of any related proxy materials and reports. It shall be the responsibility of the Participant to obtain additional copies of such materials and reports, if desired, from the issuer or transfer agent.

Communications Not Related to Meetings

Section 3. The Corporation may establish such procedures as it deems appropriate for the transmittal to Participants of communications to holders of eligible securities not made in connection with any proposed meeting.

Responsibility of Corporation

Section 4. The Corporation shall have no responsibility or obligation to Participants or others in respect of proxies or communications to holders of eligible securities except to use its best efforts to act in accordance with this Rule. Without limiting the generality of the foregoing, the Corporation shall have no responsibility in the event that the Corporation is unable to obtain through MSTC sufficient quantities of executed proxies or other materials to permit transmittal to all requesting Participants.

PROPOSED RULE

Proxies and Communications to Holders of Eligible Securities

Rule 12. Notice to Participants

Section 1. When the Corporation is advised of the proposed proxy record date of an eligible security sufficiently in advance of the record date therefor, the Corporation will use its best efforts to effect the transfer of all certificates held by the Corporation representing such security into the name of the Corporation's nominee. Upon the receipt of the proposed proxy record date, the Corporation will forward to the corporate secretary of the issuer an address verification form to confirm the correctness of the name and address of the corporate secretary/proxy dispersing agent. Failure of the corporate secretary to respond to this notification will result in subsequent materials being directed to this same corporate secretary. The Corporation will provide notification to its participants of the upcoming record date through their daily reports (Net Position and Activity Report) for each day, five days prior to the cut-off date and such notification shall continue to and inclusive of the record date. Notices to participants hereunder may be combined with notices by MSTC to MSTC Participants.

Transmittal of Proxies

Section 2. Upon receipt of the address verification from the corporate secretary, or in lieu of receipt of such verification (Note 1) the Corporation will prepare as of record date a listing called the Beneficial Participant Holders List, indicating those MCC participants and the respective number of clearing free and loan free position shares for which MCC held shares registered in its nominee name (Kray & Co.) over the record date. This listing will indicate the full name of the participant and the total MCC free position holdings in conjunction with and inclusive of MSTC free position shares of that Participant. The Corporation will forward this listing along with the executed Omnibus Proxy to the corporate secretary/proxy dispersing agent for the agent's further communication/distribution between his organization and the MCC participants. It shall be the responsibility of the corporate secretary/proxy dispersing agent to communicate directly with the MCC participant/beneficial shareholder. Initial distribution of materials and reports are the responsibility of the issuer, and any additional copies of such material should be requested by the participant from the issuing corporation.

Communications Not Related to Meetings

Section 3. Will remain unchanged.

Responsibility of Corporation

Section 4. The Corporation shall have no responsibility or obligation to participants, or others in respect of proxies or communications to holders of eligible securities except to use its best efforts to act in accordance with this rule. Without limiting the generality of the foregoing, the Corporation shall have no responsibility in the event that (i) the Corporation receives insufficient notice of a proposed meeting to permit action in accordance with Section 1; (ii) the Corporation is unable to effect transfer

of all the certificates into the name of the Corporation's nominee prior to record date; or (iii) the Corporation is unable to forward the Omnibus Proxy and the Beneficial Holders Participant Listing or other materials to the issuer of proxy dispersing agent in adequate time to permit distribution of the materials, and reports to the Corporation's participants.

(b) The proposed rule changes does not affect any other rule of the Midwest Clearing Corporation.

(c) No prior filings have been submitted.

Statement of Basis and Purpose

MCC hereby proposes to incorporate an omnibus proxy system for its proxy processing as it relates to participant free positions and corporate issuer notification. The proposed rule change would thereby correlate with Rule 7 of the Midwest Securities Trust Company—an already existing Securities and Exchange Commission approved Rule. The omnibus proxy procedure would improve the flow of information to the beneficial shareholder. MCC's omnibus proxy procedure would facilitate the processing of proxies among central certificate depositories in situations in which one depository is holding positions on behalf of another depository's participants.

MCC's current Rule calls for MCC to act as a distribution agent for the corporate issuer/dispersing agent as it relates to proxy processing. Upon receipt of a proposed meeting of shareholders of an eligible issue, MCC takes the underlying steps to insure that all underlying securities are registered in nominee name. On, or immediately after the Record Date, MCC contacts, via written communication and telephone follow-up, each participant having a free position in that eligible issue and solicits advice as to the number of proxies desired by such participant. If the participant does not respond, MCC takes no further action. Given a timely response from the participant, MCC solicits the requested number of proxies from the issuer and redistributes executed proxies to the participants. At this point it is the participant's responsibility for any other processing of these proxy materials as it relates to their customers.

Under the proposed rule change, MCC would be implementing an omnibus proxy system. This system would call for MCC to notify its participants on each day, beginning five (5) days prior to the Proxy Record Date, of the upcoming Proxy Record Date. The notification would occur through the participants' daily MCC report. MCC would also solicit an address vertification from the corporate issuer/dispersing agent. On or immediately after the Record Date, MCC will produce a Beneficial Participants Holding list which indicates each participant by symbol, full participant name, and the participant's free position. This list, along with an executed omnibus proxy, would be sent to the corporate issuer/dispersing agent based upon previous name and address information and/or updates received as a result of our prior Record Date solicitation. The omnibus proxy assignment would charge the corporate issuer/dispersing agent with the distribution and solicitation of proxy materials directly between himself and the MCC participant. Whenever MCC would be holding physical shares for the account of participants from other clearing corporations'/trust companies' participants, the omnibus proxy and Beneficial Participant Holding Report of MCC's nominee would assign the applicable voting rights to the other clearing corporation/trust company by means of our Omnibus Proxy Notice and Listing. The other clearing corporation/trust company would in turn reassign these voting rights to their appropriate participant.

MCC has not received any comments on the proposed rule change.

MCC does not perceive any burdens imposed on competition.

On or before January 23, 1976, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will;

(a) By order approve such proposed rule change or,

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before January 9, 1976.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

DECEMBER 12, 1976.

[Release No. 34–11920; File No. SR–MSTC–75–3]

MIDWEST SECURITIES TRUST COMPANY

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on November 24, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Agreement with Respect to a Comprehensive Securities Depository System

This Agreement, made this ---- day of ----------, 1975, between Midwest Stock Exchange, Inc. (hereinafter referred to as "MSE"), and American National Bank & Trust Company, Continental Illinois National Bank and Trust Company of Chicago, The First National Bank of Chicago, Harris Trust and Savings Bank and The Northern Trust Company (hereinafter sometimes referred to collectively as the "Banks"),

Witnesseth:

Whereas, as of May 9, 1973, the parties hereto entered into a Memorandum of Understanding (the "1973 Memorandum") contemplating the establishment by MSE, with the assistance of the Banks, of a securities depository to be known as Midwest Securities Trust Company ("MSTC"), and the participation of the Banks therein;

Whereas, MSE, with its own funds, has since established MSTC, and certain Banks have commenced participation therein, on a limited basis;

Whereas, the parties hereto desire to cancel and rescind the 1973 Memorandum, but to provide for continued and increased participation by the Banks in MSTC;

Whereas, the Banks desire to increase their participation MSTC, but to ensure that the operations and services of MSTC remain compatible with their needs, the Banks each desire representation on its board of directors;

Whereas, the By-Laws of MSTC (pertinent provisions of which are attached as Exhibit A hereto and incorporated herein by reference) provide for five Class B Directors, some or all of whom may be selected by MSTC participants which are not members of MSE, depending on the extent of the utilization by such participants of the services of MSTC;

Whereas, it is anticipated that the Banks may be unable, during the two years following the date of this Agreement, to utilize the services of MSTC to an extent sufficient to permit each Bank to be represented on its Board of Directors; and

Whereas, to induce the Banks to continue and increase their participation in MSTC, MSE is willing to appoint as Class B Directors of MSTC persons nominated by the Banks, as hereinafter set forth;

Now, Therefore, in consideration of the foregoing, and the mutual covenants and agreements hereinafter set forth, the parties hereto agree as follows:

1. Not less than seventy-five days before the annual meeting of shareholders of MSTC in the years 1967 and 1977, each Bank shall designate, in a written notice to MSE, one candidate for election as a Class B Director of MSTC.

2. MSE, as sole shareholder of MSTC, shall nominate for election as Class B Directors of MSTC, in accordance with its by-laws, those candidates designated by the Banks pursuant to Section 1 hereof.

3. In the event that persons in addition to the candidates designated by the banks are nominated for election as Class B Directors of MSTC, MSE will cast any votes to which it may be entitled under Article III, Section 2 of the By-Laws of MSTC for the candidates designated by the Banks, and shall, unless instructed otherwise in a written no-

DEC 19 75 V 40 245 XUM

tice signed by all of the Banks, distribute its votes equally among said candidates.

4. If, during the term of this Agreement, a person other than a candidate designated by a Bank pursuant hereto shall be elected a Class B Director of MSTC, MSE shall use its best efforts to cause the By-Laws of MSTC to be amended so as to increase the number of Class B Directors to a number sufficient to provide representation for each Bank, provided that the number of Class A Directors shall be increased simultaneously so that Class A Directors shall continue to constitute a majority of the directors of MSTC. In the event that the By-Laws of MSTC are so amended, MSE shall appoint, to fill any vacancies among the Class B Directors created thereby, persons designated in writing by those Banks not then represented on the board of directors of MSTC, provided that such persons shall have been approved by a majority of the Class B Directors then in office, in accordance with Article III, Section 8 of the By-Laws of MSTC.

5. If, during the term of this Agreement, a vacancy shall occur among the Class B Directors of MSTC, and any Bank shall cease, by reason thereof, to be represented on the board of directors of MSTC, MSE shall appoint to fill such vacancy, a person designated in writing by such Bank, provided that such person shall have been approved by a majority of the remaining Class B Directors, in accordance with Article III, Section 8 of the By-Laws of MSTC.

6. This Agreement shall terminate immediately prior to the annual meeting of shareholders of MSTC for the year 1978, and shall be of no further force or effect thereafter. In the event that any of the Banks shall cease to be a participant of MSTC prior to said annual meeting, this Agreement shall terminate, as between MSE and such Bank, on the date on which such Bank ceases to be a participant of MSTC.

7. Notices and other communications hereunder shall be in writing and shall be deemed to have been duly given if delivered manually or mailed by registered mail, postage prepaid, to the address shown below, or such other address as such addressee shall have designated in writing to the party giving such notice or communication:

If to MSE:
Midwest Stock Exchange, Inc., 120 South LaSalle Street, Chicago, Illinois 60693, Attn: President.

If to the Banks:
American National Bank & Trust Company, 33 North LaSalle Street, Chicago, Illinois 60690 Attn: Mr. Perry Callas.
Continental Illinois National Bank and Trust Company of Chicago, 231 South LaSalle Street, Chicago, Illinois 60693, Attn: Mr. Gerald M. Czarnecki.
The First National Bank of Chicago, One First National Plaza, Chicago, Illinois 60670, Attn: Mr. Richard Wood.
Harris Trust and Savings Bank, 111 West Monroe Street, Chicago, Illinois 60690, Attn: Mr. Robert H. Long.
The Northern Trust Company, 50 South LaSalle Street, Chicago, Illinois 60675, Attn: Mr. Stuart Hamilton.

8. This Agreement shall be binding on and enforceable against the parties hereto and their respective successors and assigns, provided that this Agreement may not be assigned by any party without the prior written consent of the others, except in connection with a merger or consolidation or a sale of all or substantially all of the assets of such party.

9. If any party hereto shall be prohibited from performing any obligation hereunder, or if the performance of any such obligation shall become impracticable, by reason of any legislation or rule or regulation of governmental authority, or any action by any court or other governmental agency, such party shall to that extent be discharged of its obligations hereunder.

10. The construction and performance of this Agreement shall be governed by the laws of the State of Illinois.

11. This Agreement constitutes the entire understanding of the parties relating to the subject matter hereof and supersedes all prior understandings and agreement, whether written or oral, relating to said subject matter, including, without limitation, the 1973 Memorandum, which is hereby expressly cancelled and rescinded.

In witness whereof, the parties hereto have executed this Agreement, by their duly authorized officers, as of the date first set forth above.

MIDWEST SECURITIES TRUST COMPANY PROPOSED AMENDMENT TO ARTICLE III, SECTION 2 OF BY-LAWS

Section 2. Number, Tenure and Election. The board of directors of the Corporation shall be composed of six Class A Directors and five Class B Directors. Except as expressly provided otherwise in this Article III, the powers, rights, duties and obligations of Class A Directors and Class B Directors shall be identical. Each director shall hold office until the next annual meeting of shareholders or until his succesor shall have been elected and qualified. The Class A Directors shall be appointed by the sole shareholder of the Corporation, the Midwest Stock Exchange, and shall be selected with a view towards providing fair representation for the interests of said Exchange and of those members of said Exchange which are participants of the Corporation. Class B Directors shall be selected and appointed as follows:

1. Not less than sixty days before each annual meeting of shareholders, the sole shareholder shall nominate (by delivering to the Secretary of the Corporation a list of nominations) five individuals for election as Class B Directors. Within five days thereafter, the Secretary shall mail copies of the list of nominations to each participant of the Corporation which is not a member of the Midwest Stock Exchange ("Non-Member Participant"). Non-Member Participants shall have the right to nominate additional persons by filing with the Secretary, not less than thirty days prior to the annual meeting, a petition signed by not less than three Non-Member Participants. No petition shall nominate more than five individuals, and no participant shall sign petitions nominating, in the aggregate, more than five individuals.

2. In the event that no nominating petition is filed within the time prescribed above, the sole shareholder shall, at the annual meeting, appoint as Class B Directors the individuals named in the list of nominations mailed to Non-Member Participants: provided that if any such individual shall at that time be unable or unwilling to serve, that individual's position shall be left vacant until the first meeting of directors following the annual meeting of shareholders, and the sole shareholder shall thereafter appoint, to fill the vacancy, such individual as a majority of the other Class B Directors shall approve.

3. In the event that one or more nominating petitions are filed within the prescribed time, the Class B Directors shall be selected by an election, to be conducted as follows:

(a) Not less than twenty days prior to the annual meeting, the Secretary shall transmit to each Non-Member Participant a ballot setting forth the names of all nominees, incduing those nominated by petition, and the number of votes to which the Non-Member Participant is entitled, determined as hereinafter set forth.

(b) The number of votes to which each Non-Member Participant shall be entitled shall be determined as follows:

(i) There shall be determined, for each Non-Member Participant, (A) the ratio (expressed as a percentage) between the aggregate fees paid to the Corporation by the Non-Member Participant during the Corporation's most recent fiscal year and the total fees paid by all participants during such fiscal year; and (B) the ratio (expressed as a percentage) between the average value of the securities held by the Non-Member Participant in depository free or pledged positions with the Corporation during such fiscal year (determined by taking the average of the values of the securities so held as of the close of each month during such fiscal year) and the average value of the securities so held by all participants during such fiscal year (determined in the same manner).

(ii) The percentages determined in accordance with clauses (b)(i)(A) and (b)(i)(B), above, shall be added together, and each Non-Member Participant shall be entitled to that number of votes which bears the same proportion to 1,000 as the sum of such percentages bears to 100%. The total number of votes to which Non-Member Participants in the aggregate shall be entitled in any election of Class B directors shall be the number (not exceeding 2,000) determined pursuant to the preceding sentence.

(iii) If the aggregate number of votes to which all Non-Member Participants are entitled shall be less than 1,000, the sole shareholder shall be entitled to as many votes as the difference between 1,000 and the number of votes to which all Non-Member Participants are entitled, and the Secretary shall provide

to the sole shareholder an appropriate ballot.

(c) Each Non-Member Participant (and the sole shareholder, if the sole shareholder shall be entitled to vote) shall have the right to cast the number of votes to which it shall be entitled for as many nominees as there are positions to be filled, or to cumulate said votes, and to give one nominee as many votes as the number of positions multiplied by the number of said votes, or to distribute its votes on the same principle among as many nominees as it shall desire.

(d) At the annual meeting, the sole shareholder shall appoint as Class B Directors the five individuals receiving the highest number of votes in ballots returned to the Secretary prior to the time of the annual meeting.

MIDWEST SECURITIES TRUST COMPANY PROPOSED AMENDMENT TO ARTICLE III, SECTION 8 OF BY-LAWS

Section 8. Vacancies. Any vacancy occurring in the board of directors and any directorship to be filled by reason of an increase in the number of directors may be filled by election at an annual meeting or at a special meeting of shareholders called for that purpose; provided, however, that no person shall be elected to fill any vacancy among the Class B Directors, or any newly created Class B directorship, unless such person shall have been approved by a mapority of the Class B Directors then in office.

STATEMENT OF BASIS AND PURPOSE

The proposed changes are designed to build a strong MSTC based upon active support from both the broker/dealers and institutions. It recognizes the requirements of the banks to participate in the policy decisions of MSTC as they commit the assets under their control to this institution. It also lays the groundwork for a "user controlled" board satisfying the requirements of the amendments of the 1934 Act.

The proposed agreement with the Chicago clearing house banks would enhance MSTC's capacity to function as a trust company and facilitate further immobilization of the stock certificates by providing a practicable basis for the banks to become active participants.

The amendments to the MSTC By-Laws are designed to promote the prompt and accurate clearance and settlement of securities transactions by fostering cooperation and coordination with persons engaged in the clearance and settlement of securities transactions. Moreover, by providing a practicable basis for active bank participation, the amendments remove impediments and perfect the mechanism of a national system for the prompt and accurate clearance and settlement of securities transactions. Finally, the amendments provide for a fair representation of the shareholder participants in the section of directors and administration of MSTC's affairs.

The cancelling of the previous memorandum of understanding on a comprehensive securities depository system is made necessary by the adoption of a successor agreement.

Other than discussions with the clearing house banks on terms of the agreement, no other comments were solicited nor received.

MSTC does not believe that the proposed changes would impose any burden on competition.

On or before January 23, 1976, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before January 9, 1976.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS, *Secretary.*

DECEMBER 12, 1975.

NEW YORK STOCK EXCHANGE, INC.

Proposed Rule Changes

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on November 3, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission proposed rule changes as follows:

STATEMENT OF THE PROPOSED RULE CHANGES

The following is the proposed text of proposed amendments to the Rules and Procedures of Stock Clearing Corporation:

1. Add the following at the end of Rule 1:

The term "Special Representative" has the meaning specified in Rule 39.

2. Amend Rule 7 as follows:

Renumber Section 10 as Section 11 and add a new Section 10 as follows:

"Sec. 10. A Special Representative may submit, on any business day in accordance with the time schedules established or from time to time determined by the Corporation, odd-lot transaction data, which may reflect the netted results of other transactions, as to the rights and obligations of a Clearing Member which calls for the delivery of Cleared Securities and is between Clearing Members, notwithstanding the fact that the rights and obligations do not represent transactions compared under the foregoing sections of this Rule, provided that the data submitted regarding the transaction meets the requirements specified in the Procedures. The obligations of the Clearing Member reflected in such odd-lot transaction data shall be deemed to have been confirmed and acknowledged by the Clearing Member designated by the Special Representative as a party thereto and to have been adopted by such Clearing Member and, for the purposes of these Rules and determining the rights and obligations between the Corporation and any such Clearing Member under these Rules, shall be valid and binding upon such Clearing Member to the same extent as any transaction, and shall be deemed to be transactions, compared under this Rule. A Clearing Member which has been so designated by a Special Representative shall resolve any differences or claims regarding the rights and obligations reflected in the odd-lot transaction data submitted by the Special Representative with the Special Representative, and the Corporation shall have no responsibility in respect thereof or to adjust its records or the accounts of the Clearing Member in any way, otherwise than pursuant to the instructions of the Special Representative."

3. Amend Rule 11, Section 10 as follows:

"Sec. 10. A CNNS Security shall be removed from the list of CNS Securities

V 40 245 DEC 19 75 XUM

(a) immediately upon receipt by the Corporation of written notice from DTC that the security is no longer an Eligible Security under DTC's rules or (b) upon a determination by the Corporation that rights in respect of the security may expire, including the right to convert, exchange or tender the security for other securities or property and other rights of a similar nature, and such removal shall be promptly communicated to all Clearing Members by the Corporation. In such event, the Corporation shall, on the first Settlement Date on which such securities are not deliverable through the facilities of DTC and on each subsequent Settlement Date for any CNS Contracts entered in the CNS Accounting Operation prior to the effective date of removal, match with respect to each such Settlement Date opening Short and Long Positions in such security in that manner which the Corporation in its discretion may provide, issue receive and deliver security orders in respect thereof for each such day, which orders shall have the same status as security balance orders issued in connection with the Balance Order Accounting Operation and will be subject to those provisions of these Rules pertaining to such security balance orders unless otherwise specified by the Corporation and close out such positions in the CNS System by journal entry. Any CNS Contracts not entered into the CNS Accounting Operation prior to the effective date of removal, shall be deemed to be Balance Order Contracts and shall be settled in the Balance Order System under Rules 8, 9 and 10; *provided, however, that any such CNS Contract submitted by a Special Representative may, in the Corporation's diseretion, be returned to the Special Representative in which case it shall not be settled through the facilities of the Corporation.*

4. Amend Rule 20, Section 5(b) as follows:

"(b) If the Time of Insolvency occurs when a Balance Order Accounting Operation covering transactions effected by the insolvent Clearing Member on a day prior to that on which the Time of Insolvency occurs has not been completed, the Corporation, in its discretion, may determine either (i) that such transactions shall be excluded from such incompleted Balance Order Accounting Operation or CNS Accounting Operation, in which case the exchange tickets covering such transactions which have been delivered to the Corporation shall be returned to the Clearing Member who issued the same *and any odd-lot transaction data submitted to the Corporation by a Special Representative under Section 10 of Rule 7 shall be returned to the Special Representative,* or (ii) that such of the transactions of the insolvent Clearing Member as have been compared by the Corporation *or submitted to the Corporation under Section 10 of Rule 7* shall be included in such incompleted Balance Order Accounting Operation or CNS Accounting Operation and that such Operation shall be completed by the Corporation, in which case the provisions of Section 6 of this Rule shall apply to the security balance orders and the actions to be taken with respect thereto when the same are issued on completion of such Balance Order Accounting Operation and to the Completion of the CNS Accounting Operation; provided, however, that the Corporation shall not be required to handle any incompleted Balance Order Accounting Operation in the same manner as any incompleted CNS Accounting Operation."

5. Add the following new Rule 39:

"Rule 39. The Corporation may accept or rely upon any instruction given to the Corporation by a Clearing Member including wire transmission, physical delivery or delivery by other means of instructions recorded on magnetic tape or other media or of facsimile copies of instructions, in form acceptable to the Corporation and in accordance with the Procedures, which reasonably is understood by the Corporation to have been delivered to the Corporation by the Clearing Member, and the Corporation shall have no responsibility or liability for any errors which may occur, without negligence on the Corporation's part, in the course of transmission or recording of any transmissions or which may exist in any magnetic tape, document or other media so delivered to the Corporation.

"The Corporation may accept and rely upon any instruction given to the Corporation by a Special Representative, including wire transmission, physical delivery or delivery by other means of instructions, in form acceptable to the Corporation and in accordance with the Procedures, which reasonably is understood by the Corporation to have been delivered to the Corporation by the Special Representative, provided that such instruction does not relate to the Comparison Operation, and the Corporation shall have no responsibility or liability for any errors which may occur, without negligence on the Corporation's part, in the course of transmission or recording of transmission or which may exist in any magnetic tape, document or other media so delivered to the Corporation and the Corporation shall be entitled to act pursuant to any such instruction as though such instruction had been received from the Clearing Member for which the Special Representative is acting.

"Any Clearing Member delivering instructions as provided above, or on whose behalf a Special Representative shall deliver instructions as provided above, shall indemnify the Corporation, and any of its employees, officers, directors, shareholders, agents, Settling Members and Non-Members who may sustain any loss, liability or expense as a result of (a) any act done in reliance upon the authenticity of any instruction received by the Corporation, (b) the inaccurancy of the information contained therein or (c) effecting transactions in reliance upon such information or instruction against any such loss, liability or expense so long as such transactions are effected in accordance with such information and instructions even though they be inaccurate or not authentic and so long as the person asserting a right to indemnification shall not have knowledge of such inaccuracy or lack of authenticity at the time of the event or events giving rise to such loss, liability or expense.

"Notwithstanding the foregoing, the Corporation will not act upon any instruction purporting to have been given by a Clearing Member or a Special Representative which is received by wire transmission or in the form of facsimile copies or magnetic tape or media other than written instructions or from a Special Representation commencing one business day after the Corporation receives written notice from the Clearing Member that the Corporation shall not accept such instructions until such time as the Clearing Member shall withdraw such notice.

"For the purposes of these Rules a Special Representative shall be Carlisle DeCoppett & Co., but only to the extent that firm, or its partners, act as odd-lot dealers under the rules of the Exchange."

6. Amend the first paragraph on page 17 of the SCC Procedures as follows:

ACCOUNTING OPERATION

Compared trades generated by the Comparison Operation *and transactions deemed to be transactions compared under SCC Rule 7 by reason of Section 10 of said Rule 7* enter either the Balance Order Accounting Operation or the CNS Accounting Operation. The Balance Order Accounting Operation includes all Balance Order Securities except for transactions in Balance Order Securities for which receive and deliver security orders are issued which identify the original purchaser and seller and are issued at original contract money (e.g. Special Trades).

7. Amend the first paragraph of Section B on page 19 of the SCC Procedures as follows:

B. *CNS ACCOUNTING OPERATION.* All compared trades in CNS Securities (excluding Special Trades) are processed through the CNS Accounting Operation. This includes transactions compared on the T+1, T+2 and Added Trade Contract Lists. Purchases and sales are summarized on a Compared Trade Summary (see Figure 16). This report lists the CNS Contracts in each security originally listed in the T+1, T+2 and Added Trade Contract Lists *as well as transactions submitted to SCC by a Special Representative.*

8. Add the following paragraph at the end of Section B on page 19 of the SCC Procedures:

"The CNS Compared Trade Summary will reflect the transaction data submitted by Special Representatives (i.e. the share and money balance for each CNS Security) as a single item as provided to SCC by the Special Representative. The letter "C" in the first column of the Compared Trade Summary will identify such items. Each "As Of" trade submitted to SCC by a Special Representative will appear on the Compared Trade Summary as an individual trade, will be identified as "As Of", and will show the original trade date."

STATEMENT OF BASIS AND PURPOSE

The Basis and purpose of the foregoing rule changes is as follows:

PURPOSE OF PROPOSED RULE CHANGES

Odd-lot transactions effected on the Exchange are compared and netted by Carlisle De Coppett & Co. ("Carlisle"). Under existing procedures netted data is submitted to The Depository Trust Company ("DTC") and DTC, pursuant to its Rules, adjusts the accounts of DTC Participants in accordance with Carlisle's instructions. Carlisle acts as a Special Representative under DTC's Rules (see DTC Rule 6). The purpose of the proposed rule changes is to permit odd-lot transactions in securities which are eligible for the SCC CNS System to be settled through the CNS System rather than through DTC. As a consequence of this change, odd-lot transactions, already having been subject to some netting by Carlisle, will be netted with CNS positions. In addition, there will be a reduction in the number of deliveries which must be made. It is expected that the inclusion of odd-lot transactions in the CNS System will reduce the operations work required in the offices of SCC Clearing Members and reduce their expenses.

BASIS UNDER THE ACT FOR ADOPTING THE PROPOSED RULE CHANGES

(a) Not Applicable.

(b) The proposed rule changes relate to the Exchange's wholly-owned subsidiary, SCC and SCC's capacity to facilitate the prompt and accurate clearance and settlement of securities transactions.

(c) Not Applicable.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHERS ON PROPOSED RULE CHANGES

Solicitation of comments was comments was commenced with this filing. No comments have been received.

BURDEN ON COMPETITION

None.

On or before January 23, 1975, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule changes, or

(B) institute proceedings to determine whether the proposed rule changes should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before 15 days after the date of this publication.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS, *Secretary.*

DECEMBER 12, 1975.

DEPARTMENT OF LABOR

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Notice of Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 USC 1924 (b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity or existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75, published January 29, 1975 (40 FR 4393). In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to: Deputy Assistant Secretary for Employment and Training, 601 D Street, NW., Washington, D.C. 20213.

Signed at Washington, D.C. this 15th day of December, 1975.

BEN BURDETSKY,
Deputy Assistant Secretary for Employment and Training.

MIGRANT AND OTHER SEASONALLY EMPLOYED FARMWORKERS PROGRAMS

Selection of Potential Sponsors: Corrections

In FR Doc. 75-31522 appearing at page 54352 in the issue for Friday, November 21, 1975, (notice of the selection of potential sponsors for migrant and other seasonally employed farmworker programs under the Comprehensive Employment and Training Act of 1973, section 303), make the following changes:

1. On page 54353, paragraph 2(b) is corrected by changing the date from "January 15, 1975" to "January 15, 1976".

2. On page 54354, a transposition of lines obscured the due dates set forth in paragraph 4(b). For this reason, the due dates have been extended and paragraph 4 is reprinted in its entirety with the revised dates:

4. *Resolicitation.* In the following States no designation of potential sponsors has been made because no Funding Request was received.

Maine	Wyoming
West Virginia	Nevada
Utah	

Pursuant to 29 CFR 97.216(b), the Secretary has made the following determinations for these States:

(a) The Secretary intends to initiate, after January 5, 1976, negotiations for a Fiscal Year 1976, section 303 program in the State (i) with the current section 303 program sponsor, if any, provided that the sponsor's present performance is adequate and, if these negotiations fail, (ii) with the CETA title I prime sponsor whose jurisdiction contains the largest number of migrant and seasonal farmworkers.

(b) The Secretary invites organizations eligible under § 97.205 which are interested in receiving a grant for section 303 programs in the listed States to submit Funding Requests to the address given in 29 CFR 97.214(a) on or before January 19, 1976. Such organizations must also submit to the same address a notice of intent to submit a Funding Request for the State; the notice of intent must be received before close of business January 5, 1976, or the Funding Request will not be considered. A preapplication for federal assistance form is not required.

(c) In those States for which a timely notice of intent has been received, the Secretary will not begin negotiations for a section 303 program until a Funding Request has been received and the priority set forth in paragraph 4(a) above, has been re-examined in light of the new Funding Request.

(d) Funding Requests shall be prepared in accordance with the requirements of 29 CFR 97.213 and 97.214.

Inquiries regarding the content of this announcement are to be directed to the address listed below:

U.S. Department of Labor, Employment and Training Administration, Patrick Henry Building, Room 7122, 601 D Street, NW., Washington, D.C. 20213.

Attn: Charles I. Carter, Chief, Division of Farmworker Programs.

Signed at Washington, D.C., this 5th day of December 1975.

PIERCE A. QUINLAN,
Associate Manpower Administrator, Office of Manpower Development Programs.

Office of the Secretary

[TA-W-203]

CORNING GLASS WORKS

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-203: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on October 2, 1975 in response to a worker petition received on October 2, 1975 which was filed by the American Flint Glass Workers Union on behalf of workers formerly producing glass bulbs for monochrome television picture tubes at the Albion, Michigan plant of Corning Glass Works, Corning, New York.

The notice of investigation was published in the FEDERAL REGISTER on October 15, 1975 (40 FR 48415). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Corning Glass, its customers, the U.S. International Trade Commission, the Department of Commerce, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) that a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) that sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) that increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers at the Albion plant declined 63.6 percent in the first nine months of 1975 compared to the like period in 1974. Employment of production workers of Albion ceased in the third quarter of 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales at the Albion plant declined 40.6 percent in the first nine months of 1975 compared to the first nine months of 1974. Production declined 57.7 percent in the first nine months of 1975 compared to the first nine months of 1974. The plant ceased production in the third quarter of 1975.

INCREASED IMPORTS CONTRIBUTED IMPORTANTLY

Imports of glass bulbs for monochrome televisions are reported with glass bulbs for color televisions, other cathode ray tube glass, and miscellaneous electronic and lighting glass. Imports of these products have represented less than one percent of domestic production and consumption from 1970 through 1974.

Customer officials and knowledgeable industry representatives report extremely limited imports of glass bulbs for monochrome televisions. International trade in glass bulbs is limited by their low unit value of manufacture relative to their high shipping cost.

No customers of the Albion plant had purchased imported glass bulbs before the plant closed. The high shipping costs of glass bulbs prevented customers from purchasing imported bulbs. Declines in purchases from the Albion plant were attributed to the decline in the domestic monochrome television industry.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with glass bulbs for monochrome television picture tubes produced at the Albion, Michigan plant of Corning Glass Works, Corning, New York did not contribute importantly to the total or partial separations of the workers at such plant.

Signed at Washington, D.C. this 5th day of December 1975.

GLORIA G. PRATT,
Director, Office of Foreign Economic Policy.

[FR Doc.75-34286 Filed 12-18-75;8:45 am]

[TA-W-204]

FAIRFOOT SHOE COMPANY, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-204: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on October 2, 1975 in response to a worker petition received on October 2, 1975 which was filed by the Boot and Shoe Workers Union on behalf of workers and former workers producing women's footwear at the Bedford, Pa. plant of Fairfoot Shoe Company, Incorporated, a division of Evy Footwear Company, Inc., New York, New York.

The notice of investigation was published in the FEDERAL REGISTER on October 30, 1975 (40 FR 50585). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Fairfoot Shoe Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, American Footwear Industries Association, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That significant number or proportion to the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated.

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important than any other cause.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers declined 16 percent in the first three quarters of 1975 compared to the like period in 1974.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Production at the Bedford, Pennsylvania plant declined 17 percent in the first three quarters of 1975 compared to the first three quarters of 1974. Sales declined 27 percent in the first three quarters of 1975 compared to the first three quarters of 1974.

INCREASED IMPORTS CONTRIBUTED IMPORTANTLY

Imports of articles like or directly competitive with those produced at Fairfoot Shoe Company increased from 167 million pairs in 1970 to 189 million pairs in 1974. Imports increases from 105 percent of domestic production in the first half of 1974 to over 123 percent the first half of 1975.

The ratios of imports to domestic consumption and production increased from 40 percent and 66 percent, respectively, in 1970 to 51 percent and 104 percent, respectively, in 1974.

Customers reduced purchased of Fairfoot's Shoes in favor of lower-priced imports. Reduced sales of women's dress footwear by Fairfoot led to rapidly declining production at Fairfoot.

Thus increasing penetration of imports of women's footwear in the domestic market contributed importantly to the total or partial separations of workers at Fairfoot Shoe Company, Bedford, Pennsylvania.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's footwear produced at the Bedford, Pennsylvania plant of Fairfoot Shoe Company contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All hourly, piecework, and salaried workers engaged in employment related to the production of women's footwear at the Bedford, Pennsylvania plant of Fairfoot Shoe Company who became totally or partially separated from employment on or after November 8, 1974 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 9th day of December 1975.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

[FR Doc.75-34293 Filed 12-18-75;8:45 am]

[TA-W-189]

LAKE MANUFACTURING CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-189; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on September 26, 1975 in response to a worker petition received on September 26, 1975 which was filed by the Amalgamated Clothing Workers Union on behalf of workers formerly producing ladies slacks at the Easton, Pennsylvania plant of Lake Manufacturing Company.

The notice of investigation was published in the FEDERAL REGISTER on October 7, 1975 (40 FR 46372). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Lake Manufacturing Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

V40245 DEC 19 75 XUM

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard as to whether the other criteria are satisfied, the investigation reveals that the third criterion has not been met.

Lake Manufacturing Company produced ladies slacks made of woven and knit natural and man-made fibers. Imports of ladies slacks like or directly competitive with those produced at Lake Manufacturing Company are included in the category of women's, misses, and children slacks. Imports decreased from 144 million units in 1972 to 110 units in 1974. The ratios of imports to domestic consumption and production decreased from 40.7 percent and 68.7 percent, respectively in 1972 to 32.5 percent and 48.2 percent in 1974.

The evidence developed by the Department's investigation indicated that customers of Lake Manufacturing Company decreased purchases because of fashion changes, styling requirements and the company's inability to meet delivery schedules. These customers did not report shifting purchases from Lake Manufacturing to foreign sources.

Additionally, increased costs and difficulties in obtaining basic materials caused cutbacks in production. Shortly thereafter, the company laid off employees. The continuing decline in sales associated with a reduction in orders for ladies slacks is attributable to the general downturn in the economy. The plant closed in January 1975.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with ladies slacks produced at the Easton, Pennsylvania plant of Lake Manufacturing Company did not contribute importantly to the total or partial separations of the workers at such plant.

Signed at Washington, D.C. this 9th day of December 1975.

JAMES F. TAYLOR,
Director,
Planning and Evaluation Staff.

[FR Doc.75-34289 Filed 12-18-75;8:45 am]

[TA-W-196, 235]

LOUIS GOLDSMITH, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-196, 235: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on September 26, 1975 in response to a worker petition received on September 26, 1975 which was filed by the Amalgamated Clothing Workers of America on behalf of workers formerly producing men's suits and trousers at the Souderton, Pennsylvania plant of Louis Goldsmith, Inc., a division of Kayser-Roth Corp., a subsidiary of Gulf & Western Corp. The investigation was expanded on October 14, 1975 in response to a worker petition received on October 14, 1975 which was filed by the Amalgamated Clothing Workers of America on behalf of workers formerly producing men's suits and sportcoats at the firm's Philadelphia, Pennsylvania plant.

The notices of investigation were published in the FEDERAL REGISTER (40 FR 46373;49828) on October 7 and 24, 1975. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Louis Goldsmith, its customers, the U.S. Department of Commerce, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certificate of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision on the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant Total or Partial Separations

The average number of hourly workers employed at Louis Goldsmith's Philadelphia, Souderton, Norristown and Sassamansville plants declined 34 percent, 12 percent, 4 percent and 19 percent, respectively, in the first nine months (five months in the case of Souderton which closed in May 1975) of 1975, compared to the like peirod in 1974.

Sales or Production, or Both, Have Decreased Absolutely

Production at Goldsmith's Philadelphia, Souderton and Norristown plants declined 25 percent, 30 percent and 39 percent, respectively, from 1973 to 1974, while production increased 5 percent at the Sassamansville plant. In the first nine months (five months in the case of Souderton) of 1975, production at the Philadelphia, Souderton and Sassamansville plants declined 38 percent, 22 percent and 32 percent, respectively, while production at the Norristown plant increased 42 percent, compared to the like periods in 1974.

Increased Imports Contributed Importantly

From 1973 to 1974, imports of men's tailored suits, trousers and overcoats decreased absolutely and as a ratio to domestic production and consumption. During the same period, imports of men's tailored sportcoats decreased absolutely but increased as a ratio to domestic production and consumption.

In the first seven months of 1975, imports of men's tailored suits and trousers increased absolutely while imports of men's tailored sportcoats and overcoats decreased absolutely when compared with the like period in 1974.

Declines in production and employment at Goldsmith's Philadelphia, Norristown and Sassamansville plants were caused by the company's loss of sales to domestic competitors. Major customers reduced purchases from Goldsmith in 1974 and 1975 because of frequent and significant price increases on the part of Goldsmith. Those customers shifted orders to other domestic suppliers who offered menswear of comparable quality and styling at substantially lower prices.

The Souderton plant was used exclusively as a contract sewing facility for Raewin Clothes, Inc., another division of Kayser-Roth, from June 1974 to May 1975. During that period, Raewin's sales fell substantially as some of their customers shifted orders to other domestic manufacturers because of dissatisfaction with the quality and styling of Raewin's products. Because of persistent loss of sales to domestic competitors and overcapacity at Goldsmith's remaining plants, officials of Kayser-Roth decided to close the Souderton facility in May 1975.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's tailored suits, sportcoats, trousers and overcoats produced at the Philadelphia, Souderton, Norristown and Sassamansville, Pennsylvania plants of Louis Goldsmith, Inc. did not contribute importantly to the total or partial separation of the workers at such plants.

Signed at Washington, D.C. this 5th day of December 1975.

JAMES F. TAYLOR,
Director,
Planning and Evaluation Staff.

[TA-W-195]

RAEWIN CLOTHES, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-195: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on September 26, 1975 in response to a worker petition received on September 26, 1975 which was filed by the Amalgamated Clothing Workers of America on behalf of workers formerly producing men's suiting coats and trousers at the Quakertown, Pennsylvania plant of Raewin Clothes, Inc., a division of Kayser-Roth Corp., a subsidiary of Gulf & Western Corp.

The notice of investigation were published in the FEDERAL REGISTER (40 FR 46374) on October 7, 1975. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Raewin Clothes, its customers, the U.S. Department of Commerce, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated.

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant Total or Partial Separations

The average number of production workers employed at the Quakertown plant declined 11 percent from 1973 to 1974 and declined 56 percent in the first half of 1975 compared to the like period in 1974.

Sales or Production, or Both, Have Decreased Absolutely

Production at the Quakertown plant declined 16 percent from 1973 to 1974 and declined 85 percent in the first half of 1975 compared to the like period in 1974.

Increased Imports Contributed Importantly

From 1973 to 1974, imports of men's tailored suits decreased absolutely and as a ratio to domestic production and consumption. During the same period, imports of men's tailored sportcoats decreased absolutely but increased as a ratio to domestic production and consumption.

In the first seven months of 1975, imports of men's tailored suits increased absolutely while imports of men's tailored sportcoats decreased absolutely when compared with the like period in 1974.

Raewin sales and production were influenced by the quality and styling of its output and the recession. Notwithstanding increased levels of imports of suits and sportcoats there is no indication that increased import competition was an important factor in the decline in sales or production of the Quakertown facility.

Kayser-Roth Corp., the parent firm of Raewin Clothes, decided to close the Quakertown facility in June 1975 after Raewin proved ineffective in competing with other domestic manufacturers of menswear. Major customers of Raewin Clothes substantially reduced orders in recent seasons because of unpopular styling and poor quality of Raewin's products and because of decreased demand associated with the recession. Those customers that were dissatisfied with Raewin's products shifted purchases to other domestic rather than foreign manufacturers.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's tailored suits and sportcoats produced by Raewin Clothes, Inc. did not contribute importantly to the total or partial separation of the workers of such firm.

Signed at Washington, D.C. this 5th day of December 1975.

JAMES F. TAYLOR,
Director,
Planning and Evaluation Staff.

[TA-W-188]

WEBSTER CLOTHES, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-188; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on September 26, 1975 in response to a worker petition received on that date which was filed by the Amalgamated Clothing Workers of America on behalf of workers and former workers producing men's suits, sportcoats and pants at the Westminster, Maryland plant of Webster Clothes Inc., Baltimore, Maryland.

The notice of investigation was published in the FEDERAL REGISTER (40 FR 46376) on October 7, 1975. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Webster Clothes, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant Total or Partial Separations

Employment remained stable from 1972 through 1973. In 1974, the average number of production workers decreased 24 percent. The plant closed in October 1974.

Sales or Production, or Both, Have Decreased Absolutely

Production at the Westminster, Maryland plant declined 40 percent from fiscal 1973 to fiscal 1974. Sales data were not available as the company only produced on order from Webster Clothes. Sales data were equal to production data.

Increased Imports Contributed Importantly

Imports of men's and boys' suits, like or directly competitive with those produced at the Westminster, Maryland plant increased relatively from 1971 to 1973 then declined in 1974.

The ratios of imports to domestic production and consumption of men's and boys' suits increased from 6.0 and 5.7 percent, respectively in 1971 to 10.5 and 9.5 percent, respectively in 1973. The ration of imports to production declined slightly from 1973 to 1974; then increased sharply from 7.7 percent in the

V40245 DEC 19 75 XUM

first 7 months of 1974 to 22.1 percent for the same period in 1975.

Imports of men's and boys' sportcoats increased from 1971 to 1974.

The ratios of imports to domestic production and consumption of men's and boys' sportcoats increased from 12.9 and 11.4 percent, respectively in 1971 to 22.3 and 18.2 percent in 1974. The ratio of imports to production increased from 24.5 percent in the first seven months of 1974 to 36.7 percent in the first seven months of 1975.

Imports of men's and boys' trousers increased from 1971 to 1972 then declined thereafter.

The ratios of imports to domestic production and consumption of men's and boys' trousers increased from 16.3 and 14.0 percent, respectively, in 1971 to 25.7 and 20.5 percent in 1972 then declined thereafter to 19.7 and 16.4 percent, respectively in 1974.

The evidence developed by the Department's investigation indicated that the ceasing of production of Webster Clothes' manufacturing division was attributable to the impending sale of their rented plant in Westminster, Maryland to the city of Westminster and their lack of new capital to start up operations elsewhere. The sale was consummated in January, 1975. Webster Clothes' divestiture of its manufacturing operations was also based on a decision to try to compete more successfully as a retail business. Webster currently sells goods supplied by other domestic manufacturers and avoids costly piece good commitments and gains the ability to take quick advantage of retail fashion changes.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's suits, sportcoats and pants produced at the Westminster, Maryland plant did not contribute importantly to the total or partial separations of the workers at such plant.

Signed at Washington, D.C. this 4th day of December 1975.

Wage and Hour Division

INSTITUTIONS OF HIGHER EDUCATION

Certificates Authorizing Employment of Students at Subminimum Wages

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended, the regulation on employment of full-time students at subminimum wages (29 CFR 519), and Administrative Order No. 621 (36 FR 12819), the institutions of higher education listed in this notice have been granted authority to employ their full-time students outside of the individual student's regularly scheduled hours of instruction at hourly rates not less than 85 percent of the applicable statutory minimum rate specified under section 6 of the Act.

The regulation provides for the authority to be effective on the date a properly completed application is forwarded to the Wage and Hour Division provided applicable conditions of the regulation are met. After review by the Division, the authority may be continued in effect for up to one year from the date the application was forwarded to the Division. The expiration date of the authority granted to a particular institution of higher education listed in this notice occurs between June 20, 1976 and November 20, 1976, inclusive.

The terms and conditions of the regulation further limit the authority to employ full-time students at subminimum wages to not more than 20 hours per week when school is in session, prohibit subminimum wage employment in unrelated trades or businesses such as apartment houses, stores, or other businesses not primarily catering to the students of the institution, and prohibit the hiring of full-time students at subminimum wages for work in a unit or units of the campus where abnormal labor conditions, such as a strike or lockout exist. The authority does not excuse noncompliance with higher standards applicable to full-time students under any other Federal law, State law, local ordinance, or union or other agreement.

The authority has been granted to each institution of higher education upon the representations of the institution which, among other things, were that employment of full-time students at subminimum wages is necessary to prevent curtailment of opportunities for employment, the hiring of full-time students at subminimum wages will not create a substantial probability of reducing the full-time employment opportunities of persons other than those employed under the authority, and such authority will not result in a reduction of the wage rate paid to a current employee. The authority may be annulled or withdrawn in the manner provided in Part 528 of Title 29 of the Code of Federal Regulations. Any person aggrieved by the granting of the authority to any of the institutions listed may seek a review or reconsideration thereof on or before February 2, 1976.

Signed at Washington, D.C., this 15th day of December, 1975.

DONALD T. CRUMBACK,
Authorized Representative of the Administrator.

LEASE AND INTERCHANGE OF VEHICLES BY MOTOR CARRIERS

At a Session of the INTERSTATE COMMERCE COMMISSION, Motor Carrier Leasing Board, held at its office in Washington, D.C., on the 10th day of December, 1975.

It appearing, That a petition has been filed by B F Walker, Inc., (MC-74321 and numerous subs) and Noble Transport, Inc., as the operator (by virtue of temporary authority pursuant to MC-F-12573) of the rights of Ashworth Transfer, Inc. (MC-1872 and various subs), under common control, for waiver of paragraphs (a)(3) and (c) of section 1057.4 of the Lease and Interchange of Vehicles Regulations (49 CFR 1057), concerning equipment leased between petitioners;

It further appearing, That petitioners have a jointly administered program applying the same standards of inspection and maintenance to equipment in accordance with the motor carrier safety regulations of the U.S. Department of Transportation;

It further appearing, That that Department offers no objection to granting the petition, although operations will continue to be monitored by that agency;

It is ordered, That waiver of paragraphs (a)(3) and (c) of § 1057.4, be, and, it is hereby granted provided that the equipment is inspected on the day it is to be leased and found to meet the requirement of the motor carrier safety regulations of the U.S. Department of Transportation and that petitioners remain in satisfactory compliance with those regulations and under common control.

By the Commission, Motor Carrier Leasing Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

Supplemental Notice

DECEMBER 19, 1975.

The following publications include motor carrier, water carrier, broker, freight forwarder and rail proceedings indexed as follows: (1) Grants of authority requiring republication prior to certification; (2) notices of filing of petitions for modification of existing authorities; (3) new operating right's applications directly related to and processed on a consolidated record with finance applications filed under Sections 5(2) and 212(b); (4) notices of filing of Sections 5(2) and 210a(b) finance applications; and (5) notices of filing of Section 212(b) transfer applications.

Each applicant (except as otherwise specifically noted) states that there will be no significant effect on the quality of the human environment resulting from approval of its application in compliance with the requirements of 49 C.F.R. 1100.250.

Protests to the granting of the requested authority must be filed with the Commission on or before January 19, 1976 (unless otherwise specified). Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest should comply with section 247(d) or section 240(c) as appropriate of the Commission's General Rules of Practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and a detailed description of the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one (1) copy of the protest (except for petitions and Finance Dockets under Rule 40 requiring the original and six (6) copies of the protest) shall be filed with the Commission, and a copy shall be served concurrently upon applicant's or petitioner's representative, or applicant or petitioner if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) or section 240(c)(4) of the special rules, and shall include the certification required therein.

No. MC-F-12717. Authority sought for control and merger by GARRISON MOTOR FREIGHT, INC., P.O. Box 969, Garrison Place, Harrison, AR 72601, of the operating rights and property of REYCO MOTOR EXPRESS, INC., P.O. Box 6565—South Station, Fort Smith AR 72901, and for acquisition by F. S. GARRISON, AND BEN A. GARRISON, both of Harrison, AR 72601, of control of such rights and property through the transaction. Applicants' attorneys and representative: Louis Tarlowski, 914 Pyramid Life Bldg., Little Rock, AR 72201, R. D. Reynolds, 5412 So. 24th St., Fort Smith, AR 72901, and David A. Sutherland, 1140 Connecticut Ave., N.W., Suite 501, Washington, DC 20036. Operating rights sought to be controlled and merged: *General commodities*, with the usual exceptions, as a *common carrier*, over regular routes, between Fort Smith, and Booneville, Ark., serving no intermediate points, with restriction; and under certificates of registration, in Docket Nos. MC 97270 (Sub-No. 2), MC 97270 (Sub-No. 7), and MC 97270 (Sub-No. 8), covering the transportation of general commodities, as common carriers, in interstate commerce, within the State of Arkansas. GARRISON MOTOR FREIGHT, INC., is authorized to operate as a common carrier in Alabama, Arkansas, Illinois, Kansas, Louisiana, Mississippi, Missouri, Oklahoma, Tennessee and Texas. Application has been filed for temporary authority under section 210a(b).

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

BURLINGTON NORTHERN, INC.

Approval To Act as Surety

At a Session of the Interstate Commerce Commission, the Insurance Board, held at its office in Washington, D.C., on the 4th day of December, 1975.

In the mater of Burlington Northern, Inc. assuming the obligation of surety on a bond in behalf of its subsidiary Burlington Northern Air Freight, Inc., under the provision of Section 215, Interstate Commerce Act, and our Rules and Regulations governing the filing and approval of surety bonds, policies of insurance, qualifications as a self-insurer, or other securities and agreements by motor carriers and brokers.

It appearing, That Burlington Northern, Inc. has qualified as a self-insurer of its BI & PD and cargo liability as permitted under Section 215 of the Interstate Commerce Act;

It further appearing, That in Docket No. FF-451 Burlington Northern Air Freight, Inc., a subsidiary of Burlington Northern, Inc., has acquired freight forwarder authority;

It further appearing, That Burlington Northern, Inc. has requested authority to act as a surety for Burlington Northern Air Freight, Inc. for cargo liability under the provision of section 403(c) of the Interstate Commerce Act;

And it further appearing, That this request has been given consideration and is found to be reasonable;

It is ordered, That approval be given to Burlington Northern, Inc. to act as a surety of Burlington Northern Air Freight, Inc. eeffctive December 16, 1975. with respect to its compliance with the cargo security requirements under Section 403(c) of the Act.

By the Commission, Insurance Board.

[Notice No. 144]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

DECEMBER 19, 1975.

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to Sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before January 8, 1976. Pursuant to Section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-76211. By order of December 19, 1975 the Motor Carrier Board approved the transfer to C. V. Transportation, Inc., Antrim, New Hampshire, of certificate No. MC 140097, issued June 4, 1975, to Rymes Heating Oils, Inc., Antrim, New Hampshire, authorizing the

transportation of wood chips, from points in New Hampshire to points in Maine, New York, and Rhode Island. James T. Rymes, Waverly Street, Antrim, New Hampshire 03440 Representative of applicants.

[Notice No. 143]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

DECEMBER 15, 1975.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the I.C.C. Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 531 (Sub-No. 326TA), filed December 2, 1975. Applicant: YOUNGER BROTHERS, INC., 4904 Griggs Road, P.O. Box 14048, Houston, Tex. 77021. Applicant's representative: Wray E. Hughes (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, in tank vehicles, from the facilities of Nalco Chemical at or near Sugar Land, Tex. to all points in the United States (except Alaska and Hawaii), for 180 days. Supporting shipper: Nalco Chemical Company, Inc., 2901 Butterfield Road, Oak Brook, Ill. 60521. Send protests to: District Supervisor, Mensing, 8610 Federal Bldg., 515 Rusk, Houston, Tex. 77002.

No. MC 531 (Sub-No. 327TA), filed December 4, 1975. Applicant: YOUNGER BROTHERS, INC., 4904 Griggs Road, P.O. Box 14048, Houston, Tex. 77021. Applicant's representative: Wray E. Hughes (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Hog mucosa*, in bulk, in tank vehicles, from points in the United States west of Interstate Highway 65 and the Great Lakes to facilities of 3M Company, at or near Cordova, Ill. Supporting shipper: Minnesota Mining & Manufacturing Company, 3M Center, St. Paul, Minn. 55101. Send protests to: John Mensing, District Supervisor, Interstate Commerce Commission, 8610 Federal Bldg., 515 Rusk, Houston, Tex. 77002.

No. MC 21866 (Sub-No. 82TA), filed December 8, 1975. Applicant: WEST MOTOR FREIGHT, INC., 740 S. Reading Ave., Boyertown, Pa. 19512. Applicant's representative: Alan Kahn, 1920 Two Penn Center Plaza, Philadelphia, Pa. 19102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lenses and reflectors*, from Somerset, Ky., to Boyertown, Pa., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Wagner Electric Corporation, 633 McKinley St., Hazleton, Pa. 18201. Send protests to: Monica A. Blodgett, Transportation Assistant, Interstate Commerce Commission, 600 Arch St., Room 3238, Philadelphia, Pa. 19106.

No. MC 28088 (Sub-No. 15TA), filed December 4, 1975. Applicant: NORTH & SOUTH LINES, INCORPORATED, 2710 South Main St., P.O. Box 49, Harrisonburg, Va. 22801. Applicant's representative: John R. Sims, Jr., 915 Pennsylvania Bldg., 425 Thirteenth St., N.W., Washington, D.C. 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Salt and salt products*, in mixed truckload shipments with unfrozen feed and feed materials for other than human consumption (except in bulk, in tank vehicles), from Akron, Ohio, to points in Albermarle, Augusta, Culpepper, Fauquier, Greene, Loudoun, Madison, Page, Rappahannock, Rockingham, Shenandoah, and Warren Counties, Va., for 180 days. Supporting shipper: Diamond Crystal Salt Company, 916 S. Riverside Ave., St. Clair, Mich. 48079. Send protests to: Danny R. Beeler, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 215 Campbell Ave., S.W., Roanoke, Va. 24011.

No. MC 52579 (Sub-No. 146TA), filed December 5, 1975. Applicant: GILBERT CARRIER CORP., One Gilbert Drive, Secaucus, N.J. 07094. Applicant's representative: Fred L. Cardascia (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wearing apparel*, loose, on hangers, from points in Alabama, Georgia, Kentucky, North Carolina, South Carolina, and Tennessee; to points in Dallas and Fort Worth, Tex., Commercial Zones and to Los Angeles, Calif., for 180 days. Supporting shipper: Montgomery Ward & Co., Inc., 393 Seventh Ave., New York, N.Y. 10001. Send protests to: Robert E. Johnston, District Supervisor, Interstate Commerce Commission, 9 Clinton St., Newark, N.J. 07102.

No. MC 61403 (Sub-No. 236TA), filed December 5, 1975. Applicant: THE MASON AND DIXON TANK LINES, INC., Highway 11-W, Kingsport, Tenn. 37662. Applicant's representative: Charles E. Cox (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, from the facilities of Nalco Chemical Company, at or near Sugar Land, Tex., to all points in the United States (except Alaska and Hawaii), for 180 days. Supporting shipper: Nalco Chemical Company, Inc., 2901 Butterfield Road, Oak Brook, Ill. 60521. Send protests to: Joe J. Tate, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Suite A-422, U.S. Courthouse, 801 Broadway, Nashville, Tenn. 37203.

No. MC 97310 (Sub-No. 21TA), filed November 26, 1975. Applicant: SHARRON MOTOR LINES, INC., P.O. Box 5636, Meridian, Miss. 39301. Applicant's representative: John P. Carlton, 903 Frank Nelson Bldg., Birmingham, Ala. 35203. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except Classes A and B explosives and commodities which by reason of size or weight require the use of special equipment), (1) between Centre, Ala., and Atlanta, Ga.; from Centre over Alabama Highway 9 to the Alabama-Georgia State Boundary line, thence over Georgia Highway 20 to Rome, Ga., thence over U.S. Highway 411 to junction U.S. Highway 41, thence over U.S. Highway 41 to Marietta, Ga., thence over Interstate Highway 75 to Atlanta, and return over the same route, serving all intermediate points between Centre and Rome, including Rome; (2) between Centre, Ala., and Birmingham, Ala.; from Centre over U.S. Highway 411 to Junction U.S. Highway 278 at or near Gadsden, Ala., thence over U.S. Highway 278 to junction U.S. Highway 11, at or near Attalla, Ala., thence over U.S. Highway 11 to Birmingham, and return over the same route, serving all intermediate points; (3) between the junction of U.S. Highway 278 and U.S. Highway 411 at or near Gadsden, Ala., and Montgomery, Ala.; from the junction of U.S. Highway 278 and U.S. Highway 411 over U.S. Highway 411 to junction Alabama Highway 77, thence over Alabama Highway 77 to junction Alternate U.S. Highway 231 at or near Lincoln, Ala., thence over Alternate U.S. Highway 231 to junction U.S. Highway 231 at or near Sylacauga, Ala., thence over U.S. Highway 231 to Montgomery, and return over the same route, serving all intermediate points; (4) between the junction of Interstate Highway 59 and U.S. Highway 278 at or near Gadsden, Ala., and Montgomery, Ala.; from the junction of Interstate

DEC 19 75 V40245 XUM

Highway 59 and U.S. Highway 278 over Interstate Highway 59 to junction Interstate Highway 65, thence over Interstate Highway 65 to Montgomery, and return over the same route, serving all intermediate points, and operating over U.S. Highway 31 between Birmingham, Ala., and Montgomery, Ala., for such portions of Interstate Highway 65 which have not yet been completed.

Between the junction of Alabama Highway 68 and U.S. Highway 411 at or near Leesburg, Ala., and Tuscumbia, Ala.; from the junction of Alabama Highway 68 and U.S. Highway 411 over Alabama Highway 68 to junction U.S. Highway 11, thence over U.S. Highway 11 to junction Alabama Highway 117 at or near Hammondville, Ala., thence over Alabama Highway 117 to junction U.S. Highway 72, thence over U.S. Highway 72 to Florence, Ala., thence over U.S. Highway 72 (Bus.) to Tuscumbia, and return over the same route, serving all intermediate points; (6) between the junction of Alabama Highway 68 and U.S. Highway 11 and the junction of Alabama Highway 35 and U.S. Highway 72 at or near Scottsboro, Ala.; from the junction of Alabama Highway 68 and U.S. Highway 11 over Alabama Highway 68 to junction Interstate Highway 59, thence over Interstate Highway 59 to junction Alabama Highway 35, thence over Alabama Highway 35 to junction U.S. Highway 72, and return over the same route, serving all intermediate points; (7) between the junction of U.S. Highway 278 and U.S. Highway 11 at or near Attalla, Ala., and Tuscumbia, Ala.; from the junction of U.S. Highway 278 and U.S. Highway 11 over U.S. Highway 278 to Cullman, Ala., thence over Interstate Highway 65 to junction Alabama Highway 157, thence over Alabama Highway 157 to junction U.S. Highway 72 (Bus.), thence over U.S. Highway 72 (Bus.) to Tuscumbia, and return over the same route, serving all intermediate points; (8) between the junction of Interstate Highway 65 and Alabama Highway 157 and the junction of Alternate U.S. Highway 72 and Alabama Highway 157; from the junction of Interstate Highway 65 and Alabama Highway 157 over Interstate Highway 65 to junction Alabama Highway 67, thence over Alabama Highway 67 to junction U.S. Highway 31, thence over U.S. Highway 31 to junction Alternate U.S. Highway 72 at or near Decatur, Ala., thence over Alternate U.S. Highway 72 to junction Alabama Highway 157, and return over the same route, serving all intermediate points.

(9) Between the junction of Interstate Highway 65 and Alabama Highway 67 and Huntsville, Ala.; from the junction of Interstate Highway 65 and Alabama Highway 67 over Interstate Highway 65 to junction Alternate U.S. Highway 72, thence over Alternate U.S. Highway 72 to Huntsville, and return over the same route, serving all intermediate points; (10) between the junction of U.S. Highway 278 and U.S. Highway 231 and Huntsville, Ala.; from the junction of U.S. Highway 278 and U.S. Highway 231 to Huntsville, and return over the same route, serving all intermediate points; (11) between the junction of U.S. Highway 411 and Alabama Highway 77 and Selma, Ala.; from the junction of U.S. Highway 411 and Alabama Highway 77 over U.S. Highway 411 to junction Alabama Highway 119 at or near Leeds, Ala., thence over Alabama Highway 119 to junction Alabama Highway 25 at or near Montevallo, Ala., thence over Alabama Highway 25 to junction Alabama Highway 139, thence over Alabama Highway 139 to junction Alabama Highway 22 at or near Maplesville, Ala., thence over Alabama Highway 22 to Selma, and return over the same route, serving all intermediate points; (12) between the junction of Alabama Highway 139 and Alabama Highway 25 and Marion, Ala.; from the junction of Alabama Highway 139 and Alabama Highway 25 over Alabama Highway 25 to junction Alabama Highway 5 at or near Centerville, Ala., thence over Alabama Highway 5 to junction Alabama Highway 14, thence over Alabama Highway 14 to Marion, and return over the same route, serving all intermediate points; (13) between Atlanta, Ga., and Meridian, Miss.; from Atlanta over U.S. Highway 78 to Birmingham, Ala., thence over U.S. Highway 11 (also over Interstate Highway 59) to Meridian, and return over the same route, serving all intermediate points located in Alabama between Birmingham and the Alabama-Mississippi State line, including Birmingham; (14) between Atlanta, Ga., and Montgomery, Ala; from Atlanta over Interstate Highway 85 to Montgomery, and return over the same route, using U.S. Highway 29 and Alternate U.S. Highway 27 for such portions of Interstate Highway 85 as are not yet completed.

(15) Between Birmingham, Ala., and Huntsville, Ala.; from Birmingham over Interstate Highway 65 to junction Alternate U.S. Highway 72, thence over Alternate U.S. Highway 72 to Huntsville, and return over the same route, as an alternate route for operating convenience only, serving no intermediate points, but serving Birmingham and Huntsville for purposes of joinder only; (16) between all points in Alabama lying within the area bounded by a line beginning at the junction of the Alabama-Mississippi State line and U.S. Highway 80; thence over U.S. Highway 80 to Montgomery, thence over U.S. Highway 31 to Birmingham; thence over U.S. Highway 78 to the Alabama-Georgia State line; thence along the Alabama-Georgia State line to the conjunction of the Alabama-Georgia-Tennessee State lines; thence along the Alabama-Tennessee State line to the conjunction of the Alabama-Tennessee-Mississippi State lines; thence along the Alabama-Mississippi State line to U.S. Highway 80;

(17) In conjunction with routes (1) and (13), serving all points in the commercial zone of Atlanta, Ga.; and, in conjunction with route (1), serving the commercial zone of all intermediate points between Centre, Ala., and Rome, Ga., including Rome, Ga. Applicant seeks authority to join all of the routes named above with each other at all common points of service. Applicant also seeks authority to tack routes (2), (3), (4), (11), (12), (13), (14) and (15) with its existing regular-route authority at common service points, specifically, Birmingham, Montgomery, Marion and Selma, Ala.; and Meridian, Miss. The effect of applicant's request for authority to perform such tacking operations will be to enable it to provide through service between Atlanta, Ga., on the one hand, and, on the other, all points in Alabama lying within the area bounded by a line beginning at the junction of the Alabama-Mississippi State line and U.S. Highway 80; thence over U.S. Highway 80 to Montgomery; thence over U.S. Highway 31 to Birmingham; thence over U.S. Highway 78 to the Alabama-Georgia State line; thence along the Alabama-Georgia State line to the conjunction of the Alabama-Georgia-Tennessee State lines; thence along the Alabama-Tennessee - Mississippi State lines; thence along the Alabama-Mississippi State line to U.S. Highway 80, and all points in Alabama presently served by applicant over its existing regular routes which are shown on the appended map in blue; and points on applicant's regular route in Mississippi which authorizes service to and from all points in Mississippi on U.S. Highway 80. The proposed routes of applicant are as follows: (A) Proposed Routes (2) and (15) will be tacked with applicant's existing regular-route authority at Birminghan, Ala.; (B) Proposed Routes (3), (4) and (14) will be tacked with applicant's existing regular-route authority at Montgomery, Ala.; (C) Proposed Route (11) will be tacked with applicant's existing regular-route authority at Selma, Ala.; (D) Proposed Route (12) will be tacked with applicant's existing regular-route authority at Marion, Ala.; (E) Proposed Route (13) will be tacked with applicant's existing regular-route authority at Meridian, Miss. In addition, applicant proposes and seeks authority to interline with all other carriers serving the same points it serves and proposes to serve. Such interline would take place primarily at Atlanta, Ga.; Birmingham, Gadsen, Decatur, Florence, Montgomery, Selma, Demopolis and Tuscaloosa, Ala.; Jackson, Meridian and Vicksburg, Miss., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: There are approximately 183 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Alan C. Tarrant, District Supervisor, Interstate Commerce Commission, Room 212, 145 East Amite Bldg., Jackson, Miss. 39201.

No. MC 10556 (Sub-No. 117TA), filed December 4, 1975. Applicant: SAM TANKSLEY TRUCKING, INC., P.O. Box 1119, Cape Girardeau, Mo. 63701. Applicant's representative: Thomas F. Kilroy, P.O. Box 624, Springfield, Va. 22150. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chinaware, earthenware, and pottery*, from Lancaster, Ohio, to points in Arizona, California, Idaho, Montana, Nevada, New Mexico, Oregon, Utah and Washington, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Anchor Hocking Corporation, 100 North Broad St., Lancaster, Ohio 43130. Send protests to: J. P. Werthmann, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 1465, 210 N. 12th St., St. Louis, Mo. 63101.

No. MC 106077 (Sub-No. 369TA), filed December 4, 1975. Applicant: ROBERTSON TANK LINES, INC., 2000 West Loop South, Suite 1800, Houston, Tex. 77027. Applicant's representative: J. C. Browder (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Clay, processed clay, and clay slurry*, in bulk, in tank vehicles, from Attapulgus, Ga., to Tulsa, Okla., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Engelhard Minerals & Chemicals, Menlo Park, Edison, N.J. 08817. Send protests to: John Mensing, District Supervisor, Interstate Commerce Commission, 515 Rusk, Room 8610 Federal Bldg., Houston, Tex. 77002.

No. MC 109462 (Sub-No. 27TA), filed December 3, 1975. Applicant: LUMBER TRANSPORT, INC., P.O. Drawer L, Madisonville, Ky. 42431. Applicant's representative: Carl U. Hurst (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Gypsum, gypsum wallboard, gypsum joint cement, and related commodities* (except commodities in bulk, in tank vehicles), from Acme, Tex., to points in Kansas, for 180 days. Supporting shipper: Joel T. Blalock, Manager, Freight Rates, Research, Audit and Service, Georgia-Pacific Corporation, 900 S.W. Fifth Ave., Portland, Oreg. 97204. Send protests to: Elbert Brown, Jr., District Supervisor, Bureau of Operations, 426 Post Office Bldg., Louisville, Ky. 40202.

No. MC 110420 (Sub-No. 749TA), filed December 4, 1975. Applicant: QUALITY CARRIERS, INC., P.O. Box 186, Pleasant Prairie, Wis. 53158. Applicant's representative: Joseph K. Reber (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Spent brewers yeast*, in bulk, in tank vehicles, from Milwaukee, Wis., to South Plainfield, N.J., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Southeastern Wisconsin Products Co., Inc., 500 W. Edgerton Ave., Milwaukee, Wis. 53207. Send protests to: John E. Ryden, Interstate Commerce Commission, 135 West Wells St., Room 807, Milwaukee, Wis. 53203.

No. MC 110525 (Sub-No. 1139TA), filed December 5, 1975. Applicant: CHEMICAL LEAMAN TANK LINES, INC., 520 East Lancaster Ave., Downingtown, Pa. 19335. Applicant's representative: Thomas J. O'Brien (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, in tank vehicles, from the facilities of Nalco Chemical at or near Sugar Land, Tex., to all points in the United States (except Alaska and Hawaii), restricted against liquid chemicals to points in Connecticut, Delaware, the District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont and West Virginia, for 180 days. Supporting shipper: Nalco Chemical Company, Inc., 2901 Butterfield Road, Oak Brook, Ill. 60521. Send protests to: Monica A. Blodgett, Transportation Assistant, Interstate Commerce Commission, 600 Arch St., Room 3238, Philadelphia, Pa. 19106.

No. MC 111729 (Sub-No. 592TA), filed December 3, 1975. Applicant: PUROLATOR COURIER CORP., 3333 New Hyde Park Road, New Hyde Park, N.Y. 11040. Applicant's representative: Elizabeth L. Henoch (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum samples, and related business papers*, between Richmond, Va., on the one hand, and, on the other, Madisonville, Campbellsville and Lexington, Ky.; Huntington and Clarksburg, W. Va.; Baltimore, Md.; and Seaford, Del., for 90 days. Supporting shipper: Southern States Cooperative, Inc., P.O. Box 1656, 7th & Main St., Richmond, Va. 23213. Send protests to: Anthony D. Glaimo, District Supervisor, Interstate Commerce Commission, 26 Federal Plaza, New York, N.Y. 10007.

No. MC 111729 (Sub-No. 593TA), filed December 3, 1975. Applicant: PUROLATOR COURIER CORP., 3333 New Hyde Park Road, New Hyde Park, N.Y. 11040. Applicant's representative: Elizabeth L. Henoch (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Proofs, cuts, copy, artwork, manuscripts, and related materials*, between Jonesboro, Ark., and Memphis, Tenn., restricted to the transportation of traffic having an immediately prior or subsequent movement by air, and (2) *Drugs, toiletries, chemicals, medicine and compressed air*, restricted against the transportation of shipments weighing in excess of 150 pounds, in the aggregate, from one consignor to one consignee on any one day, between points in Arizona, restricted to the transportation of traffic having an immediately prior or subsequent movement by air, rail, or motor vehicle, and further restricted to traffic moving to or from the facilities of Avon Products, Inc., for 180 days. Supporting shippers: (1) W. A. Krueger Company, Jonesboro, Ark. (2) Avon Products, Inc., Monrovia, Calif. Send protests to: Anthony D. Glaimo, District Supervisor, Interstate Commerce Commission, 26 Federal Plaza, New York, N.Y. 10007.

No. MC 111729 (Sub-No. 594TA), filed December 3, 1975. Applicant: PUROLATOR COURIER CORP., 3333 New Hyde Park Road, New Hyde Park, N.Y. 11040. Applicant's representative: Elizabeth L. Henoch (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1)(a) *Business papes, records, audit and accounting media of all kinds*, and *advertising materials*; (b) Drug samples, between Alexandria, Va., on the one hand, and, on the other, Akron, Canton, East Liverpool, Salem, Tallmadge, and Youngstown, Ohio; Burnham, Carlisle, Chambersburg, Harrisburg, Hershey, Lancaster, Lebanon, Lemoyne, Philadelphia, Plymouth Meeting, Reading, Springfield, State College and York, Pa., and (2)(a) *Business papers, records, and audit and accounting media of all kinds;* (b) *Emergency small automobile parts*, restricted against the transportation of packages or articles weighing more than 50 pounds per package or 100 pounds in the aggregate from one consignor to one consignee on any one day, from Lanham, Md., to Washington, D.C., National Airport, from Logan Airport, Mass., to Auburn, Augusta, Bangor, Brunswick, Ellsworth, Portland, Presque Isle, Rockland, Rumford, Saco, and Waterville, Maine, East Providence, Johnston, Middletown, Providence, and Wakefield, R. I.; Claremont, Concord, Keene, Laconia, Manchester, Nashua, Portsmouth, and Rochester, N. H.; and points in Massachusetts, restricted to the transportation of traffic having an immediately prior movement by air, for 180 days. Supporting shippers: Peoples Service Drugs Stores, Inc., Alexandria, Va. Volkswagen of America, Inc., Lanham, Md. Send protests to: Anthonh D. Glaimo, District Supervisor, Interstate Commerce Commission, 26 Federal Plaza, New York, N.Y. 10007.

No. MC 112750 (Sub-No. 322 TA), filed December 8, 1975. Applicant: PUROLATOR COURIER, CORP., 3333 New Hyde Park Road, New Hyde Park, N.Y. 11040. Applicant's representative: Elizabeth L. Henoch (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Commercial papers, documents, and written instruments*, from Crosset, Dermott, El Dorado, Eudora, Hamburg, Monticello, and Strong, Ark., to Moneor, La., under a continuing contract with Ouachita National Bank, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Ouachita National Bank in Monroe, Monroe, La 71201. Send protests to: Anthony D. Glaimo, District Supervisor, Interstate Commerce Commission, 26 Federal Plaza, New York, N.Y. 10007.

No. MC 116077 (Sub-No. 368 TA), filed December 3, 1975. Applicant: ROBERT-

V 40 245 DEC 19 75 XUM

SON TANK LINES, INC., 2000 West Loop South, Suite 1800, Houston, Tex. 77027. Applicant's representative: J. C. Browder (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, in tank vehicles, from the facilities of Nalco Chemical Company, at or near Sugar Land, Tex., to all points in the United States (except Alaska and Hawaii), for 180 days. Supporting shipper: Nalco Chemical Company, Inc., 2901 Butterfield Road, Oak Brook, Ill. 60521. Send protests to: Mensing, District Supervisor, 8610 Federal Bldg., 515 Rusk, Houston, Tex. 77002.

No. MC 117068 (Sub-No. 57 TA), filed December 2, 1975. Applicant: MIDWEST SPECIALIZED TRANSPORTATION, INC., P.O. Box 6418, North Highway 63, Rochester, Minn. 55901. Applicant's representative: Paul F. Sullivan, 711 Washington Bldg., Washington, D.C. 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber and lumber products*, from points in Washington, Oregon, Idaho and Montana, to points in Minnesota, North Dakota, South Dakota, Illinois, Iowa and Wisconsin, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Emmer Bros., Inc., 6800 France Ave., S., Edina, Minn. 55435. Send protests to: A. N. Spath, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 414 Federal Bldg., & U.S. Courthouse, 110 S. 4th St., Minneapolis, Minn. 55401.

No. MC 123407 (Sub-No. 276 TA), filed December 4, 1975. Applicant: SAWYER TRANSPORT, INC., South Haven Square U.S. Highway 6, Valparaiso, Ind. 46383. Applicant's representative: Stephen H. Loeb (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel bars*, from the plantsite of North Star Steel Co., at Newport, Minn., to Tulsa, Okla., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: North Star Steel Company, 1400 Red Rock Road, St. Paul, Minn. 55165. Send protests to: J. H. Gray, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 345 West Wayne St., Room 204, Fort Wayne, Ind. 46802.

No. MC 124887 (Sub-No. 20 TA), filed December 4, 1975. Applicant: SHELTON TRUCKING SERVICE, INC., Route 1, Box 230, Altha, Fla. 32421. Applicant's representative: Sol H. Proctor, 1107 Blackstone Bldg., Jacksonville, Fla. 32202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Gypsum products and commodities* used in connection with the distribution and installation of gypsum products when moving in the same vehicle and at the same time as gypsum products, from Savannah, Ga., to points in Florida, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: The Flintkote Company, 480 Central Ave., East Rutherford, N.J. 07073. Send protests to: G. H. Fauss, Jr., District Supervisor, Bureau of Operations, Interstate Commerce Commission, Box 35008, 400 West Bay St., Jacksonville, Fla. 32202.

No. MC 125916 (Sub-No. 4 TA), filed December 4, 1975. Applicant: THERON E. COON, doing business as THERON E. COON TRUCKING CO., 2330 South 7200 West, Magna, Utah 84044. Applicant's representative: Macoy A. McMurray, 500 Kennecott Bldg., Salt Lake City, Utah 84133. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Asphalt paving, non-metallic rock and sand*, in bulk, from points in Salt Lake County, Utah, to the R. L. Fraley Gasification Plant Construction site, located approximately 35 miles southeast of Rock Springs, Wyo., on Wyoming Highway 30, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Monroe, Inc., 1730 Beck St., P.O. Box 537, Salt Lake City, Utah 84110. Send protests to: Lyle D. Helfer, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 5301 Federal Bldg., 125 South State St., Salt Lake City, Utah 84138.

No. MC 127840 (Sub-No. 43 TA), filed December 2, 1975. Applicant: MONTGOMERY TANK LINES, INC., 17550 Fritz Drive, Lansing, Ill. 60438. Applicant's representative: William H. Towle, 180 N. LaSalle St., Chicago, Ill. 60601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Hog mucosa*, in bulk, from points in the United States west of Interstate Highway 65 and the Great Lakes to the facilities of the 3M Company, at or near Cordova, Ill., for 180 days. Supporting shipper: Minnesota Mining and Manufacturing Co., M. D. Hill, Planning & Evaluation Supervisor, Transportation Department 224–12, 3M Center, St. Paul, Minn. 55101. Send protests to: Patricia A. Roscoe, Transportation Assistant, Interstate Commerce Commission, Everett McKinley Dirksen Bldg., 219 S. Dearborn St., Room 1086, Chicago, Ill. 60604.

No. MC 128527 (Sub-No. 58 TA), filed December 3, 1975. Applicant: MAY TRUCKING COMPANY, P.O. Box 398, Payette, Idaho 83661. Applicant's representative: C. Marvin May (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles and iron and steel pipe and fittings*, from points in Los Angeles and Orange Counties, Calif., to points in Ada, Canyon, Payette and Washington Counties, Idaho, for 180 days. Supporting shippers: There are approximately 7 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., of copies thereof which may be examined at the field office named below. Send protests to: Barney L. Hardin, District Supervisor, Interstate Commerce Commission, 550 W. Fort St., Box 07, Boise, Idaho 83724.

No. MC 129624 (Sub-No. 5 TA), filed December 5, 1975. Applicant: ROUTE MESSENGERS OF PENNSYLVANIA, INC., 4007 Ludlow St., Philadelphia, Pa. 19104. Applicant's representative: Alan Kahn, 1920 Two Penn Center Plaza, Philadelphia, Pa. 19102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Copying machine parts and supplies*, no single parcel or package to exceed 100 pounds in weight, from Pennsauken, N.J., to points in New Castle and Kent Counties, Del., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Xerox Corporation, 7001 Westfield Ave., Pennsauken, N.J. Send protests to: Monica A. Blodgett, Transportation Assistant, Interstate Commerce Commission, 600 Arch St., Room 3238, Philadelphia, Pa. 19106.

No. MC 133562 (Sub-No. 16 TA), filed December 5, 1975. Applicant: HOLIDAY EXPRESS CORPORATION, P.O. Box 115, Estherville, Iowa 51334. Applicant's representative: Merle Johnson (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fresh beef and pork gullets, livers and lungs*, (1) from Sioux Falls, S. Dak., to the plantsite of Richland Foods, Inc., at Etherville, Iowa; (2) from the plantsite of Richland Foods, Inc., to Estherville, Iowa to Camp Hill, Pa., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Richland Foods, Inc., Suite 415, 1st Bank & Trust Bldg., Richardson, Tex. 75080. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 875 Federal Bldg., Des Moines, Iowa 50309.

No. MC 134922 (Sub-No. 153 TA), filed November 28, 1975. Applicant: B. J. McADAMS, INC., Route 6, Box 15, North Little Rock, Ark. 72118. Applicant's representative: Bob McAdams (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Rubber products* (except commodities in bulk, and those which because of size or weight require the use of special equipment), from Akron and Columbus, Ohio, to points in Arizona, Montana, Idaho, Oregon, Washington, California, Nevada, Utah, Colorado and Wyoming, for 180 days. Supporting shipper: Triple "S" Tire Center, Inc., 412 Madison St., Petaluma, Calif. 94952. Send protests to: William H. Land, Jr., District Supervisor, 3108 Federal Office Bldg., 700 West Capitol, Little Rock, Ark. 72201.

No. MC 135384 (Sub-No. 16 TA), filed December 4, 1975. Applicant: SPECIALIZED TRUCK SERVICE, INC., Highway 81 & Interstate 75, McDonough, Ga. 30253. Applicant's representative: Frank D. Hall, Suite 713, 3384 Peachtree Road NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor

vehicle, over irregular routes, transporting: *Malt beverages, related advertising material and empty malt beverage containers*, between Pabst, Houston County, Ga., and points in Texas and between San Antonio, Tex., and points in Tennessee, Virginia, Illinois and Washington, D.C., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: Pabst Brewing Company, (Georgia Div.), Georgia Highway Spur #247, Perry, Ga. 31069. Lone Star Brewing Company, 600 Lone Star Blvd., San Antonio, Tex. 78206. Send protests to: William L. Scroggs, District Supervisor, Interstate Commerce Commission, 1252 W. Peachtree St. NW., Room 546, Atlanta, Ga. 30309.

No. MC 135797 (Sub-No. 45 TA), filed December 4, 1975. Applicant: J. B. HUNT TRANSPORT, INC., P.O. Box 200, Lowell, Ark. 72745. Applicant's representative: L. C. Cypert (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Polystyrene shapes and forms, and disposable plastic tableware*, from the plantsite and warehouses of the Mobil Chemical Company, located at or near Temple, Tex., to points in Arkansas, Colorado, Kansas, Kentucky, Louisiana, Mississippi, Missouri, New Mexico, Oklahoma and Tennessee, for 180 days. Supporting shipper: Mobil Oil Corporation, 8350 North Central Expressway, #522, Dallas, Tex. 75206. Send protests to: William H. Land, Jr., 3108 Federal Office Bldg., 700 West Capitol, Little Rock, Ark. 72201.

No. MC 136066 (Sub-No. 8 TA), filed December 4, 1975. Applicant: G. P. SULLIVAN COMPANY, 1808 S. Laramie Ave., Cicero, Ill. 60605. Applicant's representative: Karl L. Gotting, 1200 Bank of Lansing Bldg., Lansing, Mich. 48933. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household appliances* of S. S. Kresge Company, K-Mart Division, Randy & Associates, Inc., and Sunray Stove Company, from Chicago, Ill., and its commercial zone to points in Kenosha, Walworth and Racine Counties, Wis., and Lake, Porter, LaPorte, Starke, Pulaski, Newton and Jasper, Counties, Ind., for 180 days. Supporting shippers: S. S. Kresge Co., J. B. Hinton, Regional Merchandise Manager, 72 Randhurst, Mt. Prospect, Ill. Randy & Associated, Inc., Dick Norris, Internal Sales Coordinator, 5853 W. Lawrence Ave., Chicago, Ill. 60630. Sunray Stove Company, Mark Montgomery, V. P. Midwest Reg., Manager, 3 N. 930 Bonnie Drive, St. Charles, Ill. 60174. Send protests to: Patricia A. Roscoe, Transportation Assistant, Interstate Commerce Commission, Everett McKinley Dirksen Bldg., 219 S. Dearborn St., Room 1086, Chicago, Ill. 60604.

No. MC 136531 (Sub-No. 4TA), filed December 5, 1975. Applicant: LUISI TRUCK LINES, INC., P.O. Box 606, Milton-Freewater, Oreg. 97862. Applicant's representative: Philip Skofstad, 3076 E. Burnside St., Portland, Oreg. 97214. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Frozen fruit and vegetables, between* Milton-Freewater, Oreg., and Walla Walla, Wash., under a continuing contract with Western Farmers Association, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Western Farmers Association, 201 Elliott Ave., West Seattle, Wash. 98119. Send protests to: W. J. Huetig, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 114 Pioneer Courthouse, Portland, Oreg. 97204.

No. MC 136669 (Sub-No. 8 TA), filed July 28, 1975, published in the FEDERAL REGISTER issue of August 11, 1975, and republished this issue. Applicant: PROCESSED BEEF EXPRESS, INC., P.O. Box 522, Dakota City, Nebr. 68731. Applicant's representative: Eugene D. Anderson, 1224 17th St. NW., Washington, D.C. 20036. By order of Division 1, acting as an Appellate Division dated December 8, 1975, applicant was granted 180-days temporary authority as a *common carrier* to transport, over irregular routes, *liquor, wines, spirits and alcoholic beverages*, from the facilities of Schenley Distillers, located at Lawrenceburg, Ind.; Frankfort, Ky.; and Schenley, Pa., to points in Chicago, Ill.; Fargo, N. Dak.; and the points within the Minneapolis-St. Paul, Minn. commercial zone. The purpose of this republication is to reflect that applicant was granted common carrier authority, in lieu of contract carrier authority.

Notice to parties: The General Rules of Practice of the Commission provide that petitions for reconsideration of the action of Division 1 may be filed within thirty days following service of notice of such action and that an original and six copies of such petition be filed. Petition should contain a statement certifying that one copy has been served on each party of record in this proceeding.

No. MC 136916 (Sub-No. 12 TA), filed December 3, 1975. Applicant: LENAPE TRANSPORTATION CO., INC., P.O. Box 227, Lafayette, N.J. 07848. Applicant's representative: Bert Collins, Suite 6193, 5 World Trade Center, New York, N.Y. 10048. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Salt and salt products*, in bulk, in dump vehicles, for the account of International Salt Company, from New York, N.Y., to Bethel, Bridgeport, Darien, Greenwich, Hamden, Milford, New Canaan, New Haven, Norwalk, Stamford, Stratford, Trumbull, Weston, Westport, and Wilton, Conn., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: International Salt Company, 30 Buxton Farm Road, Merritt Plaza, Stamford, Conn. 06902.

No. MC 138578 (Sub-No. 5 TA), filed December 5, 1975. L. C. W. TRUCKING, INC., P.O. Box 718, Edinburg, Tex. 78539. Applicant's representative: L. C. Waller (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Frozen nutria*, in bags, from points in Jefferson, LaFourche, Iberia, Vermilion, Cameron, St. Mary and Terrebonne Parishes, La., to points in Hidalgo and Cameron Counties, Tex., under a continuing contract with Summersgill Enterprises, Inc., for 180 days. Supporting shipper: Summersgill Enterprises, Inc., 1819 South Bayou Drive, Golden Meadow, La. 70357. Send protests to: Richard H. Dawkins, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room B–400 Federal Bldg., San Antonio, Tex. 78205.

No. MC 139882 (Sub-No. 3 TA), filed December 3, 1975. Applicant: GLEN M. BARNEY, doing business as GLEN BARNEY & SONS, 198 North Third East, Salina, Utah 84654. Applicant's representative: D. Michael Jorgensen, 1515 Walker Bank Bldg., P.O. Box 2465, Salt Lake City, Utah 84110. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Coal*, in bulk, from the mine sites of Southern Utah Fuel in Sevier County, Utah, to rail loading facilities in Juab County, Utah, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Wycon Chemicals Company, P.O. Box 1287, Cheyenne, Wyo. 82001. Send protests to: Lyle D. Helfer, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 5301 Federal Bldg., 125 South State St., Salt Lake City, Utah 84138.

No. MC 139885 (Sub-No. 3 TA), filed December 3, 1975. Applicant: ART J. ROBINSON, doing business as, ART ROBINSON & SONS, 95 North Second East, Salina, Utah 84654. Applicant's representative: D. Michael Jorgensen, 1515 Walker Bank Bldg., P.O. Box 2465, Salt Lake City, Utah 84110. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Coal*, in bulk, from the mine sites of Southern Utah Fuel in Sevier County, Utah, to rail loading facilities in Juab County, Utah, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Wycon Chemicals Company, P.O. Box 1287, Cheyenne, Wyo. 82001. Send protests to: Lyle D. Helfer, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 5301 Federal Bldg., 125 South State St., Salt Lake City, Utah 84138.

No. MC 140763 (Sub-No. 4 TA), filed November 25, 1975. Applicant: ONEIDA-COLUMBUS EXPRESS COMPANY, P.O. Box 356, Oneida, Tenn. 37841. Applicant's representative: Marshall Kragen, 805 McLachlen Bank Bldg., 666 Eleventh St., NW., Washington, D.C. 20001. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Carbon black*, in flo-bins and (2) *Empty flo-bins*, (1)

V 40245 DEC 19 75 XUM

from Sunray and Borger, Tex., and Sterlington and Ville Platte, La., to Oneida, Tenn., and (2) from Oneida, Tenn., to Sunray and Borger, Tex., and Sterlington and Ville Platte, La., under a continuing contract with B. F. Goodrich Company, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: B. F. Goodrich Tire Company, 500 South Main St., Akron, Ohio 44318. Send protests to: Joe J. Tate, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Suite A–422, U.S. Courthouse, 801 Broadway, Nashville, Tenn. 37203.

No. MC 141362 (Sub-No. 2TA), filed December 4, 1975. Applicant: GEORGE A. SPARKS, doing business as, ESCONDIDO TRUCK & EQUIPMENT, 630 Daisy, Escondido, Calif. 92027. Applicant's representative: William J. Monheim, P.O. Box 1756, 15942 Whittier Blvd., Whittier, Calif. 90609. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal and poultry feed and feed supplements, dry*, in bulk, from points in Maricopa, Pinal and Yuma Counties, Ariz., to points in Imperial Los Angeles, Orange, Riverside, San Bernardino, and San Diego Counties, Calif., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Wilbur-Ellis Company, 5025 E. Washington, Suite 101, Phoenix, Ariz. 85034. Send protests to: Mildred I. Price, Transportation Assistant, Interstate Commerce Commission, Room 1321 Federal Bldg., 300 Los Angeles, Calif. 90012.

No. MC 141483 (Sub-No 1 TA), filed December 8, 1975. Applicant: VALCON PACKAGE DELIVERY, INC., 3822 West St., Landover, Md. 20785. Applicant's representative: Charles E. Judd III (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Merchandise, equipment and supplies*, sold, used or distributed by a manufacturer of cosmetics, for the account of Avon Products, Inc., from Landover, Md., to points in Loudon, Fauquier, Fairfax, Prince William, Rappahannock, Stafford, Culpepper, Spotsylvania, King George, and Westmoreland Counties, Va., restricted to residential homes and apartments only, under a contract with Avon Products, Inc., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Avon Products, Inc., 2100 Ogletown Road, Newark, Del. 19711. Send protests to: Interstate Commerce Commission, 12th & Constitution Ave., NW., Room B–317, W. C Hersman, District Supervisor, Washington, D.C. 20423.

No. MC 141554 (Sub-No. 1 TA), filed December 4, 1975. Applicant: EDWARD J. PETRILA, 4355 Hattrick Road, Rootstown, Ohio 44272. Applicant's representative: Edward J. Petrila (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Empty, new, produce baskets*; from Creston and Hartville, Ohio, on the one hand, and, on the other, Lake Placid, Fla., under a continuing with D. Tope & Sons, Inc., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: D. Tope & Sons, Inc., P.O. Box 127, Lake Placid, Fla. 33852. Send protests to: James Johnson, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 181 Federal Office Bldg., 1240 East Ninth St., Cleveland, Ohio 44199.

No. MC 141562 TA, filed December 3, 1975. Applicant: CIRCLE S TRUCKING, INC., 1308 S. W. Gamma Court, Pendleton, Oreg. 97801. Applicant's representative: Russell M. Allen, 1200 Jackson Tower, Portland, Oreg. 97205. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber, forest products, and wood products* (except wood residuals), between points in Grant, Umatila and Morrow Counties, Oreg., on the one hand, and, on the other, points in Benton, Franklin, and Walla Walla Counties, Wash., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: Blue Mountain Forest Products, Inc., P.O. Box 1161, Pendleton, Oreg. 97801. Karren Lumber Products, Inc., P.O. Box 926, Walla Walla, Wash. Van Peten Lumber Co., Inc., P.O. Box 1698, Walla Walla, Wash. 99362. Send protests to: W. J. Huetig, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 114 Pioneer Courthouse, Portland, Oreg. 97204.

By the Commission.

CHAPTER XIII—OFFICE OF HUMAN DEVELOPMENT (REHABILITATION PROGRAMS) DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 1370—EVALUATION STANDARDS

Standards for Evaluating Vocational Rehabilitation Programs and Projects; Implementation Provisions

In the FEDERAL REGISTER of July 2, 1974 (39 FR 24366), Interim Regulations setting forth Standards for Evaluating Programs and Projects under the Rehabilitation Act of 1973 (Pub. L. 93-112) were published as a new Part 410 of Chapter IV of Title 45 of the Code of Federal Regulations.

Part 410 stated that the purposes of the Standards are to establish criteria for evaluating program effectiveness, for increasing program accountability, and for encouraging State vocational rehabilitation agencies to conduct more comprehensive evaluation of their programs. Data collected from the Standards were to be used to compare programs and projects in deciding whether to renew or supplement financial assistance pursuant to section 401(b) of the Rehabilitation Act of 1973. Part 410 defined various terms unique to the rehabilitation process and to the Statistical Reporting System described in the regulations of the Rehabilitation Services Administration. The methodology section stated that the implementation of the Standards is both a State and Federal responsibility and that four separate issues would be addressed in the application of the Standards: Impact on the target population; degree of change in reaching gainful activities goals through rehabilitation services; program performance in meeting the priority for providing services to the severely handicapped; and effectiveness of a program in utilizing available resources.

Following the statement of the principal objectives of the Rehabilitation Act of 1973, nine General Standards for Program Evaluation were set forth under three headings: persons served; program efficiency; and client outcomes. Subsumed under each of the nine Standards were various data elements which set forth statistical processes intended to measure the program under evaluation. Performance levels were not set in the original publication. Development and publication, however, were assured by the end of Fiscal Year 1975.

The publication of Interim Regulations provided for the submittal of comments within 30 days of publication, ending August 3, 1974. This period of comment was extended to September 3, 1974. All comments received by September 30, 1974 were carefully considered as a part of the revision process. During the months following the publication of the Interim Regulations, State, Regional and Central Office rehabilitation personnel engaged in extensive field study of the Standards and related data elements. Therefore, revisions to the Interim Regulations were made on the basis of comments received and the experience gained from working with the Standards.

Thirteen letters were received containing 56 specific major criticisms and numerous general observations regarding the various sections and data elements contained in the Interim Regulations. The comments were from State Vocational Rehabilitation Agency Directors, private organizations, the National Association of Councils of State Governments, Federal staff members and the Council of State Administrators of Vocational Rehabilitation.

Revisions were made to the Interim Regulations to accomplish the following purposes: (a) Clarify ambiguities surrounding various terms; (b) eliminate gross errors; (c) establish consistency with other regulations, reporting requirements and definitions; (d) remove confusion regarding the purposes and uses of the Standards in relation to forthcoming performance levels; and (e) provide for uniform data reporting and processing procedures.

The most significant comments and the Department's decisions concerning them are presented in the following paragraphs:

1. Numerous comments were received about the lack of clarity concerning the purpose and use of the Standards as expressed in § 410.1(a), particularly with regard to measuring program performance on the basis of data "in aggregate."

Experience gained while working with the Interim Regulations substantiated this lack of clarity and raised an additional and related issue in § 410.1(c), that the existence of data elements under specific Standards does not "insure" acceptable performance with regard to the various concerns expressed by the "standards" statements. Accordingly, the Department is clarifying in paragraphs (a) and (c) of § 410.1 that the Standards are not to be used primarily for comparison purposes, either between States or between disability groups, but rather are to be used for measuring overall program performance and impact and for assisting the Secretary to analyze and make necessary programmatic decisions.

Additionally, clarification is made that the performance levels which have been established reflect measures of central tendency with adequate levels of statistical significance to permit reasonable program variation, thus offering a criterion by which acceptable program performance can be both judged and "insured."

2. There were many comments that pointed out errors and deficiencies in the definitions in § 410.2, paragraphs (c)(5) and (c)(6) which cite 30 days after the obtaining of suitable employment as the minimum time before case closure can be effected. Since the Regulations require a minimum period of 60 days before closure can be effected, these paragraphs have been modified accordingly.

Comments were also raised concerning the omission of various needed definitions to provide for clarity and consistency in complying with the Standards. Specifically requested were definitions for the terms "cases accepted" and "cases served." Experience in working with the Interim Regulations indicated that additional definitions concerning statuses contained in the RSA Statistical Reporting System would be helpful in eliminating further ambiguity. In response, the Department has added definitions of "Status 06, Extended Evaluation" and of "Statuses 10 through 24" which pertain to active cases.

Finally, a thorough examination of this section revealed that paragraph (c) contained an incorrect reference to the source of the Statistical Reporting System definitions. This error has been corrected.

3. The Departmental review of the Interim Regulations indicated that § 410.3 on methodology did not adequately treat matters concerning implementation of and compliance with the Standards set forth in § 410.5. For this reason the Department has completely revised this Section in order to provide information necessary for methodological guidance to State agency personnel involved with the implementation of these regulations. Two States specifically cited the need for this Section to address levels of statistical significance. These concerns have been addressed in the revised methodology section.

One respondent raised specific criticism regarding the instruction for each State to "report on a self-evaluation." Although this reference is not now included in the Section on methodology, the Department's position in this issuance and in other agency regulations is that States are required to conduct ongoing studies and evaluation of their agency's performance. With regard to the Secretary's Standards, however, the evaluation and analyses conducted for decision-making purposes will be made by the Secretary in accordance with section 401(b) of the Rehabilitation Act of 1973.

4. Two comments were received concerning the statement of the objectives of the rehabilitation program in § 410.4: the first alleges inconsistency with the statutory objectives established in the Rehabilitation Act of 1973; the second

asserts the lack of precision in defining "quality vocational rehabilitation services" in paragraph (a). In response to the first comment, the Department notes that the respondent compared the objectives set forth in the Interim Regulations with the language of Section 2, Declaration of Purpose, of the Rehabilitation Act of 1973 (Pub. L. 93-112). It was not the intention of the Department in these regulations simply to repeat that declaration of purpose, but rather to set forth more general objectives of the rehabilitation program. No change has been made in this section, since the Department feels that the statements as presented are not inconsistent with the overall objectives of the rehabilitation program. With regard to the matter of "quality vocational rehabilitation services," the Department was not addressing problems of definition in § 410.4(a) and does not intend to interpret that term in this issuance.

5. The majority of the comments received dealt specifically with the general standards for evaluation set forth in § 410.5. Criticisms and suggestions addressed each of the nine Standards and nearly all of the data elements subsumed under each Standard. Many of the objections resulted from a misunderstanding concerning the statement of Standards and data elements without any specification of performance levels. Most of the comments received dealt with misapplication of information resulting from the RSA Statistical Reporting System; inconsistencies regarding the use of terms and units of measurement; the lack of processing or procedural guidance; and the difficulty of providing information on newly-implemented programs that lack regulations and guidelines upon which specific program performance can be measured.

In addition to the observations and criticism received from the field, the experience amassed by Central and Regional staff of the Rehabilitation Services Administration and Vocational Rehabilitation State agency personnel and University-based technicians revealed that the overall logic, consistency, style, and reporting burden were such that massive revision, particularly to the data elements, was essential to assure program information of such quality that accurate analyses could be carried out by the Secretary in his decision-making process.

For this reason, revision has been made to the data elements subsumed under each Standard statement.

More specifically, the Department has made the following general revisions:

(a) An analysis of each Standard was made and data elements logically related to that Standard were chosen so that the reporting burden of State agencies would either be maintained or decreased.

(b) Data elements were developed which are consistent with reports contained in the RSA Statistical Reporting System and with statistical procedures applicable to that system, or which require States to carry out information-gathering or follow-up studies to produce information related specifically to relevant program activities;

(c) Duplicative data elements were eliminated;

(d) Data elements relating to new State agency programs that lack adequate Federal guidance were reworked to permit some latitude in planning and preparing agency response;

(e) In order to establish consistency, either statutory or regulatory language was used, consistent measures of central tendency were applied, and a consistent style of presentation was used.

(f) Performance levels for each standard have been established.

After promulgation of these Regulations, guidelines will be issued by the Department to provide the additional information and technical assistance necessary to assure full implementation of the Secretary's Standards for program evaluation in conformance with the Rehabilitation Act of 1973, as amended, and the Regulations.

It is also noted that the regulations for vocational rehabilitation programs and activities have been removed from Chapter IV of Title 45 of the Code of Federal Regulations and relocated in Chapter XIII which will cover all programs administered by the Office of Human Development within the Department of Health, Education, and Welfare. Regulations covering the evaluation standards for vocational rehabilitation services programs, formerly published in Part 410, are now found in Part 1370. It will be necessary therefore for State vocational rehabilitation agencies and other rehabilitation agencies to revise previously published State policy materials which include citations to Federal vocational rehabilitation regulations in order to conform with the revised organization of the Code of Federal Regulations.

Accordingly, the regulations as revised are hereby adopted. Chapter IV of Title 45 of the Code of Federal Regulations is amended by revoking Part 410, and Chapter XIII of Title 45 of the Code of Federal Regulations is amended by adding Part 1370 as follows:

Sec.
1370.1 Purpose of standards.
1370.2 Definitions.
1370.3 Methodology.
1370.4 Objectives of the rehabilitation program.
1370.5 General standards for evaluation.

AUTHORITY: Sec. 400(b), 97 Stat. 386 (29 U.S.C. 780(b)).

§ 1370.1 Purpose of standards.

(a) The general standards include measures of program performance which address overall program impact, as well as the effectiveness of certain program elements. Their structure is sufficiently specific to provide guidance with respect to required data elements, yet broad enough to allow individual States to augment the requirements by including results of their own evaluations and experience. Federal personnel will work with State agencies and others to improve these Standards and the methods by which they are applied.

(b) The purposes of these standards are:

(1) To establish criteria for the evaluation of program effectiveness, i.e., the degree to which the rehabilitation system is accomplishing its stated objectives;

(2) To increase program accountability by focusing on those demonstrated processes generally agreed to increase program effectiveness;

(3) To require State agencies to carry out more comprehensive evaluation of their programs to determine if the program goals are being achieved within resource capabilities and if not, the reasons therefore.

(c) Data collected in response to these general standards will be analyzed and utilized by the Secretary "in deciding • • • whether to renew or supplement financial assistance" pursuant to section 401(b) of the Rehabilitation Act of 1973. However, before such actions are initiated, States which are found to be more than one standard deviation from the mean in established standards will be afforded ample time and opportunity to explain variances and seek consultation or technical assistance, or enter into negotiations in order to resolve problems at issue.

§ 1370.2 Definitions.

(a) *Program.* A program is any continuing activity which is funded by the Rehabilitation Services Administration (RSA).

(b) *Project.* A project is a discrete activity with a definite termination date.

(c) *Cases accepted.* A case is accepted once it is placed in or has passed through Status 10.

(d) *Cases served.* A case is served if it is or has been in one of the active caseload statuses (i.e. 10 through 24) during the reporting period.

(e) *Statistical Reporting System Caseload Statuses (as defined in section 3005.00 of the Rehabilitation Services Manual)*—(1) *Status 00. Referral.* This status represents entrance into the vocational rehabilitation process. A referral is defined as any individual who has applied to or been referred to the vocational rehabilitation agency by letter, by telephone, by direct contact, or by any other means; and for whom the following minimum information has been furnished: name and address, disability, age and sex, date of referral, and source of referral;

(2) *Status 02. Applicant.* As soon as the referred individual (Status 00) signs a document requesting vocational rehabilitation services, he is placed into Status 02 and is designated as an applicant. Generally, the document will be an agency application form, but a letter signed by an individual who provides the minimum basic referral information and requests service should also be considered as a basis for placing the individual in Status 02. This is important, since the applicant must be notified in writing if

DEC 19 75 V40245 XUM

his request for vocational rehabilitation services has been denied, and the only certain basis for determining that the individual has knowledge of having been referred is by the existence of a document signed by the individual;

(3) *Status 06. Extended Evaluation.* (i) An applicant should be placed in this status when the counselor has certified the applicant for extended evaluation. Individuals placed in this status may not remain in the status longer than eighteen consecutive months from the date of certification but may be moved from this status to either Status 10 or 08 at any time prior to the expiration of the 18-month period if it is determined that, either (A) there is a reasonable expectation that the individual can benefit in terms of employability (Status 10), or (B) there is no reasonable likelihood that he can benefit in terms of employability (Status 08). No time allowances can be made for interruptions during this period regardless of the nature of, or reason for, the interruptions.

(ii) Prior to or simultaneously with acceptance of an individual for services for purposes of determination of rehabilitation potential (extended evaluation), there will be a certification of: (A) the presence of a physical or mental disability, (B) the existence of a substantial handicap to employment, and (C) the inability to make a determination that vocational rehabilitation services may benefit the individual in terms of employability. An individualized written rehabilitation program is required concurrently with or reasonably soon after execution of the certificate of eligibility for extended evaluation services.

(4) *Status 08. Closed From Referral, Applicant, or Extended Evaluation Statuses:* This status has been provided to furnish a means for identifying all persons not accepted for vocational rehabilitation services, whether closed from referral status (00), applicant status (02), or extended evaluation (06). All persons processed through referral, applicant, and/or extended evaluation, and not accepted into the active caseload for vocational rehabilitation services, will be closed in this status. A certificate of ineligibility is required for a closure in Status 08, except when the client becomes unavailable for services. A copy of the Form RSA-300, properly completed, dated, and signed is sufficient certification of ineligibility for these cases, provided case documentation includes specific detailed reasons for the closure action;

(5) *Status 10. Individualized Written Rehabilitation Program Development.* While a client is in this status, the case study and diagnosis is completed to provide a basis for the formulation of the individualized written rehabilitation program. A comprehensive case study is basic to determining the nature and scope of services to be provided in order to accomplish the vocational rehabilitation objective of the individual. The counselor and client formulate and plan the rehabilitation services necessary to the solution of the client's problem, and those services are clearly outlined to him. The individual remains in this status until his rehabilitation program is written and approved;

(6) *Statuses 10–24. Active Caseload Statuses.* Active caseload statuses begin with the development of the individualized written rehabilitation program (Status 10). A client is placed in Status 12 when his individualized written rehabilitation program has been approved. Statuses 14, 16 and 18 are the in service statuses and are provided for case progress designations to indicate the kind or kinds of services given to the client to prepare him for employment. Status 14 indicates counseling and guidance only; Status 16 designates physical and mental restoration, and Status 18 is the training status. A client is placed in Status 20 when he has completed training and is ready for employment. Status 22 indicates the client has been placed in employment. Status 24, service interrupted, is recorded if services are interrupted while the client is in one of the Statuses, 14, 16, 18, 20 or 22;

(7) *Status 26. Closed Rehabilitated.* Cases closed as rehabilitated must as a minimum have been declared eligible, have received appropriate diagnostic and related services, have had a program for vocational rehabilitation services formulated, have completed the program insofar as possible, have been provided counseling as an essential rehabilitation service, and have been determined to be suitably employed for a minimum of 60 days;

(8) *Status 28. Closed Other Reasons After Individualized Written Rehabilitation Program Initiated.* Cases closed in this category must have been declared eligible, have received appropriate diagnostic and related services and have had a program for vocational rehabilitation services formulated, but have not completed the program and/or have not been provided counseling, and/or have not been determined to be suitably employed for a minimum of 60 days;

(9) *Status 30. Closed Other Reasons Before Individualized Written Rehabilitation Program Initiated.* Cases closed in this category are those cases which, although accepted for rehabilitation services, did not progress to the point that rehabilitation sevices were actually initiated under a rehabilitation plan.

(f) *Upper performance level.* The upper performance level for a data element is defined as the average value (of all agency averages) for the data element, plus one standard deviation. (The average and the standard deviation are computed over the population of individual agency averages.)

(g) *Lower performance level.* The lower performance level for a data element is defined as the average value (of all agency averages) for the data element, minus one standard deviation. (The Average and the standard deviation are computed over the population of the individual agency averages.)

§ 1370.3 Methodology.

(a) Implementation of the General Standards is both a State and a Federal responsibility.

(b)(1) Evaluation of vocational rehabilitation programs, (i) Each State will be asked to submit information based on the most recent information available, addressing the specific data elements described under each general standard. In addition, States may describe the results of any other evaluation activities undertaken in these areas.

(ii) A principal concern of both the State and Federal VR programs is the interpretation of the compared values for each data element associated with the General Standards. The data elements were selected as descriptors of the various VR State activities. It is intended that the collection of data elements specified under each Standard characterize the essential quantitative aspects of the concept embodied in the Standard. The performance levels for each data element were set at one standard deviation above and below national or regional averages.

(iii) Although the performance levels do represent relatively high or low limits for values of the data elements, it does not necessarily follow that, because a State VR agency falls outside of the performance range specified for each data element, the agency is doing a particularly exceptional or poor job with respect to the VR program concept represented by the Standard. It is quite possible that many agencies, even those having extreme values for certain data elements, are exhibiting quite satisfactory performance with respect to certain programmatic goals. Furthermore, it is recognized that there are many reasons why States may reasonably differ substantially with respect to the data elements: local demographic conditions, nature of the population served, agency policy and philosophy. It is in this context that it is intended that the data element performance levels provide a basis for recognizing unusual program features, leading to a better understanding of overall program performance. From the viewpoint of the individual VR agency, it is perhaps the year-to-year changes in the values of the data elements that will provide the greatest insight into program performance, rather than the agency-to-agency differences.

(2) Information on certain of the data elements may not be readily available to States. Examples of such data may include follow-up information, counselor data and caseload management information. In such instances, States are expected to conduct periodic sample surveys to obtain the required data. Further information on the allowable statistical significance of these studies, as well as on the frequency of performance, will be provided in guidelines.

(c) Evaluation of vocational rehabilitation projects. Projects are to be judged by the extent to which they would contribute to improvement in the normal vocational rehabilitation program performance, as measured by the evaluation standards. Following are specific criteria according to which projects will be evaluated:

(1) Specificity of goals (to be evaluated before project is approved);

(2) Extent to which project benefits the vocational rehabilitation program;

(3) Feasibility of transferring to the vocational rehabilitation program knowledge acquired from the project.

(d) Validation of data. In order to validate the appropriateness and accuracy of information submitted as it relates to the Standards in question, particularly 2(vi), 5, 6, 7(ii) and 9, instruments prepared for such validation may be administered.

§ 1370.4 Objectives of the rehabilitation program.

The principal objectives of the Rehabilitation Act of 1973 are:

(a) To maintain and improve State-Federal programs of quality vocational rehabilitation services and to redirect the public rehabilitation program towards the expansion of services to the severely handicapped;

(b) To provide the opportunity for active participation by the client in the development of the client's individualized written rehabilitation program;

(c) To provide special attention to target groups whose rehabilitation problems are known to be difficult;

(d) To promote the elimination of barriers in the environment which impede the handicapped in employment, housing, and transportation;

(e) To utilize to the fullest possible extent community, State and Federal resources in the rehabilitation of the client and the extent to which those funds are marshalled to increase and improve:

(1) The supply of trained rehabilitation manpower;

(2) Rehabilitation knowledge and techniques;

(3) Rehabilitation facilities;

(f) To promote and expand employment opportunities in the public and private sectors for handicapped individuals and to place individuals in gainful activities;

(g) To provide education to the general public and handicapped population about the rehabilitation of the handicapped and to disseminate information pertaining to rehabilitation;

(h) To develop a process of evaluation as to the effectiveness of present programming on different disability groups.

§ 1370.5 General standards for evaluation.

The evaluation standards address four basic issues: the degree to which the entire eligible population is reached and affected; the degree of change experienced towards the goal of gainful employment which occurs as a result of vocational rehabilitation services; the extent to which the program meets the mandated priority to provide services to the severely handicapped; and the efficiency with which the program utilizes available resources to accomplish its goals. This section sets forth the general evaluation standards. Standards are grouped under three headings: persons served, program efficiency and outcomes. Under each standard various data elements are listed. Performance levels are cited for each data element. The normal range for a data element is specified in terms of upper and lower performance levels, which are set one standard deviation above and below national or regional averages of the data element. A performance level one standard deviation above the mean is the "upper performance level". A performance level one standard deviation below the mean is the "lower performance level". In most cases the performance level range is closed only on one end; i.e., only an upper or lower performance level, whichever is appropriate, is specified. If an upper performance level is specified, the data element would normally have a value below the performance level. If a lower performance level is specified, the data element would normally have a value above the performance level. In certain instances, different performance levels are specified for several different regional groupings. It is emphasized that the performance levels cited for each data element do not represent national or regional averages. Rather, they specify a range of usual values for the data element, and a small portion of agencies would normally exhibit data element values beyond this range. Wherever possible, reports on the data elements should be provided separately for the severely handicapped and the non-severely handicapped. When this is not possible, the use of aggregate data should be indicated. For the latter case (aggregate data), separate performance levels are cited for blind and general agencies.

(a) *Persons served.* In order to assure that the rehabilitation program objectives and priorities, as identified in the Act, are being adhered to, it is necessary to identify the size and characteristics of the eligible population, the extent to which rehabilitation services are made available to the eligible population, and the respective numbers and types of clients who successfully complete the program. Special attention is to be given to an accurate and detailed evaluation of the manner in which services are expanded and improved to the severely handicapped.

(1) *Standard No. 1.* To insure that the rehabilitation program is serving the eligible disabled population and to insure that these services are provided in an equitable manner.

(i) Estimate of the total population eligible for VR services. Describe methodology. This "data element" is not conducive to specification of a quantitative performance level; States should indicate the analytical procedure used to estimate the target population, cite the estimate, and provide an indication of the precision of this estimate (e.g., the standard error of the estimate).

(ii) Number of accepted cases served (Statuses 10 through 30) for the year. No specific performance level is cited for this data element. States should compare the number of accepted cases served to the estimate of the target population (from paragraph (a)(1)(i) of this section), and to their total budget.

(iii) Percent of annual increase or decrease in number of accepted cases served (Statuses 10 through 30). The lower limit for performance on this data element is 0% increase.

(iv) Number of cases closed rehabilitated during the year (Status 26). No specific performance level is cited for this data element. States should compare number of cases closed rehabilitated to other variables, such as the estimate of the target population in paragraph (a)(1)(i) of this section, the number of accepted cases served, and the number of severely disabled cases served.

(v) Accepted cases (Statuses 10 through 24) as a percentage of the total of cases closed not accepted (Status 08) plus those cases accepted (Statuses 10 through 24), i.e.,

$$\frac{\text{Statuses } 10-24}{\text{Status } 08+\text{Statuses } 10-24}$$

The following performance levels are specified for this data element:

General agencies:	
Lower level	0.44
Upper level	.62
Blind agencies:	
Lower level	.34
Upper level	.65

(2) *Standard No. 2.* To insure that rehabilitated clients are placed in gainful employment suitable to their capabilities.

(i) Percent of those placed in competitive employment (wage and salary earners and self-employment). The following lower performance levels are specified for this data element:

	Percent
General agencies	70
Blind agencies	40

(ii) Percent of those placed in noncompetitive employment (sheltered workshops, and others). Upper performance levels for this data element are:

	Percent
General agencies	6
Blind agencies	12

(iii) Percent of those placed as homemakers. Upper performance levels for this data element are:

	Percent
General agencies	18
Blind agencies	42

(iv) Percent of those placed as unpaid family workers. Upper performance levels for this data element are:

	Percent
General agencies	4
Blind agencies	7

(v) Percent of those placed in business enterprise programs. No performance level is specified for this data element.

(vi) Those who received training related to the job family in which they were placed (as identified by the first digit of the Dictionary of Occupational Titles code) as a percentage of the total number who received training. No specific performance level is cited for this data element. If a State is unable to provide the specified information, it should identify reasons why, and out-

V40245 DEC 19 75 XUM

line a plan for setting up procedures to collect the required information.

(vii) Mean weekly earnings in the week before referral of all rehabilitated clients, including clients with zero earnings. No performance levels are specified for this data element.

(viii) Mean weekly earnings at closure of all rehabilitated clients, including clients with zero earnings. Lower performance levels for this data element are:

	Dollars
Regions 2, 3, 5, 9:	
General	75
Blind	45
Regions 1, 7, 8, 10:	
General	85
Blind	55
Regions 4, 6:	
General	65
Blind	45

(b) *Program efficiency.* Program elements are evaluated to determine whether there is an optimal usage of available resources to maximize the flow through of clients, while maintaining quality of services.

(1) *Standard No. 3.* To insure that undue delays are avoided in providing clients with VR services.

(i) Mean time from combined referral-applicant statuses (Statuses 00–02) to closed not accepted (Status 08). Upper performance levels for this data element are:

	Months
General agencies	10
Blind agencies	16

(ii) Mean time in extended evaluation (Status 06) for cases closed not accepted (Status 08). Upper performance levels for this data element are:

	Months
General agencies	12
Blind agencies	12

(iii) Mean time from combined referral-applicant statuses (Statuses 00–02) to accepted statuses for cases closed rehabilitated (Status 26) and closed not rehabilitated (Statuses 28–30) during the fiscal year. Upper performance levels for this data element are:

	Months
(A) For status 26:	
General agencies	5
Blind agencies	7
(B) For statuses 28–30:	
General agencies	6
Blind agencies	8

(iv) Mean time in extended evaluation (Status 06) for cases closed rehabilitated (Status 26) and closed not rehabilitated (Statuses 28–30) during the fiscal year. Upper performance levels for this data element are:

	Months
(A) For status 26:	
General agencies	9
Blind agencies	13
(B) For statuses 28–30:	
General agencies	9
Blind agencies	15

(v) Mean time from accepted case statuses (Statuses 10 through 24) to closed rehabilitated (Status 26). Upper performance levels for this data element are:

	Months
General agencies	22
Blind agencies	22

(vi) Mean time in accepted case statuses (Statuses 10 through 24) to closed not rehabilitated after rehabilitation program initiated, (Status 28). Upper performance levels for this data element are:

	Months
General agencies	25
Blind agencies	34

(vii) Mean time in accepted case statuses (Statuses 10 through 24) to closed not rehabilitated before rehabilitation program initiated (Status 30). Upper performance levels for this data element are:

	Months
General agencies	16
Blind agencies	28

(2) *Standard No. 4.* To insure that available resources are utilized to achieve maximum operational efficiency.

(i) Mean case service cost per accepted case closure (Statuses 26, 28 and 30) where case service cost to the State vocational rehabilitation agency was involved. Upper performance levels for this data element are:

	Dollars
(A) For status 26:	
General Agencies	1,100
Blind agencies	2,700
(B) For statuses 28–30:	
General agencies	700
Blind agencies	1,800

(ii) Percent of clients receiving rehabilitation services at no cost to the vocational rehabilitation agency. No performance level is specified for this data element.

(iii) Percent distribution of total vocational rehabilitation dollars spent for agency operations each fiscal year as reported on the RSA–2 expenditure report. Upper performance levels for this data element are:

Type of Expenditure

[In percent]

	General	Blind
Administration	12	20
Counseling and placement	45	45
Services to individuals	65	55
Small business enterprise	2	20
Establishment of rehabilitation facilities	10	10
Other	2	2

(iv) Mean case service cost per type of vocational rehabilitation case service involving cost to the State agency, and percentage of individuals receiving specific vocational rehabilitation service. The following table specifies upper performance levels (in percents) for each of the service categories:

Type of service

[In percent]

	General	Blind
Diagnostic and evaluation	25	20
Restoration (physical and mental)	45	30
Training	55	65
Maintenance	25	20
Services to family members	1	1
Other services	15	15

(3) *Standard No. 5.* To insure that manageable-sized caseloads are maintained. (To insure uniform reporting by all State agencies on this Standard, a "caseload carrying counselor" is to be defined as "one to whom cases are assigned and who issues vendor authorization under the Basic Support Program".)

(i) Number of caseload carrying counselor man years. No performance levels are specified for this data element.

(ii) Number of authorized and funded full-time caseload carrying counselor positions. No performance levels are specified for this data element.

(iii) Number and percent of rehabilitation counselor turnover, i.e., (A) hiring rate—new hirings divided by mean number of authorized and funded full-time caseload carrying counselor positions during the year (B) separation rate—caseload carrying counselors leaving job during the year divided by number of authorized and funded full-time caseload carrying counselor positions during the year. No performance levels are specified for this data element at this time.

(iv) Mean size of caseloads as of June 30th per number of authorized and funded caseload carrying counselor positions. The following performance levels are specified for this data element:

General agencies:	
Lower level	53
Upper level	143
Blind agencies:	
Lower level	21
Upper level	60

(v) Describe the process, if any, employed by the State for each of following functions: caseload management; caseload monitoring; caseload review. No quantitative performance level is specified for this data element. Process descriptions should include specification of quantitative process descriptors, whenever possible.

(c) *Client outcomes.* To determine whether the rehabilitation system is achieving its stated objective, it is necessary to ascertain whether rehabilitated clients retain, over time, benefits derived from the rehabilitation system. Therefore, an effective follow-up system should include a means to determine the degree of client's satisfaction with the client's program and services, the percentage of clients who have remained in gainful employment and the extent to which those activities are related to skills acquired while in the rehabilitation system; and the extent to which "post-employment" (section 103(a)(2) (Pub. L. 93–112) services are needed and provided. No quantitative performance levels are specified at this time for the data elements of Standard 6 and 9, or for data element 7ii. It is recognized that many States do not have established procedures for conducting the follow-up surveys required to efficiently collect the information required to compute the data elements. If a State already has follow-up data that permit computation of values for some data elements, it should submit those values. Otherwise, minimum performance under Standards 6, 7, and 9 would include a written plan for conducting the surveys and other procedures required to collect the required information and compute the data elements. This plan should include a detailed specification of what procedures will be adopted to determine estimates for each data element (e.g., survey design, instrument design, sampling procedures, estimation procedures, confidence limits).

(1) *Standard No. 6.* To insure that clients closed rehabilitated retain the benefits obtained from the rehabilitation process.

(i) Percent of rehabilitated clients still employed at time of follow-up, specifying 1 year, 2 years, or 3 years after closure;

(ii) Percent with earnings at follow-up, mean earnings at follow-up, and mean earnings for all with or without earnings at follow-up;

(iii) Percent increase or decrease of earnings at closure to earnings at follow-up;

(iv) Percent of rehabilitated clients (Status 26) unemployed at follow-up for: less than 1 month, 1–3 months, 4–6 months, 7–12 months, more than 12 months.

(2) *Standard No. 7.* To insure that the need for post-employment (post-closure, section 103(a)(2), Pub. L. 93–112) services is satisfied.

(i) Percent of rehabilitated clients in the previous fiscal year (Status 26) receiving post-employment (post-closure) services during the 12 months following closure;

(ii) Percent receiving the following types of post-employment services of the total receiving post-employment services:

(A) Diagnostic and evaluation;
(B) Restoration (physical or mental);
(C) Training;
(D) Guidance and counseling only;
(E) Maintenance;
(F) Transportation;
(G) Other.

(3) *Standard No. 8.* To insure that agencies are consistently identifying reasons why clients are not successfully rehabilitated.

(i) Percent of Status 08, 28, and 30 closures by the following reasons:

(A) Unable to locate or unable to contact or moved;
(B) Handicap too severe or unfavorable medical prognosis;
(C) Refused services or further services;
(D) Death;
(E) Client institutionalized;
(F) Transferred to another agency;
(G) Failure to cooperate;
(H) No disabling condition (08 closures only);
(I) No vocational handicap (08 closures only);
(J) Other.

The following table specifies upper performance levels (in percents) for each of the above reasons, by closure category (08, 28, 30):

Reason	Closure category 08	28	30
A	25	45	45
B	20	25	20
C	40	25	40
D	5	20	16
E	2	8	6
F	4	7	4
G	20	20	20
H	25		
I	12		
J	30	25	30

(ii) Cases closed not rehabilitated (Statuses 28+30) as a percentage of the total accepted cases closed (Statuses 26+28+30). Upper performance levels for this data element are:

	Percent
General agencies	35
Blind agencies	25

(4) *Standard No. 9.* To insure that the client is satisfied with the vocational rehabilitation services as developed with the counselor.

(i) Percent of clients rehabilitated throughout the fiscal year (Status 26) and not rehabilitated (Statuses 28+30) throughout the fiscal year who express satisfaction with the following, specifying 1 year, 2 years, or 3 years:

(A) Counselor's willingness to listen to client's ideas and suggestions in developing the individualized written rehabilitation program;
(B) Adequacy of information provided by counselor to clients for understanding their disability;
(C) Promptness in the delivery of services;
(D) Kind of training received;
(E) Benefits of training received;
(F) Assistance in seeking job and final employment;
(G) Results of physical restoration services.

(ii) Percentage of clients contacted during the followup period who stated they would recommend vocational rehabilitation to a disabled friend.

Effective date. These regulations shall be effective December 19, 1975.

EMPLOYEE BENEFIT PLANS

Proposed Class Exemptions From Prohibitions Respecting Certain Transactions in Which Multiemployer Plans Are Involved

DECEMBER 13, 1975.

Notice is hereby given that an application for exemption for certain classes of transactions in which multiemployer plans (as defined in section 3(37) of the Employee Retirement Income Security Act of 1974 (the Act) and section 414(f) of the Internal Revenue Code of 1954 (the Code)) are involved from the restrictions of section 4975(a) and (b) of the Code, by reason of section 4975(c)(1) of the Code, has been filed by the Alaska Teamsters Employer Pension Trust (the Applicant) pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975) and Rev. Proc. 75–26, 1975–20 I.R.B. 14.

The Applicant represents that multiemployer plans at times are required to secure adequate space for the ordinary and necessary operations of the plan on an efficient and economical basis. Section 408(b)(2) of the Act and section 4975(d)(2) of the Code provide a specific exemption from the prohibited transaction provisions set forth in section 406 of the Act and section 4975(c)(1) of the Code concerning, among other things, the furnishing of office space to a plan by a party in interest or a disqualified person (as defined in section 3(14) of the Act and section 4975(e)(2) of the Code, respectively), provided that the arrangement for such office space is reasonable and no more than reasonable compensation is paid therefor. However, multiemployer plans are sometimes unable to secure adequate existing office space, whether from parties in interest, or disqualified persons, or from others.

It is further represented that, on occasion, in order to satisfy the needs of a multiemployer plan for adequate space, the plan fiduciaries, in the exercise of their fiduciary duties, may, for valid reasons, cause the plan to acquire unimproved real property for the purpose of erecting thereon a building structure, all or a portion of which will be used by the plan for the purpose of carrying on its ordinary and necessary operations on an efficient and economical basis. Section 406 of the Act and section 4975(c)(1) of the Code do not prohibit or provide for the imposition of taxes upon the acquisition of unimproved real property by a plan for the purpose of erecting a building structure thereon, all or a portion of which will be used by the plan for the purpose of carrying on its ordinary and necessary operations. However, it is noted that section 406 of the Act and section 4975(c)(1) of the Code, among other things, provide (subject to applicable statutory exemptions) that the sale or exchange of any property between a plan and a party in interest or a disqualified person, and the furnishing of goods, services, or facilities between a plan and a party in interest or disqualified person, constitute prohibited transactions.

The Applicant represents that in some circumstances suitable unimproved real property sought to be acquired by a multiemployer plan for the purposes described above may be held by an employee organization the members of which are participants or beneficiaries of the plan. Since such an employee organization is by definition a party in interest and a disqualified person with respect to the plan under section 3(14)(D) of the Act and section 4975(e)(2)(D) of the Code, the acquisition of such unimproved real property by the plan from the employee organization would constitute a prohibited transaction.

Further, on many occasions the persons appointed to serve as trustees of such a plan by an employee organization under section 302(c)(5) of the Labor Management Relations Act, 1947 (29 U.S.C. 186(c)(5)) will be the same persons who are officers of the employee organization. In such situations, there is a substantial likelihood that the acquisition of such unimproved real property by the plan may be prohibited under the provisions of section 406(b)(2) of the Act.

The application also asserts that it is not unusual for a multiemployer plan to arrange for the construction of building structures for the purpose of providing office space for the plan with building contractors and subcontractors some or all of whose employees are participants or beneficiaries of the plan. Since such building contractors and subcontractors are by definition parties in interest and disqualified persons with respect to the plan under section 3(14)(C) of the Act and section 4975(e)(2)(C) of the Code, any arrangement as described above between the plan and such building contractors and subcontractors would also constitute prohibited transactions.

Based upon the representations set forth in the application, including the fact that the Applicant proposes to engage in a land purchase and contract for construction of a building thereon in a manner encompassed by the transactions which are generally described immediately hereafter, the Applicant has requested the Department of Labor and the Internal Revenue Service to grant certain class exemptions under section 408(a) of the Act and section 4975(c)(2) of the Code, with respect to (1) the acquisition by a multiemployer plan from an employee organization which is a party in interest or a disqualified person with respect to the plan of unimproved real property for the purpose of erecting thereon a building structure, all or a substantial portion of which will be used by the plan for the purpose of carrying on its ordinary and necessary operations on an efficient and economical basis; and (2) the construction for a multiemployer plan of a building structure, all or a portion of which will be used by the plan for the principal purpose of carrying on its ordinary and necessary operations on an efficient and economical basis, by building contractors or subcontractors who are parties in interest or disqualified persons with respect to the plan solely by reason of the fact that employees of such building contractors or subcontractors are participants in the plan.

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which, among other things, require a fiduciary to discharge his duties respecting the plan solely in the interest of the plans participants and beneficiaries and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) The exemption requested in the application with respect to the acquisition of unimproved real property does not extend to transactions prohibited under section 406(b)(1) and (3) of the Act and section 4975(c)(1)(E) and (F) of the Code.

(3) The exemption requested in the application with respect to the construction of a building structure does not extend to transactions prohibited under section 406(b) of the Act and section 4975(c)(1)(E) and (F) of the Code.

(4) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department of Labor and the Internal Revenue Service must find that the exemption is administratively feasible, in the interest of the plan or plans and of their participants and beneficiaries, and protective of the rights of participants and beneficiaries of such plan or plans.

(5) The exemptions proposed herein or which may be subsequently proposed as part of this proceeding are supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory exemptions and transitional rules. Furthermore, the fact that a transaction is the subject of an exemption is not dispositive of whether the transaction would have been a prohibited transaction in the absence of such exemption or, though it would have been a prohibited transaction, is exempt by operation of a statutory exemption or a transitional rule.

(6) The application for exemption referred to herein is available for public

inspection at the Public Document Room, Office of Employee Benefits Security, U.S. Department of Labor, Room N4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

All interested persons are invited to submit written comments on the proposed exemptions set forth herein. In order to receive consideration, such comments should be received by the Department of Labor on or before January 19, 1976. In addition, any interested person may submit a written request that a hearing be held relating to the proposed exemption concerning the acquisition of unimproved real property. Such written request must be received by the Department of Labor on or before January 13, 1976, and should state the reasons for such person's request for a hearing and the nature of such person's interest in the proposed exemption relating to the acquisition of unimproved real property.

Written comments pertaining to the proposed exemptions, and requests for a hearing pertaining to the exemption relating to the acquisition of unimproved real property, (preferably six copies) should be submitted to "Multiemployer Plans—Real Property", Office of Employee Benefits Security, Labor-Management Services Administration, Room N–4716, U.S. Department of Labor, Washington, D.C. 20216. All such comments will be made part of the record, and will be available for public inspection at the Public Document Room, Office of Employee Benefits Security, U.S. Department of Labor, Room N4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

I. *Acquisition of unimproved real property.* The class exemption set forth below has been requested by the Alaska Teamsters Employer Pension Trust (the Applicant) in order to permit multiemployer plans to acquire unimproved real property from an employee organization for the purpose of erecting thereon a building structure, all or a substantial portion of which will be used by the plan for the purpose of carrying on its ordinary and necessary operations on an efficient and economical basis. It is represented that the proposed exemption sets forth certain conditions which must be satisfied and which are sufficient to protect the interests and rights of participants and beneficiaries of such plans.

Requested exemption. It is requested that the following class exemption be granted under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with ERISA Procedure 75–1 (40 FR 18471, April 28, 1975) and Rev. Proc. 75–26, 1975–20 I.R.B. 14:

Sec. 1—*Prospective.* Effective on the date this exemption becomes effective, the restrictions of sections 406(a)(1) and 406(b)(2) of the Act and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply to the acquisition by a multiemployer plan of unimproved real property from an employee organization (as defined in section 3(a) below) which is a party in interest or a disqualified person with respect to the plan, for the purpose of erecting thereon a building structure all or a substantial portion of which is intended to be used for carrying on the ordinary and necessary operations of the plan, *provided* that:

(a) Before the acquisition by the plan of unimproved real property from any employee organization which is a party in interest or a disqualified person with respect to the plan:

(1) The plan shall have made a diligent but unsuccessful effort to secure adequate existing office space for carrying on its ordinary and necessary operations on an efficient and economical basis, or, if such space was unavailable, to secure unimproved real property from a person who is not a party in interest or disqualified person, for the purpose of erection of a building structure all or a substantial portion of which would be used for carrying on the ordinary and necessary operations of the plan;

(2) The plan shall have secured from three qualified and independent appraisers who are familiar with the area in which the unimproved real property proposed to be acquired is situated, final written opinions as to—

(A) the fair market value of such property,

(B) the general suitability of such property for the erection of a building structure as contemplated by the plan for carrying on its ordinary and necessary operations on an efficient and economical basis, and

(C) the approximate rental rate (on a square foot of usable space basis) which the plan may reasonably expect to receive with respect to any such space in the contemplated building structure that the plan may not intend to utilize upon original occupancy for carrying on its ordinary and necessary operations on an efficient and economical basis; and

(3) The plan shall have secured from at least three unaffiliated construction general contractors preliminary estimates as to the total construction costs (including all off-site costs, such as costs which may relate to utilities, water supply and sewage) of the building structure contemplated to be erected by the plan.

(b) The purchase price incurred by the plan to acquire the unimproved real property shall not exceed the lowest of the following:

(1) The fair market value of such property determined as of the date the binding contract to purchase the property was entered into by the plan;

(2) The mean between the two lowest appraised values of such property received by the plan in satisfaction of paragraph (a)(2) of this section;

(3) The purchase price incurred by the selling employee organization if such property was acquired by the organization within 36 months prior to the date of its sale to the plan;

(4) The purchase price incurred by any officer, director, or employee of the selling employee organization who has the power to exercise a controlling influence over the management or policies of such organization, or by any member of the family of such officer, director, or employee, if any such person sold the property to the employee organization within 36 months prior to its resale to the plan; or

(5) Three percent of the fair market value of the plan's gross assets determined on the date of the acquisition of such property by the plan.

(c) No commissions or any other special remuneration (whatever its form) shall be paid in connection with the sale of the unimproved real property to the plan.

(d) Construction of the building structure contemplated by the plan for the purpose of carrying on its ordinary and necessary operations on an efficient and economical basis shall commence within 12 months after the date of acquisition of the unimproved real property by the plan unless delayed by unforseen circumstances arising after the purchase, such as labor strikes, material shortages, natural disasters, or government action.

(e) The sale of the unimproved real property to the plan shall not benefit, nor be one of a series of transactions any of which benefits, directly or indirectly, any party having the power to exercise a controlling influence over the management or policies of the employee organization or the plan, or any affiliate of such party.

(f) At least 80 percent of the unimproved real property shall be substantially related to the building structure.

(g) A substantial portion of the building shall be used by the plan.

(h) For the period beginning at least 60 days prior to the date of acquisition of the unimproved real property up to the date of such acquisition, the plan shall continuously and prominently post at all offices of the plan, all hiring halls and dispatch halls of the employee organization and all places where membership meetings of the employee organization are customarily held, for inspection by plan participants, notice of the proposed acquisition by the plan of unimproved real property from the employee organization, which notice shall set forth the following, or state where in such offices, halls, and places the following are available:

(1) A copy of the FEDERAL REGISTER notice of the granting of this exemption;

(2) The relevant financial terms of the proposed acquisition along with a statement of the relevant financial terms with respect to the total construction costs of the building structure contemplated by the plan;

(3) A statement by the plan setting forth the basis of its compliance with each of the terms and conditions of this exemption including a complete set of records documenting the efforts made by the plan to secure existing office space and suitable unimproved property from unrelated parties;

(4) Copies of the appraisals secured from appraisers in accordance with subparagraph (a)(2) of this section;

V40245 DEC 19 75 XUM

(5) Copies of the preliminary estimates as to total construction costs of the contemplated building structure secured from the three construction general contractors in accordance with subparagraph (a)(3) of this section; and

(6) The following statement:

Any participant who believes the transaction described does not satisfy the conditions of the class exemption may send a statement setting forth the reasons for such belief and any pertinent facts to "Multiemployer Plans—Real Property", Office of Employee Benefits Security, Labor-Managing Services Administration, Room N-4716, U.S. Department of Labor, Washington, D.C. 20216 on or before [insert date 45 days after the date of posting of the notice].

(i) The plan shall file six copies of the notice required under paragraph (h) above at least 60 days prior to the date of the proposed acquisition at the following address: "Multiemployer Plans—Real Property", Office of Employee Benefits Security, Labor-Management Services Administration, Room N4716, U.S. Department of Labor, Washington, D.C. 20216.

(j) A complete set of records documenting all items required in paragraph (h) above, along with records documenting all bids received and contracts entered into, shall be kept by the plan trustees until termination of the period ending six years from the last day of the year in which the construction of the building is completed, except that a prohibited transaction will not be deemed to have occurred if due to circumstances beyond the control of the plan fiduciaries, such records are lost or destroyed prior to the end of such six-year period.

Sec. 2—*Retroactive.* Effective January 1, 1975 until the effective date of any exemption granted pursuant to section 1 above, the restrictions of section 406(a)(1) and 406(b)(2) of the Act and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply to the acquisition by a multiemployer plan of unimproved real property from an employee organization (as defined in section 3(a) below) which is a party in interest or a disqualified person with respect to the plan, for the purpose of erecting thereon a building structure all or a substantial portion of which would be used for carrying on the ordinary and necessary operations of the plan, *provided that:*

(a) Two qualified and independent appraisers shall have submitted written opinions as to the items set forth in section 1(a)(2),

(b) The purchase price incurred by the plan to acquire the unimproved real property shall not exceed the lowest of the following:

(1) The fair market value of such property determined as of the date the binding contract to purchase the property was entered into by the plan;

(2) The purchase price incurred by the selling employer organization if such property was acquired by the organization within 36 months prior to the date of its sale to the plan;

(3) The purchase price incurred by any officer, director, or employee of the selling employee organization who has the power to exercise a controlling influence over the management or policies of such organization, or by any member of the family of such officer, director, or employee, if any such person sold the property to the emplovee organization within 36 months prior to its resale to the plan; or

(4) Three percent of the fair market value of the plan's gross assets determined as of the date of the acquisition of such property by the plan.

(c) The plan shall have complied with the requirements of section 1 (c) through (g) above.

(d) For a period beginning within 30 days after the effective date of this exemption and lasting for at least 60 days, the plan shall continuously and prominently post at all offices of the plan, all hiring halls and dispatch halls of the employee organization and all places where membership meetings of the employee organization are customarily held, for inspection by plan participants, notice of the proposed acquisition by the plan of unimproved real property from the employee organization, which notice shall set forth the following, or state where in such offices, halls, and places the following are available:

(1) A copy of the FEDERAL REGISTER notice of the granting of this exemption;

(2) The relevant financial terms of the acquisition along with a statement of the relevant financial terms with respect to the total construction costs of the building structure contemplated by the plan;

(3) A statement by the plan setting forth the basis of its compliance with each of the terms and conditions of this exemption including a complete set of records documenting the efforts made by the plan to secure existing office space and suitable unimproved property from unrelated parties;

(4) Copies of the appraisals secured from appraisers in accordance with subparagraph (a) of this section.

(5) Copies of the preliminary estimates as to total construction costs of the contemplated building structure secured from two construction general contractors containing the information called for by subparagraph (a)(3) of section 1, and

(6) The following statement:

Any participant who believes the transaction described does not satisfy the conditions of the class exemption may send a statement setting forth the reasons for such belief and any pertinent facts to "Multiemployer Plans—Real Property", Office of Employee Benefits Security, Labor-Management Services Administration, Room N-4716, U.S. Department of Labor, Washington, D.C. 20216 on or before [insert date 45 days after the date of posting of the notice.]

(e) The plan shall file six copies of the notice required under paragraph (d) above within at least 30 days after the effective date of this exemption at the following address: "Multiemployer Plans—Real Property", Office of Employee Benefits Security, Labor-Management Services Administration, Room N-4716, U.S. Department of Labor, Washington, D.C. 20216.

(f) Within at least 30 days after the effective date of this exemption the plan trustees shall prepare and keep a complete set of records documenting all items required in paragraph (d) above, along with records documenting all bids received and contracts entered into, which records shall be kept until termination of the period ending six years from the last day of the year in which the construction of the building is completed, except that a prohibited transaction will not be deemed to have occurred if due to circumstances beyond the control of the plan fiduciaries, such records are lost or destroyed prior to the end of such six-year period.

(g) The applicant shall give notice of the proposal of this exemption to members of the employee organization members of which are covered by the applicant plan and to participants and beneficiaries of the plan, including a copy of the proposal of this exemption, in the form and manner set forth in subparagraph (d) above, except that a period beginning within five days after the publication of this proposal and ending January 19, 1976 shall be substituted for the date set forth in subparagraph (d)(6).

Sec. 3—*Definitions.* For purposes of sections 1 and 2 above—

(a) The term "employee organization" shall have the meaning ascribed to it by section 3(4) of the Act and, in addition, shall include any person (as defined in section 7701(a)(1) of the Code) which is a non-profit corporation, the shareholders or members of which constitute substantially all of the members of the employee organization.

(b) The term "unimproved real property" means land which has no building structures on it the value of which is equal to 15 percent or more of the value of the land; except that, for the purpose of section 2 above, the purchase of "unimproved real property" shall mean the purchase of land and all building structures thereon the value of which does not exceed 15 percent of the value of the land.

(c) The term "substantial portion" relating to the use by the plan of a building structure, shall mean that immediately following the construction of the building structure at least 25 percent of the usable space thereof shall be used by the plan for the purpose of carrying on its ordinary and necessary operations on an efficient and economical basis and the plan expects to use at least 25 percent of such usable space for the foreseeable future.

(d) The term "independent appraiser" means an appraiser which received at least 90 percent of its compensation during each of the three 12-month periods immediately preceding the appraisal referred to in this exemption from sources other than the plan or the employee organization.

(e) The term "unaffiliated construction general contractor" means a contractor (1) whose directors, officers, five percent shareholders, or partners are neither officers, directors, or employees who have the power to exercise a controlling influence over the management or policies of the employee organization, nor a member of the family of such officer, director, or employee, nor fiduciaries of the plan, nor members of the family of such a fiduciary, and (2) whose employees constitute no more than five percent of the participants in the plan.

(f) The term "member of the family" shall mean a relative as defined in section 3(15) of the Act, or a brother, a sister, or a spouse of a brother or sister.

(g) The term "affiliate", with respect to any person shall include:

(1) Any person directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with such person;

(2) Any officer, director, partner, employee or member of the family of such person; and

(3) Any corporation or partnership of which such person is an officer, director or partner.

II. *Construction of building structure.* The class exemption set forth below has been requested by the Alaska Teamsters Employer Pension Trust (the Applicant) in order to permit a multiemployer plan to cause to be constructed on unimproved real property held by the plan certain building structures, all or a substantial portion of which will be used by the plan for the purpose of carrying on its ordinary and necessary operations on an efficient and economical basis, by a construction general contractor and subcontractors who are parties in interest or disqualified persons with respect to the plan. It is represented that the exemption as requested sets forth certain conditions which must be satisfied and which are sufficient to protect the interests and rights of participants and beneficiaries of such plans.

Requested exemption. It is requested that the following class exemption be granted under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with ERISA Procedure 75-1 (40 FR 18471, April 28, 1975) and Rev. Proc. 75-26, 1975-20 I.R.B. 14.

Sec. 1—*Prospective.* Effective on the date this exemption becomes effective, the restrictions of section 406(a)(1) of the Act and the taxes imposed by section 4975 (a) and (b) of the Code, by reason of section 4975(c)(1) (A) through (D) of the Code, shall not apply to the construction for a multiemployer plan of a building structure all or a substantial portion of which will be used by such plan for the purpose of carrying on its ordinary and necessary activities on an efficient and economical basis, by a construction general contractor or subcontractors which are parties in interest or disqualified persons with respect to the plan solely by reason of having employees who are covered by the plan, provided that:

(a) Before the construction contract for the building structure has been awarded the plan shall have secured bids for the construction of the building structure from:

(1) At least two financially responsible and otherwise qualified unaffiliated construction general contractors and subcontractors if the total estimated construction costs of the building structure are $500,000 or less; or

(2) At least three financially responsible and otherwise qualified unaffiliated construction general contractors and subcontractors if the total estimated construction costs of the building structure are over $500,000.

(b) The contractor to whom the contract is awarded shall be one of the unaffiliated construction general contractors which submitted a bid under subsection (a) and shall provide adequate security to insure timely completion of the building structure.

(c) At least 60 days prior to the award of the contract for the construction of the building structure, and continuing until the award of the contract, notice of the proposed construction of the building structure along with copies of the bids, a copy of the FEDERAL REGISTER notice of the granting of this exemption, and a statement by the plan setting forth the basis of its compliance with each of the conditions of this exemption, shall be continuously and prominently posted at all offices of the plan, all hiring halls and dispatch halls of employee organizations whose members are participants in the plan and all places where membership meetings of the employee organization are customarily held, for inspection by plan participants.

The notice required by this subsection shall also contain the following statement:

Any participant who believes the transaction described does not satisfy the conditions of the class exemption may send a statement containing the reasons for such belief and any pertinent facts to "Multiemployer Plans—Real Property" Office of Employee Benefits Security, Labor-Management Services Administration, Room N-4716, U.S. Department of Labor, Washington, D.C. 20216 on or before [insert date 45 days after the date of posting of notice of proposed contract]."

(d) The plan shall file six copies of the notice required under subsection (c) above at least 60 days prior to the date of the award of the contract for the construction of the building structure at the following address: "Multiemployer Plans—Real Property", Office of Employee Benefits Security, Labor-Management Services Administration, Room N-4716, U.S. Department of Labor, Washington, D.C. 20216.

Sec. 2.—*Retroactive.* Effective January 1, 1975 until the effective date of this exemption, the restrictions of section 406(a)(1) of the Act and the taxes imposed by section 4975 (a) and (b) of the Code, by reason of section 4975 (c)(1)(A) through (D) of the Code, shall not apply to the construction for a multiemployer plan of a building structure all or a substantial portion of which will be used by the plan for the purpose of carrying on its ordinary and necessary activities on an efficient and economical basis, by a construction general contractor or subcontractors which are parties in interest or disqualified persons with respect to the plan solely by reason of having employees who are covered by the plan, provided that the plan shall have complied with all of the requirements set forth in section 1 above, except that:

(a) The plan need only have secured at least two estimates from otherwise qualified unaffiliated construction general contractors and subcontractors for the total construction costs of the building structure.

(b) For a period beginning within 30 days after the effective date of this exemption and lasting for at least 60 days, notice of the construction of the building structure along with copies of the estimates, copies of all contracts awarded, a copy of the FEDERAL REGISTER notice of the granting of this exemption, and a statement by the plan setting forth the basis of its compliance with each of the conditions of this exemption, shall be continuously and prominently posted at all offices of the plan, all hiring halls and dispatch halls of employee organiations whose members are participants in the plan and all places where membership meetings of the employee organization are customarily held, for inspection by plan participants.

The notice required by this subsection shall also contain the following statement:

Any participant who believes the transaction described does not satisfy the conditions of the class exemption may send a statement containing the reasons for such belief and any pertinent facts to "Multiemployer Plans—Real Property" Office of Employee Benefits Security, Labor-Management Services Administration, Room N-4716, U.S. Department of Labor, Washington, D.C. 20216 on or before [insert date 45 days after the date of posting of the notice of proposed contract].

(c) The plan shall file six copies of the notice required under subsection (b) within at least 30 days after the effective date of this exemption at the following address: "Multiemployer Plans—Real Property", Office of Employee Benefits Security, Labor-Management Services Administration, Room N-4716, U.S. Department of Labor, Washington, D.C. 20216.

(d) The applicant shall give notice of the proposal of this exemption to the members of the employee organization members of which are covered by the applicant plan and to participants and beneficiaries of the plan, including a copy of the proposal of this exemption, in the form and manner set in subparagraph (b) above, except that a period beginning within five days after the publication of this proposal and ending January 19, 1976 shall be substituted for the date set forth therein.

Sec. 3—*Definitions.* For purposes of sections 1 and 2 above—

DEC 19 75 V40245 XUM

FRIDAY, DECEMBER 19, 1975

(a) The term "total construction costs" means the sum of the costs necessary to complete the entire building structure, including, but not limited to, such off-site costs as may relate to utilities, water supply and sewage.

(b) The term "substantial portion" relating to the use by the plan of a building structure, shall mean that immediately following construction of the building structure at least 25 percent of the usable space thereof shall be used by the plan for the purpose of carrying on its ordinary and necessary operations on an efficient and economical basis and the plan expects to use at least 25 percent of such usable space for the foreseeable future.

(c) The term "unaffiliated construction general contractor" means a contractor (1) whose directors, officers, five percent shareholders, or partners are neither officers, directors, or employees who have the power to exercise a controlling influence over the management or policies of the employee organization, nor a member of the family of such officer, director or employee, nor fiduciaries of the plan, nor members of the family of such a fiduciary, and (2) whose employees constitute no more than five percent of the participants in the plan.

(d) The term "member of the family" shall mean a relative as defined in section 3(15) of the Act, or a brother, sister, or a spouse of a brother or sister.

Signed at Washington, D.C. this thirteenth day of December, 1975.

JAMES D. HUTCHINSON,
Administrator of Pension and Welfare Benefit Programs, U.S. Department of Labor.

DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

PART IV:

NATIONAL COMMUNICATIONS SYSTEM

TELECOMMUNICATIONS; BIT ORIENTED DATA LINK CONTROL PROCEDURES

Proposed Federal Standard

V40245 DEC 19 75 XUM

NATIONAL COMMUNICATIONS SYSTEM

TELECOMMUNICATIONS: BIT ORIENTED DATA LINK CONTROL PROCEDURES

Proposed Federal Standard 1003

NOTE: This document, FR Doc. 75-33358, was originally published at 40 FR 57721 (Thursday, December 11, 1975). At that time, the text of the proposed Standard 1003 was inadvertently filed as part of the original document. Today's republication contains the text of the standard.

The Administrator of the General Services Administration (GSA) is responsible, under the provisions of the Federal Property and Administrative Services Act of 1949, as amended, for the Federal Standardization Program. On 14 August 1972, the National Communications System (NCS) [1] was designated by the Administrator, GSA, as the responsible agent for the development of telecommunication standards for NCS interoperability and the computer-communications interface. The Federal Telecommunication Standards Committee (FTSC) was established under the administration of NCS to accomplish this mission. Additionally, the Secretary of Commerce is authorized, under the provisions of Public Law 89-306, to develop and establish uniform Federal automatic data processing standards.

This proposed Federal standard is part of a series of joint Federal telecommunication standards and Federal Information Processing Standards (FIPS) falling within the area of mutual responsibility of the NCS and the National Bureau of Standards (NBS) as defined in FIPS PUB 23 [2] and NCS Circular 175-1 [3].

The proposed Federal standard and the companion FIPS publication will adopt the content of the American National Standards Institute (ANSI) document X3S34/589, 15 August 1975, with the exceptions set forth in paragraph 2, "Applicable Documents." The ANSI document specifies the data communication control procedures, which define the means for exchanging data between business machines (e.g., computers, concentrators and terminals) over communication circuits. The advanced data communication control procedures described are synchronous, bit oriented (i.e., use bit patterns instead of ASCII characters for control), code independent (i.e., capable of handling any data code or pattern) and interactive (i.e., have relatively high efficiency in an interactive application). The proposed ANSI document was developed by an ANSI task group with Federal Government participation and has been recommended for processing as a Federal standard by the FTSC with the concurrence of the National Bureau of Standards in response to requirements specified by various Government agencies.

Prior to submission of the final endorsement of the proposed Federal standard and its companion FIPS publication to the Department of Commerce (DOC), the Office of Telecommunications Policy (OTP), Executive Office of the President, and GSA, it is essential that proper consideration is given to the needs and views of industry, the public, and state and local governments. The purpose of this notice is to solicit such views. Interested parties may submit their comments to the Office of the Manager, National Communications System, ATTN: NCS-TS, Washington, D.C. 20305. All comments should be submitted to NCS by 30 January 1976.

LEE M. PASCHALL,
Lieutenant General, USAF,
Manager.

MAURICE W. ROCHE,
Director, Correspondence and Directives, OASD (Comptroller).

DECEMBER 8, 1975.

PROPOSED FEDERAL STANDARD

TELECOMMUNICATIONS: BIT ORIENTED DATA LINK CONTROL PROCEDURES

This standard is issued by the General Services Administration pursuant to the Federal Property and Administrative Services Act of 1949, as amended. Its application to both data processing systems and telecommunications systems is mandatory on all Federal agencies to the extent specified herein. Do not use prior to approval.

FOREWORD

The Telecommunication series of Federal Standards are designed to facilitate interoperability between telecommunication facilities and systems of the Federal Government and compatibility of these facilities and systems at the computer-communications interface with data processing equipment (systems).

FED-STD-1003
January, 1976

PROPOSED
FEDERAL STANDARD

TELECOMMUNICATIONS: BIT ORIENTED DATA LINK CONTROL PROCEDURES

1. Scope. This standard specifies the frame structure, elements of procedures, and codes of practice (classes of procedure) for data communications systems that transmit synchronous binary data, including binary coded data, by electrical or electromagnetic means and which have automatic error detection capabilities.

1.1 Application. This standard shall be used by all Federal agencies in the design and procurement of equipment and systems. It applies to equipment and systems that are procured after the effective date of this standard. Those new systems and equipments on which substantial technical design has been completed before the effective date of which are procured as replacements in or extensions to existing systems may file for exception.

2. Applicable Documents. This Federal standard embodies the content of the American National Standards Institute document X3S34/589, "Proposed American National Standard for Advanced Data Communication Control Procedures (ADCCP) (Independent Numbering)," dated 15 August 1975, except for the aspects listed below:

a. All systems conforming to this Federal standard shall be able to implement the 16-bit frame check sequence (FCS) described in paragraph 3.5, section 12, and appendix D. In addition, if a 32-bit FCS is required for some applications, it shall use the generating polynomial

$$X^{32}+X^{26}+X^{23}+X^{22}+X^{16}+X^{12}+X^{11}+X^{10}+X^{8}+X^{7}+X^{5}+X^{4}+X^{2}+X^{1}+1$$

b. The user defined commands and responses, USER0, USER1, USER2, and USER3, appearing in the introduction to section 7, paragraph 7.4, the introduction to paragraph 7.5, and paragraph 7.5.4.2 are not a part of the Federal standard.

3. Changes. When a Federal agency considers that this standard does not provide for its essential needs, a statement citing inadequacies shall be sent in duplicate to the General Services Administration, Federal Supply Service, FMH, Washington, DC, 20406 (in accordance with provisions of Federal Property Management Regulations 4, CFR SS 101-29.3). The General Services Administration will determine the appropriate action to be taken and will notify the agency.

UP - Unnumbered Poll (Command)
USER - User (Command, Response)
XID - Exchange Identification (Command, Response)
w,x,y,z - bits in CMDR Status Field

NOTE: The mathematical symbols and abbreviations used in Section 12.0, Frame Check Sequence (FCS) Generation and Checking, and Appendix D, Frame Check Sequence (FCS), are not included above; they are defined as they introduced in Section 12 and Appendix D.

1.0 SCOPE

This standard is intended to cover a wide range of applications (e.g., two-way alternate and two-way simultaneous data communication between computers, concentrators and terminals which are normally buffered) and a wide range of data link configurations (e.g., full and half duplex, multi-point, point-to-point, switched or non-switched).

This standard establishes the procedures to be used on synchronous communication links using ADCCP - Independent Numbering. This standard does not define any single system and should not be regarded as a specification for a data communications system.

These procedures are defined specifically in terms of the actions that occur on receipt of commands at a Secondary.

In order to provide a high degree of standardization (and, therefore, of compatibility), any equipment intended to be operated within the constraints of this standard shall implement all features of a stipulated class of the procedures.

3.0 DEFINITIONS

3.1 Abort: The termination of a transmission by a station before the normal ending flag is sent.

3.2 Address: A field in a frame that identifies the station that is to receive the frame.

3.3 Address Field: The field following the beginning flag sequence of a frame that contains the address of the station that is to receive the frame.

3.4 Address Recognition: The procedure by which a station examines the address field of a frame to determine if it is to receive the frame.

3.5 Address Response: The address field of a response frame.

3.6 Address Response Field: The field following the beginning flag sequence of a response frame that contains the address of the station that is sending the response frame.

3.7 Address Response Recognition: The procedure by which a station examines the address response field of a frame to determine if it is to receive the frame.

3.8 Address Response Value: The value contained in the address response field.

3.9 Address Value: The value contained in the address field.

3.10 Asynchronous Response Mode: A mode in which a secondary station may initiate transmission without receiving explicit permission from the primary station.

3.11 Asynchronous Response Mode Extended: An extension of the asynchronous response mode in which a secondary station may initiate transmission without receiving explicit permission from the primary station. Extended operation is used.

3.12 Beginning Flag Sequence: The flag sequence that precedes the address field of a frame.

3.13 Bit Stuffing: The insertion of a 0 bit after five consecutive 1 bits anywhere between the beginning and ending flag sequences of a frame to prevent simulation of a flag or abort.

3.14 Broadcast: A transmission to all stations.

3.15 Command: A frame sent by a station to cause the receiving station to perform a data link control operation.

3.16 Control Field: The field following the address field of a frame that contains the commands, responses, sequence numbers, and miscellaneous bits used to control the data link.

3.17 Data Field: The field following the control field of a frame that contains the data to be transmitted.

3.18 Ending Flag Sequence: The flag sequence that follows the frame check sequence field of a frame.

3.19 Flag Sequence: A unique sequence of bits, 01111110, used to indicate the beginning and ending of a frame.

3.20 Frame: The unit of transmission in a data link. It includes the beginning flag sequence, address field, control field, data field, frame check sequence field, and ending flag sequence.

3.21 Frame Check Sequence Field: The field preceding the ending flag sequence of a frame that contains the frame check sequence.

3.22 Frame Check Sequence: A function of the bits in the address field, control field, and data field of a frame used to check for transmission errors.

3.23 Frame Length: The number of bits between the beginning and ending flag sequences of a frame.

3.24 Group Address: An address associated by prior agreement with more than one station.

3.25 Group Address Response: An address response associated by prior agreement with more than one station.

3.26 Information Field: The data field of a frame.

3.27 Initialization: A procedure that causes a station to set its send state variable, receive state variable, and other appropriate variables to their initial values.

3.28 Invalid Frame: A frame that contains a single flag between two flag sequences, or that contains fewer than 32 bits between two flag sequences, or that contains a frame check sequence error, or that contains a frame length error.

3.29 Invalid Frame Length: A frame length that is not an integral number of octets.

3.30 Link Level: The level in a station that implements the data link control procedures.

3.31 Modulo: The number of consecutive sequence numbers that can be assigned to frames.

3.32 Nonswitched Channel: A channel that does not require any dialing operation, such as a leased telephone line.

3.33 Octet: A group of eight consecutive bits.

3.34 Poll: The act of requesting a station to send its data.

3.35 Primary: The station that controls the operation of the data link.

3.36 Primary Address: The address assigned to a secondary station for use in frames transmitted by the primary station.

3.37 Primary Address Response: The address response assigned to a secondary station for use in frames transmitted by the primary station.

3.38 Receive State Variable: The variable that contains the sequence number of the next frame expected to be received.

3.39 Response: A frame sent by a station to indicate to the receiving station the status of the data link.

3.40 Secondary: A station that operates under the control of a primary station.

3.41 Secondary Address: The address assigned to a secondary station for use in frames transmitted by that secondary station.

3.42 Secondary Address Response: The address response assigned to a secondary station for use in frames transmitted by that secondary station.

3.43 Send State Variable: The variable that contains the sequence number of the next frame to be transmitted.

3.44 Station: The logical entity that implements the data link control procedures.

3.45 Switched Channel: A channel that requires a dialing operation, such as a switched telephone line.

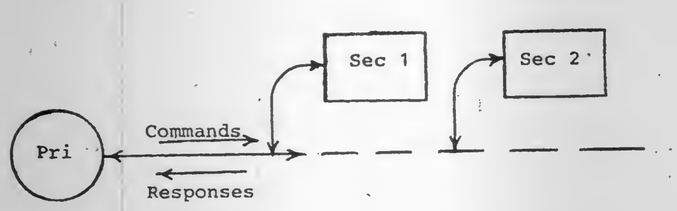
3.46 Test Frame: A valid frame containing a test command or response.

3.47 Test Frame Response: A valid frame containing a test response.

3.48 Transparency: The capability to send any bit pattern as data.

3.49 Unnumbered Frame: A frame used for link control functions that contains neither send nor receive state variables.

V40245 DEC 19 75 XUM



X3S34/589
DRAFT 4
15 August 1975

2.0 DATA LINK CONFIGURATIONS

ADCCP-Independent Numbering defines a Primary/Secondary link which has a primary link control function (referred to as Primary), and a secondary link control function (referred to as secondary). The primary is responsible for initialization, scheduling of data flow, and initiation of link level error recovery functions. Each secondary is responsible for executing commands received from the primary, and for responding when instructed by the primary.

2.1 Primary/Secondary Link

The Primary/Secondary link configuration includes one primary station and one or more secondary stations, as shown in Figure 1. The link may be point-to-point or multipoint, half duplex or full duplex, switched or non-switched. In this configuration all data transfer and link error recovery functions are controlled by the single primary station.

Point-to-Point or multipoint, half duplex or full duplex, switched or non-switched link

FIGURE 2-1 - PRIMARY/SECONDARY LINK

X3S34/589
DRAFT 4
15 August 1975

3.0 FRAME STRUCTURE

In ADCCP - Independent Numbering, all transmissions are in frames and each frame conforms to the following structure:

F, A, C, Info, FCS, F

Where:

F = Flag Sequence

A = Secondary Station Link Address Field

C = Control Field

Info = Information Field

FCS = Frame Check Sequence

Frames containing only data link control sequences form a special case where there is no Info field. The short frame structure is therefore:

F, A, C, FCS, F

The elements of the frame are described in the following paragraphs. See also Figure 3-1.

3.1 Flag Sequence (F)

All frames start and end with the flag sequence. This sequence is a zero bit followed by 6 one bits followed by a zero bit (01111110). All stations attached to the data link continuously hunt, on a bit-by-bit basis, for this sequence. However, a transmitter must send only complete eight-bit flags. Thus, the flag is used for frame synchronization.

In order to achieve transparency the flag sequence is prohibited from occurring in the Address, Control, Information and FCS Fields via a "zero bit insertion" procedure which is described in paragraph 3.7.

Where station constraints permit, the flag sequence which closes a frame may also be the opening flag sequence for the next frame. Any number of complete flags may be used between frames. (See also Appendix B)

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

3.2 Secondary Station Link Address Field (A)

The Secondary Station Link Address Field follows the opening flag of every frame from both primary and secondary stations. The length of this field (A) is N octets (N greater than or equal to 1). The encoding of this field is described in Section 4.

3.3 Control Field (C)

The Control Field contains commands, responses, and sequence numbers. The control field is used by the primary to instruct the addressed secondary what operation it is to perform. It is also used by the secondary to respond to the primary. The length of this field (C) is normally one octet. It is two octets in length in the case of the extended control field (see Section 5.2.2).

Sequence numbers and the formatting of the Control Field are described in Section 5. Commands and responses are functionally described in Section 7.

3.4 Information Field (Info)

The Information field may be any number and sequence of bits; the data link is completely transparent. Data contained in the information field is unrestricted with respect to code or grouping of bits. See Appendix B for examples of typical limitations on maximum length. An information field length of zero is specifically permitted.

3.5 Frame Check Sequence (FCS)

All frames include a 16-bit frame check sequence (FCS) just prior to the closing flag for error detection purposes. The contents of the Address, Control and Information fields, excluding the zeros inserted to maintain transparency per Section 3.7, are included in the calculation of the FCS sequence.

The FCS is the remainder of a modulo 2 division process utilizing a generator polynomial as a divisor. The generator polynomial is that used in CCITT Recommendation V.41 and is: $X^{16} + X^{12} + X^5 + 1$.

X3S34/589
DRAFT 4
15 August 1975

Section 12 gives a complete description of the FCS generation process and the error checking process which utilizes the FCS. Appendix D gives an example of FCS generation and error detection.

NOTE: If future applications show that a higher degree of protection is needed, the length of the FCS sequence shall be increased by multiples of eight bits. This requires a higher degree generator polynomial the implementation of which is outside of this standard.

3.6 Abort

Abort is the procedure by which a station in the process of sending a frame, ends the frame in an unusual manner such that the receiving station will ignore the frame.

Aborting a frame is performed by transmitting at least seven, but less than fifteen, contiguous one bits (with no inserted zeros). Receipt of seven contiguous one bits is interpreted as an abort. Receipt of fifteen or more contiguous one bits is interpreted as an abort and Idle Link State (see Section 3.9).

3.7 Transparency

ADCCP provides transparency for data coded in the Information field. The occurrence of the flag sequence within a frame is prevented via a "zero bit insertion" procedure as follows:

> The transmitter inserts a zero bit following five contiguous one bits anywhere between the beginning flag and the ending flag of the frame. The insertion of the zero bit thus applies to the contents of the Address, Control, Info and FCS fields (including the last 5 bits of the FCS). The receiver continuously monitors the received bit stream; upon receiving a zero bit followed by five contiguous one bits, the receiver inspects the following bit: If a zero, the 5 one bits are passed as data and the zero bit deleted. If the sixth bit is a one, the receiver inspects the seventh bit; if it is zero, a flag sequence has been received; if it is a one an abort has been received (See Section 3.6).

V40245 DEC 19 75 XUM

3.8 Active Link State

A link is in an ACTIVE state when the Primary or a Secondary is actively transmitting a frame, an abort sequence, or interframe time fill. When the link is in the active state the right of the transmitting station to continue transmission is reserved.

3.8.1 Interframe Time Fill

Interframe time fill is accomplished by transmitting continuous flags between frames. There is no provision for intraframe time fill. (See also Appendix B.)

3.9 Idle Link State

A link is defined to be in an IDLE state when a continuous ones state is detected that persists for 15 bit times.

Idle link time fill is defined to be a continuous one condition on the link.

3.10 Invalid Frame

An invalid frame is defined as one that is not properly bounded by two flags (thus an aborted frame is an invalid frame) or one which is too short (that is, shorter than 32 bits between flags). A Secondary will ignore any invalid frame.

3.11 Order of Bit Transmission

Addresses, commands and responses, and sequence numbers are to be transmitted low order bit first (e.g., the first bit of sequence number that is transmitted carries the weight 2^0).

The order of bit transmission for data contained within the information field is application-dependent and not specified.

The order of bit transmission for the FCS is most significant bit first (See Appendix D).

FRAME

First Bit Transmitted

F	A	C	(Info)	FCS	F

Flag Sequence	Address Field	Control Field	Information Field	Frame Check Sequence	Flag Sequence

Note 1. Address Field formats described in Sections 4.2 & 4.3

Note 2. Control Field formats described in Sections 5.2.1 & 5.2.2

Note 3. Information Field may be any number of bits ≥0.

STRUCTURAL RELATIONSHIP OF DEFINED FIELDS IN ADCCP FORMAT

Figure 3.1

3.12 Transparency

Any bit sequence may be transmitted over the link when the sending station inserts a zero bit after all sequences of five contiguous one bits (including flags) transmitted between the opening and closing flags of a frame. The receiving station will discard a zero bit that directly follows five one bits.

3.13 Abort

A frame may be aborted by transmitting at least seven and less than fifteen one bits.

3.14 Frame Check Sequence

The frame check sequence is a 16 bit sequence. It is the remainder after multiplication by x^{16} and then division by $x^{16}+x^{12}+x^5+1$ of the contents of the address, control, information fields, and the FCS, excluding any zero bits inserted for transparency. The multiplication and division are modulo 2 operations.

3.15 Station Addressing Procedures

Each station on a link must be assigned a unique address. The address field is eight bits long. The all ones address is reserved for broadcast operation. The all zeros address is reserved for a null address. Addresses 1 through 254 are available for station addresses.

3.16 Broadcast Operation

The all ones address is reserved for broadcast operation. Broadcast operation is optional for both Primary and Secondary stations. Broadcast operation is not allowed for SNRM, SNRME, SARM, SARME, SABM, SABME, DISC, UA, DM, FRMR, RD, RIM, SIM, RSET, SNRM, SNRME, SARM, SARME, SABM, SABME, XID, TEST, RR, RNR, REJ, SREJ, UI, UIC, RD, RIM, SIM, RSET

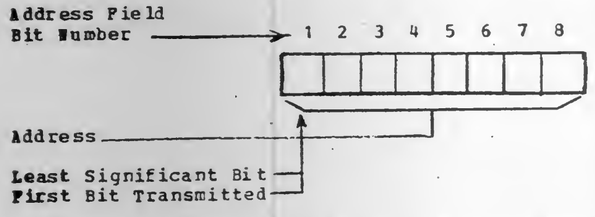
DRAFT 4
15 August 1975

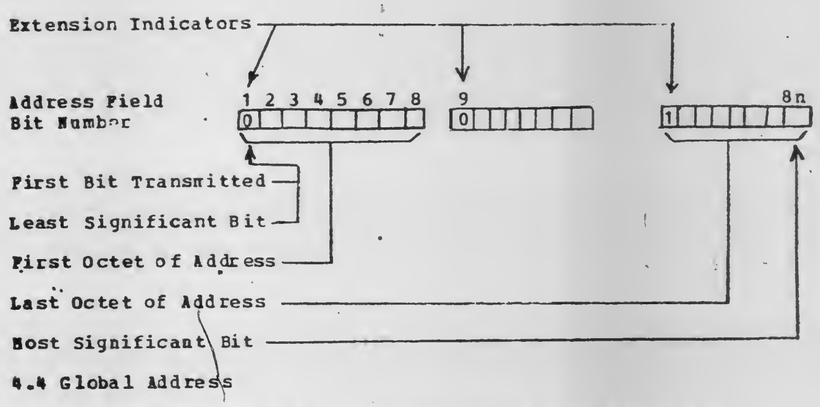


4.0 SECONDARY LINK ADDRESS FIELD

4.1 Addressing Modes

Two addressing modes are defined for the secondary station link address field. These modes are mutually exclusive for any given Secondary on a link and therefore the addressing mode must be explicitly specified.

4.2 Secondary Link Address Field - Basic Address Mode



In basic mode, the secondary link address field contains one address, which may be a single, group, or global secondary address. This field consists of one octet with the following format:

4.3 Secondary Link Address Field - Extended Address Mode

In extended mode, the secondary link address field is a sequence of octets which comprises one address which may be a single, group, or global Secondary address. When the first bit of an address octet is "0", the following octet is an extension of the address field. The address field is terminated by an octet having a "1" in bit position one. Thus, the address field is recursively extendable. The format of the extended secondary link address field is:

X3S34/589
DRAFT 4
15 August 1975

4.4 Global Address

The address of eight "1" bits (11111111) is reserved as the global (universal, or broadcast) address.

The global address is used in situations where a specific Secondary address is not known (e.g., switched connection), or is not necessary to the situation (e.g., broadcast transmission).

4.5 Null Address

The address of eight "0" bits (00000000) is reserved as the null (no-station) address.

The null address is used in situations where it desired to exercise a station transmit ability without requiring remote station action or reply.

X3S34/589
DRAFT 4
15 August 1975

5.0 TRANSMISSION PARAMETERS AND FORMATS

5.1 Parameters

The various parameters associated with the transmission formats are described in the following sections.

5.1.1 Modulus

Each Information (I) frame is sequentially numbered and may have the value 0 through modulus minus 1 (where modulus is the modulus of the sequence numbers). Modulus equals 8 for the basic control field and 128 for the extended control field. The sequence numbers cycle through the entire range.

The maximum number of sequentially numbered I frames that the Primary or Secondary may have outstanding (i.e., unacknowledged) at any given time may never exceed one less than the MODULUS of the sequence numbers. This restriction is to prevent any ambiguity in the association of transmitted I frames with sequence numbers during normal operation and/or error recovery action. The number of outstanding I frames may be further restricted by either the sending or receiving station storage capability; e.g., the number of I frames that can be stored for transmission and/or retransmission in the event of a transmission error.

5.1.2 Frame Variables and Sequence Numbers

In ADCCP-Independent Numbering operation each addressed Secondary station maintains a separate (independent) Send Sequence Number, N(S), and a Receive Sequence Number, N(R), on the I frames it sends and receives. Each Secondary station then maintains an N(S) number on the frames it transmits to the Primary, and an N(R) number on the I frames it has correctly received from the Primary. In the same manner the Primary maintains separate N(S) and N(R) numbers for I frames sent to and received from each Secondary on the link.

X3S34/589
DRAFT 4
15 August 1975

5.1.3 Send State Variable, S

A Primary station and all Secondary stations capable of transmitting I frames have a state variable, S, which denotes the sequence number of the next in sequence I frame to be transmitted. S can take on the value 0 through MODULUS -1. (Where MODULUS is the modulus of the sequence numbering scheme and the numbers cycle through the entire range). The value of S is incremented by one with each successive I frame transmission, but cannot exceed N(R) of the last received frame by more than MODULUS -1.

5.1.4 Send Sequence Number, N(S)

Only I frames contain N(S), the sequence number of transmitted frame. Prior to transmission of an in sequence I frame, the value of N(S) is updated to equal the value of S.

5.1.5 Receive State Variable, R

A Primary station and all Secondary stations capable of receiving I frames have a state variable, R, which denotes the sequence number of the next in sequence I frame to be received. R can take on the values 0 through MODULUS -1 (where MODULUS is the modulus of the sequence numbering scheme and the numbers cycle through the entire range). The value of R is incremented by the receipt of an error free in sequence I frame whose send sequence number, N(S), equals R.

5.1.6 Receive Sequence Number, N(R)

All I frames and S frames contain N(R), the expected sequence number of the next received I frame. Prior to transmission or retransmission of a frame of the above types, the value of N(R) is updated to equal the current value of R. N(R) indicates that the station transmitting the N(R) has correctly received all I frames numbered up to and including N(R)-1.

5.1.7 Poll/Final, P/F, Bit

The Poll (P) bit is used by the Primary to solicit (poll) a response or sequence of responses from Secondary stations.

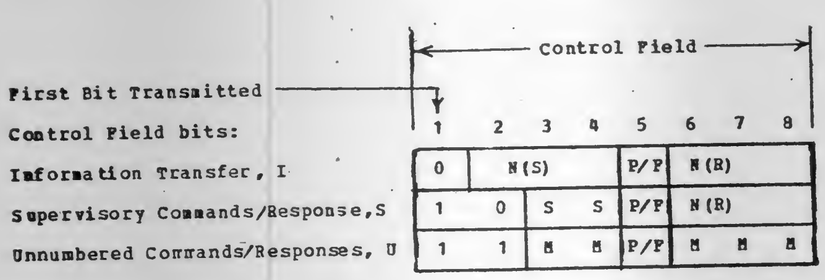
The Final (F) bit is used by a Secondary to:

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

1) indicate in ARM the response frame sent in reply to the receipt of a poll command.

2) in NRM to indicate the final frame transmitted as the result of a previous poll command.



See Section 6.1 for further description of the P/F bit operation.

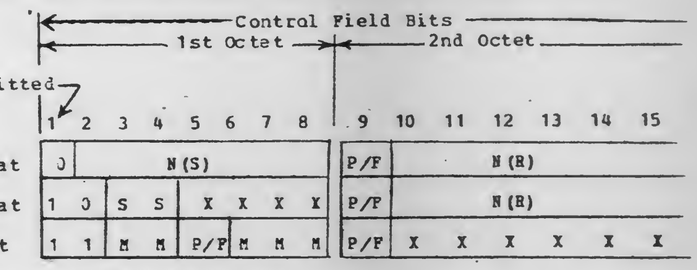
5.2 Control Field Formats

The three formats defined for the Control field are used to perform information transfer, basic supervisory control functions, and special or infrequent control functions.

5.2.1 Basic Control Field

The basic control field accommodates modulo 8 N(S) and N(R) sequence numbering.

Where: N(S) = Transmitting station send sequence number. (Bit 2 = Low Order Bit)
N(R) = Transmitting station receive sequence number. (Bit 6 = Low Order Bit)
S = Supervisory function bits
M = Modifier function bits
P/F = Poll bit - Primary transmissions. Final bit - Secondary transmissions.



X3S34/589
DRAFT 4
15 August 1975

(1 = Poll/Final)

5.2.2 Extended Control Field

The extended control field accommodates modulo 128 N(S) and N(R) sequence numbering. (On long propogation delay links (e.g., satellite transmission) it is desirable for reasons of efficiency to extend the modulus of the sequence numbers N(S) and N(R). The method of extension is defined below.)

Control field extension for the three formats is as follows:

where X bits are reserved and set to "0"

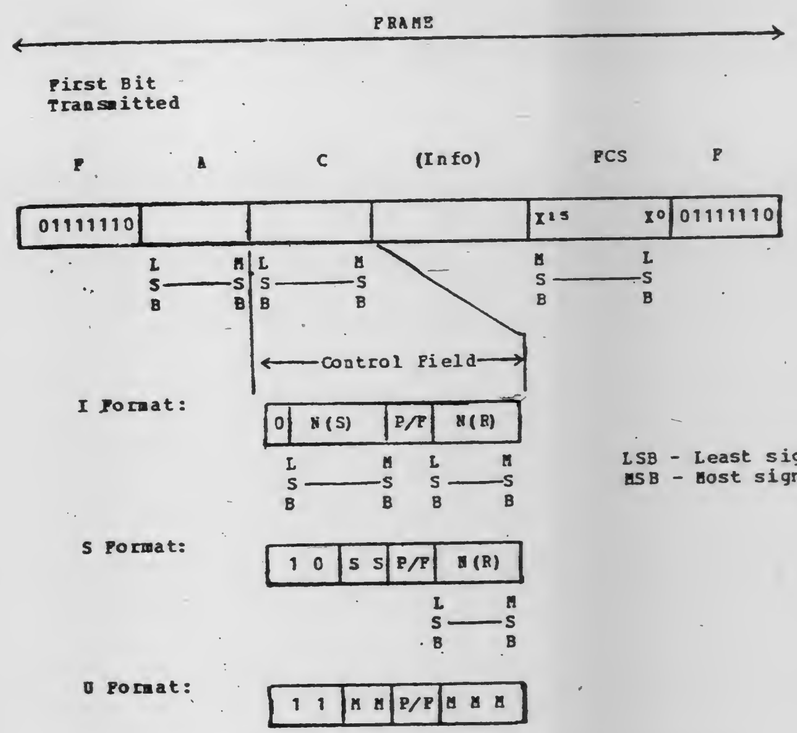
5.3 Information Transfer Format - I

The I format is used by Primary and Secondary stations to perform an information transfer.

The functions of N(S), N(R), and P/F are independent; i.e., each I frame has an N(S) sequence number, the N(R) sequence number may or may not acknowledge additional I frames at the receiving station, and the P/F bit may or may not be set to "1".

5.4 Supervisory Format - S

The S format is used to perform link supervisory control functions such as acknowledge I frames, request retransmission of I frames, and indicate temporary interruption of capability to receive I/UI frames.



V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

5.5 Unnumbered Format - U

The U format is used to provide additional Primary and Secondary link control functions. This format contains no sequence numbers and consequently 5 "modifier" bit positions are available which allows definition of up to 32 additional command and 32 additional response functions.

X3S34/589
DRAFT 4
15 August 1975

POSITIONAL SIGNIFICANCE OF BITS IN FIELDS OF ADCCP BASIC FORMAT

Figure 5-1

5.6 Information Field

The information field contains any sequence of bits. The length of the information field is variable and is limited only by the maximum number of bits between flags that can be checked by the FCS.

5.7 Frame Check Sequence (FCS) Field

The FCS field is used to detect errors in the transmission of the address, control, and information fields. The FCS field is a 16 bit sequence. The FCS is the ones complement of the sum (modulo 2) of:

(a) The remainder of $x^k(x^{15}+x^{14}+x^{13}+x^{12}+x^{11}+x^{10}+x^9+x^8+x^7+x^6+x^5+x^4+x^3+x^2+x^1+1)$ divided (modulo 2) by the generator polynomial $x^{16}+x^{12}+x^5+1$, where k is the number of bits in the address, control, and information fields; and

(b) The remainder after multiplication by x^{16} and then division (modulo 2) by the generator polynomial $x^{16}+x^{12}+x^5+1$ of the contents of the address, control, and information fields.

As a typical implementation at the receiver, the initial remainder of the division is preset to all ones and then modified by division by the generator polynomial $x^{16}+x^{12}+x^5+1$ of the address, control, information, and FCS fields, provided that no bits are removed by bit stuffing. The result of this operation in the absence of transmission errors is the unique nonzero remainder $x^{15}+x^{14}+x^{12}+1$.

5.8 Flag Sequence

The flag sequence is the unique bit pattern 01111110 which is used to indicate the beginning and ending of a frame. Flags are continuously transmitted between frames on the link. The receiver continuously searches for the flag sequence to establish frame synchronization.

5.9 Transparency

Transparency is the capability to transmit any bit pattern in the information field. This is accomplished by the transmitting station inserting a 0 bit after every sequence of five contiguous 1 bits (including the last five bits of the FCS) to ensure that a flag sequence is not simulated. After receiving a flag sequence, the receiving station will monitor the bit sequences and remove any 0 bit that follows five contiguous 1 bits.

5.10 Abort

A station may abort a frame by transmitting at least seven contiguous 1 bits. The receiving station will discard the frame.

5.11 Idle Channel

The idle channel condition is a continuous binary 1 state. The idle channel condition may be used between frames.

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

6.0 SECONDARY MODES

6.1 Operational Modes

There are two link level operational modes: Normal Response Mode (NRM) and Asynchronous Response Mode (ARM). A Secondary in either of these modes is fully operational and capable of transmitting and receiving I, S, and U format frames.

Secondary stations do not queue sequential responses for command frames received. A Secondary station response is predicated on: 1) station status at that time the response is transmitted; 2) an exception condition previously established, or; 3) the previous receipt of a command which requires a specific response format.

6.1.1 Normal Response Mode, NRM

NRM is a Secondary station operational mode in which the Secondary station may initiate transmission only as the result of receiving a command frame with the Poll (P) bit set to "1". Upon receiving a command frame with the P bit set to "1" the Secondary station shall initiate a response transmission. The response transmission may consist of one or more frames while maintaining an Active Link State. In all cases the last frame of the response transmission will have the Final (F) bit set to "1". When the response frame with the F bit set to "1" is transmitted the Secondary station will stop transmitting and not initiate any additional transmission until a subsequent command frame is received with the P bit set to "1".

The N(R) number of a received frame which has the Poll (command) or Final (response) bit set to "1" will cause the receiving station to initiate appropriate recovery procedures if all I frames transmitted previous to and/or concurrent with the last frame which was transmitted with the Poll (Primary) or Final (Secondary) bit set to "1" have not been acknowledged. In all cases the receipt of an I or S format frame will confirm previously transmitted I frames through N(R)-1.

Normal Response Mode Extended, NRME, is operationally identical to NRM except that for the extended control field. See Section 5.2.2.

X3S34/589
DRAFT 4
15 August 1975

6.1.2 Asynchronous Response Mode, ARM

ARM is a Secondary station operational mode in which the Secondary station may initiate transmission without regard to the receipt of a command frame with the Poll bit set to "1". Asynchronous transmission may be initiated at the first respond opportunity, which for two-way alternate (TWA) transmission is detection of an Idle Link State, and for two-way simultaneous (TWS) transmission is immediately. An asynchronous transmission may contain multiple frames and is used to initiate information transfer (I/UI) and/or to report status changes in the Secondary Station, (e.g., N(R) number change, transition from a ready to a busy condition or vise versa, establishment of an exception condition.)

The Secondary station will transmit a frame with the Final bit set to "1" only in response to a received command frame with the Poll bit set to "1". Following the receipt of a command frame with the Poll bit set to "1" the Secondary station must initiate a response transmission with the Final bit set to "1". Additional response frames may be transmitted following the response frame which had the Final bit set to "1".

In the case of a TWS Secondary station which is in the process of transmitting when the command with the Poll bit set to "1" is received, the Final bit will be set to "1" in the earliest possible subsequent frame to be transmitted.

The N(R) number of a received frame which has the Poll (command) or Final (response) bit set to "1" will cause the receiving station to initiate appropriate recovery procedures if all I frames transmitted previous to and/or concurrent with the last frame which was transmitted with the Poll (Primary) or Final (Secondary) bit set to "1" have not been acknowledged.

In ARM a Secondary station has a response timer which will cause initiation of appropriate recovery procedures if previously transmitted frames have not been acknowledged by the Primary station within a system specified timeout period. Since simultaneous contention may occur in the case of TWA configurations, the interval employed by the Secondary station must be greater than that employed by the Primary station so as to permit contention situations to be resolved in favor of the Primary station.

V40245 DEC 19 75 XUM

Asynchronous Response Mode Extended, ARME, is operationally identical to ARM except for the extended control field. See Section 5.2.2.

6.2 Disconnected Modes

There are two link level disconnected modes: Normal Disconnected Mode (NDM) and Asynchronous Disconnected Mode (ADM). These disconnected modes are provided to prevent a Secondary from appearing on the link in a fully operational mode during unusual situations or exception conditions since such operation could cause 1) unintended contention in ARM, 2) sequence number mismatch between the Primary and Secondary, or 3) ambiguity in the Primary as to the Secondary status or mode.

In NDM or ADM the Secondary is logically disconnected from the data link; i.e., no information field (I/UI) or S frames are transmitted or accepted. The Secondary capability in either NDM or ADM is limited to 1) accepting one of the mode-setting commands, 2) transmitting a DM or RIM response frame at each respond opportunity, and 3) responding to an XID command.

A Secondary is system defined as to the condition(s) that cause it to assume one of the two predetermined modes (ADM or NDM).

Examples of possible conditions (in addition to receiving a DISC command) which may cause a Secondary to change to a disconnected mode are:

1. the Secondary power is turned on
2. the Secondary has a temporary loss of power
3. the Secondary link level logic is manually reset
4. the Secondary terminal is manually switched from a local (home) condition to a connected-to-the-link (on-line) condition.

A Secondary in NDM or ADM may not establish a Command Reject exception condition.

6.2.1 Normal Disconnected Mode, NDM

NDM is a Secondary disconnected mode in which the Secondary is logically disconnected from the data link (i.e., not in an operational status) and has normal mode respond opportunity protocol; i.e., it may initiate a response transmission (per Section 6.1.1) only as the result of receiving a command frame with the P bit set to "1".

In this mode a Secondary actions only mode setting and XID commands. Valid commands received with the P bit set to "1" cause a Secondary in NDM to respond with a Disconnect Mode (DM) response or, if the Secondary determines it is unable to continue functioning, a request for initialization (RIM). Valid commands received with the P bit set to "0" are ignored by the Secondary.

6.2.2 Asynchronous Disconnected Mode, ADM

ADM is a Secondary disconnected mode in which the Secondary is logically disconnected from the data link (i.e., not in an operational mode) and has asynchronous respond opportunity protocol; i.e., it may initiate a response transmission (per Section 6.1.2) in TWA exchange upon detection of an Idle Link State, and in TWS exchange at any time. Such a response transmission will only consist of a request for logical connection to the Primary (DM) or, a request for initialization (RIM) if the Secondary determines it is unable to continue functioning.

In this mode a Secondary actions only mode setting and XID commands.

6.3 Initialization Mode, IM

IM is a mode of operation in which the Secondary link control program is initialized or regenerated by Primary action. IM is invoked when a Primary concludes a Secondary is behaving abnormally and needs its link control program corrected, or to remotely upgrade the Secondary's link control program. In like manner a Secondary may determine it is unable to continue functioning due to program checks and request IM to obtain a good program from the Primary.

A Secondary enters the IM upon sending a UA response in reply to the receipt of a Set Initialization Mode (SIM)

V40245 DEC 19 75 XUM

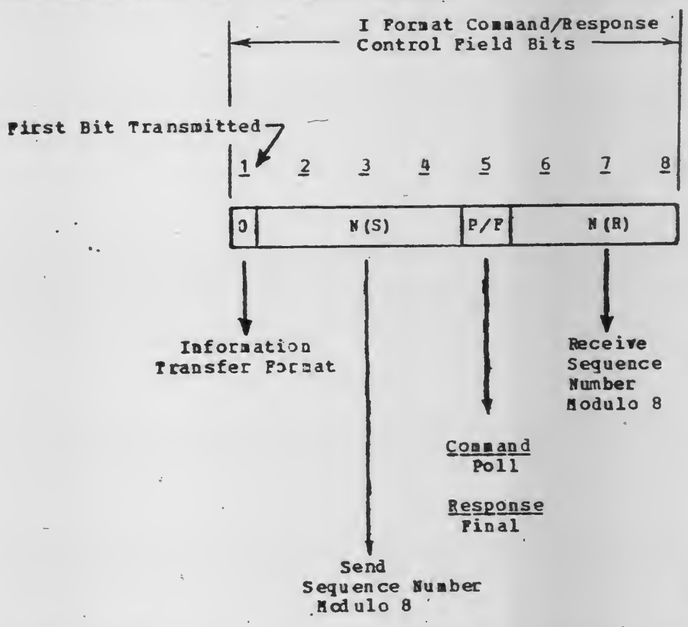
command. The Secondary may request SIM by sending Request Initialization Mode (RIM). In IM, the Primary and Secondary may exchange information in any manner specified for that Secondary station (i.e., unformatted and unchecked bit streams, UI frames, or I frames). IM is ended when the Secondary receives, actions, and acknowledges (via a UA response) a mode setting command, i.e., SNRM, SARM, SNRME, SARME, or DISC.

7.0 COMMANDS AND RESPONSES

This standard defines the link control operation of each secondary station control in terms of command frames, response frames and internal modes. The actual link management procedure (i.e., sequence of commands and related responses) is application and link configuration dependent. Consequently, specific Primary command sequences are not defined but left to the designer of the primary link control.

Sections 7.1 through 7.3 contain the definition of the set of commands and responses (listed below) for each of the transmission formats.

Information Transfer Format Commands	Information Transfer Format Respons
I - Information	I - Information
Supervisory Format Commands	**Supervisory Format Responses**
RR - Receive Ready	RR - Receive Ready
RNR - Receive Not Ready	RNR - Receive Not Ready
REJ - Reject	REJ - Reject
SREJ - Selective Reject	SREJ - Selective Reject



V40245 DEC 19 75 XUM

Unnumbered Format Commands	Unnumbered Format Responses
Mode Setting Commands	**Mode Setting Responses**
SNRM - Set Normal Response Mode	UA - Unnumbered Acknowledge
SARM - Set Asynchronous Response	DM - Disconnected Mode
SNRME - Set Normal Response Mode Extended	RIM - Request Initialization Mode
SARME - Set Asynchronous Response Mode Extended	RD - Request Disconnect
SIM - Set Initialization Mode	
DISC - Disconnect	
Information Transfer Commands	**Information Transfer Responses**
UI - Unnumbered Information	UI - Unnumbered Information
UP - Unnumbered Poll	
Recovery Commands	**Recovery Responses**
RSPR - Response Reject	CMDR - Command Reject
Miscellaneous Commands	**Miscellaneous Responses**
USER - User Defined (4 code positions)	USER - User Defined (4 code positions)
XID - Exchange Identification	XID - Exchange Identification

7.1 Information Transfer Format, I, Command and Response

The function of the Information, I, command and response is to efficiently transfer sequentially numbered frames containing an information field across a link.

The encoding of the I command/response control field is:

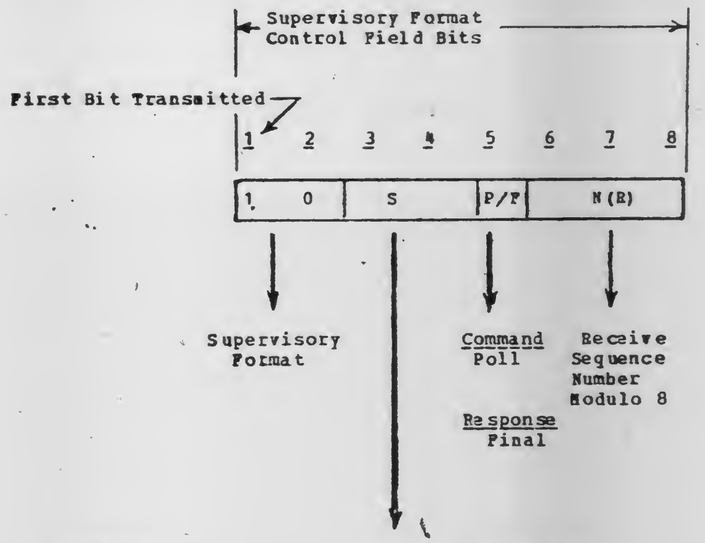
The I frame control field contains two sequence numbers: N(S), Send Sequence Number, which indicates the sequence number associated with the I frame; N(R), Receive Sequence Number which indicates the sequence number of the next expected I frame to be received (i.e., I frames numbered up to and including N(R)-1 have been correctly received).

An I frame with P bit set to "1" may be used to reset a busy condition that was initiated by the transmission of RNR. See Section 7.2.2.

See Section 6.1 for description of P/F bit operation.

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975



7.2 Supervisory Format, S, Commands and Responses

Supervisory, S, commands and responses are used to perform basic supervisory link control functions such as I frame acknowledgement, polling, temporary interruption of information (I/UI) transfer, and error recovery.

Frames with the S format do not contain an information field and therefore do not increment the Send Sequence Numbers N(S) at either the transmitting or receiving station.

X3S34/589
DRAFT 4
15 August 1975

The encoding of the S command/response control field is:

Commands		Responses
RR - Receive Ready	00	Receive Ready
RNR - Receive Not Ready	10	RNR - Receive Not Ready
REJ - Reject	01	REJ - Reject
SREJ - Selective Reject	11	SREJ- Selective Reject

A S frame contains an N(R), Receive Sequence Number, which indicates the sequence number of the next expected I frame to be received (i.e., all received I frames numbered up to and including N(R)-1 have been correctly received.) See Section 6.1 for description of the P/F bit operation.

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

7.2.1 Receive Ready, RR, Command and Response

The receive Ready, RR, is used by the Primary or Secondary to: 1) indicate it is ready to receive an I frame 2) acknowledge previously received I numbered up to and including N(R)-1.

The Primary may use the RR command with the Poll bit set to "1" to solicit responses from (poll) Secondary stations.

An RR frame may be used to reset a busy condition that was initiated by the transmission of RNR. See Section 7.2.2.

7.2.2 Receive Not Ready, RNR, Command and Response

The Receive Not Ready, RNR, is used by the Primary or Secondary to indicate a "busy" condition; i.e., the temporary inability to accept additional incoming information (I or UI) frames. I frames numbered up to and including N(R)-1 are acknowledged. I frame N(R) and any subsequent I frames received, if any, are not acknowledged; the acceptance status of these frames will be indicated in subsequent exchanges.

A Secondary station receiving an RNR frame when in the process of transmitting (i.e., a TWS station) is to stop transmitting at the earliest possible time by completing or aborting the frame in process.

The Primary station may use the RNR command with the Poll bit set to "1" to obtain the receive status of a Secondary station, The Secondary response will be either RR, RNR, or a U frame with the Final bit set to "1".

See Section 8.1, Busy Condition, for further details on RNR.

7.2.3 Reject, REJ, Command and Response

The Reject, REJ, is used by the Primary or Secondary to request retransmission of I frames starting with the frame numbered N(R). I frames numbered N(R)-1 and below are acknowledged. Additional I frames pending initial transmission may be transmitted following the retransmitted I frame(s).

X3S34/589
DRAFT 4
15 August 1975

Only one REJ exception condition, from a given station to another station, may be established at any given time; another REJ or SREJ may not be transmitted (i.e., actioned) until the first REJ exception condition has been cleared at the sender.

The REJ exception condition is cleared (reset) upon the receipt of an I frame with an N(S) number equal to the N(R) of the REJ command/response.

An REJ maybe used to reset a busy condition that was initiated by the transmission of RNR. See Section 7.2.2.

See Section 8.2 for sequence error recovery protocols.

7.2.4 Selective Reject, SREJ, Command and Response

The Selective Reject, SREJ, is used by the Primary or Secondary to request retransmission of the single I frame numbered N(R). I frames up to and including N(R)-1 are acknowledged.

The SREJ exception condition is cleared (reset) upon receipt of an I frame with an N(S) number equal to the N(R) of the SREJ command/response.

After a station transmits a SREJ it may not transmit SREJ or REJ for an additional sequence error until the first SREJ error condition has been cleared. (To do so would acknowledge as correctly received all I frames up to and including N(R)-1, where N(R) is the sequence number in the second SREJ or REJ.)

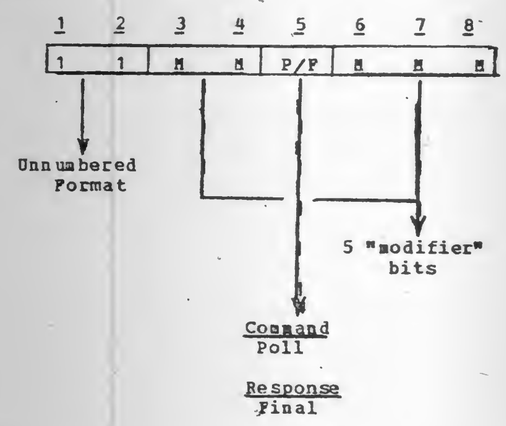
I frames that may have been transmitted following the I frame indicated by the SREJ command/response are not retransmitted as the result of receiving a SREJ. Additional I frames pending initial transmission may be transmitted following the retransmission of the specific I frame requested by the SREJ.

An SREJ may be used to reset a busy condition that was initiated by the transmission of RNR. See Section 7.2.2.

See Section 8.2 for sequence error recovery protocols.

V40#245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975



7.3 Unnumbered Format, U, Commands and Responses

Unnumbered, U, commands and responses are used by the Primary and Secondary to extend the number of link supervisory functions. U Frames do not increment the Send Sequence Numbers N(S) at either the transmitting or receiving station. Five "modifier" bits are defined which allow up to 32 additional supervisory functions.

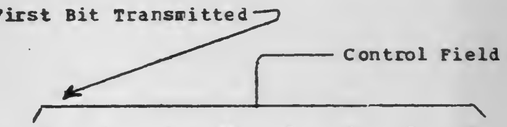
The encoding of the U command/response control field is:

Unnumbered Format
Control Field Bits

First Bit Transmitted

See Section 6.1 for description of the P/F bit operation.

7.4 Unnumbered Format Commands



Unnumbered Format commands are grouped according to the function performed:

X3S34/589
DRAFT 4
15 August 1975

- Mode-Setting commands: SNRM, SARM, SNRME, SARME, SIM, DISC
- Information transfer commands: UI, UP
- Recovery commands: RSPR
- Miscellaneous commands: USER0, USER1, USER2, USER3, XID

The following U commands are defined; other commands may be defined in the future if required. All bit encodings not defined are reserved.

First Bit Transmitted

1	2	3	4	5	6	7	8	
1	1	0	0	P	0	0	1	SNRM Command
1	1	1	1	P	0	0	0	SARM Command
1	1	1	1	P	0	1	1	SNRME Command
1	1	1	1	P	0	1	0	SARME Command
1	1	1	0	P	0	0	0	SIM Command
1	1	0	0	P	0	1	0	DISC Command
1	1	0	0	P	0	0	0	UI Command
1	1	0	0	P	1	0	0	UP Command
1	1	1	0	P	0	0	1	RSPR Command
1	1	0	1	P	0	0	0	USER0 Command
1	1	0	1	P	0	0	1	USER1 Command
1	1	0	1	P	0	1	0	USER2 Command
1	1	0	1	P	0	1	1	USER3 Command
1	1	1	1	P	1	0	1	XID Command

See Section 6.1 for description of the P bit operation.

The SNRM, SARM, SNRME, SARME, SIM, RSPR, and DISC commands require the Secondary to acknowledge acceptance by responding with a single Unnumbered Acknowledgement, UA, frame at the first respond opportunity. The Secondary station transmission of a UA response following the receipt

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

of one of these commands takes precedence over any other responses which may be pending at the Secondary. If more than one of these U commands is received by a Secondary prior to a respond opportunity, a single UA response is transmitted that is referenced to the first such command received; i.e., any additional I, S or U commands subsequently received are monitored only to detect the next respond opportunity and then discarded.

The respond opportunity at the Secondary is determined by the mode setting command received (i.e., the mode to which the Secondary is directed dictates when the response is transmitted).

1. upon receipt of a SNRM or SNRME command with the P bit set to "1", the Secondary responds with a single UA frame with F bit set to "1"; if the SNRM or SNRME P bit is set to "0", the Secondary waits until a command frame with P bit set to "1" is received and then responds with a single UA frame with the F bit set to "1", or until a UP command (with P bit set to "0") is received and then responds with a single UA frame with the P bit set to "0".

2. upon receipt of a SARM or SARME command with or without the P bit set to "1" the Secondary will transmit a single UA frame:

   a. upon detection of an Idle Link State in TWA operation

   b. immediately in TWS operation.

   The UA frame will have the F bit set to "1" if the command has the P bit set to "1".

3. Upon receipt of a SIM or a DISC command the Secondary will respond with a single UA frame per its system defined respond opportunity; i.e., a given Secondary is system defined to always use the normal mode response opportunity or the asynchronous mode response opportunity.

NOTE: The protocol defined here requires that the Primary station restrict the transmission of U commands which require UA responses so that only one such command is

X3S34/589
DRAFT 4
15 August 1975

outstanding (not acknowledged) to any given Secondary at any given time. This eliminates the requirement for the Secondary to queue responses and prevents any ambiguity relative to the meaning of the UA response.

A TWA Secondary station, following the receipt of one of these U commands, is restricted to transmitting a single UA response frame. A TWS Secondary station which is transmitting concurrent to the receipt of one of these U commands will initiate transmission of a single UA response frame at the first respond opportunity. The Secondary may continue transmission following return of the UA response as appropriate to its respond mode.

7.4.1 Mode-Setting Commands

Mode-setting commands are used by the Primary to reset or change the mode of the addressed Secondary. Once established a mode remains in effect at a Secondary until the next mode-setting command is received and actioned.

7.4.1.1 Set Normal Response Mode, SNRM, Command

The SNRM command is used to place the addressed Secondary station in the NRM where all control fields are one octet in length. No information field is permitted with the SNRM command.

The Secondary station confirms acceptance of SNRM by transmission of a UA in the unextended control field format. Upon acceptance of this command the Secondary station send and receive counts are set to zero.

Previously transmitted I frames that are unacknowledged when this command is actioned remain unacknowledged. Transmission of SNRM indicates a reset of a Primary busy condition initiated by the transmission of RNR. See Section 7.2.2.

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

7.4.1.2 Set Asynchronous Response Mode, SARM, Command

The SARM command is used to place the addressed Secondary station in ARM where all control fields are one octet in length. No information field is permitted with the SARM command.

The Secondary confirms acceptance of SARM by the transmission of a UA response in the unextended control field format. Upon acceptance of this command the Secondary station send and receive sequence counts are set to zero.

Previously transmitted I frames that are unacknowledged when this command is actioned remain unacknowledged. Transmission of SARM indicates a reset of a Primary busy condition initiated by the transmission of RNR. See Section 7.2.2.

7.4.1.3 Set Normal Response Mode Extended, SNRME, Command

The SNRME command is used to place the addressed Secondary station in NRME where all control fields will be two octets in length as defined in Section 5.2.2. No information field is permitted with the SNRME command.

The Secondary station confirms acceptance of SNRME by transmission of a UA response in the extended control field format. Upon acceptance of this command the Secondary send and receive counts are set to zero.

Previously transmitted I frames that are unacknowledged when this command is actioned remain unacknowledged. Transmission of SNRME indicates a reset of a Primary busy condition initiated by the transmission of RNR. See Section 7.2.2.

7.4.1.4 Set Asynchronous Response Mode Extended, SARME, Command

The SARME command is used to place the addressed Secondary station in ARME where all command/response control fields will be two octets in length as defined in Section 5.2.2. No information field is permitted with the SARME command.

The Secondary station confirms acceptance of SARME by transmission of a UA response in the extended control field

X3S34/589
DRAFT 4
15 August 1975

format. Upon acceptance of this command the Secondary send and receive counts are set to zero.

Previously transmitted I frames that are unacknowledged when this command is actioned remain unacknowledged. Transmission of SARME indicates a reset of a Primary busy condition initiated by the transmission of RNR. See Section 7.2.2.

7.4.1.5 Set Initialization Mode, SIM, Command

The SIM command is used to cause the addressed Secondary to initiate a station-specified procedure(s) to initialize its link level control functions (e.g., accept a new program or update operational parameters). No information field is permitted with the SIM command.

The Secondary station confirms acceptance of SIM by transmission of a UA response. Upon acceptance of this command the Secondary station send and receive sequence numbers are set to zero.

Previously transmitted I frames that are unacknowledged when this command is actioned remain unacknowledged.

7.4.1.6 Disconnect, DISC, Command

The DISC command is used in switched networks to perform a physical disconnect; i.e., cause the addressed station to go "on-hook". It is also used in non-switched networks to perform a logical disconnect; i.e., inform stations that the Primary is suspending operation with that Secondary station. No information field is permitted with the DISC command.

Prior to actioning the command the Secondary confirms acceptance of DISC by the transmission of a UA response. The respond opportunity after receipt of DISC is dependent upon the response operation (Normal or Asynchronous) the Secondary assumes during disconnect and is system defined for any given Secondary. The respond opportunities are defined in Section 6.1 and 6.2. Upon actioning this command the Secondary station is placed in the unextended (i.e., single octet) control field mode.

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

Previously transmitted I frames that are unacknowledged when this command is actioned remain unacknowledged.

7.4.2 Unnumbered Information Transfer Commands

Unnumbered information transfer commands are used to exchange frames containing information.

7.4.2.1 Unnumbered Information, UI, Command

The UI command is used to transfer an information field across a link to a Secondary or group of Secondaries without impacting the Secondary I format sequence numbers, N(S) and N(R). Reception of the UI frame is not sequence number verified, therefore the information field may be lost if a link exception occurs during transmission of the UI, or duplicated if an exception occurs during any reply to the UI. Examples of UI frame information are status, operation interruption, temporal data (e.g., time-of-day), or link initialization parameters.

See Appendix B, 7.4.2.1 for additional explanatory information.

7.4.2.2 Unnumbered Poll, UP, Command

The UP command is used to solicit response frames from a single Secondary (Individual Poll) or from a group of Secondaries (Group Poll), by establishing a logical operational condition that exists at each addressed Secondary for one respond opportunity. (In the case of a Group Poll, the mechanism employed to control (schedule) the response transmissions (to avoid simultaneous transmissions) is considered to exist and is not defined in this standard.) Secondaries receiving UP with a group address will respond in the same manner as when addressed using an individual address. The response frame(s) will contain the sending Secondary's individual address, plus N(S) and N(R) numbers as required by the particular responses. (The continuity of each Secondary's N(S) count will be maintained.) The UP command does not acknowledge receipt of any response frames that may have been previously transmitted by the Secondary(s). No information field is permitted with the UP command.

X3S34/589
DRAFT 4
15 August 1975

A Secondary which receives a UP with the P bit set to "1" will respond (at its respond opportunity and consistent with its mode of operation) with a frame which has the F bit set to "1".

A Secondary which receives a UP with the P bit set to "0" may or may not respond depending on the status of the Secondary; Secondary responses sent in reply to this command will have the F bit is set to "0" in all frames of each Secondary's response. A Secondary will respond to a received UP which has the P bit set to "0" when: 1) it has an I/UI frame(s) to send, 2) it has received but not acknowledged an I frame(s) 3) it has experienced an exception condition or change of status that has not been reported, 4) it has a status that must be reported again (e.g., DM, CMDR).

7.4.3 Unnumbered Recovery Commands

Unnumbered recovery commands are used to facilitate the link level exception recovery protocol.

7.4.3.1 Response Reject, RSPR, Command

The RSPR command is used to report an error not recoverable by retransmission of the identical frame; i.e. one of the following conditions resulted from the receipt of an error free frame from the Secondary station:

1. The receipt of a response that is invalid or not implemented.

2. The receipt of an I/UI response with an information field which exceeded the maximum established length. (An RSPR condition will not be established upon receipt of an XID response frame with an information field that exceeds the maximum established storage capability of the Primary.)

3. The receipt of a response frame having an invalid N(R) number. (See 7.5.3.1 for definition of an invalid N(R) number.)

A Status field immediately following the control field is included with this command to provide the reason for the

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

RSPR. Refer to Section 7.5.3.1 for the size and content of the Basic Status field and Extended Status field except substitute "RSPR" for "CMDR", "response reject" for "command reject", and "Primary station" for "Secondary station".

The Secondary will, at the first respond opportunity following the receipt of RSPR, transmit 1) a UA, response to indicate it will take action to correct the RSPR condition, or 2) a CMDR, response to indicate that either no corrective action will be taken or that the RSPR command is not implemented.

RSPR with an on' all zeros information field (including w,x,y, and z all equal to zero) indicates an unspecified rejection of a response frame.

See also Section 8.4, Command-Response Reject.

7.4.4 Miscellaneous Commands

7.4.4.1 Exchange Identification, XID, Command

The XID command is used to cause the addressed Secondary station to identify itself, and optionally to provide Primary station identification to the addressed Secondary. An information field is optional with the XID command; if present the information field will be the Primary station ID. If no information field is present with the XID command the Primary station is scliciting the addressed Secondary station ID. A Secondary in any mode receiving an XID command will transmit an XID response unless 1) a set mode response (UA) is pending, or 2) a CMDR condition exists.

An RSPR condition will not establish if the received XID has an information field which exceeds the maximum extablished storage capability of the Primary.

7.4.4.2 User-Defined Commands (USER0, USER1, USER2, USER3)

Four User-Defined commands are specified to permit the implementer to define special system-dependent functions that do not have general applicability. The User-Defined commands are USER0, USER1, USER2, and USER3.

X3S34/589
DRAFT 4
15 August 1975

7.5 Unnumbered Responses

Unnumbered responses are grouped according to the function performed:

- Mode-setting responses: UA, DM, RIM
- Information transfer responses: UI
- Recovery responses: CMDR
- User-defined responses: USER0, USER1, USER2, USER3

The following Unnumbered responses are defined; other responses may be defined in the future if required. All bit encodings not defined are reserved.

Control Field Bits 1	2	3	4	5	6	7	8	
1	1	0	0	P	1	1	0	UA Response
1	1	1	1	P	0	0	0	DM Response
1	1	0	0	P	0	1	0	RD Response
1	1	1	0	P	0	0	0	RIM Response
1	1	0	0	P	0	0	0	UI Response
1	1	1	0	P	0	0	1	CMDR Response
1	1	0	1	P	0	0	0	USER0 Response
1	1	0	1	P	0	0	1	USER1 Response
1	1	0	1	P	0	1	0	USER2 Response
1	1	0	1	P	0	1	1	USER3 Response
1	1	1	1	P	1	0	1	XID Response

See Section 6.1 for description of the P bit operation

7.5.1 Mode-Setting Responses

Mode-setting responses are used by the Secondary to request transmission of, or to respond to the mode-setting commands of the Primary.

7.5.1.1 Unnumbered Acknowledge, UA, Response

The UA response is used to acknowledge the receipt and acceptance of the SNRM, SARM, SNRME, SARME, SIM, DISC, and RSPR Unnumbered commands defined in Sections 7.4.1 and 7.4.3. The UA response is transmitted in the basic or the extended control field format as directed by the received

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

Unnumbered command. No information field is permitted with the UA response. (See Section 7.4 for additional details)

7.5.1.2 Disconnected Mode, DM, Response

The DM response is used to report a non-operational status where the Secondary is logically disconnected from the link; i.e., the Secondary is, per system definition, in NDM or ADM. (See Section 6.2 for details.)

The DM response is sent by a Secondary in NDM or ADM (or equivalent state) to request the Primary to issue a set mode command, or, if sent in response to the reception of a set mode command, to inform the Primary that the Secondary is still in NDM/ADM and cannot action the set mode command. On a switched network where the call is initiated by a Secondary DM is sent to request a set mode command. On a non-switched line a Secondary in ADM may send the DM response at any respond opportunity. No information field is permitted with the DM response.

A Secondary in NDM or ADM will monitor received commands (other than those that reset the disconnected mode) only to detect a respond opportunity in order to (re)transmit DM (or RIM if initialization is required); i.e., no transmissions are accepted until the disconnected mode is reset by the receipt of SNRM, SARM, SNRME, SARME, or SIM.

See Appendix C, Example 5.5.

7.5.1.3 Request Disconnect, RD, Response

The RD response is used to indicate to the Primary that the Secondary wishes to be placed in disconnected mode (NDM or ADM). RD may be sent asynchronously if the Secondary is in ARM, or if in NRM as a response to a command with the P bit set to "1". A Secondary which has sent an RD response and receives any non DISC frame(s) must accept the command frame(s) if it is able to do so. If the Secondary accepts the non DISC command frame(s) it follows the normal ADCCP elements of procedures to respond to the Primary commands. Secondary acceptance of non DISC frames after having issued an RD response cancels the RD response. If the Secondary still wants to be placed in disconnected mode (NDM or ADM) which it must re-issue the RD response. A Secondary cannot accept non DISC commands frame(s) due to internal problems may

X3S34/589
DRAFT 4
15 August 1975

respond with RD again. No information field is permitted with the RD response.

7.5.1.4 Request Initialization Mode, RIM, Response

The RIM response is used to request the SIM command. A Secondary which has established a RIM condition will monitor any subsequently received commands (other than SIM or DISC) only to detect a respond opportunity to (re)transmit RIM; i.e., no transmissions are accepted until the RIM condition is reset by the receipt of SIM or DISC. No information field is permitted with the RIM response.

7.5.2 Unnumbered Information Transfer Responses

Unnumbered information transfer responses are used to exchange frames containing information.

7.5.2.1 Unnumbered Information, UI, Response

The UI response is used to transfer an information field across a link without impacting the Secondary I format sequence numbers, N(S) and N(R). Reception of the UI frame is not sequence number verified, therefore the information field may be lost if a link exception occurs during transmission of the UI, or duplicated if an exception occurs during any reply to the UI. Examples of UI frame information are status, operation interruption, temporal data, and link initialization parameters.

7.5.3 Unnumbered Recovery Responses

Unnumbered recovery responses are used to facilitate the link level exception recovery protocol.

7.5.3.1 Command Reject, CMDR, Response

The CMDR response is used to report an error condition not recoverable be retransmission of the identical frame; i.e., one of the following conditions resulted from the receipt of an error free frame from the Primary station:

1 the receipt of a command that is invalid or not implemented.

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

2 the receipt of an I/UI frame with an information field which exceeded the maximum established length. (A CMDR condition will not be established upon receipt of an XID command frame with an information field that exceeds the maximum established storage capability of the Secondary.)

3 the receipt of an invalid N(R) number from the Primary station.

An invalid N(R) is defined as a number which points to an I frame which has previously been transmitted and acknowledged, or to an I frame which has not been transmitted and is not the next sequential I frame pending transmission.

A Secondary in a disconnected mode (NDM or ADM) will not establish a CMDR condition.

CMDR Basic Status Field

A Basic Status Field, which immediately follows the basic control field is returned with this response to provide the reason for the Command Reject Response. The format for the Basic status field is:

← Basic Status Field Bits →

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
Rejected Basic Control field								0	N(S)				0	N(R)			W	X	Y	Z

First Bit Transmitted

where:

Rejected Control Field is the control field of the received frame which caused the command reject

N(S) is the current N(S) number of the Secondary station

N(R) is the current N(R) number of the Secondary station

X3S34/589
DRAFT 4
15 August 1975

w set to "1" indicates the control field received and returned in bits 1 through 8 was invalid or not implemented

x set to "1" indicates the control field received and returned in bits 1 through 8 was considered invalid because the frame contained an information field which is not permitted with this command. Bit w must be set to "1" in conjunction with this bit.

y set to "1" indicates the information field received exceeded the maximum established capacity of the Secondary station. This bit is mutually exclusive with bit w above.

z if set to "1" indicates the control field received and returned in bits 1 through 8 contained an invalid N(R) number. This bit is mutually exclusive with bit w above.

If required, the Status field associated with the CMDR may be padded with zero bits to provide a modulo of the character width being used.

CMDR with an all zeros information field (including w,x,y and z all equal to zero) indicates an unspecified rejection of the command.

See also Section 8.4, Command-Response Reject

CMDR Extended Status Field

The format for the Extended Status field, which immediately follows the extended control field (see Section 5.2.2), returned with the CMDR response is:

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

First Bit Transmitted

Extended Status Field bits

1 — 16	17 18	24	25 26	32	33 — 36
Rejected Extended Control Field	0	N(S)	0	N(R)	WXYZ

7.5.4 Miscellaneous Responses

7.5.4.1 Exchange Identification, XID, Response

The XID response is used to reply to an XID command. An information field containing the Secondary station identification is optionally present with the XID response. A Secondary receiving an XID command will action the XID in any mode unless 1) a set mode response (UA) is pending or 2) a CMDR condition exists.

A CMDR condition will not be established if the received XID command has an information field which exceeds the maximum established storage capability of the Secondary.

On switched networks when the Secondary is the calling station it may use the XID response, which may contain an optional information field, to request an XID exchange. (See Section 10.0 Switched Network Conventions.)

7.5.4.2 User-Defined Responses (USER0, USER1, USER2, USER3)

Four User-Defined responses are specified to permit the implementer to define special system-dependent functions that do not have general applicability. The User-Defined responses are USER0, USER1, USER2, and USER3.

X3S34/589
DRAFT 4
15 August 1975

8.0 EXCEPTION CONDITION REPORTING AND RECOVERY

This section specifies the procedures to be observed to effect recovery following the detection/occurrence of an exception condition at the link level. Exception conditions described are those situations that may occur as the result of transmission errors, station malfunction or operational situations.

8.1 Busy Condition

A busy condition occurs when a station temporarily cannot receive or continue to receive I frames due to internal constraints, e.g., receive buffering limitations. The "busy" condition is reported by transmission of an RNR frame with the N(R) number of the first I frame that is expected. Traffic pending transmission at the busy station may be transmitted prior to or following the RNR. The continued existence of a busy condition must be reported by retransmission of RNR at each P/F frame exchange. See Section 8.1.3, Clearing Busy Condition.

8.1.1 Secondary Receipt of RNR

a. A Secondary transmitting in NRM will upon receipt of an RNR cease transmission at the earliest possible time. The frame in process may be completed or aborted, however transmission must be terminated in the usual manner; i.e., either ended with a frame with the P bit set to "1" (see Example 5.2.1, Appendix C) or going to the Idle Link State. The Secondary may resume transmission of I frames at the next poll command (an RR, REJ, SREJ, or I command frame with the P bit set to "1").

b. A Secondary transmitting in ARM will, upon receipt of an RNR, cease transmitting at the earliest possible time by completing or aborting the frame in process and going to the Idle Link State. If the RNR command frame had the P bit set to "1" the Secondary must transmit a frame with the F bit set to "1" before going to the Idle Link State. See Examples 5.4.1 and 5.4.3 in Appendix C. The Secondary must perform a Response/Command Time-out before resuming asynchronous transmission.

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

8.1.2 Primary Receipt of RNR

Primary receipt of an RNR indicates that the transmitting Secondary has a busy condition.

8.1.3 Clearing Busy Condition

The busy condition is cleared at the station which transmitted the RNR when the internal constraint ceases.

Clearance of the busy condition is reported to the remote station by transmission of an RR, REJ, or SREJ frame (with or without the P/F bit set to "1"), or by transmitting an I frame with the P/F bit set to "1".

8.2 N(S) Sequence Error

An N(S) sequence exception is established in the receiving station when an I frame received error free (no FCS error) contains an N(S) sequence number that does not agree with the stations N(R) sequence number. The receiving station does not acknowledge (increment its N(R) number) the frame causing the sequence error, or any I frames which may follow, until an I frame with the correct N(S) number is received.

A station which receives one or more valid I frames having sequence errors but otherwise error free will accept the control information contained in the N(R) number and the P/F bit to perform link control functions; e.g., to receive acknowledgement of previously transmitted I frames (via the N(R) number), to cause a Secondary station to respond (P bit set to "1"), and in NRM to detect that the Secondary will terminate transmission (F bit set to "1").

Following the occurrence of a sequence error one of the two following recovery protocols is implemented to achieve recovery. Which protocol is used is dependent upon whether the optional SREJ command/response is implemented by a given Secondary. Both BASIC and SREJ recovery protocols may be used on a link, but only one protocol is used at any given Secondary.

X3S34/589
DRAFT 4
15 August 1975

The two recovery protocols are:

a. BASIC Recovery (NB/NAB CLASSES) uses REJ and Poll/Final Bit frame exchange (described in Section 8.2.1); the recovery protocol causes retransmission of the missing I frame which caused the sequence error and all I frames which may have been transmitted following that frame.

b. SREJ Recovery (NS/NAS CLASSES) uses SREJ and REJ commands/responses (described in Section 8.2.2); the recovery protocol causes either retransmission of only the missing I frame which caused the sequence error (SREJ recovery), or retransmission of the missing I frame which caused the sequence error and all I frames which may have been transmitted following that frame (REJ recovery).

NOTE: In these two recovery protocols the exchange of P/F bit frames perform different functions:

1. in BASIC Recovery protocol the receipt of P/F bit frames can initiate retransmission of errored or lost I frames in the same manner as the receipt of a REJ. Retransmission of I frames begins at the N(R) sequence number in the REJ, the N(R) number in the P/F bit frame, or (in the case where the P/F bit is in a U frame) at the N(R) number that exists in the receiver at the time the P/F bit is received. See Appendix B, 8.2 for precautionary note.

2. in SREJ Recovery protocol the receipt of P/F bit frames is used to sense the failure of the first attempt at recovery; i.e., the P/F bit frame exchange detects that a transmitted SREJ or REJ was not correctly received at the remote station and must be retransmitted.

8.2.1 BASIC Recovery Capability (NB/NAB CLASSES)

8.2.1.1 REJ and Poll/Final Recovery

When a station has BASIC recovery capability (i.e. does not have the capability to receive the SREJ command/response) the recovery protocol is initiated by receipt of REJ, by the

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

exchange of N(R) numbers in Poll/Final frames, or by a system specified Response/Command Time-out; additionally, in TWA data exchange, recovery may be initiated by the receipt of an N(R) number that does not acknowledge all previously transmitted I frames.

8.2.1.2 REJ Recovery

The REJ command/response is primarily used to initiate more timely exception recovery (retransmission) following the detection of a sequence error than is possible by Poll/Final recovery; e.g., in TWS information transfer, if REJ is immediately transmitted upon detection of a sequence error, there is no requirement to wait for a Poll/Final frame exchange. See Examples 3.2.1, 3.3.1, 4.2.2, 4.3.1, 7.1.1 and 7.1.3 in Appendix C.

Only one REJ exception condition is established at any given time and the REJ command/response may be transmitted only one time when an REJ exception condition is established.

A station receiving REJ initiates retransmission of I frames starting with the I frame indicated by the N(R) number contained in the REJ frame.

The REJ exception condition is cleared (reset) upon the receipt of an I frame with a N(S) number equal to the N(R) number of the REJ command/response.

8.2.1.3 Poll/Final Recovery

If, following a sequence error, the REJ command/response is not received (i.e., either not transmitted or due to transmission errors) recovery is initiated by P/F bit exchange. (If no P/F bit exchange occurs, recovery is initiated by detection of an Idle Link State or a Response/Command Time-out.) Following the exchange of Poll/Final frames, sequential transmission of I frames (if available) is initiated starting with any previously transmitted but unacknowledged I frames or, if none, starting with additional I frames not previously transmitted. See Examples 1.2.2, 1.3.2, 2.2.2, 2.3.2, 4.3.3, 4.3.4, 7.1.2, 7.1.4 and 7.2.2 in Appendix C. A station in ARM TWS which has received and actioned a REJ

X3S34/589
DRAFT 4
15 August 1975

prior to or concurrent with the receipt of a Poll/Final frame will not additionally initiate Poll/Final recovery.

8.2.1.4 Response/Command Time-Out

Following the transmission of a frame to which a reply is expected, a no-response or lost-response condition is detected by the Response/Command Time-out. (See Section 9.0.) Upon expiration of the time-out function, one or more frames are retransmitted starting with the last N(R) sequence number received. See Examples 1.2.1, 1.2.3, 1.3.1, 1.3.3, 2.1.2, 2.2.1, 2.3.1, 2.3.3, 4.2.1, and 8.2 in Appendix C.

8.2.1.5 Receipt of N(R) in TWA Data Exchange

In TWA data exchange, when P/F bit frames are lost, in error or not exchanged, the receipt of an N(R) number which does not acknowledge all previously transmitted I frames will initiate (at the next respond opportunity) sequential retransmission of I frames not acknowledged. See Example 2.2.3 in Appendix C.

8.2.2 SREJ Recovery Capability (NS/NAS CLASSES)

8.2.2.1 SREJ/REJ Recovery

The SREJ command/response is primarily used to initiate more efficient error recovery by requesting the retransmission of a single I frame following the detection of a sequence error rather than the retransmission of the I frame requested plus all additional I frames which may have been subsequently transmitted. To improve transmission efficiency it is recommended that the SREJ command/response be transmitted as the result of the detection of a sequence error where only a single I frame is missing (as determined by receipt of the out-of-sequence N(S) number).

When SREJ/REJ error recovery protocol is used, retransmission of I frame(s) is initiated only upon recieipt of either a SREJ or REJ command/response as described below. If the SREJ or REJ is not received, or is received incorrectly by the remote station, it must be retransmitted before initiating error recovery.

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

8.2.2.2 SREJ Recovery

When an I frame sequence error is detected, the SREJ is transmitted at the earliest possible time. Although multiple SREJ (or multiple SREJ and one REJ) exception conditions may exist within a station only one exception recovery is actioned at any given time; i.e., after a station starts the SREJ recovery procedure it may not begin a second SREJ or a REJ recovery procedure until the first error condition has been cleared. For a given error condition the SREJ command/response is transmitted only one time in each Poll/Final frame exchange.

The SREJ exception condition at the sender is cleared (reset) upon the receipt of an I frame with an N(S) number equal to the N(R) of the SREJ command/response i.e., the missing I frame.

See Examples 3.2.2, 3.3.2, 4.2.3, 4.3.2, 7.2.1 and 7.2.3 in Appendix C.

8.2.2.3 REJ Recovery

In the event the sequence error is caused by two or more sequential I fames not being received, as determined by the received N(S) numbers, it is recommended that the REJ command/response be transmitted.

Only one REJ exception condition is established at any given time. (Note that there may be one or more SREJ exception conditions pending when the REJ exception condition occurs.) A station receiving REJ initiates retransmission of I frames starting with the I frame indicated by the N(R) number contained in the REJ frame.

The REJ exception condition is cleared (reset) upon the receipt of an I frame with an N(S) number equal to the N(R) of the REJ command/response.

NOTE: The following Examples in Appendix C have been specified for BASIC Recovery capability (Section 8.2.1, REJ Recovery) but also apply to the use of REJ in stations with SREJ Recovery capability: 3.2.1, 3.3.1, 4.2.2, 4.3.1, 7.1.1, and 7.1.3. in Appendix C.

X3S34/589
DRAFT 4
15 August 1975

8.2.2.4 Retransmission of SREJ or REJ

In the event the SREJ or REJ command/response is transmitted but not received by the remote station (i.e., due to a transmission error), it must be retransmitted following detection that it was not received. This detection will occur either at the exchange of P/F bit frames (as described below) or by a Response/Command Time-out. In either case the SREJ or REJ command/response is retransmitted so that the proper recovery action may be executed.

For example, in the case where a SREJ (or REJ) is transmitted by a Secondary but is not received correctly by the Primary, the Secondary senses the SREJ (or REJ) must be retransmitted when, following transmission of a response frame with the Final bit set to "1" concurrent with or after the SREJ (or REJ), the requested I frame(s) is not received by the Secondary prior to or concureent with the receipt of a command frame with the Poll bit set to "1". In other words, since the Secondary transmitted the SREJ (or REJ) concurrent with or before sending the response frame with the Final bit set to "1", then the I frame(s) requested by SREJ (or REJ) should be received prior to or concurrently with the next command frame with Poll bit set to "1". (See example 7.2.4 in Appendix C where SREJ is transmitted prior to response frame I3,1F but the requested I frame is not received prior to command frame I6,4P.)

In like manner if a Primary which has transmitted a SREJ (or REJ) does not receive the requested I frame(s) prior to or concurrent with receiving the response frame with the Final bit set to "1" which is itself in reply to the first command frame with the Poll bit set to "1" concurrent with or following the SREJ, it will retransmit the SREJ (or REJ).

In the event the remote station, due to a transmission error, does not receive (or receives and discards) a single I frame or the last I frame(s) in a sequence of I frames it will not detect an out-of-sequence exception condition and, therefore, will not transmit SREJ/REJ. The station which transmitted the unacknowledged I frame(s) will, following the completion of a system specified timeout period take appropriate recovery action to determine the point where retransmission must begin.

X3S34/5 89

X3S34/589
DRAFT 4
15 August 1975

In the event an SREJ is transmitted but not received (or is received in error and discarded) the station that transmitted the SREJ may convert the SREJ to REJ when again reporting the exception condition (e.g., if additional transmission errors have occured since the SREJ was first transmitted).

8.3 FCS Error

Any frame received with an FCS error is not accepted by the receiving station and is discarded. At the Secondary no action is taken as the result of that frame.

8.4 Command-Response Reject

A command-response reject exception condition is established upon the receipt of an error free frame which contains an invalid command/response in the control field, an invalid frame format, an invalid N(R) number or an information field which exceeded the maximum established storage capability.

At the Primary station this exception condition is subject to recovery/resolution at a higher function level.

At the Secondary station the exception condition is reported by transmitting a CMDR response to the Primary station for appropriate action. Once a Secondary station has established a CMDR exception any additional commands (other than those that reset the CMDR exception condition) subsequently received are examined only with regard to the state of the N(R) number and P bit; i.e., only to update the acknowledgement of I frames previously transmitted and to detect a respond opportunity to retransmit CMDR. No additional transmissions are accepted or actioned until the condition is reset by the receipt of a SNRM, SARM, SNRME, SARME, SIM, or DISC.

At the Secondary station the receipt of a Response Reject, RSPR is subject to recovery/resolution at a higher function level.

X3S34/589
DRAFT 4
15 August 1975

9.0 RESPONSE/COMMAND TIME-OUT

In order to detect a no-response or lost-response condition, each Primary shall provide a response time-out function. Also, in Asynchronous mode of operation in order to detect a no-response or lost-response condition, each Secondary shall provide a command time-out function.

9.1 Normal Response Mode

The transmission of any command with the P bit set to "1" requires a response and therefore starts the time-out function. (NOTE: No more than one poll may be outstanding at one time.)

The time-out function shall be restarted upon receipt of a valid frame.

The time-out function shall be stopped upon receipt of the expected response.

Expiration of the time-out function shall initiate appropriate recovery action.

The duration of the time-out function is system dependent and subject to bilateral agreement.

9.2 Asynchronous Response Mode

The transmission of any command with the P bit set to "1" requires a response and therefore starts the time-out function.

The time-out function shall be stopped upon receipt of a valid frame with the F bit set to "1".

Expiration of the time-out function shall initiate appropriate recovery action.

The duration of the time-out function is system dependent and subject to bilateral agreement.

10.0 SWITCHED NETWORK CONVENTIONS

Stations connected to a switched communications network may be capable of operation as primary stations only, as secondary stations only, or as either primary or secondary stations. The capabilities of the called station must be known at the calling station and the calling station must operate accordingly. If the called station is capable of operating either as a Primary or as a Secondary it

1) will implement the XID command and response, and

2) will determine which type of link control (Primary or Secondary) to invoke by recognition of either the remote station link address or identification (XID).

The calling or called station will initiate the transmission interchange first depending on the characteristics of the transmission network. When initiated by the secondary, it sends a single unsolicited Supervisory or Unnumbered response. When initiated by the primary, it sends any appropriate command with an appropriate address.

11.0 CLASSES OF PROCEDURES

All classes of procedures use the two frame formats as defined in Section 3.0 FRAME STRUCTURE. In addition, all procedures assume that the links include primary and secondary link controllers. Primary link controllers transmit commands (in frames with or without data), and secondary link controllers receive the command frames and transmit responses (in frames with or without data). The primary link controller is responsible for determining which commands to send, within the constraints of the standard.

Procedure differences, based on overall system consideration (e.g., network configuration, traffic management, etc.) are accommodated by defining two modes of operation - Asynchronous and Normal - and by defining various classes of procedures that utilize the capabilities of these modes together with the exception recovery characteristics specified within the standard. Individual classes implement a prescribed subset of the commands and responses defined in Section 7.0, COMMANDS AND RESPONSES. ("Implement" is defined at the Primary as the ability to receive all responses in the prescribed subset, and at the Secondary as the ability to receive all commands in the prescribed subset.)

APPENDIX B, ADDITIONAL INFORMATION, provides examples that illustrate how a point-to-point (P-P) Primary-to-Secondary (P-S) configuration(s) (described below in Section 11.1, and 11.2 Primary-to-Secondary Classes of Procedures) may be employed to yield balanced control or near-balanced control operation. These capabilities are in addition to the P-P Balanced Control Classes of Procedure (previously called "Primary/Primary") defined in Section 11.3.

11.1 Normal Response Mode (NRM) Primary to Secondary (P-S) Classes of Procedure

These classes of procedure are applicable to point-to-point (P-P) and multipoint (MP) link configurations. The Secondary station may transmit a frame or frames only as a result of the receipt of an appropriate command frame as described in Section 6.1.1, Normal Response Mode.

11.1.1 NB CLASS: Normal Response Mode - BASIC Exception Recovery Procedure

Stations operating in this mode may use the REJ command/response to solicit retransmission of any frame detected in error. The subsequent retransmission will consist of the frame in error plus any previously transmitted frames in accordance with Section 8.2.1.

The following commands and responses must be implemented in this class:

Commands	Responses
I	I
RR	RR
RNR	RNR

11.3 Balanced Control Classes of Procedures (previously called "Primary/Primary")

These Balanced Control classes of procedures are restricted to point-to-point two-way simultaneous (P-P TWS), switched or non-switched transmission facility. See Figure 11-1. Each station is responsible for correction of errors associated with the traffic it originates. Each station can transmit frames at any time independent of action by the other station. Stations operating according to these classes of procedures use the Asynchronous Response Mode of operation. Each station maintains only one sequence number for all I frames transmitted and only one sequence number for all I frames accepted.

All Command frames specify the receiving station address. All Response frames specify transmitting station address.

The N(R) number in both Information and Supervisory formats indicates that the station transmitting the N(R) has

X3S34/589
DRAFT 4
15 August 1975

correctly received all information format frames numbered up to and including N(R)-1. See examples 8.1 and 8.2 in Appendix C.

11.3.1 BCB CLASS: Balanced Control - BASIC Exception Recovery Procedure

Stations operating in this class use the REJ command/response to solicit retransmission of any frame(s) detected in error. The subsequent retransmission will consist of the frame in error plus any previously transmitted following frames in accordance with Section 8.2.1.

The following commands and responses must be implemented in this class:

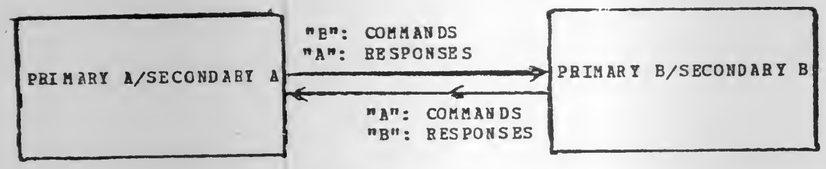

FIGURE 11-1

X3S34/589
DRAFT 4
15 August 1975

12.0 FRAME CHECK SEQUENCE (FCS) GENERATION AND CHECKING

This section specifies the FCS generation and checking requirements. These requirements are formulated to detect frame length changes due to erroneous addition or deletion of zero bits at the end of the frame as well as to detect errors introduced within the frame.

12.1 FCS Generation

The equations for FCS generation are:

$$\frac{X^{16} G(x) + X^{k} L(X)}{P(X)} = Q(X) + \frac{R(X)}{P(X)} \quad \text{and,}$$

$$FCS = L(X) + R(X) = R(X),$$

The division is modulo 2 and,

$L(X) = X^{15} + X^{14} + X^{13} + X^{12} + X^{11} + X^{10} + X^{9} + X^{8} + X^{7} X^{6} + X^{5} + X^{4} + X^{3} + X^{2} + X^{1} + 1,$

$R(X)$ = The remainder which is of degree less than 16.

k = The number of bits represented by $G(X)$,

$P(X)$ = The CCITT V.41 generator polynomial ($X^{16} + X^{12} + X^{5} + 1$), and

$G(X)$ = The message polynomial. It includes the contents of the address, control and information fields, excluding the zero bits inserted for transparency (see Section 3.7).

The generation of the remainder $R(X)$ differs from that used in conventional check sequence generation by the presence of the $X^{k} L(X)$ term in the generation equation. When the FCS generation is by the usual shift register technique, the $X^{k} L(X)$ term is added in either of two ways:

1. Preset the shift register to all ones rather than to all zeros as in conventional generation procedures. Otherwise, shift the data ($G(X)$) through the register as in conventional procedures, or,

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

2. Invert the first 16 bits of G(X) before shifting into the register and shift the remaining part of G(X) through uninverted. This requires that G(X) contain at least 16 bits.

Whether 1 or 2 is used, the shift register contents, after shifting through G(X), is R(X). These contents are inverted bit-by-bit and transmitted as the FCS sequence.

The transmitted sequence is always (in algebraic notation):

$$M(X) = X^{16} G(X) + FCS.$$

12.2 FCS Checking

The received sequence will be denoted M*(x), which differs from M(x) if transmission errors are introduced. The checking process always involves dividing the received sequence by P(x) and testing the remainder. Direct division, however, does not yield a unique remainder and it is expected that in most cases the received sequence will be modified for checking purposes by addition of terms which will cause the division to yield such a unique remainder when M*(x) = M(x), i.e., when the frame is error free.

Two classes of checking equations are given below:

1. $$\frac{X^{\gamma}[M^*(x) + X^{h}L(x)]}{P(x)} = Q(x) + \frac{R(x)}{P(x)}$$

In this case the unique remainder is the remainder of the division $X^{\gamma}\frac{L(x)}{P(x)}$

When $\gamma = 0$ the remainder is L(x) (16 ones).
When $\gamma = 16$ the remainder is $X^{12} + X^{11} + X^{10} + X^{8} + X^{3} + X^{2} + X + 1$ (0001110100001111 X^{15} through X^{0} respectively)

2. $$X^{\gamma}[M^*(x) + (X^{h}+1)L(x)] = Q(x) + \frac{R(x)}{P(x)}$$

In this case the unique remainder is always zero regardless of the value of γ.

Shift register implementation of the above equations normally use $\gamma = 16$ (pre-multiplication). When this is the

X3S34/589
DRAFT 4
15 August 1975

case, the added term X L(x) in both 1 and 2 is added by either inverting the first 16 received bits of M*(X) before shifting them through the checking register or by presetting the register to all 1's and shifting all of M*(X) through normally. Thus the receiver action on the leading portion of a frame is the same with either 1 or 2.

The + 1 of the term (X + 1)L(x) of the generation equation of 2 is added by inverting the FCS. This implies a 16 bit storage delay by the FCS function at the receiver since the location of the FCS is not known until the closing flag is received.

V40245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

APPENDIX A - GLOSSARY

ABORT: A function invoked by a sending (PRIMARY or SECONDARY) station causing the recipient to discard (and ignore) all bit sequences transmitted by the sender since the preceding FLAG SEQUENCE.

ACCEPT: The condition assumed by a (PRIMARY or SECONDARY) station upon accepting a correctly received FRAME for processing.

ADCCP: Advanced Data Communication Control Procedures.

ADDRESS FIELD (A): The sequence of eight (or any multiple of eight if extended) bits immediately following the opening FLAG of a FRAME identifying the SECONDARY station sending (or designated to receive) the FRAME.

ADDRESS FIELD EXTENSION: Enlarging the ADDRESS FIELD to include more addressing information.

BASIC STATUS: A SECONDARY STATION's capability to send or receive a FRAME containing an INFORMATION FIELD.

COMMAND: The content of the CONTROL FIELD, of a COMMAND FRAME sent by the PRIMARY instructing the addressed SECONDARY to perform some specific LINK LEVEL function.

COMMAND FRAME: All FRAMES that may be transmitted by the PRIMARY are referred to as COMMAND FRAMES.

CONTROL FIELD (C): The sequence of eight (or sixteen if extended control field) bits immediately following the ADDRESS FIELD of a FRAME. The content the CONTROL FIELD is interpreted by the receiving:

(a) SECONDARY, designated by the ADDRESS FIELD, as a COMMAND instructing the performance of some specific function.

(b) PRIMARY, as a RESPONSE from the SECONDARY, designated by the ADDRESS FIELD, to one or more COMMANDS.

CONTROL FIELD EXTENSION: Enlarging the CONTROL FIELD to include additional control information.

X3S34/589
DRAFT 4
15 August 1975

(a) Is terminated by an ABORT Sequence, or

(b) Contains less than 32 bits before an apparent ending FLAG SEQUENCE is detected.

LINK LEVEL: The conceptual level of control or processing logic existing in the hierarchical structure of a (PRIMARY or SECONDARY) station that is responsible for maintaining control of the DATA LINK. The LINK LEVEL functions provide an interface between the station HIGH LEVEL logic and the DATA LINK; these functions include (transmit) bit injection and (receive) bit extraction, ADDRESS/CONTROL FIELD interpretation, COMMAND/RESPONSE generation, transmission and interpretation, and FRAME CHECK SEQUENCE computation and interpretation.

PRIMARY: That portion of the Primary station responsible for control of the DATA LINK. The PRIMARY generates COMMANDS and interprets RESPONSES. Specific responsibilities assigned to the PRIMARY include:

(a) Initialization of (data and control) information interchange

(b) Organization and control of data flow

(c) Retransmission control

(d) All recovery functions at the LINK LEVEL

RESPOND OPPORTUNITY: The LINK LEVEL logical control condition during which a given SECONDARY may transmit a RESPONSE FRAME(S).

RESPONSE: The content of the CONTROL FIELD of a Response Frame advising the PRIMARY with respect to the processing by the SECONDARY of one or more COMMAND FRAMES.

RESPONSE FRAME: All FRAMES that may be transmitted by a SECONDARY are referred to as RESPONSE FRAMES.

SECONDARY: That portion of a Secondary station responsible for performing LINK LEVEL operations, as instructed by the PRIMARY. A SECONDARY interprets received COMMANDS and generates RESPONSES.

V40 245 DEC 19 75 XUM

SECONDARY STATUS: The current condition of a SECONDARY with respect to processing the series of COMMANDS received from the PRIMARY.

UNNUMBERED COMMANDS: The commands that do not contain sequence numbers in the CONTROL FIELD.

UNNUMBERED RESPONSES: The responses that do not contain sequence numbers in the CONTROL FIELD.

APPENDIX B - ADDITIONAL INFORMATION

This appendix provides additional explanatory information to assist in the use of the standard. For ease of reference, the organization of this appendix is identical to that of the body of the standard.

3.4 Frame Structure, Information Field

Although the maximum length of the information field is theoretically unlimited it will be constrained by one or more of the folloying factors:

1 Error detection capability of the FCS

2 Channel error characteristics and data rates

3 Station buffer sizes and strategies

4 Logical properties of the data

3.1 Flag Sequence, and 3.8 Time Fill

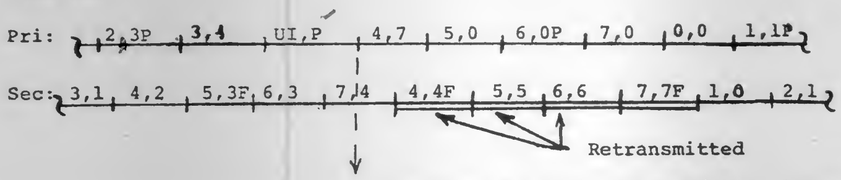
Although this standard permits the closing flag of one frame to be the opening flag of the next frame, it must be recognized that in certain implementations this may result in crisis time problems. Under those conditions, it may be necessary to transmit interframe time fill. The amount of time fill must be determined by prior agreement.

3.9 IDLE Link State

Detection of an IDLE link condition may require the use of a timer or an alternate clock to determine receipt of a continuous one condition for 15 bit times if the link configuration does not provide clock signals in an IDLE condition.

7.4.2.1 Unnumbered Information, UI, Command

A Secondary must respond upon receipt of a UI command frame with the P bit set to "1"; the response shall be any appropriate frame(s), one of which will have the F bit set to "1". A UI command with the P bit set to "0" solicits no response.



V40 245 DEC 19 75 XUM

X3S34/589
DRAFT 4
15 August 1975

8.2 N(S) Sequence Error

In P/F bit recovery if the P or F bit is contained in a U frame, the N(R) number that exists at the receiver when P/F bit recovery is initiated can, under some circumstances, be incorrect. (See example below.) Therefore stations which initiate P/F bit recovery when the P/F bit is in a U frame must be prepared to receive retransmitted frames which have N(S) members that have been previously received and acknowledged. I frames are not lost or duplicated in these instances, however link efficiency is decreased due to the transmission of duplicate I frames.

ARM TWS

In previous Sec F-bit frame N(S)=5, however N(R) as received from Pri =4 (from frame 3,4), therefore begin P/F recovery

11.0 Classes of Procedures

There are two forms of point-to-point two-way simultaneous (P-P TWS) operations that are possible using Primary/Secondary configurations. They are:

A. Primary/Secondary ARM TWS
B. Primary/Secondary Back-to-Back ARM or NRM TWS

A. Primary/Secondary Asynchronous Response Mode (ARM) Operation.

Section 11.2 defines Primary-Secondary classes of operation that can be used in such a manner so as to provide a capability similar to Balanced Control (sometimes called "Primary/Primary") in which balanced information transfer in ARM is achieved with Primary function required in only one

X3S34/589
DRAFT 4
15 August 1975

station and Secondary function required in the other. See Figure B1. Balanced information transfer is achieved by virtue of symmetrical functional equivalency of the I, RR, RNR, REJ, SREJ and CMDR/RSPR commands and responses. Only the station designated as Primary, however, has the functional use of the mode setting and DISC commands for resetting or disconnecting logical link functions. The capability offered by this type of operation may indeed be satisfactory and optimal for a great many applications envisioned.

The independence of operation at each end of the link with regard to originating information transmission is illustrated in the examples in Section 9.0 of Appendix C for I frame transmission from Primary only, Secondary only, and simultaneous Primary and Secondary.

The two-station configuration in Figure B1 is extendable to a multipoint link configuration; i.e., one Secondary is placed in ARM (and operates point-to-point with the Primary) and all other Secondaries are sent a DISC command. Thus the Primary can perform balanced control type operation with one station at a time.

In case of failure of the TWS link, Primary/Secondary ARM has the ability to substitute a single dial-up line and operate in ARM TWA.

B. Back-to-Back Primary/Secondary Operation

For those cases where completely balanced and independent operation is desirable, the capability exists within the definition of Primary-Secondary operation to accomplish a "Balance Control" arrangement. This can be done in the following manner.

A Primary and Secondary link control function is required in each station with the use of two addresses (and associated sequence numbers) to direct transmissions received to either the Primary or Secondary link control function (see Figure B2). Primary A has use of the full repertoire of commands relative to Secondary B and Secondary B has use of the full repertoire of responses relative to Primary A. The same is also applicable between Primary B and Secondary A. Transmissions from Primary A to Secondary B and transmissions from Secondary A to Primary B are multiplexed

V40245 DEC 19 75 XUM

on a frame or frame basis as required in one direction of the TWS facility (i.e., in Figure B1 from right to left). Transmission from Primary B to Secondary A and transmissions from Secondary B to Primary A are similarly multiplexed in the other direction (i.e., in Figure B2 from left to right).

By this means logical interaction between Primary A and Secondary B is independent of the logical interaction between Primary B and Secondary A. There is no procedural restriction that information (data) flow be only from Primary function to Secondary function (i.e., the Secondary function may transmit I/UI frames, see Example 10.1 Appendix C), although this constraint may be accomplished if desirable in several different ways, e.g., at link level by use of BNR to Poll for non-information responses only (See Example 10.2 Appendix C) or by prior system agreement that the Secondary never transmit I/UI frames. (See Example 10.3 Appendix C)

Back-to-Back Primary-Secondary operation offers the flexibility of response in that each sublink (one Primary to one Secondary) may optionally be operated in either ARM or NRM; i.e., one Primary-Secondary pair could be operated in ARM, where the Secondary responds asynchronously, and the other Primary-Secondary pair in NRM, where the Secondary only responds when it receives a command frame with the P bit set to "1". The choice of ARM or NRM is a system option; e.g., depends upon whether it is desired to obtain the most immediate Secondary acknowledgment (by using ARM) or to limit the number of Secondary overhead responses (by setting the P bit to "1" only in every nth frame).

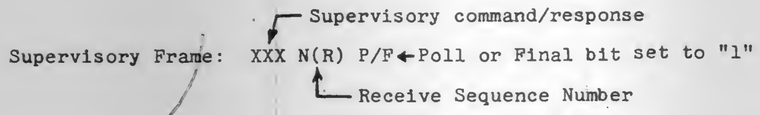
APPENDIX C: EXAMPLES OF THE USE OF COMMANDS AND RESPONSES

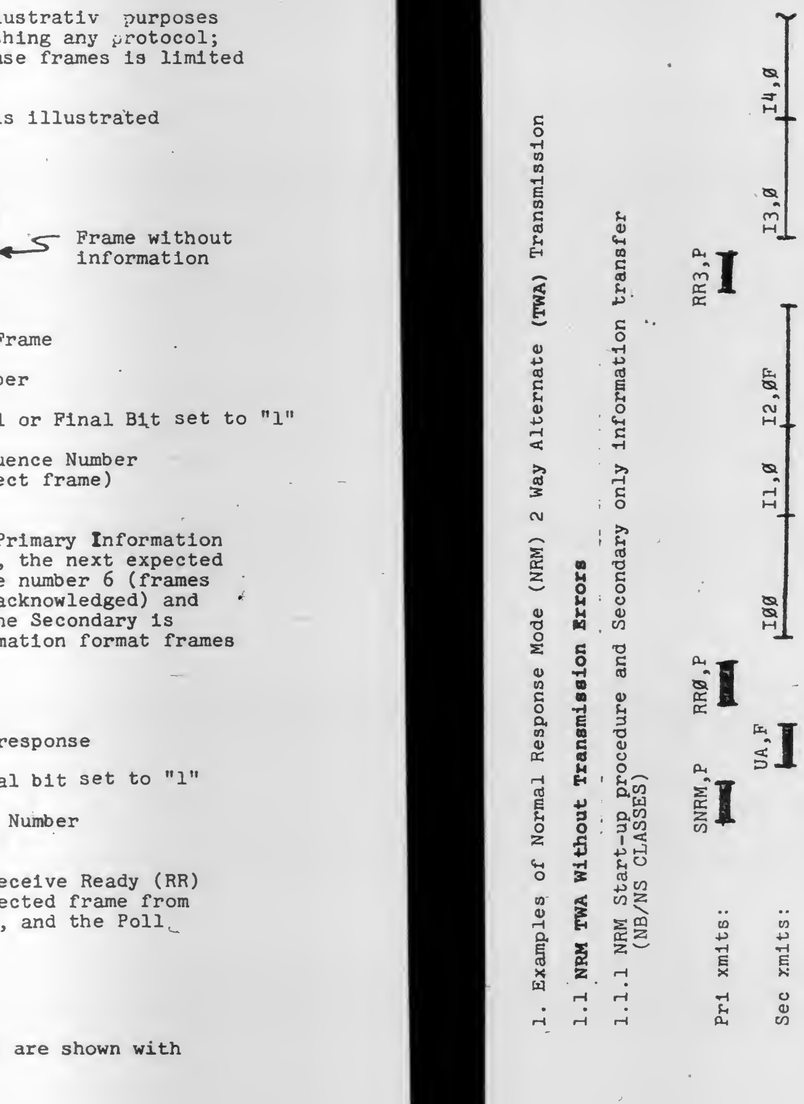


The examples in Appendix C are offered for illustrativ purposes only and should not be interpreted as establishing any protocol; the exchange of the various command and response frames is limited only by the rules specified in the standard.

The notation used in the Appendix C diagrams is illustrated below:

Example: Pri xmits: I2,6P. This denotes a Primary Information format frame with sequence number 2, the next expected frame from the Secondary is sequence number 6 (frames numbered 5 and below are therefore acknowledged) and the Poll bit is set to "1" (i.e., the Secondary is to initiate transmission with Information format frames if available).

Example: Pri xmits: RR2P. This denotes a Receive Ready (RR) command, N(R)=2 (i.e., the next expected frame from the Secondary is sequence number 2), and the Poll bit is set to "1".



NOTE: Retransmitted Information format frames are shown with a double line; i.e., ═══ .

APPENDIX D - FRAME CHECK SEQUENCE (FCS)

D1. Description

The transmission integrity of a received message is determined by use of a Frame Check Sequence (FCS). The FCS is generated by a transmitter, inspected by the receiver and positioned within a frame in accordance with the following diagrams:

Direction of transmission

The procedure for using the FCS assumes the following:

1. The k bits of data which are being checked by the FCS can be represented by a polynomial G(x).

Examples:

a. $G(x) = 10100100 = X^7 + X^5 + X^2 = X^2(X^5+X^3+1)$

b. $G(x) = 00\text{--}010100100 = X^7+X^5+X^2 = X^2(X^5+X^3+1)$

c. $G(x) = 101001 = X^5 + X^3 + 1$

In general, leading zeros don't change G(x) and trailing zeros add a factor of X where n is the number of trailing zeros.

2. The Address, Control and Information field (if it exists in the message) are represented by the polynomial G(x).

X3S34/589
DRAFT 4
15 August 1975

3. For the purpose of generating the FCS, the first bit following the opening flag is the coefficient of the highest degree term of G(x) regardless of the actual representation of the Address, Control and Information fields.

4. There exists a generator polynomial P(x) of degree 16, having the form $P(x) = X^{16}+X^{12}+X^5+1$

D.2 Generation and use of FCS

The FCS is defined as a one's complement of a remainder, R(x), obtained from the modulo two division of

$$X^{16}\,G(x)+X^k(X^{15}+X^{14}+X^{13}+X^{12}+X^{11}+X^{10}+X^9+X^8+X^7+X^6+X^5+X^4+X^3+X^2+X^1+1)$$

by the generator polynomial P(x).

$$\frac{X^{16}\,G(x)+X^k(X^{15}+X^{14}+\cdots+X+1)}{P(x)} = Q(x) + \frac{R(x)}{P(x)} \leftarrow \overline{FCS}$$

The multiplication of G(x) by X^{16} corresponds to shifting the message G(x), 16 places and thus providing the space of 16 bits for the FCS.

The addition of $X^k(X^{15}+X^{14}+\cdots+X+1)$ to $X^{16}\,G(x)$ is equivalent to inverting the first 16 bits of G(x). It can also be accomplished in a shift register implementation by presetting the register to all "ones" initially. This term is present to detect erroneous addition or deletion of zero bits at the leading end of M(x) due to erroneous flag shifts.

The complementing of R(x), by the transmitter, at the completion of the division insures that the transmitted sequence M(x) has a property which permits the receiver to detect addition or deletion of trailing zeros which may appear as a result of errors.

At the transmitter the FCS is added to the X^{16} G(x) and results in the total message M(x) of length k+16, where M(x) = X^{16} G(x) + FCS.

The receiver can employ one of several detection processes, two of which are discussed here. In the first process, the incoming M(x) (assuming no errors; i.e. M*(x) = M(x)) is

V40245 DEC 19 75 D XUM

X3S34/589
DRAFT 4
15 August 1975

multiplied by X^{16}, added to X^{k+16} $(X^{15} + X^{14} - - - - - - + X + 1)$ and divided by P(X).

$$\frac{X^{16}\,[X^{16}\,G(X) + FCS] + X^{k+16}\,(X^{15} + X^{14} - - - + X + 1)}{P(x)} = Qr(x) + Rr(x)/P($$

Since the transmission is error free, the remainder Rr(x) will be "0001110100001111" (X^{15} through X^0).

Rr(X) is the remainder of the division: $\frac{X^{16}\,L(x)}{P(x)}$

where $L(x) = X^{15} + X^{14} - - - - + X + 1$. This can be shown by establishing that all other terms of the numerator of the receiver division are divisible by P(x). This will be done below.

Note that $FCS = \overline{R(x)} = L(x) + R(x)$. (Adding L(x) to polynomial of its same length is equivalent to a bit by bit inversion of the polynomial.)

The receiver division numerator can be rearranged to:

$$X^{16}[X^{16}\,G(x) + X^{k}\,L(x) + R(x)] + X^{16}\,L(x).$$

It can be seen that the first term is divisible by P(x) by inspecting the transmitter generation equation, thus the $X^{16}L(x)$ term is the only contributor to Rr(x).

The second process differs from the first in that another term $(X^{16}L(x))$ is added to the numerator of the generation equation. This causes a remainder of zero to be generated if M*(x) is received error free.

D.3 Implementation

A shift register FCS implementation is described in detail here. It utilizes "ones presetting" at both the sender and the receiver and the receiver does not invert the FCS. The receiver thus checks for the non-zero residual Rr(x) to indicate an error free transmission.

Figure D.1 is an illustration of the implementation. It shows a configuration of storage elements and gates. The addition of $X^k(X^{15}+X^{14}-------+X+1)$ to the X^{16} G(x) can be

X3S34/589
DRAFT 4
15 August 1975

accomplished by presetting all storage elements to a binary value "1".

The one's complement of R(x) is obtained by the logical bit by bit inversion of the transmitter's R(x).

Figure D.1 shows the implementation of the FCS generation for transmission. The same hardware can also be used for verification of data integrity upon data reception.

Before transmitting data, the storage elements, X_0-X_{15} are initialized to "ones". The accumulation of the remainder R(x) is begun by enabling the "A" and thereby enabling gates G2 and G3. The data to be transmitted goes out to the receiver via G2 and at the same time the remainder is being calculated with the use of feedback path via G3. Upon completion of transmitting the k bits of data, the "A" is disabled and the stored R(x) is transmitted via G1 and I1 while G2 and G3 are disabled. The I1 provides the necessary inversion of R(x).

At the receiver, before data reception, the storage elements, X_0 - X_{15} are initialized to "ones". The incoming message is then continuously divided by P(x) via G3 ("A" enabled). If the message contained no errors, the storage elements will contain "0001110100001111" (X^{15} through X^0) at the end of the M*(x).

Figure D.2 is an example of the receiver and transmitter states during a transmission of a 19 bit G(x) and a 16 bit FCS.

The implementation of the FCS generation and the division by P(x) as described in this Appendix is used as an example only. Other implementations are possible and may be utilized. This standard only requires that the FCS be generated in accordance with the rules of Sections 3.5 and 12.1 and that the checking process involve division by the polynomial P(x). Furthermore, the order of transmission of M(x) is the coefficient of the highest degree term first and thereafter in decreasing order of powers of x, regardless of the actual representation of fields internal to M(x).

EXPOSITORY REMARKS
for
American National Standard for
Advanced Data Communication
Control Procedure (ADCCP) -
Independent Numbering

A. BRIEF HISTORY

The development of advanced data communication control procedure standards began in late 1969 during final work on the American National Standard-Procedures for the Use of the Communication Control Characters of American National Standard Code for Information Interchange in Specified Data Communication Links (X3.28 - 1971). At that time, it was recognized that X3.28 lacked certain desirable capabilities that would be impractical to incorporate due to the basic philosophy of the standard. Consequently, several proposals were submitted by members of the Task Group for new and improved procedures. Similar work was proceeding at the same time in ECMA and ISO. One of the most significant proposals was a bit-oriented approach to link control that became widely accepted in a short period of time, both domestically and internationally. Domestically, the resultant control procedure have been called Advanced Data Communication Control Procedures (ADCCP). Internationally, the development going on in this area is called HDLC - High Level Data Link Control.

The original bit-oriented proposal and most of the work, both domestically and internationally, was based on a dependent/single sequence number per frame. In late 1971, a proposal was submitted for independent/dual numbering. It was the general concensus at that time, both domestically and internationally, that the net advantages over the disadvantages of the independent/dual numbering approach was not great enough to warrant working on the two procedures in parallel. Consequently, the American National Standard for ADCCP - Dependent Numbering evolved. Now that the work on dependent/single numbering is complete, the efforts of the

X3S34/589
DRAFT 4
15 August 1975

Task Group are directed toward this proposed American National Standard for ADCCP - Independent Numbering.

B. MAIN TECHNICAL ARGUMENTS AND RELATIONSHIP WITH ISO

The basic objectives of the Advanced Data Communication Control Procedures are to provide:

a) Full transparency and code independence,

b) Efficient interactive operation,

c) A High level of reliability,

d) Two-way alternate and two-way simultaneous operation

e) A high level of modularity

These objectives have been largely met.

During the four-year period of ADCCP development, there has been active liaison with both the ECMA and ISO spheres of interest. As a result each group's activity has influenced that of the other.

DEPARTMENT OF LABOR

Employment Standards Administration

■

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

V40245 DEC 19 75 XUM

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determinations by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138), and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the orginal General Wage Determination Decision.

MODIFICATIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State.

DECISION NO. C075-5143

LABORERS (Heavy Construction)

Group 1: Minimum Labor, including Caissons to 8'; Carrying Reinforcing Rods; Work on Cross Culverts, connections and side drains in connection with highway work, whether corrugated metal or concrete pipe; Fence Erectors; Metal Mesh; Dowel Bars; Tie Bars and Chairs in concrete paving; Flagman directing traffic; Nursery Man including seeding, mulching and planting of trees, shrubs and flowers; Stake Chaser; Gabion Baskets and Reno Mattresses; Pipe plants and yards, stringing of pipe or skids, handling and signaling on pipe line work

Group 2: Chuck Tenders, Nippers, Core and Diamond Drill Helpers, Powdermen Helpers; Hot Asphalt Labor, Rakers, Boxtenders, Asphalt Curb Machines, Potmen (not mechanical); Multi-plate Culvert Pipe; Air, gas and electrical tool Operators; Barco Hammers; Spaders, electric hammers; Air Tampers; Cutting Torches on demolition work; Caissons 8' to 12': Cofferdams; Power operated Concrete Buggies; Operators of concrete saws on pavement (other than gang saws); Timber and Chain Saws; Stresser or Stretcherman on Post Tension or Prestressed Concrete on or off jobsite; Tool Room Man and Checkers; Cement Finisher Helper; Sand Blaster; Sand Blaster Helper; Concrete processing material; Monitor; Spotters; Signalmen; Dumpmen; Transverse Concrete Conveyor Operator; Mechanical Grouters; Boring Machine (air hydraulic); Automatic Concrete Power Curbing Machine; Jack Hammer; Vibrators; Paving Breakers; Frostproofing; Any laborer performing bridge work over 40' above the ground or above a floor and working from a Bos'n Chair; Swing Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety bolts used shall be of a type approved by State and Federal laws; Gunniting and Shotcrete Helpers; Caissons over 12'; Scalers; Timbermen, underpinning and shoring; Form-setters and/or stringmen on roads, highways, streets and airport runways; Distribution, placing and hooking of landing mats; Bull Float (hand operated) and Center Expansion Machines; Grade Checkers if required by employer; Pipe Wrappers; Dopers; Jeep Holiday Detector Men, Bandage Makers; Laborers working in trenches on all pipe lines, sewer, water, gas, oil, telephone conduit, Pen Stock, Siphons, drainage lines, Caulkers, Yarners, Fine Graders, air, gas, electric and hydraulic tools, Boring Machines, Hydraulic Jacks, Drills, Tampers, and similar operated tools; Wiping of Joint Concrete Pipe, inside and out; Labor, applicable to pipe coating or wrapping, plants and yards; Enamelers of pipe, inside and out

DECISION NO. C075-5143

LABORERS (Cont'd)
(Heavy Construction)

Group 3: Powdermen and Blasters; Gunnite Nozzlemen; Shotcrete Operator; Pipe Layer on truck pipe lines in conncection with highway work Relining Pipe; Mixer Man; Pipelayer; Hydro-broom

Group 4: Wagon Drills and Air Tracks; Jack Hammer Operators in Caissons over 12'; Ballers and Stummen; Licensed Powdermen; Diamond and Core Drills powered by air.

Group 5: Any work, other than on bridges, performed by Laborers working from a Bos'n Chair, Swinging Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws; Plugs and Galleys in Dams

LABORERS (Tunnels)

Group 1: Outside Labor

Group 2: Minimum Tunnel Labor, Dry Houseman

Group 3: Cable or Hose Tenders, Chuck Tenders, Concrete Laborers, Dumpmen, Whirley Pump Operators

Group 4: Helpers on Shotcrete, Gunniting and Sand Blasting; Helpers, Core and Diamond Drills; Pot Tenders

Group 5: Cement Finisher Helper, applying of concrete processing materials

Group 6: Collapsible form movers and setters, Miners, Machine Men and Bit Grinders, Nippers, Powdermen and Blasters, Reinforcing Steel Setters, Timbermen (steel or wood tunnel support, including the placement of sheeting when required) and all cutting and welding that is incidental to the Miner's work; Tunnel Liner Plate Setters; Vibrator Man, internal and external; Unloading, stopping and starting of Moran Agitator Cars; Diamond and Core Drill Operators; Cement Finisher (underground); Shotcrete Operator; Gunnite Nozzlemen, Sand Blasters, Pump Concrete placement Men

(SHAFTS, RAISES, MISSILE SILOS and all UNDERGROUND WORK OTHER THAN TUNNELS)

Group 1: Laborers, Topmen, Bottommen and Cagers

Group 2: Chucktenders, Concrete Laborers, Whirley Pump Operators

DECISION NO. C075-5143

LABORERS (Cont'd)
(SHAFTS, RAISES, MISSILE SILOS and all UNDERGROUND WORK OTHER THAN TUNNELS)

Group 3: Helpers in Shotcrete Gunniting and Sand Blasting; Helpers on Core and Diamond Drills; Pot Tenders; Cement Finisher Helpers; Applying of concrete processing material

Group 4: Collapsible form movers and setters, Miners, Machine Men and Bit Grinders, Nippers, Powdermen and Blasters, Reinforcing Steel Setters, Timbermen (Steel or wood tunnel support, including the placement of sheeting when required) and all cutting and welding that is incidental to the Miner's work; Liner Plate Setters; Vibrator Man, internal and external

Group 5: Diamond and Core Drill Operators; Cement Finisher (underground); Gunnite Nozzleman; Shotcrete Operators; Sand Blasters and Pump Concrete Placement Men

Group 6: Any employee performing work underground from a Bos'n Chair, Swinging Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws

POWER EQUIPMENT OPERATORS
(Other than for work in Tunnels, Shafts and Raises)

Group 1: Air Compressor; Asphalt Screed; Oiler; Brakeman; Drill Operator - Smaller than Williams MF and similar; Helper to Heavy Duty Mechanic and/or Welder; Operators of 5 or more light plants, Welding Machines, Generators, single unit conveyor; Pumps; Vacuum well point system; tractor, under 70 HP with or without attachments

Group 2: Conveyor, handling building materials; Ditch Witch and similar trenching machine; Fireman or tank heater, road; Forklift; Haulage motor man; Pugmill; portable screening plant with or without a spray bar; screening plants, with classifier; self-propelled Roller, Rubber tired under 5 tons;

Group 3: Asphalt Plant; Backfiller, Bituminous spreader or laydown machine; Cableway signalman; caisson drill; Williams MF, similar and larger; C.M.I. and similar; Concrete Batching Plants; Concrete finish Machine; Concrete Gang Saws on concrete paving; Concrete Mixer, less than 1 yd.; Concrete Placement Pumps, under 8 inches; Distributors, bituminous surfaces; Drill, diamond or core; Drill Rigs, rotary, churn, or cable tool; Elevating Graders, Equipment Lubricating and service Engineer; Engineer Fireman; Grout Machine; Gunnite Machine; Hoists, 1 drum; Hydraulic Backhoes, wheel mounted under 3/4 yd.; Loader, Barber Green, etc.; Loader up to and including 6 cu. yds.; Maintine Doctor; Mechanic; Motor Grader/Blade, rough; Road Stabilization Machine; Rollers, self-propelled, all types over 5 tons; Sandblasting Machine; single unit portable crusher, with or without washer; tie tamper, wheel mounted; Tractor, 70 HP and over with or without attachments; Trenching Machine Operator; Welder; winch on truck

Group 4: Cable Operated crane, track mounted; cable operated power shovels, Draglines, Clamshells, and backhoes, 5 cu. yds. and under; Concrete Mixer over 1 cu. yd.; Concrete Paver 34E or similar; Concrete placement pumps, 8 inches and over; crane, 50 tons and under; Hoist, 2 drums; Hydraulic Backhoe, 3/4 yd. and over; Loader, over 6 cu. yds.; Mechanic-welder, heavy duty; Mixer mobile; Motor Grader/blade, finish; Multiple unit portable crusher, with or without washer; Piledrivar; Scrapers, single bowl under 40 cu. yds.; Self-propelled Hydraulic Crane; tractor with sideboom; truck mounted Hydraulic Crane

Group 5: Cable operated Power Shovels, Draglines, Clamshells and Backhoes over 5 cu. yds.; Crane, over 50 tons carrier mounted; Derrick; Electric rail type tower crane; Hoist, 3 drum or more; Quad Nine and similar push unit; Scrapers - single bowl including pups 40 cu. yds. and tandem bowls and over

Group 6: Cableway; Climbing tower Crane; Crawler or Truck Mounted Tower Crane; Wheel Excavator, Tower Crane, Truck type

DECISION NO. C075-5143

POWER EQUIPMENT OPERATORS (Cont'd)
(for work in Tunnels, Shafts and Raises)

Group 1: Brakeman

Group 2: Motorman

Group 3: Compressor (900 CFM and over) Serving Tunnels, Shafts and Raises

Group 4: Air Tractors; Grout Machine; Gunnite Machine; Jumbo Form; Mechanic; Welder

Group 5: Concrete Placement Pumps, 8" and over discharge; Mechanic-Welder, heavy duty; Mucking Machines and Front End Loaders, underground; Slusher; Mine Hoist Operator

Group 6: Nole

STATE: Colorado COUNTY: El Paso
DECISION NUMBER: CO75-5144 DATE: Date of Publication
Supersedes Decision No. CO75-5137 dated November 28, 1975, in 40 FR 55622
DESCRIPTION OF WORK: Building Construction (excluding single family homes and garden type apartments up to and including 4 stories) and heavy construction.

LABORERS (Cont'd)
(Building Construction)

GROUP DESCRIPTION For All COUNTIES

Group 1: Watchmen tending Heaters and Pumps

Group 2: Building Construction Laborer

Group 3: Laborers - Underpinning and Shoring Eight (8) feet or more below working surface.
Power Tool Operators of all mechanical, air, gas and electrical tools, including Self-propelled Buggies and Cement Finisher Tenders.
Laborers parparing and placing of stone or any other Aggregate in a sand bed to be used as exposed face of tilt-up panels.
Burners on Demolition and Welders, Gunnite Nozzlemen and Sand Blasters.

Group 4: Pipelayers on Building Construction

Group 5: Jackhammer Operator for Underpinning and Shoring over twelve (12) feet below working surface, Bellers and Stemmers on Caisson Work

Group 6: Tender, Mason and Plaster

DECISION NO. C075-5144

LABORERS
(Heavy Construction)

Group 1: Minimum Labor, including Caissons to 8'; Carrying Reinforcing Rods; Work on Cross Culverts, connections and side drains in connection with highway work, whether corrugated metal or concrete pipe; Fence Erectors; Metal Mesh; Dowel Bars; Tie Bars and Chairs in concrete paving; Flagman directing traffic; Nursery Man including seeding, mulching and planting of trees, shrubs and flowers; Stake Chaser; Gabion Baskets and Reno Mattresses; Pipe plants and yards, stringing of pipe or skids, handling and signaling on pipe line work

Group 1: Chuck Tenders, Nippers, Core and Diamond Drill Helpers, Powdermen Helpers; Hot Asphalt Labor, Rakers, Boxtenders, Asphalt Curb Machines, Potmen (not mechanical); Multi-plate Culvert Pipe; Air, gas and electrical tool Operators; Barco Hammers; Spaders, electric hammers; Air Tampers; Cutting Torches on demolition work; Caissons 8' tO 12'; Cofferdams; Power operated Concrete Buggies; Operators of concrete saws on pavement (other than gang saws); Timber and Chain Saws; Stresser or Stretcherman on Post Tension or Prestressed Concrete on or off jobsite; Tool Room Man and Checkers; Cement Finisher Helper; Sand Blaster; Sand Blaster Helper; Concrete processing material; Monitor; Spotters; Signalmen; Dumpmen; Transverse Concrete Conveyor Operator; Mechanical Grouters; Boring Machine (air, hydraulic); Automatic Concrete Curbing Machine; Jack Hammer; Vibrators; Paving Breakers; Frostproofing; Any Laborer performing bridge work over 40' above the ground or above a floor and working from a Bos'n Chair; Swing Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws; Gunniting and Shotcrete Helpers; Caissons over 12'; Scalers; Timbermen, underpinning and shoring; Form-setters and/or stringmen on roads, highways, streets and airport runways; Distribution, placing and hooking of landing mats; Bull Float (hand operated) and Center Expansion Machines; Grade Checkers if required by employer; Pipe Wrappers; Dopers; Jeep Holiday Detector Men, Bandage Makers; Laborers working in trenches on all pipe lines, sewer, water, gas, oil, telephone conduit, Pen Stock, Siphons, drainage lines, Caulkers, Yarners, Fine Graders, air, gas, electric and hydraulic tools, Boring Machines, Hydraulic Jacks, Drills, Tampers and similar operated tools; Wiping of Joint Concrete Pipe, inside and oOt; Labor, applicable to pipe coating or wrapping, plants and yards; Enamelers of pipe, inside and out

Group 3: Powdermen and Blasters; Gunnite Nozzlemen; Shotcrete Operator; Pipe Layer on truck pipe lines in connection with highway work; Relining pipe; Mixer Man; Pipelayer; Hydro-broom

Group 4: Wagon Drills and Air Tracks; Jack Hammer Operators in Caissons over 12'; Bellers and Stemmen; Licensed Powdermen; Diamond and Core Drills powered by air

Group 5: Any work, other than on bridges, performed by Laborers working from a Bos'n Chair, Swinging Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws; Plugs and Galleys in Dams

DECISION NO. C075-5144

LABORERS (Tunnels)

Group 1: Outside Labor

Group 2: Minimum Tunnel Labor Dry Houseman

Group 3: Cable or Hose Tenders, Chuck Tenders, Concrete Laborers, Dumpmen, Whirley Pump Operators

Group 4: Helpers on Shotcrete, Gunniting and Sand Blasting; Helpers, Core and Diamond Drills; Pot Tenders

Group 5: Cement Finisher Helper, applying of concrete processing materials

Group 6: Collapsible form movers and setters, Miners, Machine Men and Bit Grinders, Nippers, Powdermen and Blasters, Reinforcing Steel Setters, Timbermen (steel or wood tunnel support, including the placement of sheeting when required) and all cutting and welding that is incidental to the Miner's work; Tunnel Liner Plate Setter; Vibrator Men, internal and external; Unloading, stopping and starting of Moran Agitator Cars; Diamond and Core Drill Operators; Cement Finisher (underground); Shotcrete Operator; Gunnite Nozzlemen, Sand Blasters, Pump Concrete placement Men

(SHAFTS, RAISES, MISSILE SILOS and all UNDERGROUND WORK OTHER THAN TUNNELS)

Group 1: Laborers, Topmen, Bottommen and Cagers

Group 2: Chucktenders, Concrete Laborers, Whirley Pump Operators

Group 3: Helpers in Shotcrete Gunniting and Sand Blasting; Helpers on Core and Diamond Drills; Pot Tenders; Cement Finisher Helpers; Applying of concrete processing materials

Group 4: Collapsible Form Movers and Setters, Miners, Machine Men and Bit Grinders, Nippers, Powdermen and Blasters, Reinforcing Steel Setters, Timbermen (steel or wood tunnel support, including the placement of sheeting when required) and all cutting and welding that is incidental to the Miner's work; Liner Plant Setters; Vibrator Men, internal and external

Group 5: Diamond and Core Drill Operators; Cement Finisher (underground); Gunnite Nozzlemen; Shotcrete Operators; Sand Blasters and Pump Crete Placement Men

Group 6: Any employee performing work underground from a Bos'n Chair, Swinging Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws

LABORERS (Cont'd)
Building Construction

GROUP DESCRIPTION For All COUNTIES

Group 1: Watchmen tending Heaters and Pumps

Group 2: Building Construction Laborer

Group 3: Laborers - Underpinning and Shoring Eight (8) feet or more below working surface.
Power Tool Operators of all mechanical, air, gas, and electrical tools, including Self-propelled Buggies and Cement Finisher Tenders.
Laborers preparing and placing of stone or any other Aggregate in a sand bed to be used as exposed face of tilt-up panels.
Burners on Demolition and Welders, Gunnite Nozzlemen and Sand Blasters.

Group 4: Pipelayers on Building Construction

Group 5: Jackhammer Operator for Under-pinning and Shoring over twelve (12) feet below working surface, Bellers and Stemmers on Caisson Work.

Group 6: Tender, Mason and Plaster

DECISION NO. C075-5145

LABORERS
(Heavy Construction)

Group 1: Minimum Labor, including Caissons to 8'; Carrying Reinforcing Rods; Work on Cross-Culverts, connections and side drains in connection with highway work, whether corrugated metal or concrete pipe; Fence Erectors; Metal Mesh; Dowel Bars; Tie Bars and Chairs in concrete paving; Flagman directing traffic; Nursery Man including seeding, mulching and planting of trees, shrubs and flowers; Stake Chaser; Gabion Baskets and Reno Mattresses; Pipe plants and yards, stringing of pipe or skids, handling and signaling on pipe line work

Group 2: Chuck Tenders, Nippers, Core and Diamond Drill Helpers, Powdermen Helpers; Hot Asphalt Labor, Rakers, Boxtenders, Asphalt Curb Machines, Potmen (not mechanical); Multi-plate Culvert Pipe; Air, gas and electrical tool Operators; Barco Hammers; Spaders, electric hammers; Air Tampers; Cutting Torches on demolition work; Caissons 8' to 12'; Cofferdams; Power operated Concrete Buggies; Operators of concrete saws on pavement (other than gang saws); Timber and Chain Saws; Stresser or Stretcherman on Post Tension or Prestressed Concrete on or off jobsite; Tool Room Man and Checkers; Cement Finisher Helper; Sand Blaster; Sand Blaster Helper; Concrete processing material; Monitor; Spotters; Signalmen; Dumpmen; Transverse Concrete Conveyor Operator; Mechanical Grouters; Boring Machine (air hydraulic); Automatic Concrete Power Curbing Machine; Jack Hammer; Vibrators; Paving Breakers; Frostproofing; Any laborer performing bridge work over 40' above the ground or above a floor and working from a Bos'n Chair; Swing Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws; Gunniting and Shotcrete Helpers; Caissons over 12'; Scalers; Timbermen, underpinning and shoring; Form-setters and/or stringmen on roads, highways, streets and airport runways; Distribution, placing and hooking of landing mats; Bull Float (hand operated) and Center Expansion Machines; Grade Checkers if required by employer; Pipe Wrappers; Dopers; Jeep Holiday Detector Men, Bandage Makers; Laborers working in trenches on all pipe lines, sewer, water, gas, oil, telephone conduit, Pen Stock, Siphons, drainage lines, Caulkers, Yarners, Fine Graders, air, gas, electric and hydraulic tools, Boring Machines, Hydraulic Jacks, Drills, Tampers, and similar operated tools; Wiping of Joint Concrete Pipe, inside and out; Labor, applicable to pipe coating or wrapping, plants and yards; Enamelers of pipe, inside and out

DECISION NO. C075-5145

LABORERS (Cont'd) (Heavy Construction)

Group 3: Powdermen and Blasters; Gunnite Nozzlemen; Shotcrete Operator; Pipe Layer on truck pipe lines in conncection with highway work Relining Pipe; Mixer Man; Pipelayer; Hydro-broom

Group 4: Wagon Drills and Air Tracks; Jack Hammer Operators in Caissons over 12'; Bellers and Stemmen; Licensed Powdermen; Diamond and Core Drills powered by air.

Group 5: Any work, other than on bridges, performed by Laborers working from a Bos'n Chair, Swinging Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws; Plugs and Galleys in Dams

LABORERS (Tunnels)

Group 1: Outside Labor

Group 2: Minimum Tunnel Labor, Dry Houseman

Group 3: Cable or Hose Tenders, Chuck Tenders, Concrete Laborers, Dumpmen, Whirley Pump Operators

Group 4: Helpers on Shotcrete, Gunniting and Sand Blasting; Helpers, Core and Diamond Drills; Pot Tenders

Group 5: Cement Finisher Helper, applying of concrete processing materials

Group 6: Collapsible form movers and setters, Miners, Machine Men and Bit Grinders, Nippers, Powdermen and Blasters, Reinforcing Steel Setters, Timbermen (steel or wood tunnel support, including the placement of sheeting when required) and all cutting and welding that is incidental to the Miner's work; Tunnel Liner Plate Setters; Vibrator Men, internal and external; Unloading, stopping and starting of Moran Agitator Cars; Diamond and Core Drill Operators; Cement Finisher (underground); Shotcrete Operator; Gunnite Nozzlemen, Sand Blasters, Pump Concrete placement Men

(SHAFTS, RAISES, MISSILE SILOS and all UNDERGROUND WORK OTHER THAN TUNNELS)

Group 1: Laborers, Topmen, Bottommen and Cagers

Group 2: Chucktenders, Concrete Laborers, Whirley Pump Operators

DECISION NO. C075-5145

LABORERS (Cont'd)
(SHAFTS, RAISES, MISSILE SILOS and all UNDERGROUND WORK OTHER THAN TUNNELS)

Group 3: Helpers in Shotcrete Gunniting and Sand Blasting; Helpers on Core and Diamond Drills; Pot Tenders; Cement Finisher Helpers; Applying of concrete processing material

Group 4: Collapsible form movers and setters, Miners, Machine Men and Bit Grinders, Nippers, Powdermen and Blasters, Reinforcing Steel Setters, Timbermen (Steel or wood tunnel support, including the placement of sheeting when required) and all cutting and welding that is incidental to the Miner's work; Liner Plate Setters; Vibrator Men, internal and external

Group 5: Diamond and Core Drill Operators; Cement Finisher (underground); Gunnite Nozzlemen; Shotcrete Operators; Sand Blasters and Pump Concrete Placement Men

Group 6: Any employee performing work underground from a Bos'n Chair, Swinging Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws

**ZONE 1: That area encompassed by 0 to 30 driving miles from the main Post Office in each of the following Cities: Grand Junction, Gunnison, Montrose, and Naturita.

**ZONE 2: That area encompassed by 30 to 70 driving miles from the main Post Office of above named Cities.

**ZONE 3: That area encompassed by 70 driving miles and over from the main Post Office of above named Cities.

DECISION NO. C075-5146

LABORERS (Cont'd)
Building Construction

GROUP DESCRIPTION For All COUNTIES

Group 1: Watchmen tending Heaters and Pumps

Group 2: Building Construction Laborer

Group 3: Laborers - Underpinning and Shoring Eight (8) feet or more below working surface.
Power Tool Operators of all mechanical, air, gas, and electrical tools, including Self-propelled Buggies and Cement Finisher Tenders.
Laborers preparing and placing of stone or any other Aggregate in a sand bed to be used as exposed face of tilt-up panels.
Burners on Demolition and Welders, Gunnite Nozzlemen and Sand Blasters.

Group 4: Pipelayers on Building Construction

Group 5: Jackhammer Operator for Under-pinning and Shoring over twelve (12) feet below working surface, Bellers and Stemmers on Caisson Work.

Group 6: Tender, Mason and Plaster

DECISION NO. C075-5146

LABORERS
(Heavy Construction)

Group 1: Minimum Labor, including Caissons to 8'; Carrying Reinforcing Rods; Work on Cross Culverts, connections and side drains in connection with highway work, whether corrugated metal or concrete pipe; Fence Erectors; Metal Mesh; Dowel Bars; Tie Bars and Chairs in concrete paving; Flagman directing traffic; Nursery Man including seeding, mulching and planting of trees, shrubs and flowers; Stake Chaser; Gabion Baskets and Reno Mattresses; Pipe plants and yards, stringing of pipe or skids, handling and signaling on pipe line work

Group 2: Chuck Tenders, Nippers, Core and Diamond Drill Helpers, Powdermen Helpers; Hot Asphalt Labor, Rakers, Boxtenders, Asphalt Curb Machines, Potmen (not mechanical); Multi-plate Culvert Pipe; Air, gas and electrical tool Operators; Barco Hammers; Spaders, electric hammers; Air Tampers; Cutting Torches on demolition work; Caissons 8' to 12'; Cofferdams; Power operated Concrete Buggies; Operators of concrete saws on pavement (other than gang saws); Timber and Chain Saws; Stresser or Stretcherman on Post Tension or Prestressed Concrete on or off jobsite; Tool Room Man and Checkers; Cement Finisher Helper; Sand Blaster; Sand Blaster Helper; Concrete processing material; Monitor; Spotters; Signalmen; Dumpmen; Transverse Concrete Conveyor Operator; Mechanical Grouters; Boring Machine (air hydraulic); Automatic Concrete Power Curbing Machine; Jack Hammer; Vibrators; Paving Breakers; Frostproofing; Any laborer performing bridge work over 40' above the ground or above a floor and working from a Bos'n Chair; Swing Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws; Gunniting and Shotcrete Helpers; Caissons over 12'; Scalers; Timbermen, underpinning and shoring; Form-setters and/or stringmen on roads, highways, streets and airport runways; Distribution, placing and hooking of landing mats; Bull Float (hand operated) and Center Expansion Machines; Grade Checkers if required by employer; Pipe Wrappers; Dopers; Jeep Holiday Detector Men, Bandage Makers; Laborers working in trenches on all pipe lines, sewer, water, gas, oil, telephone conduit, Pan Stock, Siphons, drainage lines, Caulkers, Yarners, Fine Graders, air, gas, electric and hydraulic tools, Boring Machines, Hydraulic Jacks, Drills, Tampers, and similar operated tools; Wiping of Joint Concrete Pipe, inside and out; Labor, applicable to pipe coating or wrapping, plants and yards; Enamelers of pipe, inside and out

DECISION NO. C075-5146

LABORERS (Cont'd)
(Heavy Construction)

Group 3: Powdermen and Blasters; Gunnite Nozzlemen; Shotcrete Operator; Pipe Layer on truck pipe lines in connection with highway work Relining Pipe; Mixer Man; Pipelayer; Hydro-broom

Group 4: Wagon Drills and Air Tracks; Jack Hammer Operators in Caissons over 12'; Bellers and Stemmen; Licensed Powdermen; Diamond and Core Drills powered by air.

Group 5: Any work, other than on bridges, performed by Laborers working from a Bos'n Chair, Swinging Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws; Plugs and Colleys in Dams

LABORERS (Tunnels)

Group 1: Outside Labor

Group 2: Minimum Tunnel Labor, Dry Housemen

Group 3: Cable or Hose Tenders, Chuck Tenders, Concrete Laborers, Dumpmen, Whirley Pump Operators

Group 4: Helpers on Shotcrete, Gunniting and Sand Blasting; Helpers, Core and Diamond Drills; Pot Tenders

Group 5: Cement Finisher Helper, applying of concrete processing materials

Group 6: Collapsible form movers and setters, Miners, Machine Men and Bit Grinders, Nippers, Powdermen and Blasters, Reinforcing Steel Setters, Timbermen (steel or wood tunnel support, including the placement of sheeting when required) and all cutting and welding that is incidental to the Miner's work; Tunnel Liner Plate Setters; Vibrator Men, internal and external; Unloading, stopping and starting of Moran Agitator Cars; Diamond and Core Drill Operators; Cement Finisher (underground); Shotcrete Operator; Gunnite Nozzlemen, Sand Blasters, Pump Concrete placement Men

(SHAFTS, RAISES, MISSILE SILOS and all UNDERGROUND WORK OTHER THAN TUNNELS)

Group 1: Laborers, Topmen, Bottommen and Cagers

Group 2: Chucktenders, Concrete Laborers, Whirley Pump Operators

DECISION NO. C075-5146

LABORERS (Cont'd)
(SHAFTS, RAISES, MISSILE SILOS and all UNDERGROUND WORK OTHER THAN TUNNELS)

Group 3: Helpers in Shotcrete Gunniting and Sand Blasting; Helpers on Core and Diamond Drills; Pot Tenders; Cement Finisher Helpers; Applying of concrete processing material

Group 4: Collapsible form movers and setters, Miners, Machine Men and Bit Grinders, Nippers, Powdermen and Blasters, Reinforcing Steel Setters, Timbermen (Steel or wood tunnel support, including the placement of sheeting when required) and all cutting and welding that is incidental to the Miner's work; Liner Plate Setters; Vibrator Men, internal and external

Group 5: Diamond and Core Drill Operators; Cement Finisher (underground); Gunnite Nozzlemen; Shotcrete Operators; Sand Blasters and Pump Concrete Placement Men

Group 6: Any employee performing work underground from a Bos'n Chair, Swinging Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws

DECISION NO C075-5146

POWER EQUIPMENT OPERATORS
(Other than for work in Tunnels, Shafts and Raises)

Group 1: Air Compressor; Asphalt Screed; Oiler; Brakeman; Drill Operator - Smaller than Williams MF and similar; Helper to Heavy Duty Mechanic and/or Welder; Operators of 5 or more light plants, Welding Machines, Generators, single unit conveyor; Pumps; Vacuum well point system; tractor, under 70 HP with or without attachments

Group 2: Conveyor, handling building materials; Ditch Witch and similar trenching machine; Fireman or tank heater, road; Forklift; Haulage motor man; Pugmill; portable screening plant with or without a spray bar; screening plants, with classifier; self-propelled Roller, Rubber Tired under 5 tons;

Group 3: Asphalt Plant; Backfiller, Bituminous spreader or laydown machine; Cableway signalman; caisson drill; Williams MF, similar and larger; C.M.I. and similar; Concrete Batching Plants; Concrete finish Machine; Concrete Gang Saws on concrete paving; Concrete Mixer, less than 1 yd.; Concrete Placement Pumps, under 8 inches; Distributors, bituminous surfaces; Drill, diamond or core; Drill Rigs, rotary, churn, or cable tool; Elevating Graders, Equipment Lubricating and service Engineer; Engineer Fireman; Grout Machine; Gunnite Machine; Hoists, 1 drum; Hydraulic Backhoes, wheel mounted under 3/4 yd.; Loader, Barber Green, etc.; Loader up to and including 6 cu. yds.; Machine Doctor; Mechanic; Motor Grader/Blade, rough; Road Stabilization Machine; Rollers, self-propelled, all types over 5 tons; Sandblasting Machine; single unit portable crusher, with or without washer; tie tamper, wheel mounted; Tractor, 70 HP and over with or without attachments; Trenching Machine Operator; Welder; winch on truck

Group 4: Cable Operated crane, track mounted; cable operated power shovels, Draglines, Clamshells, and backhoes, 5 cu. yds. and under; Concrete Mixer over 1 cu. yd.; Concrete Paver 34F or similar; Concrete placement pumps, 8 inches and over; crane, 50 tons and under; Hoist, 2 drums; Hydraulic Backhoe, 3/4 yd. and over; Loader, over 6 cu. yds.; Mechanic-welder, heavy duty; Mixer mobile; Motor Grader/blade, finish; Multiple unit portable cruener, with or without washer; Piledriver; Scrapers, single bowl under 40 cu. yds.; Self-propelled Hydraulic Crane; tractor with sideboom; truck mounted Hydraulic Crane

Group 5: Cable operated Power Shovels, Draglines, Clamshells and Backhoes over 5 cu. yds.; Crane, over 50 tons carrier mounted; Derrick; Electric rail type tower crane; Hoist, 3 drum or more; Quad Nine and similar push unit; Scrapers - single bowl including pups 40 cu. yds. and tandem bowls and over

Group 6: Cableway; Climbing tower Crane; Crawler or Truck Mounted Tower Crane; Wheel Excavator, Tower Crane, Truck type

DECISION NO. C075-5146

POWER EQUIPMENT OPERATORS (Cont'd)
(for work in Tunnels, Shafts and Raises)

Group 1: Brakeman

Group 2: Motorman

Group 3: Compressor (900 CFM and over) serving Tunnels, Shafts and Raises

Group 4: Air Tractors; Grout Machine; Gunnite Machine; Jumbo Form; Mechanic; Welder

Group 5: Concrete Placement Pumps, 8" and over discharge; Mechanic-Welder, heavy duty; Mucking Machines and Front End Loaders, underground; Slusher; Mine Hoist Operator

Group 6: Mole

DECISION NO. CO75-5147

LABORERS

Group 1: Minimum Labor, including Caissons to 8'; Carrying Reinforcing Rods; Work on Cross Culverts, connections and side drains in connection with highway work, whether corrugated metal or concrete pipe; Fence Erectors; Metal Mesh; Dowel Bars; Tie Bars and Chairs in concrete paving; Flagman directing traffic; Nursery Man including seeding, mulching and planting of trees, shrubs and flowers; Stake Chaser; Gabion Baskets and Reno Mattresses; Pipe plants and yards, stringing of pipe or skids, handling and signaling on pipe line work

Group 2: Chuck Tenders, Nippers, Core and Diamond Drill Helpers, Powdermen Helpers; Hot Asphalt Labor, Rakers, Boxtenders, Asphalt Curb Machines, Potmen (not mechanical); Multi-plate Culvert Pipe; Air, gas and electrical tool Operators; Barco Hammers; Spaders, electric hammers; Air Tampers; Cutting Torches on demolition work; Caissons 8' to 12'; Cofferdams; Power operated Concrete Buggies; Operators of concrete saws on pavement (other than gang saws); Timber and Chain Saws; Stresser or Stretcherman on Post Tension or Prestressed Concrete on or off jobsite; Tool Room Man and Checkers; Cement Finisher Helper; Sand Blaster; Sand Blaster Helper; Concrete processing material; Monitor; Spotters; Signalmen; Dumpmen; Transverse Concrete Conveyor Operator; Mechenical Grouters; Boring Machine (air hydraulic); Automatic Concrete Power Curbing Machine; Jack Hammer; Vibrators; Paving Breakers; Frostproofing; Any laborer performing bridge work over 40' above the ground or above a floor and working from a Bos'n Chair; Swing Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws; Gunniting and Shotcrete Helpers; Caissons over 12'; Scalers; Timbermen, underpinning and shoring; Form-setters and/or stringmen on roads, highways, streets and airport runways; Distribution, placing and hooking of landing mats; Bull Float (hand operated) and Center Expansion Machines; Grade Checkers if required by employer; Pipe Wrappers; Dopers; Jeep Holiday Detector Men, Bandage Makers; Laborers working in trenches on all pipe lines, sewer, water, gas, oil, telephone conduit, Pen Stock, Siphons, drainage lines, Caulkers, Yarners, Pine Graders, air, gas, electric and hydraulic tools, Boring Machines, Hydraulic Jacks, Drills, Tampers, and similar operated tools; Wiping of Joint Concrete Pipe, inside and out; Labor, applicable to pipe coating or wrapping, plants and yards; Enamelers of pipe, inside and out

DECISION NO. CO75-5147

LABORERS (Cont'd)

Group 3: Powdermen and Blasters; Gunnite Nozzlemen; Shotcrete Operator; Pipe Layer on truck pipe lines in connection with highway work Relining Pipe; Mixer Man; Pipelayer; Hydro-broom

Group 4: Wagon Drills and Air Tracks; Jack Hammer Operators in Caissons over 12'; Bellers and Stemmen; Licensed Powdermen; Diamond and Core Drills powered by air.

Group 5: Any work, other than on bridges, performed by Laborers working from a Bos'n Chair, Swinging Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws; Plugs and Galleys in Dams

LABORERS (Tunnels)

Group 1: Outside Labor

Group 2: Minimum Tunnel Labor, Dry Houseman

Group 3: Cable or Hose Tenders, Chuck Tenders, Concrete Laborers, Dumpmen, Whirley Pump Operators

Group 4: Helpers on Shotcrete, Gunniting and Sand Blasting; Helpers, Core and Diamond Drills; Pot Tenders

Group 5: Cement Finisher Helper, applying of concrete processing materials

Group 6: Collapsible form movers and setters, Miners, Machine Men and Bit Grinders, Nippers, Powdermen and Blasters, Reinforcing Steel Setters, Timbermen (steel or wood tunnel support, including the placement of sheeting when required) and all cutting and welding that is incidental to the Miner's work; Tunnel Liner Plate Setters; Vibrator Men, internal and external; Unloading, stopping and starting of Moran Agitator Cars; Diamond and Core Drill Operators; Cement Finisher (underground); Shotcrete Operator; Gunnite Nozzlemen, Sand Blasters, Pump Concrete placement Men

(SHAFTS, RAISES, MISSILE SILOS and all UNDERGROUND WORK OTHER THAN TUNNELS)

Group 1: Laborers, Topmen, Bottommen and Cagers

Group 2: Chucktenders, Concrete Laborers, Whirley Pump Operators

NOTICES

DECISION NO. CO75-5147

LABORERS (Cont'd)
(SHAFTS, RAISES, MISSILE SILOS and all UNDERGROUND WORK OTHER THAN TUNNELS)

Group 3: Helpers in Shotcrete Gunniting and Sand Blasting; Helpers on Core and Diamond Drills; Pot Tenders; Cement Finisher Helpers; Applying of concrete processing material

Group 4: Collapsible form movers and setters, Miners, Machine Men and Bit Grinders, Nippers, Powdermen and Blasters, Reinforcing Steel Setters, Timbermen (Steel or wood tunnel support, including the placement of sheeting when required) and all cutting and welding that is incidental to the Miner's work; Liner Plate Setters; Vibrator Men, internal and external

Group 5: Diamond and Core Drill Operators; Cement Finisher (underground); Gunnite Nozzlemen; Shotcrete Operators; Sand Blasters and Pump Concrete Placement Men

Group 6: Any employee performing work underground from a Bos'n Chair, Swinging Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laws

NOTICES

POWER EQUIPMENT OPERATORS
(Other than for work in Tunnels, Shafts and Raises)

Group 1: Air Compressor; Asphalt Screed; Oiler; Brakeman; Drill Operator - Smaller than Williams HF and similar; Helper to Heavy Duty Mechanic and/or Welder; Operators of 5 or more light plants, Welding Machines, Generators, single unit conveyor; Pumps; Vacuum well point system; tractor, under 70 HP with or without attachments

Group 2: Conveyor, handling building materials; Ditch Witch and similar trenching machine; Fireman or tank heater, road; Forklift; Haulage motor man; Pugmill; portable screening plant with or without a grav bar; screening plants, with classifier; self-propelled Roller, Rubber tired under 5 tons;

Group 3: Asphalt Plant; Backfiller, Bituminous spreader or laydown machine; Cableway signalman; caisson drill; Williams HF, similar and larger; C.M.I. and similar; Concrete Batching Plants; Concrete finish Machine; Concrete Gang Saws on concrete paving; Concrete Mixer, less than 1 yd.; Concrete Placement Pumps, under 8 inches; Distributors, bituminous surfaces; Drill, diamond or core; Drill Rigs, rotary, churn, or cable tool; Elevating Graders, Equipment Lubricating and service Engineer; Engineer Fireman; Grout Machine; Gunnite Machine; Hoists, 1 drum; Hydraulic Backhoes, wheel mounted under 3/4 yd.; Loader, Barber Green, etc.; Loader up to and including 6 cu. yds.; Machine Doctor; Mechanic; Motor Grader/Blade, rough; Road Stabilization Machine; Rollers, self-propelled, all types over 5 tons; Sandblasting Machine; single unit portable crusher, with or without washer; tie tamper, wheel mounted; Tractor, 70 HP and over with or without attachments; Trenching Machine Operator; Welder; winch on truck

Group 4: Cable Operated crane, track mounted; cable operated power shovels, Draglines, Clamshells, and backhoes, 5 cu. yds. and under; Concrete Mixer over 1 cu. yd.; Concrete Paver 34S or similar; Concrete placement pumps, 8 inches and over; crane, 50 tons and under; Hoist, 2 drums; Hydraulic Backhoe, 3/4 yd. and over; Loader, over 6 cu. yds.; Mechanic-welder, heavy duty; Mixer mobile; Motor Grader/blade, finish; Multiple unit portable crusher, with or without washer; Piledriver; Scrapers, single bowl under 40 cu. yds.; Self-propelled Hydraulic Crane; tractor with sideboom; truck mounted Hydraulic Crane

Group 5: Cable operated Power Shovels, Draglines, Clamshells and Backhoes over 5 cu. yds.; Crane, over 50 tons carrier mounted; Derrick; Electric rail type tower crane; Hoist, 3 drum or more; Quad Nine and similar push unit; Scrapers - single bowl including pups 40 cu. yds. and tandem bowls and over

Group 6: Cableway; Climbing tower Crane; Crawler or Truck Mounted Tower Crane; Wheel Excavator, Tower Crane, Truck type

POWER EQUIPMENT OPERATORS (Cont'd)
(for work in Tunnels, Shafts and Raises)

Group 1: Brakeman

Group 2: Motorman

Group 3: Compressor (900 CFM and over) serving Tunnels, Shafts and Raises

Group 4: Air Tractors; Grout Machine; Gunnite Machine; Jumbo Form; Mechanic; Welder

Group 5: Concrete Placement Pumps, 8" and over discharge; Mechanic-Welder, heavy duty; Mucking Machines and Front End Loaders, underground; Slusher; Mine Hoist Operator

Group 6: Mole

SUPERSEDEAS DECISION

STATE: Indiana COUNTIES: *See Below
DECISION NUMBER: IN75-2131 DATE: Date of Publication
Supersedes Decision No. IN75-2083, dated June 27, 1975 in 40 FR 27422
DESCRIPTION OF WORK: Building Construction (excluding single family homes and garden type apartments up to and including 4 stories).

*Allen, Bartholomew, Benton, Dearborn, Delaware, Grant, Marion, Monroe, Tippecanoe, Vanderburgh & Vigo	Basic Hourly Rates	Fringe Benefits Payments: H & W	Pensions	Vacation	Education and/or Appr. Tr.

DECISION NO. IN75-2131

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day;
E-Thanksgiving Day; F-Christmas Day

FOOTNOTES:
a. 6% for Health & Welfare includes Pension
b. 6 paid holidays: A through F
c. Employer contributes 4% of regular hourly rate to vacation pay credit for employee who has worked in business more than 5 years, & 2% for employee who has worked in business less than 5 years.
d. When an employee has been employed by an employer for 6 continuous months, the employer will contribute $5.00 per week toward his Hospital/Medical premiums if the employer does not have a preestablished Hospital/Medical plan. If an employee has met the 6-month qualification & is off work for any reason for over 30 continuous calendar days, the employer will not make the above $5.00 weekly contribution to the employee until the employee returns to work on a regular basis.
e. 6 paid holidays: A through F provided such employees work the last scheduled day prior to & the next scheduled work day after the holiday unless permission for not working on such days is granted by the employer.
f. 9 paid holidays: A through F plus Washington's Birthday, Good Friday, & Christmas Eve, providing employee has worked 45 full days during the 120 calendar days prior to the holiday, & the regular scheduled work days immediately preceding and following the holiday.
g. 2 paid holidays: C & D
h. $14.00 per week per employee
i. $14.00 per week per employee
j. $16.00 per week per employee
k. $13.00 per week per employee.
l. 1 week's paid vacation after 1 year's employment; 2 weeks after 3 years; 3 weeks after 10 years
m. $16.00 per week per employee
n. $19.50 per week per employee
o. Each employee who has been in the employ of the same employer for 1 year & has accumulated 1000 hours of service shall receive 1 week's vacation with pay of 40 hours at straight time; each employee who has been in the employ of the same employer for 10 years or more & has accumulated 1000 hours of service shall receive 3 weeks' vacation with pay of 120 hours at straight time hourly rate.

POWER EQUIPMENT OPERATORS 2 of 3

Group 1: Air Compressors in Manifold with throttle valve; Asphalt Plant Engineer; Auto Grade or similar type machine; Auto Patrol; Backhoe on Farm type Tractor, 45 H.P. and over; Ballast Regulator (R. R.); Bituminous Mixer; Bituminous Paver; Bituminous Plant Engineer; Bull Dozer; Caisson Drilling Machine; Cherry Picker - 15 ton or over; Chip Spreader; Concrete Mixer 21 cu. ft. or over; Core Drilling Machine; Crane or Derrick with any attachment including clamshell, dragline, shovel, backhoe, etc.; Dredge Engineer; Dredge Operator; Drilling Machine on which the drill is an integral part; Earth Mover - rubber tired (paddle wheel, 619, 631, TS-24 or similar type); Earth Mover, rubber tired - tandem (50 cents per hour additional for each bowl); Elevating Grader; Fork Lift (10 ton or over); P.C.C. Formless Paver; Gradall; Gravel Processing Plant (Portable); Operator of Guard Rail Post Driver; Highlift Shovel - 1-1/2 cu. yd. or over; Hoist (2 drums and over); Helicopter - Crew; Hydraulic Boom Truck; Keystone (Skimmer Scoop); Loader - self-propelled (Belt-chain Wheel); Locomotive Operator; Mucking Machine; Panel Board Concrete Plant (Central Mix type); Paver-Hetherington; Pile Driver - Skid or Crawler; Road Paving Mixer; Rock Breaking Plant; Rock Crushing Plant (portable); Roller - Asphalt, Waterbound Macadam; Bituminous Macadam, Brick Surface; Roller with Dozer Blade; Root Rake, Tractor Mounted; Self-propelled Widener; Stump Remover, Tractor Mounted; Surface Heater and Planer; Tandem Push Tractor (50 cents per hour additional); Tractor - Boom, Winch or Hoe Head; Tractor - Push; Tractor Mounted Spreader; Tree Mover; Trench Machine (over 24"); Tug Boat Operator; Well Drilling Machine; Winch Truck with A-Frame

Group 2: Air Compressor with throttle valve or Clever Brooks type combination; Backfiller; Back Hoe on Farm type Tractor, under 45 H.P.; Bull Float; Cherry Picker under 15 ton; Chip Spreader (self-propelled); Concrete Pump; Concrete Mesh Depressor - independently operated; Concrete Spreader - power driven; End Loader under 1-1/2 cu. yd.; Excavating Loader - portable; Finishing Machine and Bull Float; Gunite Machine; Head Dresser; Mechanic; Mesh or Steel Placer; Multiple Tamping Machine (R.R.); P.C.C. Concrete Belt Placer; Pull Grader - power control; Refrigerating Machine - freezing operation; Ross Carrier; Sheepfoot Roller (self-propelled); Tamper - Multiple Vibrating - Asphalt, Waterbound Macadam, Bituminous Macadam, Brick Surface; Trench Machine 24" and under; Tube Float; Welder

POWER EQUIPMENT OPERATORS (Cont'd) 3 of 3

Group 3: Assistant Plant Engineer; Base Paver (Jersey or similar type machine); Concrete Finishing Machine; Concrete Mixer - less than 21 cu. ft.; Curb Machine; Farm Tractor - including farm tractor with all attachments except backhoe and including high lift end loaders of 1 cu. yd. capacity or less; Fireman (oil boiler); Hoist (one drum); Operator, 5 pieces of minor equipment; Paving Breaker; Power Broom, self-propelled; Roller (Earth and Sub-base material); Slurry Seal Machine; Spike Machine (R.R.); Tamper - Multiple Vibrating - Earth and Sub-base material); Throttle Valve; Throttle Valve and Fireman combination on horizontal or upright boiler; Tractaire with Drill; Tractor - 50 H.P. or over; Well Point System; Widener (Apsco or similar type)

Group 4: Air Compressor; Assistant to Engineer - Oiler; Automatic Dry Batch Plant; Bituminous Distributor; Bituminous Patching Tamper; Belt Spreader; Broom and Belt Machine; Chair Cart (self-propelled); Coleman Type Screen; Conveyor (portable); Deck Hand; Digger Post Hole (power-driven); Fork Lift - under 10 ton; Form Grader; Form Tamper (motor driven); Generator; Greaser Helper; Hetherington Driver; Hetherington Helper; Hydra Seeder; Mechanics Helper; Mechanical Heater; Operator 1 thru 4 pcs. of minor equipment; Outboard or Inboard Motor Boat; Power Curing Spraying Machine; Power Saw - Concrete (power driven); Pug Mill; Pull Broom (power type); Seaman Tiller; Straw Blower or Brush Mulcher; Striping Machine, Paint (motor driven); Sub-grader; Tractaire; Tractor (below 50 H.P.); Truck Crane Oiler - Driver; Spreader; Water Pump; Welding Machine - 2 of 300 amps or over

ELECTRICIANS' ZONE DEFINITIONS

ELECTRICIANS:

ZONE I - AREA 1 - Bernalillo, Santa Fe, Torrance, DeBaca, Guadalupe, Quay, San Miguel, Mora, Harding, Union, Colfax, Taos, Rio Arriba, Grant, Sandoval, Valencia, Socorro, Catron, Sierra and all of San Juan County excluding the Navajo Indian Reservation

ZONE I - AREA 2 - Chaves, Curry, Lincoln and Roosevelt Counties From nearest basing point cities, towns and miles to from main post office in the following towns:

Albuquerque - 15 miles from main post office
Santa Fe - 15 miles from main post office
Las Vegas - 8 miles from main post office
Farmington - 8 miles from main post office
Raton - 6 miles from main post office
Tucumari - 6 miles from main post office
Aztec - 6 miles from main post office
Roswell - 12 miles from main post office
Ruidoso - 12 miles from main post office
Portales - 12 miles from main post office
Carrizozo - 12 miles from main post office
Clovis - 12 miles from main post office

ZONE II - Los Alamos County

ZONE III - Single or multiple, family dwelling or apartments up to and including 26 units under one roof not exceeding two stories - Bernalillo, Santa Fe Counties and all of San Juan County excluding the Navajo Indian Reservation

ZONE IV - Dona Ana, Otero, Luna, Hidalgo Counties
Zone 4-A - Within 5 mile radius from the post office in Las Cruces and Alamogordo
Zone 4-B - Dona Ana, Otero, Luna and Hidalgo Counties (except that area specified in Zone 4-A)

ZONE V - McKinley County
Zone 5-A - Includes that City of Gallup and extending 10 road miles from main post office
Zone 5-B - Extending up to 20 road miles beyond Zone 5-A
Zone 5-C - Extending up to 30 road miles beyond Zone 5-A
Zone 5-D - Anything extending 30 road miles beyond Zone 5-A

ZONE VI - Eddy and Lea Counties - the following zones shall be designated from the main post office of Artesia, Carlsbad, Hobbs and Lovington:
Zone 6-A - 0 to 12 miles from main post office
Zone 6-B - 12 to 22 miles from main post office
Zone 6-C - 22 to 40 miles beyond main post office
Zone 6-D - 40 miles and beyond main post office

Ruidoso - 12 miles from main post office
Portales - 12 miles from main post office
Carrizozo - 12 miles from main post office
Clovis - 12 miles from main post office

ZONE II - Los Alamos County

ZONE III - Dona Ana, Otero, Luna, Hidalgo Counties
3-A - Within 5 miles radius from the post office in Las Cruces and Alamogordo
3-B - Dona Ana, Otero, Luna, and Hidalgo Counties (except that area specified in Zone 3-A)

ZONE IV - McKinley County
4-A - Includes that city of Gallup and extending 10 road miles from main post office
4-B - Extending up to 20 road miles beyond zone 4-A
4-C - Extending up to 30 road miles beyond Zone 4-A
4-D - Anything extending 30 road miles beyond Zone 4-A

ZONE V - Eddy and Lea Counties - the following zones shall be designated from the main post office of Artesia, Carlsbad, Hobbs, and Lovington:
Zone 5-A - 0 to 12 miles from main post office
Zone 5-B - 12 to 22 miles from main post office
Zone 5-C - 22 to 40 miles beyond main post office
Zone 5-D - 40 miles and beyond main post office

DECISION NO. NM75-4204

PAINTERS

ZONE I - San Juan, McKinley, Bernalillo, Torrance, Guadalupe, Quay, Catron, Socorro, Lincoln, DeBaca, Roosevelt, Chaves, Valencia, Sierra, Grant, Hidalgo and Curry Counties:
- Zone 1-A - Painters, roller and hand textures
- Zone 1-B - Painters, spray, sandblasting, painter on steel beidges, tanks towers, pipe and structural
- Zone 1-C - Paperhanger
- Zone 1-D - Drywall finisher; Ames tool operator
- Zone 1-E - Hand finisher machine texture
- Zone 1-F - Painting 30 to 75 feet above ground or floor
- Zone 1-G - Painting 75 feet or more above ground floor

ZONE II - Colfax, Harding, Los Alamos, Mora, Sandoval, San Miguel, Rio, Arriba, Taos, Union, and Santa Fe Counties.
- Zone 2-A - Painters and roller
- Zone 2-B - Paperhangers
- Zone 2-C - Spray, Sandblast, pressure roller and gunnite operator
- Zone 2-D - Steel painter; bridges, structural steel, machinery tank, towers, pipe boiler rooms and power plant brush and spray
- Zone 2-E - Drywall finisher tool and machine texture
- Zone 2-F - High pay - 30 to 75 feet
- Zone 2-G - High pay - 75 to 100 feet
- Zone 2-H - High pay - 100 feet and over

ZONE III- Luna, Otero and Dona Ana Counties
- Zone 3-A - Brush, tapers and rollers
- Zone 3-B - Spray, sandblasting
- Zone 3-C - Ames tool and steel brush after erection
- Zone 3-D - Stripping machine
- Zone 3-E - Radio towers, water tanks, smoke stacks
- Zone 3-F - Radio towers, water tanks, smoke stacks 50 to 75 feet
- Zone 3-G - Radio towers, water tanks, smoke stacks 75 feet to 100 feet
- Zone 3-H - Radio towers, water tanks, smoke stacks 100 feet to 200 feet
- Zone 3-I - Radio towers, water tanks, smoke stacks 200 feet to 300 feet
- Zone 3-J - Radio towers, water tanks, smoke stacks 300 feet to 400 feet

ZONE IV - Lea and Eddy Counties shall encompass Carlsbad, New Mexico and an area within a radius of 40 miles from the courthouse in Carlsbad, New Mexico
- Zone 4-A - Brush and roller
- Zone 4-B - Paperhangers and sandblaster
- Zone 4-C - Spray and dry wall finisher

ZONE V - Lea and Eddy Counties shall include the rest of the area in Eddy and Lea Counties
- Zone 5-A - Brush, roller and drywall finisher
- Zone 5-B - Spray
- Zone 5-C - Paperhanger and sandblaster

RESIDENTIAL AND GENERAL BUILDING CONSTRUCTION
POWER EQUIPMENT OPERATORS:

Group 1: Firemen, Oiler, Helper - Mechanics Welders, Greaser Truck Screedman Scale Operator such a (Bin-A-Batch), Rubber-tired Farm-type Tractor, Tractors under 50 HP w/o attachments, Breakman, Concrete Paving Curing Machine (bridge type)

Group 2: Rollers, Sheepsfoot or Pneumatic Self-propelled w/o Dozer, Concrete Conveyor, Service Truck Operator (head oiler), Air Compressor (300 CFM and over), Pumps (6" and over), Screening Plant, Concrete Mixers (under 1 c.y.), Concrete Saw of Grinder-span type, Hoists, 1 drum, Air Tugger, Elevating Belt Type Loaders, Forklift Lumber Stacker, Tractor-farm type (under 50 HP w/attachments) Motor Man and Industrial Locomotive Operator, Winch Trucks, Front End Loader (under 2 c.y.), Power Plants which generate over 15 KW, Welding Machines

Group 3: Bituminous Distributors Boilers, Retort and Hot Oil Heaters, Concrete Paver-single drum, Drilling Equipment, Motor Graders (Rough), Shaft and Tunnel Equipment-Refrigeration, Slusher, jumbo form, Trenching Machines (all types), Pump Crete and Gunite Machines, Slipform Paver, Mechanical Bullfloats, Concrete Slab, Spreading Machine, Concrete Slab Finishing Machine, Asphalt Plants, Bituminous Finishing Machines, Crushing Plants

Group 4: Fornt End Loader (2 thru 10 c.y.), Rollers, Steel Wheeled-all types, Bulldozers, Scrapers, (Motor or Towed), Elevating Graders, Concrete Batching Plants, Self-propelled Rollers-equiped with Dozer, Twin-bowl Scrapers and Quad 8 or 9 Pushers (35c over basic rate) Three Bowl Scrapers (60c over basic rate)

Group 5: Hydraulic Cranes - with less than 50 ft. of boom (20 tons and under), Concrete Paver-double drum, Cat Cranes, Hysters, Side and Swingboom Cats, Hoist-2 drum, Auto Fine Grader

Group 6: Mucking Machines - all types, Motor Grader-Finish, Mechanic-Welder

Group 7: Steam Engineers, Loader (Front End over 10 c.y.)

Group 8: All Shovel type Equipment:
Cranes, Draglines, Backhoes, Derricks, Guy and Stiff Leg, Pipemoble, (No.20p) Pile Driver, Hydraulic Cranes (20 tons and over), Mine Hoist (Belt Loader "CMI" type), Cranes, Draglines - with Booms and Jib over 150 ft. 25c per hour additional

Group 9: Shovel (wheel type), Boring Machine (Tunnel or Shaft Mole), Pipe Mobile

Group 10: Shaft and Tunnel Work

HEAVY ENGINEERING CONSTRUCTION
POWER EQUIPMENT OPERATORS

Group 1: Firemen, Oiler, Helper - Mechanics Welders, Greaser Truck, Screedman Scale Operator such a (Bin-A-Batch), Rubber-tired Farm-type Tractor, Tractors under 50 HP w/o attachments, Breakman, Concrete Paving Curing Machine (bridge type)

Group 2: Rollers, Sheepsfoot or Pneumatic Self-propelled w/o Dozer, Concrete Conveyor, Service Truck Operator (head oiler), Air Compressor (300 CFM and over), Pumps (6" and over), Screening Plants, Concrete Mixers (under 1 c.y.), Concrete Saw of Grinder-span type, Hoists, 1 drum, Air Tugger, Elevating Belt Type Loaders, Forklift Lumber Stacker, Tractor-farm type (under 50 Hp w/attachments) Motor Man and Industrial Locomotive Operator, Winch Trucks, Front End Loader (under 2 c.y.), Power Plants which generate over 15 KW, Welding Machines

Group 3: Bituminous Distributors Boilers, Retort and Hot Oil Heaters, Concrete Paver - single drum, Drilling Equipment, Motor Graders (Rough), Shaft and Tunnel Equipment - Refrigeration, Slusher, jumbo form, Trenching Machines (all types), Pump Crete and Gunite Machines, slipform Paver, Mechanical Bullfloats, Concrete Slab, Spreading Machine, Concrete Slab Finishing Machine, Asphalt Plants, Bituminous Finishing Machines, Crushing Plants

Group 4: Front End Loader (2 thru 10 c.y.), Rollers, Steel Wheeled-all types, Bulldozers, Scrapers, (Motor or Towed), Elevating Graders, Concrete Batching Plants, Self-propelled Rollers - equiped with Dozer, Twin-bowl Scrapers and Quad 8 or 9 Pushers (35c over basic rate) Three Bowl Scrapers (60c over basic rate)

Group 5: Hydraulic Cranes - with less than 50 ft. of Boom (20 tons and under), Concrete Paver - double drum, Cat Cranes, Hystera, Side and Swingboom Cats, Hoist - 2 drum, Auto Fine Grader

Group 6: Mucking Machines - all types, Motor Grader - Finisher, Mechanic - Welder

Group 7: Steam Engineers, Loader (Front End over 10 c.y.)

Group 8: All Shovel Type Equipment:
Cranes, Draglines, Backhoes, Derricks, Guy and Stiff Leg, Pipemoble (No. 20p) Pile Driver, Hydraulic Cranes (20 tons and over), Mine Hoist (Belt Loader "CMI" type), Cranes, Draglines - with Booms and Jib over 150 ft. 25c per hour additional

Group 9: Shovel (wheel type), Boring Machine (Tunnel or Shaft Mole), Pipe Mobile

CLASSIFICATION DEFINITIONS

TRUCK DRIVERS:

Group 1: Pickup 3/4 ton and under; Light Tire Repair or Washer; Swamper or Riding Helper; Teamster 2 or 4 up

Group 2: Bus or Taxi Driver; Dump or Batch Truck under 8 C.Y.W.L.A.; Flatbed (bobtail) 2 ton and under; Warehouse including Material Checker; Mechanic and Welder Helper; Forklift, under 5 ton MRC

Group 3: Dump Truck (including all hgihway and off-highway) 8 up to 16 C.Y.W.L.C.; Water, Fuel or Oil Trucks less than 3,000 gallons; Flatbed (bobtail) over 2 tons

Group 4: Distributors Driver; Heavy Tire Repair; Lumber Carrier Driver; Yound Buggy or similar equipment transit mix or agitator 2 or 3 axle bobtail equipment; Scissor Truck; Bulk Cement Bobtail 2 or 3 axles; Semi-trailer Driver (flatbed or van single axle); Forklift 5 ton and over M.R.C.; Field Equipment Serviceman

Group 5: Dumpsters and Dumpcrete Driver; Water, Fuel or Oil Truck, 3,000 to 6,000 gallon capacity; Lowboy, light equipment driver; Euclid type tank wagon under 6,000 gallons

Group 6: Vacuum Truck; Dump Truck (including all highway and off-highway 16 up to 22 C.Y.W.L.C.

Group 7: Transit Mix or Agitator semi or 4 axle equipment driver; Flaherty Truck type Spreader Box Driver; Slurry Trucks 4 axle Bobtail; Winch Truck and "A" Frame Dump Trucks (including all highway and off-highway) 22 C.Y. up to 35 C.Y.W.L.C, Head Field Equipment Serviceman

Group 8: Euclid Diesel powered Turnarocker; Terra Cobra; DW 10; DW 20; LeTourneau Pulls and similar diesel powered equipment when used to haul materials and assigned to a Teamster; Lowboy Heavy Equipment Driver; Water, Fuel or Oil Trucks 6,000 gal. and over (including tank wagon drivers); Semi-treiler Driver (flatbed or van tandems); Light equipment mechanic; Dump Trucks (including all highway and off-highway) 35 C.Y.W.L.C. and over; Truck and Trailer or Semi-trailer (flatbed eject all)

Group 9: Lowboy (heavy equipment, double goosenack); Heavy equipment mechanics; Welder (body and fender man)

TEAMSTERS CLASSIFICATION not listed, shall be paid a rate comparable to classification listed.

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

FOOTNOTES:
a. Includes $0.07 contribution to the Occupational Health Fund.
b. 1st 6 months - none; 6 months to years, 2%; over 5 years, 4% of basic hourly rate.
c. Paid Holidays: A through F.

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

SUPERSEDEAS DECISION

STATE: North Carolina COUNTY: Mecklenburg
DECISION NUMBER: NC75-1115 DATE: Date of Publication
Supersedeas Decision No. AP-161 dated March 2, 1973 in 38 FR 5753.
DESCRIPTION OF WORK: Building Construction (excluding single family homes and garden type apartments up to and including 4 stories).

	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
Asbestos workers	$4.03				
Air conditioning & heating mechanics	4.50				
Acoustical ceiling installer	4.00				
Bricklayers	5.26				
Carpenters	4.32				
Cement masons	4.28				
Drywall hangers & finishers	4.50				
Electricians	7.08	.25	1%		½ of 1%
Elevator constructors	5.705	.195	.20	1%+a&b	.005
Elevator constructors' helpers	70% JR	.195	.20	1%+a&b	.005
Elevator constructors' helpers, (probationary)	50%JR				
Glaziers	3.58				
Ironworkers, structural	5.36				
Ironworkers, reinforcing	4.37				
Laborers:					
Laborers	2.75				
Mason tenders	3.35				
Mortar mixers	3.05				
Pipelayers	2.86				
Lathers	4.97				
Millwrights	4.90				
Painters, brush	3.50				
Plasterers	5.00				
Plumbers, pipefitters, steamfitters	5.26				
Roofers	2.78				
Sheet metal workers	4.50				
Stonemasons	4.25				
Terrazzo workers	4.00				
Tile setters	4.08				
Truck drivers	2.42				
Waterproofing mechanics	3.23				
Power Equipment Operators:					
Asphalt paving machine	2.85				
Backhoe	3.59				
Bulldozers	3.00				
Cranes, derricks, draglines, drill rig	4.84				

NC75-1115 P. 2

	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
Power Equipment Operators (cont'd):					
Drill hole man	6.17				
Fork lift	4.25				
Front end loader	2.82				
Motor grader	3.00				
Oilers	5.17				
Pan	3.35				
Pump	4.00				
Roller	2.84				
Scraper	3.00				
Welders - Receive rate prescribed for craft performing operation to which welding is incidental.					

PAID HOLIDAYS:
A - New Year's Day; B - Memorial Day; C - Independence Day; D - Labor Day; E - Thanksgiving Day; F- Christmas Day.

Footnotes:
a. Employer contributes 4% basic hourly rate for 5 years or more of service or 2% basic hourly rate for 6 months to 5 years of service as Vacation Pay Credit.

b. Holidays: A through F.

NATIONAL SCIENCE FOUNDATION

PRIVACY ACT OF 1974

Additional Systems of Records

V40245 DEC 19 75 XUM

National Science Foundation

Privacy Act of 1974

Additional System of Records

Pursuant to the requirements of section 3 of the Privacy Act of 1974, 5 U.S.C. 552a(c)(4), notice is hereby given of the existence and character of a new system of records to be maintained by the National Science Foundation and of the routine uses thereof. Interested persons are invited to submit written data, views or arguments to the Director, National Science Foundation, ATTN: General Counsel, Washington, D.C. 20550, not later than thirty days from the date of this published notice.

NSF-40

System name: NSF Innovation Guide Mailing List

System location: Capital Systems Group, Inc., 6110 Executive Boulevard, Suite 850, Rockville, Maryland 20852 and Word/One Computer Center, Bowne Time Sharing, 345 Hudson Street, New York, New York 10014.

Categories of individuals covered by the system: Recipients of the Innovation Guide and other individuals potentially interested in the Innovation Guide project or in improving communications of scientific and technical information.

Categories of records in the system: Name, address (institution or place of business), scientific/professional group categorization, and correspondence records.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Identification of individuals for personal referrals in response to inquiries from interested readers. Other Government agencies or private organizations may be given information from this system.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Computer records on disc pack and/or archive tape file.

Retrievability: Alphabetically by last name.

Safeguards: Cannot be accessed by persons who do not have the computer sign-on passwords and the "get" or access word to the document.

Retention and disposal: Maintained indefinitely.

System manager(s) and address: Head, Office of Science Information Service.

Notification procedure: The NSF Privacy Act Officer should be contacted in accordance with procedures found at 45 CFR Part 613.

Record access procedures: See "Notification" above.

Contesting record procedures: See "Notification" above.

Record source categories: Individual inquiries, response to press releases, referrals from other organizations, and identification through directories.

Date: December 8, 1975.

H. Guyford Stever,
Director.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title I—General Provisions

CHAPTER IV—PRESIDENT'S COMMISSION ON WHITE HOUSE FELLOWSHIPS

PART 425—PRIVACY ACT REGULATIONS

Miscellaneous Amendment

The Privacy Act rules as published in the FEDERAL REGISTER on November 10, 1975 (Vol. 40, No. 217, page 52416) are amended as follows and will be effective on December 22, 1975.

1. Section 425.2 is amended by adding paragraph (d).

§ 425.2 Procedures for notification of existence of records pertaining to individuals.

* * * * *

(d) No special identity verification is required for individuals who wish to know whether a specific system of records pertains to them.

2. Section 425.2(c) is revised.

§ 425.2 Procedures for notification of existence of records pertaining to individuals.

* * * * *

(c) The Commission will acknowledge requests for the existence of records within 10 working days from the time it receives the request and will normally notify the requester of the existence or non-existence of records within 30 working days from receipt of request.

3. Section 425.3(d) is added as follows:

§ 425.3 Procedure for requests for access to or disclosure of records pertaining to individuals.

* * * * *

(d) Individuals will not be denied access to records pertaining to them.

4. Section 425.4 is revised as follows:

§ 425.4 Correction of records.

(a) An individual may request that a record or records pertaining to him or her be amended or corrected. Such requests shall be submitted in writing to the Administrative Officer at the Commission's business address.

(b) The signature of the requester will be sufficient identification for requesting correction of records.

(c) A request for amendment shall contain an exact description of the item or items sought to be amended and specific reasons for the requested amendment, as well as the individual's birthdate for purposes of verification of records.

(d) Within 10 working days after receipt of a request to amend a record, the Administrative Officer shall transmit to the requester a written acknowledgement of receipt of request. No acknowledgement is required if the request can be reviewed and processed with notification to the individual of compliance or denial within the ten-day period. Requester will be notified within 30 days whether or not his or her request has been granted.

(e) If the Administrative Officer determines that the requested amendment is appropriate to insure that the record is:

(1) Relevant and necessary to accomplish the purposes for which the records were collected; and

(2) As accurate, timely, and complete as are reasonably necessary to assure fairness to the requester, the Administrative Officer shall:

(i) Change the record accordingly;

(ii) Advise the requester that the change has been made, thirty days from receipt of written request;

(iii) After an accounting of disclosures has been kept pursuant to 5 U.S.C. 552a(c), advise all previous recipients of the record, who, the Commission believes, still retain a copy thereof, of the fact that the amendment was made and the substance of the amendment.

(f) If, after review of the record, the Administrative Officer determines that the requested amendment is not in conformity with the requirements of the Act, he shall:

(1) Advise the requester in writing within thirty days of written request of such determination together with specific reasons therefor; and

(2) Inform the requester that further review of the request by the Director of the Commission is available if a written request therefor is made within 30 days after date of denial.

(g) Within 30 working days of receipt of a written request for review pursuant to § 425.4(f)(2) the Director shall make an independent review of the record, using the criteria of § 425.4(e) (1) and (2).

(i) If the Director determines that the record should be amended in accordance with the request, the Administrative Officer shall take the actions listed in § 425.4(e)(2) (i), (ii), and (iii).

(2) If the Director, after independent review, determines that the record should not be amended in accordance with the request, the Administrative Officer shall advise the requester:

(i) Of the determination and the reasons therefor;

(ii) Of his or her right to file with the Administrative Officer a concise statement of his or her reasons for disagreeing with the refusal to amend the record;

(iii) That the record will be annotated to indicate to anyone subsequently having access to it that a statement of disagreement has been filed, and that the statement will be made available to anyone to whom the record is disclosed;

(iv) That the Director and the Administrative Officer may, in their discretion, include a brief summary of their reasons for refusing to amend the record whenever such disclosure is made;

(v) That any prior recipients of this disputed record, who, the Commission believes, still retain a copy thereof, will be sent a copy of the statement of disagreement, after an accounting of disclosures has been kept pursuant to 5 U.S.C. 552a(c);

(vi) Of his or her right to seek judicial review of the refusal to amend the record, pursuant to 5 U.S.C. 552a(g)(1)(A).

5. Section 425.5 is amended by adding new paragraph (b):

§ 425.5 Disclosure of records to agencies or persons other than the individual to whom the record pertains.

* * * * *

(b) An accounting of the date, nature, and purpose of each disclosure of a record as well as the name and address of the person and agency to whom the disclosure was made will be indicated on the record. This accounting is available to the individual to whom the records pertain on written request to the Commission.

For President's Commission on White House Fellowships.

BRUCE H. HASENKAMP,
Director.

Title 6—Economic Stabilization

CHAPTER VII—COUNCIL ON WAGE AND PRICE STABILITY

PART 703—RECORDS MAINTAINED ABOUT AN INDIVIDUAL

Privacy Act of 1974

On August 27, 1975, the Council issued for public comments its proposed rules to implement the Privacy Act of 1974 with respect to documents maintained by the Council about individuals. The Council has since reviewed these proposed rules and also comments submitted by the Office of Management and Budget. A few minor amendments have been made in response to these comments. Therefore, the following rules are published to become effective immediately as Part 703 of 6 CFR.

Issued in Washington, D.C., on December 17, 1975 and to become effective immediately.

MICHAEL H. MOSKOW,
Director.

Subpart A—General

Sec.
703.1 Purpose.
703.2 Definitions.
703.3 Fees.

Subpart B—Annual Notice of Systems of Records Maintained by the Council

703.4 Publication of notice.

Subpart C—An Individual's Access to Records Maintained About Him (or Her)

703.5 Request for records.
703.6 Contents of request.
703.7 Procedure for request.
703.8 Initial decision.

Subpart D—Access of Others to Records About an Individual

703.9 Limitations on disclosures.

Subpart E—Accounting of the Disclosure of Records About an Individual

703.10 Maintenance of an accounting.
703.11 Contents of accounting.
703.12 Access to accounting.

Subpart F—Amendment or Correction of Records About an Individual

703.13 Request for amendment or correction.
703.14 Initial decision.
703.15 Written statement of disagreement.
703.16 Amendment or correction of previously disclosed records.

Subpart G—Appeals

703.17 General.
703.18 Appeal.
703.19 Director's decision.

AUTHORITY: 5 U.S.C. 552a.

Subpart A—General

§ 703.1 Purpose.

This part contains the regulations of the Council implementing the Privacy Act of 1974, 5 U.S.C. 552a. The regulations apply to all records maintained by the Council that are contained in a system of records, as defined herein, and that contain information about an individual. The regulations in this part set forth procedures that (a) authorize an individual's access to records maintained about him (or her), (b) limit the access of other persons to those records, and (c) permit an individual to request the amendment or correction of records about him (or her).

§ 703.2 Definitions.

For purposes of this part:

(a) "Council" shall mean the Council on Wage and Price Stability;

(b) "Individual" shall mean a citizen of the United States or an alien lawfully admitted for permanent residence;

(c) "Record" shall mean any item, collection or grouping of information about an individual that is maintained by the Council, including but not limited to, his education, financial transactions, medical history, and criminal or employment history and that contains his name, or the identifying number, symbol, or other identifying particulars assigned to the individual, such as a finger or voice print or photograph: *Provided*, That such record is maintained in a system of records as defined herein;

(d) "System of records" shall mean a group of any records under the control of the Council from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual.

§ 703.3 Fees.

The fee schedule set forth in § 702.17 of Part 702 of this chapter shall apply to the reproduction of documents for any request made pursuant to this part.

Subpart B—Annual Notice of Systems of Records Maintained by the Council

§ 703.4 Publication of notice.

The Council will publish in the FEDERAL REGISTER an annual notice describing the systems of records that the Council maintains. Those notices shall include (a) the system name, (b) the system location, (c) the categories of individuals covered by the system, (d) the categories of records in the system, (e) the Council's authority to maintain the system, (f) the routine uses of the system, (g) the Council's policies and practice for maintenance of the system, (h) the system manager, (i) the procedures for notification, access to and correction of records in the system, and (j) the sources of information for the system. Notices shall also be published, as required by the Privacy Act of 1974, of significant changes in or additions to the Council's systems of records.

Subpart C—An Individual's Access to Records Maintained Abount Him (or Her)

§ 703.5 Request for records.

Any individual may request that the Council provide him (or her) access to review and/or obtain a copy of any record pertaining to him (or her) which is contained in any system of records maintained by the Council. Such a request shall be made pursuant to the procedures set forth in §§ 703.6 and 703.7.

§ 703.6 Contents of request.

(a) Any request for access to records must (1) identify the individual making the request by him (or her) full name, birth date and current address and (2) reasonably describe the systems of records from which an individual's records are requested. Descriptions of the systems of records maintained by the Council will be available pursuant to § 703.4 in a volume, listing the systems of records maintained by the various agencies of the federal government, to be published by the Office of the Federal Register.

(b) Any request for access to records may also notify the Administrative Officer of the individual's intent to be accompanied by another person of his choice, when reviewing records. Such a statement shall be deemed the individual's consent that records about him (or her) be disclosed in the presence of that other person.

§ 703.7 Procedure for request.

Any individual's request for access to records pertaining to him (or her) shall be made in writing or in person to the Administrative Office of the Council at Room 3235 of the New Executive Office Building, 726 Jackson Place, NW., Washington, D.C. 20503. Any individual making such a request in person shall provide acceptable identification (for example, a driver's license, employee identification card or medicare card) to verify his identity and shall complete and sign any reasonable form that the Administrative Officer might provide as a record of the request. Any individual making such a request in writing shall mail or otherwise submit to the Administrative Officer a written request that is accompanied by a statement verifying the identification of the requestor.

§ 703.8 Initial decision.

(a) Within 10 working days of the receipt of a request pursuant to § 703.4, the Administrative Officer shall make an Initial Decision whether the requested records exist and whether they will be made available to the person requesting them. That initial decision shall immediately be communicated, in writing or other appropriate form, to the person who has made the request.

(b) Where the initial decision is to provide access to the requested records, the above writing or other appropriate communication shall (1) briefly describe the records to be made available, (2) state whether any records maintained, in the system of records in question, about the individual making the request are not being made available, (3) state that the requested records will be available during the Council's ordinary office hours at Room 4026, New Executive Office Building, 726 Jackson Place, NW., Washington, D.C. 20503 or alternatively state the procedure for delivery of copies of the records by mail to the individual making the request, and (4) state whether any further verification of the identity of the requesting individual is necessary.

(c) Where the initial decision is not to provide access to requested records, the Administrative Officer shall by writing or other appropriate communication explain the reason for that decision. The Administrative Officer shall

only refuse to provide an individual access to records about himself (or herself) where (1) there is inadequate verification that the requesting individual is in fact the person about whom records are maintained, (2) in fact no such records are maintained, or (3) the requested records have been compiled in reasonable anticipation of civil or criminal action or proceedings.

Subpart D—Access of Others to Records About an Individual

§ 703.9 Limitations on disclosure.

Requests for records about an individual made by persons other than that individual shall also be directed to the Administrative Officer. Such records shall only be made available to persons other than that individual in the following circumstances:

(a) To any person with the prior written consent of the individual about whom the records are maintained;

(b) To officers, employees or contractors of the Council who need the records in the performance of their duties for the Council;

(c) For a routine use compatible with the purpose for which it was collected;

(d) To any person to whom disclosure is required by the Freedom of Information Act, 5 U.S.C. 552;

(e) To the Bureau of the Census for uses pursuant to Title 13, of the United States Code;

(f) In a form not individually identifiable, to a recipient who has provided the Council with adequate assurance that the record will be used solely as a statistical research or reporting record; or

(g) To the National Archives of the United States or other appropriate entity as a record which has historical or other value warranting its preservation;

(h) In response to a written request from the head of that federal agency, to an agency for a civil or criminal law enforcement activity that is authorized by law;

(i) To a person showing compelling circumstances, affecting the health or safety of the individual about whom records are maintained, that require the disclosure of such records: *Provided*, That notification of such a disclosure is immediately mailed to the last known address of the individual;

(j) To either House of Congress or to any committee thereof with appropriate jurisdiction;

(k) To the Comptroller General in the performance of the official duties of the General Accounting Office; or

(l) Pursuant to the order of a court of competent jurisdiction.

Subpart E—Accounting of the Disclosure of Records About an Individual

§ 703.10 Maintenance of an Accounting.

The Administrative Officer of the Council shall maintain a record ("Accounting") of every instance in which records about an individual are made available, pursuant to this part, to any person other than (a) an officer, employee or contractor of the Council in the performance of his duties or (b) any person pursuant to the Freedom of Information Act, 5 U.S.C. 552.

§ 703.11 Contents of an Accounting.

The above Accounting shall contain the following information:

(a) A brief description of records disclosed;

(b) The date, nature and, where known, the purpose of the disclosure; and

(c) The name and address of the person or agency to whom the disclosure is made.

§ 703.12 Access to accounting.

Any individual may request and shall be provided access, pursuant to the procedures set forth in Subpart C of this part, to any Accounting pertaining to records maintained about that individual.

Subpart F—Amendment or Correction of Records About an Individual

§ 703.13 Request for amendment or correction.

After inspection of any records about an individual, that individual may request, in person or by mail, that the Administrative Officer correct or otherwise amend the records maintained about him (or her). Such request shall specify the particular portions of the record to be amended or corrected, the desired amendment or correction, and the reasons therefor.

§ 703.14 Initial decision.

Within 10 working days of receipt of such a request, the Administrative Officer shall give the requesting individual notice, by mail or other appropriate means, of his decision regarding the request. That notice shall include:

(a) A statement whether the request has been granted or denied, in whole or in part;

(b) A quotation or description of any amendment or correction made to any records; and

(c) Where a request is denied in whole or in part, an explanation of the reason for that denial, of the requesting individual's right to appeal the decision to the Council's Director pursuant to Subpart G of this part, and of the individual's right, pursuant to § 703.15, to file a written statement to accompany the records in question, setting forth the individual's reasons why those records should have been amended or corrected.

§ 703.15 Written statement of disagreement.

Any individual whose request for the correction or amendment of a record about him (or her) has been denied, in whole or part, may file a Written Statement of Disagreement, setting forth the reasons why the record should have been amended or corrected as requested. That Written Statement shall be made a part of the record and shall accompany that record in any use of disclosure of the record.

§ 703.16 Amendment or correction of previously disclosed records.

Whenever a record is amended or corrected pursuant to § 703.13 or a Written Statement filed pursuant to § 703.15, the Administrative Officer shall give notice of that correction, amendment or Written Statement to all persons to whom the records or copies thereof have been disclosed, as recorded in the Accounting kept pursuant to Subpart E of this part.

Subpart G—Appeals

§ 703.17 General.

Any individual whose request for access to records or request for the amendment or correction of records has been denied, in whole or in part, by the Administrative Officer may appeal that Initial Decision to the Director of the Council. Such an appeal shall be made in accordance with the procedures of this subpart.

§ 703.18 Appeal.

An individual whose request has been denied in whole or in part by an Initial Decision of the Administrative Officer may appeal that decision by filing an appeal, in writing or in person, with the Council Director, Room 4026, New Executive Office Building, 726 Jackson Place, NW., Washington, D.C. That appeal shall describe (a) the request initially made by the individual for access to or the amendment or correction of records, (b) the Administrative Officer's Initial Decision thereupen and (c) the reasons why that Initial Decision should be Modified by the Director.

§ 703.19 Director's decision.

Within 30 working days of the receipt of any appeal, the Director shall make a decision, and give notice thereof to the appealing individual, whether to modify the Administrative Officer's Initial Decision in any way. The Director shall also notify the appealing individual of (a) his right to judicial review of the Director's decision pursuant to 5 U.S.C. 552a(g)(1)(A), and (b) of his right, after the denial of any request to amend or correct records, to file a written statement to accompany those records, explaining the individual's reasons why, in his view, the records should have been amended or corrected.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Navel Orange Reg. 357, Amdt. 1]

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

This regulation increases the quantity of California-Arizona Navel oranges that may be shipped to fresh market during the weekly regulation period Decem-

V401246 DEC 22 75 XUM

ber 12–18, 1975. The quantity that may be shipped is increased due to improved market conditions for Navel oranges. The regulation and this amendment are issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 907.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of Navel oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for an increase in the quantity of oranges available for handling during the current week results from changes that have taken place in the marketing situation since the issuance of Navel Orange Regulation 357 (40 F.R. 57641). The marketing picture now indicates that there is a greater demand for Navel oranges than existed when the regulation was made effective. Therefore, in order to provide an opportunity for handlers to handle a sufficient volume of Navel oranges to fill the current market demand thereby making a greater quantity of Navel oranges available to meet such increased demand, the regulation should be amended, as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restriction on the handling of Navel orangies grown in Arizona and designated part of California.

(b) *Order, as amended.* The provisions in paragraph (b) (1) (i) and (iii) of § 907.657 (Navel Orange Regulation 357) (40 FR 57641) are hereby amended to read as follows:

§ 907.657 Navel Orange Regulation 357.

* * * * * * *

(b) * * *

(1) * * *

(i) District 1: 1,567,000 cartons;

(ii) * * *

(iii) District 3: 83,000 cartons.

* * * * * * *

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674))

Dated: December 16, 1975.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-34349 Filed 12-19-75;8:45 am]

CHAPTER XI—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MISCELLANEOUS COMMODITIES), DEPARTMENT OF AGRICULTURE

PART 1250—EGG RESEARCH AND PROMOTION

In FR Doc. 75–7720, 40 FR 13198–13201, Tuesday, March 25, 1975, and its correction, 40 FR 15065, Friday, April 4, 1975, the title should be changed from "Egg Research and Consumer Information Order" to "Egg Research and Promotion Order;" and

In FR Doc. 75–7690, 40 FR 13513–13517, Thursday, March 27, 1975; Docket No. ERPA–1, Correction, 40 FR 15906, Tuesday, April 8, 1975; FR Doc. 75–21121, 40 FR 33982–33995, Wednesday, August 13, 1975; and FR Doc. 75–26170, 40 FR 45176–45190, Wednesday, October 1, 1975; all references to part number "1251" should be changed to part number "1250." In addition, in FR Doc. 75–27865, 40 FR 48496–48498, Thursday, October 16, 1975, the reference on page 48497 in § 1250.202(a) reading "§ 1251.–347" should read "§ 1250.347."

The heading for Part 1250 is revised to read as set forth above, and Subpart—Egg Research and Promotion Order is added as follows:

Subpart—Egg Research and Promotion Order

DEFINITIONS

Sec.
1250.301 Secretary.
1250.302 Act.
1250.303 Fiscal period.
1250.304 Egg Board or Board.
1250.305 Egg producer or producer.
1250.306 Commercial eggs or eggs.
1250.307 Person.
1250.308 United States.
1250.309 Handler.
1250.310 Promotion.
1250.311 Research.
1250.312 Marketing.
1250.313 Eligible organization.
1250.314 Plans and projects.
1250.315 Part and subpart.
1250.316 Representative of a producer.

EGG BOARD

1250.326 Establishment and membership.
1250.327 Term of office.
1250.328 Nominations.
1250.329 Selection.
1250.330 Acceptance.
1250.331 Vacancies.
1250.332 Alternate members.
1250.333 Procedure.
1250.334 Compensation and reimbursement.
1250.335 Powers of the Board.
1250.336 Duties.

RESEARCH, EDUCATION, AND PROMOTION

1250.341 Research, education, and promotion.

EXPENSES AND ASSESSMENTS

1250.346 Expenses.
1250.347 Assessments.
1250.348 Collecting handlers and collection.
1250.349 Producer refunds.
1250.350 Influencing governmental action.

REPORTS, BOOKS, AND RECORDS

1250.351 Reports.
1250.352 Books and records.
1250.353 Confidential treatment.

CERTIFICATION OF ORGANIZATIONS

1250.356 Certification of organizations.

MISCELLANEOUS

1250.357 Suspension and termination.
1250.358 Proceedings after termination.
1250.359 Effect of termination or amendment.
1250.360 Personal liability.
1250.361 Right of the Secretary.
1250.362 Amendments.
1250.363 Separability.

AUTHORITY: Egg Research and Consumer Information Act (7 U.S.C. 2701 et seq.).

FINDINGS AND DETERMINATIONS

(a) *Findings on the basis of the hearing record.* Pursuant to the provisions of the Egg Research and Consumer Information Act (7 U.S.C. 2701 et seq.) and the applicable rules of practice and procedure governing proceedings to formulate an order (7 CFR Part 1250, 40 FR 13198–13201), a public hearing was held on a proposal to formulate an Egg Research and Promotion Order in Atlanta, Georgia, May 6 and 7; in Philadelphia, Pennsylvania, May 12; in Des Moines, Iowa, May 15; in Dallas, Texas, May 19; and in South San Francisco, California, May 22, 1975. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act; and

(2) All handling of eggs produced in the 48 contiguous States of the United States, as defined in the said order, is in the current of interstate commerce, or directly burdens, obstructs, or affects interstate commerce in eggs, egg products, spent fowl, or products of spent fowl.

(b) *Additional findings.* It is necessary in the public interest to make this order effective upon publication in the FEDERAL REGISTER of December 22, 1975, so that the Egg Board, the administrative agency provided for in the order, may be nominated and selected, and to start to function as soon as possible. In order for the Board to be ready to start the collection of assessments, it will be necessary to issue rules and regulations to govern the collection system. These proceedings are expected to take at least 3 months, and no collections will be required prior thereto.

The provisions of this order are known to producers and handlers by reason of the public hearing and other procedures conducted with respect to this order, and by the publication of the notice of hearing on March 27, 1975, 40 FR 13198–13201; the recommended decision and order on August 13, 1975, 40 FR 33982–33995; and the final decision and order on October 1, 1975, 40 FR 45176–45190.

All known egg producers, as defined in the act and order, eligible to vote in the referendum, were each mailed a Registration, Ballot, and Certification form and a summary of major provisions of the order. Also, Registration, Ballot, and Certification forms and copies of the entire order were readily available to producers on request. Compliance with the provisions of this order will not require advance preparation by persons subject thereto which cannot be completed prior to the effective date of regulations to be issued thereunder. No useful purpose would be served by postponing the effective date of said order beyond the date of its publication in the FEDERAL REGISTER.

(c) *Determinations.* It is hereby determined that: (1) The issuance of this order is approved or favored by not less than two-thirds of the egg producers who voted in the referendum of egg producers held during the period November 3–28, 1975; and

(2) The issuance of this order is the only practical means pursuant to the declared policy of the act of advancing the interests of producers as defined in the act and order and of carrying out the provisions of the act.

It is therefore ordered:

DEFINITIONS

§ 1250.301 Secretary.

"Secretary" means the Secretary of Agriculture or any other officer or employee of the Department of Agriculture to whom there has heretofore been delegated, or to whom there may hereafter be delegated, the authority to act in his stead.

§ 1250.302 Act.

"Act" means the Egg Research and Consumer Information Act and as it may be amended (Pub. L. 93–428).

§ 1250.303 Fiscal period.

"Fiscal period" means the calendar year unless the Egg Board, with the approval of the Secretary, selects some other budgetary period.

§ 1250.304 Egg Board or Board.

"Egg Board" or "Board" or other designatory term adopted by such Board, with the approval of the Secretary, means the administrative body established pursuant to § 1250.326.

§ 1250.305 Egg producer or producer.

"Egg producer" or "producer" means any person who either:

(1) Is an egg farmer who acquires and owns laying hens, chicks, and/or started pullets for the purpose of and is engaged in the production of commercial eggs; or

(2) Is a person who supplied or supplies laying hens, chicks, and/or started pullets to an egg farmer for the purpose of producing commercial eggs pursuant to an oral or written contractual agreement for the production of commercial eggs. Such person is deemed to be the owner of such laying hens unless it is established in writing, to the satisfaction of the Secretary or the Egg Board, that actual ownership of the laying hens is in some other party to the contract. In the event the party to an oral contract who supplied or supplies the laying hens cannot be readily identified by the Secretary or the Egg Board, the person who has immediate possession and control over the laying hens at the egg production facility shall be deemed to be the owner of such hens unless written notice is provided to the Secretary or the Egg Board, signed by the parties to said oral contract, clearly stating that the eggs are being produced under a contractual agreement and identifying the party (or parties) under said contract who is the owner of the hens.

§ 1250.306 Commercial eggs or eggs.

"Commercial eggs" or "eggs" means eggs from domesticated chickens which are sold for human consumption either in shell egg form or for further processing into egg products.

§ 1250.307 Person.

"Person" means any individual, group of individuals, partnership, corporation, association, cooperative, or any other entity.

§ 1250.308 United States.

"United States" means the 48 contiguous States of the United States of America and the District of Columbia.

§ 1250.309 Handler.

"Handler" means any person who receives or otherwise acquires eggs from an egg producer, and processes, prepares for marketing, or markets, such eggs, including eggs of his own production.

§ 1250.310 Promotion.

"Promotion" means any action, including paid advertising, to advance the image or desirability of eggs, egg products, spent fowl, or products of spent fowl.

§ 1250.311 Research.

"Research" means any type of research to advance the image, desirability, marketability, production, or quality of eggs, egg products, spent fowl, or products of spent fowl, or the evaluation of such research.

§ 1250.312 Marketing.

"Marketing" means the sale or other disposition of commercial eggs, egg products, spent fowl, or products of spent fowl in any channel of commerce.

§ 1250.313 Eligible organization.

"Eligible organization" means any organization, association, or cooperative which represents egg producers of any egg producing area of the United States certified by the Secretary pursuant to § 1250.356.

§ 1250.314 Plans and projects.

"Plans" and "projects" mean those research, consumer and producer education, advertising, marketing, product development, and promotion plans, studies, or projects pursuant to § 1250.341.

§ 1250.315 Part and subpart.

"Part" means the Egg Research and Promotion Order and all rules, regulations, and supplemental order issued pursuant to the act and the order. "Subpart" refers to the aforesaid order or any other portion or segment of this part.

§ 1250.316 Representative of a producer.

"Representative of a producer" means the owner, officer, or an employee of a producer who has been duly authorized to act in the place and stead of the producer.

EGG BOARD

§ 1250.326 Establishment and membership.

There is hereby established an Egg Board, hereinafter called the "Board," composed of 18 egg producers or representatives of egg producers, and 18 specific alternates, all appointed by the Secretary from nominations submitted by eligible organizations, associations, or cooperatives, or by other producers pursuant to § 1250.328.

§ 1250.327 Term of office.

The members of the Board, and their alternates, shall serve for terms of 2 years, except initial appointments shall be, proportionately, for terms of 2 and 3 years. Each member and alternate member shall continue to serve until his successor is appointed by the Secretary and has qualified. No member shall serve for more than three consecutive terms.

§ 1250.328 Nominations.

All nominations authorized under § 1250.326 shall be made in the following manner:

(a) Within 30 days of the approval of this order by referendum, nominations shall be submitted to the Secretary for each geographic area as specified in paragraph (d) of this section by eligible organizations, associations, or cooperatives certified pursuant to § 1250.356, or, if the Secretary determines that a substantial number of egg producers are not members of, or their interests are not represented by, any such eligible organization, association, or cooperative, then from nominations made by such egg producers in the manner authorized by the Secretary;

(b) After the establishment of the initial Board, the nominations for subsequent Board members and alternates shall be submitted to the Secretary not less than 60 days prior to the expiration of the terms of the members and alternates previously appointed to the Board;

(c) Where there is more than one eligible organization, association, or cooperative within each geographic area, as defined by the Secretary, they may caucus for the purpose of jointly nominating two qualified persons for each member and for each alternate member to be appointed. If joint agreement is not reached with respect to any such nominations, or if no caucus is held within a defined geographic area, each eligible organization, association, or cooperative

V 40246 DEC 22 75 5 XUM

may submit to the Secretary two nominations for each appointment to be made;

(d) For purposes of nominating members, and their alternates, to the Board, the 48 contiguous States of the United States shall be grouped into 6 geographic areas, as follows: Area 1 (North Atlantic States) consisting of Vermont, New Hampshire, Maine, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, New Jersey, Delaware, Maryland, and the District of Columbia; Area 2 (South Atlantic States) consisting of Virginia, West Virginia, North Carolina, South Carolina, Georgia, and Florida; Area 3 (East North Central States) Ohio, Indiana, Illinois, Michigan, and Wisconsin; Area 4 (West North Central States) Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas; Area 5 (South Central States) Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas; and Area 6 (Western States) Montana, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Idaho, Washington, Oregon, and California. The number of members of the initial Board, and their alternates, who shall be appointed from each area are: Area 1–3, Area 2–4, Area 3–2, Area 4–2, Area 5–4, and Area 6–3, for a total of 18 members from all areas. Changes to the Board as provided in paragraph (e) of this section shall be accomplished by determining the percentage of United States egg production in each area times 18 (total Board membership) and rounding to the nearest whole number; and

(e) After the establishment of the initial Board, the area grouping of the 48 contiguous States of the United States provided for in paragraph (d) of this section, including the area distribution of the 18 members of the Board and their alternates, shall be reviewed at any time not to exceed 5 years by the Board, or by a person or agency designated by the Board to perform such review, and the results shall be reported to the Secretary along with any recommendations by the Board regarding whether the delineation of the areas and the area distribution of the Board should continue without any change, or whether changes should be made in either the areas or the number of Board members to be appointed from each area, providing that each area shall be represented by not less than one Board member and any action recommended shall be subject to the approval of the Secretary.

§ 1250.329 Selection.

From the nominations made pursuant to § 1250.328, the Secretary shall appoint the members of the Board, and an alternate for each such member, on the basis of representations provided for in § 1250.326, § 1250.327, and § 1250.328.

§ 1250.330 Acceptance.

Any person appointed by the Secretary as a member, or as an alternate member, of the Board shall qualify by filing a written acceptance with the Secretary within a period of time prescribed by the Secretary.

§ 1250.331 Vacancies.

To fill any vacancy occasioned by the failure to qualify of any person appointed as a member, or as an alternate member, of the Board, or in the event of the death, removal, resignation, or disqualification of any member or alternate member of the Board, a successor for the unexpired term of such member or alternate member of the Board shall be nominated, qualified, and appointed in the manner specified in § 1250.326, § 1250.328(b), § 1250.329, and § 1250.330, except that replacement of a Board member, or alternate, with an unexpired term of less than 6 months is not necessary.

§ 1250.332 Alternate members.

An alternate member of the Board, during the absence of the member for whom he is the alternate, shall act in the place and stead of such member and perform such other duties as assigned. In the event of the death, removal, resignation, or disqualification of a member, his alternate shall act for him until a successor for such member is appointed and qualified.

§ 1250.333 Procedure.

(a) A majority of the members, including alternates acting for members of the Board, shall constitute a quorum, and any action of the Board shall require the concurring votes of at least a majority of those present and voting. At assembled meetings, all votes shall be cast in person.

(b) For routine and noncontroversial matters which do not require deliberation and exchange of views, and in matters of an emergency nature when there is not enough time to call an assembled meeting of the Board, the Board may also take action upon the concurring votes of a majority of its members by mail, telephone, or telegraph, but any such action by telephone shall be confirmed promptly in writing.

§ 1250.334 Compensation and reimbursement.

The members of the Board, and alternates when acting as members, shall serve without compensation but shall be reimbursed for necessary and reasonable expenses, as approved by the Board, incurred by them in the performance of their duties under this subpart.

§ 1250.335 Powers of the Board.

The Board shall have the following powers:

(a) To administer the provisions of this subpart in accordance with its terms and provisions;

(b) To make rules and regulations to effectuate the terms and provisions of this subpart;

(c) To receive, investigate, and report to the Secretary complaints of violations of the provisions of this subpart; and

(d) To recommend to the Secretary amendments to this subpart.

§ 1250.336 Duties.

The Board shall have the following duties:

(a) To meet and organize and to select from among its members a chairman and such other officers as may be necessary, to select committees and subcommittees of Board members, to adopt such rules for the conduct of its business as it may deem advisable, and it may establish advisory committees of persons other than Board members;

(b) To appoint or employ such persons as it may deem necessary and to define the duties and determine the compensation of each;

(c) To prepare and submit to the Secretary for his approval budgets on a fiscal-period basis of its anticipated expenses and disbursements in the administration of this subpart, including probable cost of plans and projects as estimated in the budget or budgets submitted to it by prospective contractors, with the Board's recommendations with respect thereto;

(d) With the approval of the Secretary, to enter into contracts or agreements with persons, including, but not limited to, State, regional, or national agencies or State, regional, or national egg organizations which administer research, education, or promotion programs, advertising agencies, public relations firms, public or private research organizations, advertising and promotion media, and egg producer organizations, for the development and submission to it of plans and projects authorized by § 1250.341 and for the carrying out of such plans or projects when approved by the Secretary, and for the payment of the cost thereof with funds collected pursuant to § 1250.347. Any such contracts or agreements shall provide that such contractors shall develop and submit to the Board a plan or project together with a budget or budgets which shall show estimated costs to be incurred for such plan or project, and that any such plan or project shall become effective upon approval by the Secretary. Any such contract or agreement shall also provide that the contractor shall keep accurate records of all of its transactions and make periodic reports to the Board of activities carried out and an accounting for funds received and expended, and such other reports as the Secretary may require;

(e) To review and submit to the Secretary any plans or projects which have been developed and submitted to it by the prospective contractor, together with its recommendations with respect to the approval thereof by the Secretary;

(f) To maintain such books and records and prepare and submit such reports from time to time to the Secretary as he may prescribe, and to make appropriate accounting with respect to the receipt and disbursement of all funds entrusted to it;

(g) To prepare and make public, at least annually, a report of activities carried out and an accounting for funds received and expended;

(h) To cause its books to be audited by a certified public accountant at least once each fiscal period and at such other times as the Secretary may request, and submit a copy of each such audit to the Secretary;

(i) To give the Secretary the same notice of meetings of the Board as is given to members in order that he or his representative may attend such meetings;

(j) To act as an intermediary between the Secretary and any producer or handler; and

(k) To submit to the Secretary such information pursuant to this subpart as he may request.

RESEARCH, EDUCATION, AND PROMOTION

§ 1250.341 Research, education, and promotion.

The Board shall develop and submit to the Secretary for approval any programs or projects authorized in this section. Such programs or projects shall provide for:

(a) The establishment, issuance, effectuation, and administration of appropriate programs or projects for advertising, sales promotion, and consumer education with respect to the use of eggs, egg products, spent fowl, and products of spent fowl: *Provided, however,* That any such program or project shall be directed towards increasing the general demand for eggs, egg products, spent fowl, or products of spent fowl;

(b) The establishment and carrying on of research, marketing, and development projects and studies with respect to sale, distribution, marketing, utilization, or production of eggs, egg products, spent fowl, and products of spent fowl, and the creation of new products thereof in accordance with section 7(b) of the act, to the end that the marketing and utilization of eggs, egg products, spent fowl, and products of spent fowl may be encouraged, expanded, improved, or made more acceptable, and the data collected by such activities may be disseminated;

(c) The development and expansion of foreign markets and uses for eggs, egg products, spent fowl, and products of spent fowl;

(d) Each program or project authorized under paragraph (a), (b), and (c) of this section shall be periodically reviewed or evaluated by the Board to insure that each such program or project contributes to a coordinated national program of research, education, and promotion contributing to the maintenance of markets and for the development of new markets for and of new products from eggs, eg products, spent fowl, and products of spent fowl. If it is found by the Board that any such program or project does not further the national purpose of the act, then the Board shall terminate such program or project; and

(e) No advertising or promotion programs shall use false or unwarranted claims or make any reference to private brand names of eggs, egg products, spent fowl, and products of spent fowl or use unfair or deceptive acts or practices with respect to quality, value, or use of any competing product.

EXPENSES AND ASSESSMENTS

§ 1250.346 Expenses.

The Board is authorized to incur such expenses as the Secretary finds are reasonable and likely to be incurred by the Board for its maintenance and functioning and to enable it to exercise its powers and perform its duties in accordance with the provisions of this subpart. The funds to cover such expenses shall be paid from assessments received pursuant to § 1250.347.

§ 1250.347 Assessments.

Each handler designated in § 1250.348 and pursuant to regulations issued by the Board shall collect from each producer; except that the following shall be exempt from the provisions of this section: (a) any egg producer whose aggregate number of laying hens at any time during a 3-consecutive-month period immediately prior to the date assessments are due and payable has not exceeded 3,000 laying hens, and (b) any producer owning a flock of breeding hens whose production of eggs is primarily utilized for the hatching of baby chicks; and shall pay to the Board at such times and in such manner as prescribed by regulations issued by the Board, an assessment at the rate of 5 cents per 30-dozen case of eggs, or the equivalent thereof, or such lesser amount set by the Board and approved by the Secretary for such expenses and expenditures, including provisions for a reasonable reserve and those administrative costs incurred by the Department of Agriculture after this subpart is effective, as the Secretary finds are reasonable and likely to be incurred by the Board and the Secretary under this subpart, except that no more than one such assessment shall be made on any case of eggs.

§ 1250.348 Collecting handlers and collection.

(a) Handlers responsible for collecting the assessment specified in § 1250.347 shall be any one of the following:

(1) The first person to whom eggs are sold, consigned, or delivered by producers and who grades, cartons, breaks, or otherwise performs a function of a handler under § 1250.309, (2) a producer who grades, cartons, breaks, or otherwise performs a function of a handler under § 1250.309 for eggs of his own production, or (3) such other persons as designated by the Board under rules and regulations issued pursuant to this subpart.

(b) Handlers shall collect and remit to the Egg Board all assessments collected in the manner and in the time specified by the Board pursuant to rules and regulations issued by the Board.

(c) Handlers shall maintain such records as the Egg Board may prescribe pursuant to rules and regulations issued by the Board.

(d) The Board with the approval of the Secretary may authorize other organizations or agencies to collect assessments in its behalf.

§ 1250.349 Producer refunds.

Any egg producer against whose eggs any assessment is made under the authority of the act and collected from him and who is not in favor of supporting the programs as provided for in this subpart shall have the right to demand and receive from the Board a refund of such assessment upon submission of proof satisfactory to the Board that the producer paid the assessment for which refund is sought. Any such demand shall be made personally by such producer in accordance with regulations and on a form and within a time period prescribed by the Board and approved by the Secretary. However, in no event should such period be more than 90 days after the end of the month in which the assessments are due and collectable. Any such refund shall be made within 60 days after demand is received therefor.

§ 1250.350 Influencing governmental action.

No funds collected by the Board under this subpart shall in any manner be used for the purpose of influencing governmental policy or action except to recommend to the Secretary amendments to this subpart.

REPORTS, BOOKS, AND RECORDS

§ 1250.351 Reports.

Each handler subject to this subpart and other persons subject to section 7(c) of the act may be required to report to the Board periodically such information as is required by regulations and will effectuate the purposes of the act, which information may include but not be limited to the following:

(a) Number of cases of eggs handled;

(b) Number of cases of eggs on which an assessment was collected;

(c) Name and address of person from whom any assessment was collected; and

(d) Date collection of assessment was made on each case of eggs handled.

§ 1250.352 Books and records.

Each handler subject to this subpart and persons subject to section 7(c) of the act shall maintain and make available for inspection by the Board or the Secretary such books and records as are necessary to carry out the provisions of the subpart and the regulations issued hereunder, including such records as are necessary to verify any reports required. Such records shall be retained for at least 2 years beyond the fiscal period of their applicability.

§ 1250.353 Confidential treatment.

(a) All information obtained from such books, records, or reports shall be kept confidential by all officers and employees of the Department of Agriculture and the Board, and only such information so furnished or acquired as the Secretary deems relevant shall be disclosed by them, and then only in a suit or administrative hearing brought at the direction, or upon the request of the Secretary, or to which the Secretary or any officer of the United States is a party and involving this subpart. Nothing in

V 40 246 DEC 22 75 XUM

this subsection shall be deemed to prohibit (1) the issuance of general statements based upon the reports of the number of persons subject to this subpart or statistical data collected therefrom, which statements do not identify the information furnished by any person, (2) the publication, by direction of the Secretary, of general statements relating to refunds made by the Egg Board during any specific period of time, or (3) the publication, by direction of the Secretary, of the name of any person violating this subpart together with a statement of the particular provisions of this subpart violated by such person.

(b) All information with respect to refunds, except as provided in paragraph (a) (2) of this section, made to individual producers shall be kept confidential by all officers and employees of the Department of Agriculture and the Board.

CERTIFICATION OF ORGANIZATIONS

§ 1230.356 Certification of organizations.

Any organization may request the Secretary for certification of eligibility to participate in nominating members and alternate members on the Board to represent the geographic area in which the organization represents egg producers. Such eligibility shall be based in addition to other available information upon a factual report submitted by the organization which shall contain information deemed relevant and specified by the Secretary for the making of such determination, including, but not limited to, the following:

(a) Geographic territory covered by the organization's active membership;

(b) Nature and size of the organization's active membership, proportion of total of such active membership accounted for by producers of commercial eggs, a chart showing the egg production by State in which the organization has members, and the volume of commercial eggs produced by the organization's active membership in such State(s);

(c) The extent to which the commercial egg producer membership of such organization is represented in setting the organization's policies;

(d) Evidence of stability and permanency of the organization;

(e) Sources from which the organization's operating funds are derived;

(f) Functions of the organization; and

(g) The organization's ability and willingness to further the aims and objectives of the act.

The primary consideration in determining the eligibility of an organization shall be whether its egg producer membership consists of a substantial number of egg producers who produce a substantial volume of the applicable geographic area's commercial eggs to reasonably warrant its participation in the nomination of members for the Board or to request the issuance of an order. The Secretary shall certify any organization which he finds to be eligible under this section and his determination as to eligibility shall be final.

MISCELLANEOUS

§ 1230.357 Suspension and termination.

(a) The Secretary shall, whenever he finds that this subpart or any provision thereof obstructs or does not tend to effectuate the declared policy of the act, terminate or suspend the operation of this subpart or such provision.

(b) The Secretary may conduct a referendum at any time, and shall hold a referendum on request of 10 percent or more of the number of egg producers voting in the referendum approving this subpart, to determine whether egg producers favor the termination or suspension of this subpart, and the Secretary shall suspend or terminate such subpart at the end of 6 months after he determines that suspension or termination of the subpart is approved or favored by a majority of the egg producers voting in such referendum who, during a representative period determined by the Secretary, have been engaged in the production of commercial eggs, and who produced more than 50 percent of the volume of eggs produced by the egg producers voting in the referendum.

§ 1230.358 Proceedings after termination.

(a) Upon the termination of this subpart the Board shall recommend not more than six of its members to the Secretary to serve as trustees for the purpose of liquidating the affairs of the Board. Such persons, upon designation by the Secretary, shall become trustees of all the funds and property then in the possession or under control of the Board, including claims for any funds unpaid or property not delivered or any other claim existing at the time of such termination.

(b) The said trustees shall: (1) continue in such capacity until discharged by the Secretary, (2) carry out the obligations of the Board under any contracts or agreements entered into by it pursuant to § 1230.336, (3) from time to time account for all receipts and disbursements and deliver all property on hand, together with all books and records of the Board and of the trustees, to such person as the Secretary may direct, and (4) upon the request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all of the funds, property, and claims vested in the Board or the trustees pursuant to this subpart.

(c) Any person to whom funds, property, or claims have been transferred or delivered pursuant to this subpart shall be subject to the same obligation imposed upon the Board and upon the trustees.

(d) Any residual funds not required to defray the necessary expenses of liquidation shall be turned over to the Secretary to be disposed of, to the extent practicable, in the interest of continuing one or more of the research or promotion programs hitherto authorized.

§ 1230.359 Effect of termination or amendment.

Unless otherwise expressly provided by the Secretary, the termination of this subpart or of any regulation issued pursuant hereto, or the issuance of any amendment to either thereof, shall not:

(a) Affect or waive any right, duty, obligation, or liability which shall have risen or which may hereafter arise in connection with any provision of this subpart or any regulation issued thereunder;

(b) Release or extinguish any violation of this subpart or any regulation issued hereunder; or

(c) Affect or impair any rights or remedies of the United States, or of the Secretary, or of any person, with respect to any such violation.

§ 1230.360 Personal liability.

No member or alternate member of the Board shall be held personally responsible either individually or jointly with others, in any way whatsoever, to any person for errors in judgment, mistakes, or other acts, either of commission or omission, as such member or alternate, except for acts of dishonesty, or willful misconduct.

§ 1230.361 Right of the Secretary.

All fiscal matters, programs or projects, rules or regulations, reports, or other substantive action proposed and prepared by the Board shall be submitted to the Secretary for his approval.

§ 1230.362 Amendments.

Amendments to this subpart may be proposed, from time to time, by the Board, or by an organization certified pursuant to section 16 of the act, or by any interested person affected by the provisions of the act, including the Secretary.

§ 1230.363 Separability.

If any provision of this subpart is declared invalid or the applicability thereof to any person or circumstances is held invalid, the validity of the remainder of this subpart of the applicability thereof to other persons or circumstances shall not be affected thereby.

Signed at Washington, D.C., on December 17, 1975.

RICHARD L. FELTNER,
Assistant Secretary.

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

REORGANIZATION, CONSOLIDATION AND REPUBLICATION

Notice is hereby given that the Farmers Home Administration (FmHA) in the administration of its rules and regulations as authorized by law and first published as former Chapter III (Parts 300–391) of Title 6 and transferred to Title 7, Chapter XVIII with parts redesignated respectively as Parts 1800–1891 at 31 FR14109, dated November 4, 1966, is reorganizing and consolidating related regulations under these Parts. The intent of FmHA is to transfer and redesignate those Parts and Subparts (that are not retained in Part 1800) that are revised and/or consolidated into new Parts 1900–1999 and 2000–2999 established with publication of this notice. FmHA will publish the transfers and redesignations of its programs and administrative regulations in the FEDERAL REGISTER from time to time under its new procedural reorganization and consolidation plan.

Dated: December 15, 1975.

JOSEPH R. HANSON,
Acting Administrator,
Farmers Home Administration.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 213—OIL IMPORT REGULATIONS

Sale of Oil Import Licenses

On August 5, 1975, the Federal Energy Administration (FEA) issued proposed technical amendments to the Oil Import Regulations (40 FR 33474, August 8, 1975). One of these proposed amendments, intended to permit prior tariff payments to be deducted from fee payments, was implemented (40 FR 40143, September 2, 1975). FEA has now determined that another of the proposed amendments, dealing with the sale of oil import licenses subject to FEA approval, should be implemented with certain modifications.

Background. When the Mandatory Oil Import Program was implemented in 1959, one of its objectives was to provide equity of feedstock cost for the inland refiner relative to the coastal refiner. Since imported oil was much cheaper than domestic oil, this equity was provided by giving the inland refiner import rights under the program. However, if the inland refiner was not in a position to import and process foreign crude, a mechanism was needed whereby the inland refiner could realize the benefits of the import rights earned under the program.

Accordingly, the regulations permitted exchange of foreign oil for domestic, but only on the condition that the domestic oil received in the exchange would be processed in the licensee's refinery. This restriction was designed, in part, to discourage participation in the program by speculators who might attempt to manipulate the value of the import rights.

However, such exchanges proved difficult because many inland refiners did not have the resources to import foreign oil, and not all coastal refiners controlled domestic crude which could be delivered in exchange for foreign feedstock. In order to facilitate the exchanges, the "ticket" exchange evolved. In this transaction, an inland refiner sold oil to a coastal refiner, and purchased imported oil from him. The inland refiner then imported the oil purchased. After importation, he swapped the imported oil back to the coastal refiner for the oil which he originally sold.

Although there is no longer any opportunity to obtain inexpensive foreign oil, the ticket exchange has benefitted the allocation holder by allowing him to obtain oil for his refinery and to realize the value of his fee-exempt allocation, without making other import arrangements which would not be economically or physically practicable. Thus, such transfers have enabled the benefits of the program to be utilized by the persons for whom they were intended, and have contributed to the viability of small, inland refiners. In all cases, the exchanges have been required to be reported in advance to the Director of Oil Imports. The regulations issued today are intended to continue such benefits, but, by permitting the direct sale of licenses, to eliminate much of the cumbersome paperwork that has heretofore charcterized transfers of this sort.

The regulations providing for sale of licenses. In accordance with the foregoing, § 213.22 is amended to provide that persons holding fee-exempt allocations under §§ 213.9, 213.10, 213.11, 213.12, 213.13, 213.29, or 213.30, or persons who own or operate independent refineries, a petrochemical plant or petrochemical capacity, to whom allocations are made under Section 5 of Proclamation No. 3279, as amended, may sell their licenses upon approval by the Director of Oil Imports of an application for that purpose. FEA is presently preparing the appropriate application forms, which shall be required to be certified by both parties. It should be noted that in accordance with the policy of the Mandatory Oil Import Program against license speculation, the licenses may only be sold to persons who own or operate a refinery, petrochemical plant, or petrochemical capacity for their use. Furthermore, each license sold shall be subject to § 213.22 (a), which requires that "each person who imports crude oil or unfinished oil under a license issued pursuant to [the affected sections] must process the oils so imported in his own refinery, petrochemical plant, or petrochemical capacity."

This amendment differs from the proposal, in that § 213.22 would have been amended by eliminating the current procedures for the exchange of imported and domestic oil, and by substituting therefor a procedure facilitating the sale of licenses. After evaluating the proposal in the light of public comments, FEA has determined to adopt the procedure for sale of licenses but also retain current exchange procedures. This has been done in order to provide maximum flexibility for the affected importers, some of whom have long-standing exchange relationships. In addition, the sale procedure itself has been modified by eliminating its application to licenses issued under § 213.15 (Allocations of residual fuel oil—District I). Upon further consideration, FEA has determined that the initial purpose of issuing fee-exempt licenses to importers of residual fuel oil, was to provide economic benefits to the actual importer. If an importer is unable to utilize his license in the full amount of his fee-exempt allocation, its sale would be incompatible with this purpose. There is no analogous group to the inland refiners in the case of residual fuel oil imports.

The inability to sell a license for residual fuel oil also does not cause the license holder significant inconvenience. This is because a District I residual fuel oil importer can sell the oil itself for use in District I, while imported crude oil must be refined in the importer's own refinery or exchanged for domestic crude that must be so refined. The holder of such a license wishing to refine the oil or exchange it, can be saved considerable inconvenience where his license is salable. Furthermore, and in accordance with this rationale, the proposal was modified by eliminating its application to allocations issued by the Office of Exceptions and Appeals, except in the case of allocations made to persons who own or operate independent refineries, a petrochemical plant or petrochemical capacity. Those sections of the regulations which are affected by the amended § 213.22, and which restrict the sale or exchange of licenses issued thereunder, have been amended to permit such transactions when carried out in accordance with the procedures of § 213.22.

The remaining proposed amendment, which would authorize exporters to receive applicable refunds irrespective of whether such exporters were also the importers of the record is still being evaluated.

(Federal Energy Administration Act of 1974, Pub. L. 93275; E.O. 11790, 39 FR 23185, Trade Expansion Act of 1962, Pub. L. 87–794, as amended; Proclamation No. 3279, 24 FR 1781, as amended by Proclamation No. 4210, 38 FR 9645, Proclamation No. 4227, 38 FR 16195, Proclamation No. 4317, 38 FR 35103, Proclamation No. 4341, 40 FR 3956, Proclamation No. 4355, 40 FR 10437, Proclamation No. 4370, 40 FR 19421, and Proclamation No. 4377, 40 FR 23491).

In consideration of the foregoing, Part 213 of Chapter II, Title 10 of the Code of Federal Regulations is amended as set forth below effective immediately.

Issued in Washington, D.C., December 17, 1975.

MICHAEL F. BUTLER,
General Counsel,
Federal Energy Administration.

§§ 213.9, 213.10, 213.11, 213.13, 213.29, and 213.30 [Amended]

1. Section 213.9 is amended in paragraph (d), Section 213.10 is amended in paragraph (i), Section 213.11 is amended in paragraph (j), Section 213.13 is amended in paragraph (d), Section 213.29 is amended in paragraph (f), and Section 213.30 is amended in paragraph (h), by replacing the period [.] with a comma [,], and by adding the words "except in accordance with § 213.22."

2. Section 213.12 is amended in paragraph (d) to read as follows:

§ 213.12 Allocations; Refiners; Districts I–IV and the Virgin Islands.

. . . . . .

(d) No allocation made pursuant to this section may be sold, assigned, or otherwise transferred, except in accordance with § 213.22, and no license issued

V401246 DEC 22 75 XUM

under such allocation shall permit the importation of Canadian imports as defined in section 11(j) of Proclamation No. 3279, as amended, except as may be authorized by this section.

. . . . . .

3. Section 213.22 is amended in paragraph (b)(2) and by adding paragraph (d) to read as follows:

§ 213.22 Use of imported crude oil and unfinished oils.

. . . . . .

(b) . . .

(2) A proposed agreement for each exchange must be reported to the Director before any action involved in the exchange is taken, and all such exchanges shall be reported in accordance with § 213.23(b).

. . . . . .

(d) Subject to paragraph (a), persons to whom allocations are made under §§ 213.9, 213.10, 213.11, 213.12, 213.13, 213.29, or 213.30, or persons who own or operate an independent refinery, a petrochemical plant or petrochemical capacity, to whom allocations are made under Section 5 of Proclamation No. 3279, as amended, may, upon approval by the Director of an application for this purpose, sell the licenses issued pursuant thereto to a person who owns or operates a refinery, petrochemical plant, or petrochemical capacity for his use. Application for sale may be made before or after issuance of a license. Where an application is made for the sale of a license which has previously been issued, such license shall be returned to the Director with the application. Applications for sale shall be signed by both parties to the transaction and shall be subject to the provisions of Section 1001 of Title 18 of the United States Code. Each party shall certify through an appropriate person that the application was duly signed for and in behalf of said party, and by a person within whose scope of authority it is to transact such a sale. The purchaser of the license shall, in accordance with § 213.35, make payment or post bond in the amount of the outstanding supplemental fee liability of the license prior to the completion of the sale. These parties to the sale shall be solely responsible for determining the sale price of the licenses in question and for settling the costs thereof.

[FR Doc.75-34534 Filed 12-18-75;10:13 am]

Title 12—Banks and Banking

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

[No. 75-1145]

PART 545—OPERATIONS

Satellite Offices

DECEMBER 15, 1975.

The following summary of the amendments adopted by this Resolution is included for the reader's convenience and is subject to the full explanation in the preamble and to the specific provisions in the regulations.

I. *Proposed Regulations.* The regulations concerning satellite offices in effect prior to the effective date of this Resolution would have been changed by:

A. Deleting the limitations concerning the following:

(1) the number of applications which the same association may file in any 12-month period (the limitation was 2);

(2) the number of satellite offices which the same association may operate at any one time (the limitation was 5); and

(3) the maximum operating period which will be approved as to an initial application (the limitation was 5 years as to an initial application; a renewal application was approvable without a time limit). The Board proposed also to delete any limitation on the maximum operating period as to all applications approved by the Board prior to the date of this final regulation and to provide that such approvals shall be deemed to have been made without a time limit on the future operation of such satellite offices. However, a future approval of a particular application could specify a time limit.

B. Increasing the permissible maximum floor space per office from 500 to 1000 square feet as to any satellite office.

C. Clarifying that the "primary service area" of an applicant would be determined as of the time of the filing of the application for permission to establish the new facility.

II. *Final Regulations.* The same as the proposal, plus clarifying § 545.14–5(c)(6) and conforming this section to present practice.

III. *Reason for these Amendments.* Remove restrictions which are not needed at this time.

The Federal Home Loan Bank Board, by Resolution No. 75–738, dated August 6, 1975, proposed to amend § 545.14–5 of the Rules and Regulations for the Federal Savings and Loan System (12 CFR 545.14–5) relating to satellite offices for the purpose of removing certain restrictions. Notice of such proposed rulemaking was duly published in the FEDERAL REGISTER on August 14, 1975 (40 FR 34162) with an invitation for interested persons to submit written comments by September 16, 1975.

On the basis of its consideration of all relevant material presented by interested persons and otherwise available, the Board hereby amends § 545.14–5 by (1) rescinding subdivisions (c)(5) and (g)(5) thereof and (2) revising subdivisions (a), (c)(1)(i), (c)(4), (c)(6), (g)(2), and the last three sentences of subdivision (g) of said section to read as set forth below, effective December 22, 1975.

Since these amendments relieve restrictions, clarify provisions or conform requirements to present practice, and, in the opinion of the Board, it is in the public interest that these amendments become effective without delay, the Board hereby finds that further notice and public procedure are unnecesary under the provisions of 12 CFR 508.11 and 5 U.S.C. 553(b); and since publication of said amendments for the 30-day period specified in 12 CFR 508.14 and 553(d) prior to the effective date of said amendments would, in the opinion of the Board, likewise be unnecessary for the same reasons, the Board hereby provides that said amendments shall become effective as hereinbefore set forth.

The regulations adopted by this Resolution are the same as the proposed regulations published in the FEDERAL REGISTER on August 14, 1975, except that (1) the first sentence of § 545.14–5(c)(6) has been revised to make it clear that a satellite office must be both within the primary service area and 5 miles of the office of which it is a satellite and (2) the last sentence of § 541.14–5(c)(6) has been changed by substituting the word "established" for the word "located" and by deleting the phrase "unless such office is to be a satellite of a branch office located outside of such State." It is the practice of the Board not to approve establishment by a Federal association of a satellite outside the State where its home office is located.

As to this Resolution's increase from 500 to 1,000 square feet in the floor space limitation regarding satellite offices, the new 1,000 square foot limitation is retroactive, i.e., the square footage of an existing satellite office may be increased to 1,000 square feet without further Board approval, even though there was a regulatory 500-square foot limitation at the time that the Board approved the establishment of such satellite office.

Section 545.14–5 is amended as set forth below.

§ 545.14–5 Satellite office.

(a) *Nature of a satellite office.* An office of a Federal association which is not its home office or a branch office approved pursuant to § 545.14 shall be deemed to be a satellite office if it meets the requirements of a satellite office as described in this section and if it is a satellite of the association's home office or a branch office in that it is located in the primary service area of such home office or branch office, as determined by the Board or its Supervisory Agent as of the time of the filing of the application for permission to establish a satellite office. Any business of a Federal association, as authorized by the association's board of directors, may be transacted at a satellite office.

. . . . . .

(c) *Specific provisions.* Each application for permission to establish a satellite office will be considered or processed pursuant to the provisions of this section. Approval of such an application pursuant to this section will be subject to the following provisions and any other conditions, requirements, and limitations the Board may specify in a particular case:

(1) A satellite office may be, but is not required to be, located within premises principally occupied by a retail sales establishment or any other business organization. A satellite office shall be operated in conformity with the following physical requirements:

(i) The satellite office shall not occupy more than 1,000 square feet of floor space; and

. . . . . .

(4) Except as may be otherwise prescribed by the Board at the time of approval, an approved satellite office may operate without limitation as to time. Any satellite office approved prior to December 22, 1975, shall be deemed to have been approved without a time limit on its operation and may operate or continue to operate without limitation as to time.

(5) [Rescinded, eff. 12–22–75.]

(6) A satellite office must be located within (i) the primary service area and (ii) five miles of the Federal association's home or branch office of which it is a satellite. No satellite office may be established outside of the State in which the Federal association's home office is located.

. . . . . .

(g) *Approval by Supervisory Agent.* The Supervisory Agent is authorized to approve, on behalf of the Board, an application for permission to establish a satellite office if the following conditions have been met:

. . . . . .

(2) The Supervisory Agent is of the opinion that the satellite office will be located both within five miles of, and within the primary service area of, an existing branch office or the home office of the applicant association;

. . . . . .

(5) [Rescinded, eff. 12–22–75] and

. . . . . .

The Supervisory Agent shall forward to the Board for its consideration, together with his recommendation, any application which does not meet the requirements of this paragraph. In addition, the Supervisory Agent shall forward to the Board an application, which, in his opinion, should be approved with a time limit on the future operation of the satellite office, together with his recommendation as to the period for which the application should be approved. The Supervisory Agent is not required, in approving an application under this section, to obtain assurance that the applicable requirements of paragraphs (c)(1)(i) and (ii) of this section will be met, since such requirements are continuing requirements to be observed by the Federal association.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

PART 107—SMALL BUSINESS INVESTMENT COMPANIES

Overline Limitation; Correction

In the FEDERAL REGISTER published on November 7, 1975, (38 F.R. 30836) Revision 5 to Part 107, Small Business Investment Companies, appeared as Part III of that issue. Section 107.301(d) contained a typographical error; instead of "for" in the third line thereof, the word "or" appeared.

As corrected, § 107.301(d) should read:

§ 107.301 General.

. . . . . .

(d) *Overline limitation.* Without written SBA approval, the aggregate amount of funds disbursed for securities acquired (exclusive of write-down), and of commitments and guaranties issued for a Small Concern (including affiliated concerns as defined in § 121.3–2(a) of this chapter) shall not exceed twenty percent of Licensee's Private Capital: *Provided, however,* That for section 301(d) Licensees the limitation shall be thirty percent.

. . . . . .

(Catalog of Federal Domestic Assistance Program 59.011)

Dated: December 11, 1975.

LOUIS F. LAUN,
Acting Administrator.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75–GL–25; Amdt. 39–2472]

PART 39—AIRWORTHINESS DIRECTIVES

Enstrom Models F–28, F–28A and 280

Pursuant to the authority delegated to me by the Administrator (31 FR 13697 and 14 CFR 11.89), an Airworthiness Directive was adopted November 28, 1975, and made effective immediately as to all known operators of Enstrom Helicopters. That directive requires a visual inspection with an 8X (eight power) or greater magnifying glass at the shaft section just below the main rotor hub prior to next flight after receipt of letter, and within every ten hours in service thereafter. That Airworthiness Directive was considered to constitute an initial action pending further investigation.

A review of the Airworthiness Directive issued November 28, 1975, indicated that a more detailed inspection of the main rotor shaft is necessary. Consequently, it was determined that this Airworthiness Directive should also require that a further detailed inspection of the shaft be made. If any part is found to be cracked or contain defects, it must be removed from service.

Since it was found that immediate action was required, notice and public procedure thereon was impractical and contrary to public interest and good cause existed for making that Airworthiness Directive effective immediately as to all known operators of the affected Enstrom Model Helicopters by individual airmail letters November 28, 1975. These conditions still exist and the Airworthiness Directive, amended as noted above, is hereby published in the FEDERAL REGISTER as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

ENSTROM. Applies to Models F–28, F–28A and 280 Helicopters certificated in all categories.

Compliance required as indicated:

To detect cracks which may develop into failure of the Main Rotor Shafts (Enstrom Part No. 28–13104) accomplish the following:

A. Before further flight, unless previously accomplished and within each 50 hours time in service thereafter, inspect the main rotor gearbox shaft for cracks in the area of the radius beneath the rotor hub shoulder using a 3-step dye-penetrant method.

B. Within 10 hours time in service after the initial dye-penetrant inspection and thereafter at intervals not to exceed 10 hours time in service visually check the main rotor gearbox shaft for cracks in the area of the radius beneath the rotor hub shoulder using an eight power or greater magnifying glass. Particular attention should be given to the junction between said radius and the upper tapered outside diameter of the shaft, and to the possible presence of tool marks circumferentially disposed around the shaft which may serve as stress raisers for the initiation of metal fatigue. Evidence of damage must be confirmed by the 3-step dye-penetrant method used in A.

C. Any helicopter which develops unusual once-per-rotor-revolution vibration, which cannot be ascribed to blade misadjustment or other tangible causes, must be immediately checked in accordance with Paragraph B above. Such vibrations serve as warning of imminent failure.

D. Any shaft found to contain cracks or other evidence of damage must be removed from service immediately and replaced with an airworthy shaft of the same part number or later FAA approved part number.

E. A service record (log) shall be maintained for the affected helicopters delineating Main Rotor Shafts which are inspected, removed from service, and replaced in accordance with this Airworthiness Directive.

F. Only those checks which do not require the dye-penetrant inspection constitute preventative maintenance and may be performed by persons authorized to perform preventive maintenance under FAR 43.

G. Upon request of the operator, a Federal Aviation Administration Maintenance Inspector, subject to prior approval of the Chief, Engineering and Manufacturing Branch, Federal Aviation Administration, Great Lakes Region, may adjust the repetitive inspection intervals specified in this Airworthiness Directive, if the request contains satisfactory substantiating data to justify the adjustment for the operator.

Enstrom Service Note No. 0031 also pertains to this subject.

This amendment is effective December 26, 1975, and portions of it were effective November 28, 1975 for all recipients of the airmail letter dated November 28, 1975.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Des Plaines, Illinois on December 12, 1975.

R. O. ZIEGLER,
Acting Director,
Great Lakes Region.

[FR Doc.75-34337 Filed 12-19-75;8:45 am]

V40246 DEC 22 75 XUM

[Docket No. 75–EA–61; Amdt. 39–2470]

PART 39—AIRWORTHINESS DIRECTIVE

Lycoming Aircraft Engines

The Federal Aviation Administration is amending § 39.13 of Part 39 of the Federal Aviation Regulations so as to revise and amend AD 75–08–09.

Since the promulgation of the airworthiness directive it has been determined that there is no justification for distinguishing between non-helicopter installed engines, which distinction had permitted higher inspection intervals. This amendment deletes such distinction and revises the airworthiness directive with minor editorial changes. The same air safety considerations exist for this amendment as for AD 75–08–09.

In view of the foregoing and because the deficiency is one which affects air safety, notice and public procedure hereon are impractical and good cause exists for making the amendment effective in less than 30 days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator, 14 CFR 11.89 (31 FR 13697) § 39.13 of Part 39 of the Federal Aviation Regulations is amended by revising and amending AD 75–08–09 as follows:

LYCOMING—Applies to all the following models and series Lycoming engines listed below:

Applicable models	Applicable serial Nos.	Excepted serial Nos.
O-235 series	L-11268-15 through L-12098-15 and L-12100-15.	L-12099-15, L-12101-15 and up.
O-290 series	Any engine modified in accordance with Lycoming service instruction No. 1272.	Any engine not modified in accordance with Lycoming service instruction No. 1272.
O-320 series	L-33329-27A through L-41054-27A.	L-41055-27A and up; O-321-E2D series: L-41029-27A and up; O-320-E3D series: L-41017-27A, L-41021-27A and up.
O-320-B and O-320-D	L-6909-39A through L-6971-39A.	L-6972-39A and up.
IO-320-B1A	L-4953-55A through 5270-55A.	L-5271-55A and up.
LIO-320 series	L-292-66A through L-296-66A.	L-297-66A and up.
O-360, HO-360-B1A, HO-360-B1B series.	L-17440-36A through L-19846-36A and L-17427.	L-19817-36A, L-19818-36A, L-19847-36A and up.
VO-360, IVO-360 series	Any engine modified in accordance with Lycoming service instruction 1272.	Any engine not modified in accordance with Lycoming service instruction 1272.
HIO-360-A1A, HIO-360-B1A.	L-10179-51A through L-13351-51A.	L-12557-51A, L-12727-51A, L-12853-51A, L-12890-51A, L-13513-51A and up.
HIO-360-D1A	L-10179-51A through L-13512-51A.	L-12882-51A through L-12894-51A, L-12919-51A, L-12966-51A through L-12968-51A, L-12979-51A, L-13034-51A through L-13040-51A, L-13124-51A through L-13128-51A, L-13170-51A through L-13174-51A, L-13257-51A through L-13262-51A, L-13280-51A through L-13283-51A, L-13513-51A and up.
HIO-360-C1A	L-10179-51A through L-13372-51A.	L-11578-51A, L-12193-51A, L-12445-51A, L-12763-51A, L-12845-51A, L-12847-51A through L-12849-51A, L-12895-51A, L-12897-51A, L-12898-51A, L-12911-51A, L-12913-51A, L-12914-51A through L-12916-51A, L-12918-51A, L-12969-51A through L-12972-51A, L-13041-51A, L-13042-51A, L-13119-51A through L-13123-51A, L-13142-51A through L-13148-51A, L-13271-51A through L-13275-51A, L-13373-51A and up.
HIO-360-C1B	L-10179-51A through L-13551-51A.	L-13352-51A and up.
AEIO-360 series	L-10179-51A through L-13616-51A.	L-13617-51A and up.
IO-360 series	L-10146-51A through L-13540-51A.	L-13541-51A and up.
IO-360-A1B6D	L-10115-51A through L-13529-51A	L-13530-51A and up.
AIO-360 series	L-171-63A through L-206-63A.	L-209-63A and up.
LIO-360 series	L-634-67A through L-1059-67A.	L-1060-67A and up.
TIO-360 series	L-116-64A through L-145-64A.	L-146-64A and up.
O-540 series except O-540-H1A5D, O-540-H1B5D, O-540-H2A5D, O-540-H2B5D series.	L-15327-40A through L-17105-40A.	L-17068-40A, L-17103-40A, L-17105-40A and up.
IO-540 series except IO-540-K1A5D, IO-540-K1B5D, IO-540-K1E5D, IO-540-K1F5D, IO-540-M2A5D, IO-540-T1A5, IO-540-S1A5, IO-540-T4A5D series.	L-10536-48 through L-12856-48.	L-10623-48, L-10624-48, L-10813-48, L-10814-48, L-11246-48, L-11247-48, L-11266-48, L-11267-48, L-12144-48 through L-12147-48, L-12231-48, L-12287-48 through L-12298-48, L-12371-48 through L-12378-48, L-12463-48, L-12464-48, L-12636-48, L-12637-48, L-12684-48, L-12685-48, L-12711-48 through L-12713-48, L-12725-48 through L-12729-48, L-12734-48 through L-12739-48, L-12744-48 through L-12753-48, L-12806-48, L-12821-48 through L-12823-48, L-12840-48 through L-12844-48, L-12859-48 through L-12868-48, L-12888-48, L-12897-48 and up.

Also applies to the same models and series engines overhauled/remanufactured by Lycoming between December 18, 1972 and December 10, 1974 and to any other engine in which the provisions of Lycoming Service Instruction No. 1272 have been incorporated.

Compliance required as indicated.

1. For the Lycoming O-360-C2D, HO-360, HIO-360, VO-360 and IVO-360 series engines, compliance is required within the next 10 hours in service after the effective date of this AD or before the engines have accumulated 400 hours in service, whichever occurs later, unless already accomplished.

2. For the O-235, O-290, O-320, IO-320-B1A, LIO-320, O-360, IO-360, AEIO-360, AIO-360, LIO-360, TIO-360, O-540 and IO-540 series engines compliance is required within the next 50 hours in service after the effective date of this AD or before the engines have accumulated 400 hours in service, whichever occurs later, unless already accomplished.

To prevent oil pump failures, inspect, replace and assemble the oil pump drive shaft and drive impeller in accordance with the inspection and procedure paragraphs of Lycoming Service Bulletin No. 381B or No. 385C or later revision approved by Chief, Engineering and Manufacturing Branch, FAA, Eastern Region.

The manufacturer's inspections and replacement procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer, may obtain copies upon request to Avco Lycoming Division Service Department, Williamsport, Pennsylvania 17701. These documents may also be examined at the Engineering and Manufacturing Branch, Federal Aviation Administration, Eastern Region, Federal Building, John F. Kennedy International Airport, Jamaica, New York 11430. A historical file on this AD which includes the incorporated material in full is maintained by the FAA at its Eastern Region Headquarters.

This amendment is effective December 24, 1975.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Jamaica, N.Y., on December 11, 1975.

L. J. CARDINALI,
Acting Director,
Eastern Region.

[FR Doc.75-34338 Filed 12-19-75;8:45 am]

[Docket No. 14869; Amdt. 39-2479]

PART 39—AIRWORTHINESS DIRECTIVE

Pilatus Aircraft Ltd. and Fairchild Hiller Model PC–6 Airplanes

A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring repetitive inspections, interim repair and replacement of the rudder bar, as necessary, in Pilatus Model PC–6 airplanes manufactured by Pilatus Aircraft Ltd. and Fairchild Hiller was published in the Federal Register on August 5, 1975, (40 FR 32838).

Interested persons have been afforded the opportunity to participate in the making of the amendment. No objections were received. However, an editorial change of a non-substantive nature has been made in paragraph (a) of the compliance section to clarify the reference to part numbers.

This amendment is made under the authority of sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (14 CFR 11.80), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

PILATUS AIRCRAFT LTD. AND FAIRCHILD HILLER. Applies to Pilatus Model PC–6 airplanes (all variants), serial numbers 338 through 623, manufactured by Pilatus Aircraft Ltd. and serial numbers 2001 through 2067, manufactured by Fairchild Hiller.

Compliance is required as indicated.

To prevent a fatigue failure of the pilot and copilot rudder bar junction welded seam, accomplish the following:

(a) Within the next 10 hours' time in service after the effective date of this AD, unless already accomplished, visually inspect the junction fillet welds of the pilot and copilot rudder bars (P/Ns 6232.145, 6232.241, and 116.35.06.004) and determine whether the weld covers the full 360° of the rudder bar tube circumference or only 250° of the rudder bar tube circumference. If the weld is determined to be of the improved 360° design, no further action is required by this AD.

(b) If the fillet weld is found to be of the non-continuous (250°) weld design, visually inspect the rudder bar junction weld for cracks by applying magnaflux or by the dye check method in accordance with paragraph 2.1 of Pilatus Aircraft Ltd. Service Bulletin No. 120, dated January 1973, or an FAA-approved equivalent.

(c) If no cracks are found during the inspection required by paragraph (b) of this AD, within the next 100 hours' time in service and thereafter at intervals not to exceed 100 hours' time in service, visually inspect the rudder bar junction weld for cracks using a 10 power magnifying glass in accordance with paragraph 2.2 of Pilatus Aircraft Ltd. Service Bulletin No. 120, dated January 1973, or an FAA-approved equivalent.

(d) If cracks are found during an inspection required by paragraphs (b) or (c) of this AD, either repair the rudder bar junction weld in accordance with paragraph 2.3 of Pilatus Aircraft Ltd. Service Bulletin No. 120, dated January 1973, or an FAA-approved equivalent, or replace the rudder bars with new rudder bars of the same part number but with improved 360° weld design.

(e) Within the next 100 hours' time in service after accomplishing the repair described in paragraph (d) of this AD, or, if no cracks were found during the inspections required by paragraphs (b) or (c) of this AD, within the next 300 hours' time in service after complying with the inspection requirements of paragraph (b) of this AD, replace the rudder bars, P/N 6232.145, 6232.241, or 116.35.06.004, with new rudder bars of the same part number incorporating the continuous full 360° fillet weld around the rudder bar circumference.

This amendment becomes effective on January 21, 1976.

Issued in Washington, D.C., on December 12, 1975.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

[FR Doc.75-34335 Filed 12-19-75;8:45 am]

[Docket No. 75–EA–81; Amdt. 39–2471]

PART 39—AIRWORTHINESS DIRECTIVES

Piper Aircraft

The Federal Aviation Administration is amending § 39.13 of Part 39 of the Federal Aviation Regulations so as to issue an airworthiness directive applicable to Piper PA–31 type airplanes.

There has been a report that the landing gear selector cable attachment pin assembly on a PA–31 type aircraft had become disengaged, resulting in a wheels-up landing. Since this deficiency can exist or develop in airplanes of similar type design, an airworthiness directive is being issued which will require the safetying of the assembly with wire.

In view of the foregoing and because the deficiency is one which affects air safety, notice and public procedure hereon are impractical and good cause exists for making the amendment effective in less than 30 days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator, 14 CFR 11.89 (31 FR 13697) § 39.13 of Part 39 of the Federal Aviation Regulations is amended by issuing a new airworthiness directive as follows:

PIPER AIRCRAFT CORPORATION. Applies to PA–31–310 and PA–31–325 airplanes, S/Ns 31–7300950 to 31–7612017 inclusive; PA–31–350 airplanes, S/Ns 31–7305048, 31–7305049, and 31–7305052 to 31–7650005 inclusive, certificated in all categories. Compliance required within the next 50 hours' time in service after the effective date of this AD, unless already accomplished. To prevent inadvertent disengagement of the landing gear selector cable attachment pin assembly, accomplish the alteration described in Piper Aircraft Corporation Service Bulletin No. 488, dated October 24, 1975, or an equivalent alteration approved by the Chief, Engineering and Manufacturing Branch, FAA Eastern Region.

This amendment is effective December 24, 1975.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c))).

Issued in Jamaica, N.Y., on December 11, 1975.

L. J. CARDINALI,
Acting Director,
Eastern Region.

[FR Doc.75-34339 Filed 12-19-75;8:45 am]

[Airspace Docket No. 75–GL–62]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

On page 47141 of the FEDERAL REGISTER dated October 8, 1975, the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Olivia, Minnesota.

Interested persons were given 30 days to submit written comments, suggestions or objections regarding the proposed amendment.

No objections have been received and the proposed amendment is hereby adopted without change and is set forth below.

This amendment shall be effective 0901 G.m.t., February 26, 1976.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655 (c)))

Issued in Des Plaines, Illinois on December 2, 1975.

R. O. ZIEGLER,
Acting Director,
Great Lakes Region.

In § 71.181 (40 FR 441), the following transition area is added:

OLIVIA, MINNESOTA

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Olivia Municipal Airport (latitude 44°46'44" N., longitude 95°01'58" W.); and within 2 miles each side of the 193° bearing from the airport extending from the 5-mile radius area to 6.5 miles south of the airport.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI–352]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for City of Melbourne, Florida

On September 12, 1974, in 39 FR 32886, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the City of Melbourne, Florida, as an eligible community and included Map Nos. H 120025 07 & 09, which indicate that Sugar Mill, Melbourne, Florida, as recorded in Deed Book 1457, Pages 362 and 363, in the office of the Clerk of the Circuit Court, Brevard County, Florida, is in its entirely within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the existing structures on the above mentioned property are not within the Special Flood Hazard Area. Accordingly, effective August 30, 1974, Map Nos. H 120025 07 & 09 are hereby corrected to reflect that the structures on the above property are not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: December 8, 1975.

HOWARD B. CLARK,
Acting Federal
Insurance Administrator.

[Docket No. FI–250]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Village of Arthur, Illinois

On April 25, 1974, in 39 FR 14602, the Federal Insurance Administrator pub-

V 40246 DEC 22 75 XUM

lished a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the Village of Arthur, Illinois, as an eligible community and included Map No. H 170520 01 which indicates that the property known as the Willoughby Implement Company, located in Section 24, Township 15 North, Range 6 East, Moultrie County, Illinois, as recorded in Book 1 of Plats, Page 301 in the office of the Recorder of Moultrie County, Illinois is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above property is not within the Special Flood Hazard Area. Accordingly, effective May 3, 1974, Map No. H 170520 01 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: December 8, 1975.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for City of Arvada, Colorado

On July 13, 1972, in 37 FR 13715, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the City of Arvada, Colorado, as an eligible community and included Map No. H 085072 04, which indicates that Lot 476, Alta Vista Addition, Arvada, Colorado, as recorded in Plat Book 14, Pages 18 and 19, in the office of the Clerk and Recorder of Jefferson County, Colorado, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above mentioned property is within Zone C, and is not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective May 1, 1971, Map No. H 085072 04 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: December 8, 1975.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI–822]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for City of Arvada, Colorado

On July 13, 1972, in 37 FR 13715, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the City of Arvada, Colorado, as an eligible community and included Map No. H 085072 05, which indicates that Lots 3 through 7, Arvada Park Subdivision, Arvada, Colorado, as recorded in Book 36, Page 51, in the office of the Clerk and Recorder of Jefferson County, Colorado, are in their entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that Lot 5 is within Zone C, and is not within the Special Flood Hazard Area. Lots 3, 4, 6, and 7, are within Zone B, and are not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective May 1, 1971, Map No. H 085072 05 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: December 10, 1975.

[Docket No. FI–201]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of Sweetwater, Tennessee

On February 19, 1974, in 39 F.R. 6054, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the City of Sweetwater, Tennessee as an eligible community and included Map No. H 470135 04 which indicates that a portion of the property at New Tennessee Highway 68 and Old Athens Road, Sweetwater, Tennessee, as recorded in Warranty Deed Book 128, Page 396 in the office of the Register of Monroe County, Tennessee, which can be described as follows:

Beginning at a point on the northerly side of New Tennessee Highway No. 68, said beginning point being 110 feet in a northeasterly direction from the center line of the new highway, and being at the southeasterly corner of what is known as the business building property, and running thence, parallel with the highway, North 57°-35' West 833.4 feet to an iron pin near the intersection of the old Athens Road; thence, running North 5°17' West 111.2 feet to a corner on the easterly side of the old Athens Road; thence running, with the old Athens Road, North 34°42' East 112.2 feet to a corner; thence running South 57°35' East 595.1 feet to a corner; thence running North 32°-25' East 20 feet to a corner; thence running South 45°3' East 337.1 feet to a corner; thence running South 40°4' West approximately 130 feet to the point of beginning.

is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above property is not within the Special Flood Hazard Area. Accordingly, effective February 15, 1974, Map No. H 470135 04 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: December 10, 1975.

FRANCIS REILLY,
Acting Federal Insurance Administrator.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the Town of Winslow, Maine

On March 27, 1974, in 39 FR 11262, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the Town of Winslow, Maine, as an eligible community and included Map No. H 230071 04 which indicates that the property located on the southerly side of Albion Road at Eames Road, Winslow, Maine, as recorded in Plan Book 38A, Page 17 in the office of the Registrar of Deeds of Kennebec County, Maine, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the existing house and barn on the above property are not within the Special Flood Hazard Area. Accordingly, effective March 22, 1974, Map No. H 230071 04 is hereby corrected to reflect that the existing house and barn on the above property are not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: December 8, 1975.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Bensalem Township, Pennsylvania

On April 11, 1974, in 39 FR 13152, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included Bensalem Township, Pennsylvania, as an eligible community and included Map Nos. H 420181 01 and 02 which indicate that a portion of Ben Salem Village of Franklin Park Limited, Bensalem Township, Bucks County, Pennsylvania, as recorded in Deed Book 2012, Page 469 in the office of the Recorder of Deeds of Bucks County, Pennsylvania, which can be described as follows:

Beginning at the intersection of the centerlines of Byberry Road and Newportville Road, situated in Bensalem Township, Bucks County, Pennsylvania, thence S 26°39' W, 383.59 feet to a point; thence S 63°21' E, 100.00 feet to a point; thence R=1069.69 feet, A=80.90 feet to a point; thence N 25°02'50" E, 143.83 feet to a point; thence S 74°49'70" E, 1583.49 feet to a point; thence S 63° E, approximately 42 feet to a point; thence S 3° W, approximately 126 feet to a point; thence S 70° E, approximately 64 feet to a point; thence S 17°30' E, approximately 107 feet to a point; thence S 45°30' W, approximately 22 feet to a point; thence S 88°30' W, approximately 130 feet to a point; thence S 76°30' W, approximately 75 feet to a point; thence S 17° E, approximately 48 feet to a point; thence S 84° E, approximately 84.5 feet to a point; thence S 67°30' E, approximately 54.5 feet to a point; thence S 82° E, approximately 44 feet to a point; thence S 9°33' E, 503.00 feet to a point; thence S 80°27' W, 200.00 feet to a point; thence S 61° W, 53.03 feet to a point; thence S 80°27' W, 400.00 feet to a point; thence N 9°33' W, 260.00 feet to a point; thence S 80°27' W, 400.00 feet to a point; thence N 83°10' W, 287.95 feet to a point; thence S 26°39' W, 150.00 feet to a point; thence N 63°21' W, 450.00 feet to a point; thence N 26°39' E, 670.00 feet to a point; thence N 63°21' W, 580.00 feet to a point; thence N 26°39' E, 176.60 feet to a point; thence N 63°21' W, 306.05 feet to a point; thence S 18°46' W, 200.67 feet to a point; thence N 62°52' W, 407.43 feet to a point; thence N 16°46' E, 309.35 feet to a point; thence S 72°51' E, 125.00 feet to a point; thence N 16°46' E, 225.00 feet to a point; thence S 72°51' E, 275.78 feet to a point; thence S 16°46' W, 201.43 feet to a point; thence S 63°21' E, 130.45 feet to a point; thence N 17°09' E, 222.85 feet to a point; thence S 72°51' E, 250.66 feet to the point of beginning,

is partially located within the Special Floor Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above property is not within the Special Floor Hazard Area. Accordingly, effective April 5, 1974, Map Nos. H 420181 01 and 02 are hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: December 8, 1975.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of Lawton, Oklahoma

On August 21, 1974, in 39 FR 30122, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the City of Lawton, Oklahoma, as an eligible community and included Map No. H 400049 01, as amended, H 400049 A 01, by 40 FR 8817, which indicates that Lots 20, 21, 27, and 43 through 45, Block 2; and Lots 1 through 3, Block 4; and Lots 4, 5, and 33 through 35, Block 5, Sherwood Addition Part Three, Lawton, Oklahoma, as recorded in Book 6, Page 33, in the office of the Clerk of Comanche County, Oklahoma, are in their entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above mentioned property is not within the Special Flood Hazard Area. Accordingly, effective February 21, 1975, Map No. H 400049 A 01 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: December 10, 1975.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of Gardner, Massachusetts

On September 12, 1974, in 39 FR 32894, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the City of Gardner, Massachusetts, as an eligible community and included Map Nos. H 250305 07 and 08, which indicate that land in Gardner, Massachusetts, as recorded in Book 4266, Page 407; Parcel 1 of Book 4375, Page 55; Parcel 1 of Book 4726, Page 127; Book 4982, Page 228; Book 4998, Page 347; Parcel 1 of Book 5320, Page 127; and Book 5360, Page 176, in the Worcester District Registry of Deeds, Massachusetts, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above maps in light of additional, recently acquired flood information, that the property as recorded in Parcel 1 of Book 4726, Page 127; Book 4982, Page 228; Book 4998, Page 347; and Parcel 1 of Book 5320, Page 127 is not within the Special Flood Hazard Area. The existing structures on the property as recorded in Book 4266, Page 407; Parcel 1 of Book 4375, Page 55; and Book 5360, Page 176, are not within the Special Flood Hazard Area. Accordingly, effective September 6, 1974, Map Nos. H 250305 07 and 08 are hereby corrected to reflect that the above property and structures are not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: December 8, 1975.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Anne Arundel County, Maryland

On November 29, 1974, in 39 FR 41504, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included Anne Arundel County, Maryland, as an eligible community and included Map No. H 240008 44 which indicates that Lots 34 and 35, Belvedere Beach on the Magothy, being 810 Riverview Avenue, Arnold, Anne Arundel County, Maryland, recorded as Plat No. 489 in Book No. 9, Folio 21 in the office of the Clerk of the Circuit Court of Anne Arundel County, Maryland, are in their entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the existing structure on the above property is not within the Special Flood Hazard Area. Accordingly, effective November 15, 1974, Map No. H 240008 44 is hereby corrected to reflect that the structure on the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

[Docket No. FI-817]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the Village of Palatine, Illinois

On February 20, 1973, in 38 FR 4669, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the Village of Palatine, Illinois, as an eligible community and included Map No. H 175170 02 which indicates that Lot 5, Block 2, Winston Park Northwest Unit No. 1, being 511 North Winston Drive, Palatine, Illinois, recorded as Document No. 23240662 in the office of the Recorder of Cook County, Illinois, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the structure on the above property is within Zone C, and not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective February 16, 1973, Map No. H 175170 02 is hereby corrected to reflect that the structure on the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: December 10, 1975.

[Docket No. FI-818]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Fairfax County, Virginia

On January 8, 1972, in 39 FR 281, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included Fairfax County, Virginia, as an eligible community and included Map No. H 515525 18 which indicates that Lot 218, Rolling Valley West Section 2, Fairfax County, Virginia, as recorded in Deed Book 3614, Page 234 in the office of the Clerk of the Court of Fairfax County, Virginia, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration,

after further technical review of the above map in light of additional, recently acquired flood information, that the above property is within Zone C, and not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective June 17, 1970, Map No. H 515525 18 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: December 8, 1975.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-819]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Fairfax County, Virginia

On January 8, 1972, in 39 FR 281, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included Fairfax County, Virginia, as an eligible community and included Map No. H 515525 19 which indicates that Lot 596, Rolling Valley Subdivision Section 7, being 7221 Hadlow Drive, Springfield, Fairfax County, Virginia, as recorded in Deed Book 3187, Page 369 in the office of the Clerk of the Court of Fairfax County, Virginia, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above property is within Zone C, and not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective June 17, 1970, Map No. H 515525 19 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: December 8, 1975.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-820]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Fairfax County, Virginia

On January 8, 1972, in 39 FR 281, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included Fairfax County, Virginia, as an eligible community and included Map No. H 515525 07 which indicates that Lot 20, Clark's Crossing Subdivision, being 9808 Peppermill Place, Centreville District, Fairfax County, Virginia, as recorded in Map Book 4051, Page 146 in the office of the Clerk of the Court of Fairfax County, Virginia, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above property is within Zone C, and not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective June 17, 1970, Map No. H 515525 07 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: December 8, 1975.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-821]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of Virginia Beach, Virginia

On October 3, 1970, in 35 FR 15442, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the City of Virginia Beach, Virginia, as an eligible community and included Map No. H 515531A 31 which indicates that Lot W of the Subdivision of Property of David L. Levine, Virginia Beach, Virginia, as recorded in Book 89, Page 30 in the office of the Clerk of the Circuit Court of Virginia Beach, Virginia, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that Wings A, B, and C, and Townhouse Units 1 through 5 of the above property, as shown on the Condominium Plat of Seagate Colony Phase I, Virginia Beach, Virginia, prepared by Mayne, Oseroff, Van Besien, Inc., of Arlington, Virginia, in October, 1973, are within Zone B, and not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective September 8, 1970, Map No. H 515531A 31 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: December 10, 1975.

FRANCIS V. REILLY,
Acting Federal Insurance Administrator.

[Docket No. FI-259]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the Village of Fremont, Wisconsin

On November 29, 1973, in 38 FR 32928, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the Village of Fremont, Wisconsin, as an eligible community and included Map No. H 550496 01, which indicates that land in Fremont, Wisconsin, as recorded in Volume 478, Pages 368 and 369, in the office of the Register of Deeds of Waupaca County, Wisconsin, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the existing structures on the above mentioned property are not within the Special Flood Hazard Area. Accordingly, effective November 30, 1973, Map No. H 550496 01 is

V401246 DEC 22 75 XUM

hereby corrected to reflect that the structures on the above property are not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: December 10, 1975.

FRANCIS REILLY,
Acting Federal Insurance Administrator.

Title 28—Judicial Administration

CHAPTER I—LAW ENFORCEMENT ASSISTANCE ADMINISTRATION, DEPARTMENT OF JUSTICE

PART 20—CRIMINAL JUSTICE INFORMATION RECORDS

Criminal History Records; Collection, Storage, and Dissemination of Information

This amends the regulations pertaining to the collection, storage and dissemination of criminal history record information by extending the date on which the State plan must be submitted. Further changes as proposed in 40 FR 49789 dated October 24, 1975, will be forthcoming at a later date.

Pursuant to the authority vested in the Law Enforcement Assistance Administration by sections 501 and 524 of the Omnibus Crime Control and Safe Streets Act of 1968, as amended by the Crime Control Act of 1973, Pub. L. 93-83, 87 Stat. 197 (42 U.S.C. 3701 *et seq.*) (Aug. 6, 1973), this amends Chapter I of Title 28 of the Code of Federal Regulations.

In § 20.21 the first sentence of the introductory text is amended as follows:

§ 20.21 Preparation and submission of a Criminal History Record Information Plan.

A plan shall be submitted to LEAA by each State on March 16, 1976, to set forth all operational procedures, except those contained in paragraph (f) of this section. • • •

JAMES MEGG,
Acting Administrator.

DECEMBER 16, 1975.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 471-2]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revision to the Virgin Islands Implementation Plan

On May 31, 1972 (37 FR 10905), pursuant to section 110 of the Clean Air Act, (42 U.S.C. 1857c-5(a)), and 40 CFR Part 51, the Administrator approved as part of the Virgin Islands implementation plan the control strategy for particulate matter. This control strategy was designed to provide for the attainment and maintenance of National Ambient Air Quality Standards for particulate matter by January 1975.

Included as part of the control strategy for particulate matter was section 204-23 of Chapter 9 of Title 12 of the Virgin Islands Code entitled, "Regulations Governing Emission of Particulate Matter." Paragraph (c)(2) of this section prohibits the use of any incinerator which is not a multiple chamber incinerator. After reviewing the adequacy of this paragraph as it pertains to the single chamber St. John Municipal Incinerator, it was determined that this unit should be exempted from compliance with this paragraph. Consequently, the Governor of the Virgin Islands, on July 9, 1975, submitted to EPA a proposed revision to the Virgin Islands Air Quality Control Implementation Plan. This proposed revision exempts the St. John Municipal Incinerator from the requirements of section 204-23, paragraph (c)(2) of the Virgin Islands Air Pollution Control Code.

The material submitted in support of the proposed plan revision includes the following:

(1) A notice of a public hearing which was held on April 23, 1975.

(2) A copy of the variance granted to the St. John Municipal Incinerator.

(3) A certification from the Assistant Director, Natural Resources Management, that a public hearing was held on the variance request on April 23, 1975.

(4) A summary of sulfur dioxide and particulate matter concentrations predicted to occur under varying atmospheric stabilities as a result of the variance granted to the St. John Municipal Incinerator.

It is the intention of the Virgin Islands to allow the operation of the incinerator until such time that land is obtained from the National Park Service for a sanitary landfill.

The control strategy analysis performed by the Virgin Islands shows that the maximum 24-hour sulfur dioxide and particulate matter concentrations are predicted to be 21 ug/m³ and 172 ug/m³, respectively. The Administrator's review of the proposed revision request determined that the control strategy analysis submitted by the Virgin Islands was erroneous in that it overpredicted the maximum 24-hour concentration for particulate matter. Analysis performed by the Administrator predicts a maximum 24-hour particulate matter concentration below the national secondary standard of 150 ug/m³. It was found that the assumptions used in the Virgin Islands calculations were unrealistically conservative and tended to overpredict ambient air concentrations.

Effective date. Due to the minor nature of this action and the insignificant effect on air quality on St. John, these revisions shall become effective December 22, 1975.

(42 U.S.C. 1857c-5 and 9)

Dated: December 15, 1975.

RUSSELL E. TRAIN,
Administrator,
Environmental Protection Agency.

Part 52 of Chapter 1, Title 40 Code of Federal Regulations is amended as follows:

1. Section 52.2720 is revised by amending paragraph (c)(3) as follows:

§ 52.2770 Identification of plans.

• • • • • •

(c) • • •

(3) February 12, 1974, April 10, 1975. July 9, 1975.

[FRL 471-6]

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Emission Monitoring Requirements and Revisions to Performance Testing Methods; Correction

In FR Doc. 75-26565 appearing at page 46250 in the FEDERAL REGISTER of October 6, 1975, the following changes should be made in Appendix B:

1. On page 46260, paragraph 4.3, line 24 is corrected to read as follows:

$\log(1-0_i) = (1_i/1_s)\log(1-0_s)$

2. On page 46263, paragraph 4.1, line 8 is corrected to read as follows:

of an air preheater in a steam generating

3. On page 46269, paragraph 7.2.1, the definition of $C.I._{\infty}$ is corrected to read as follows:

$C.I._{\infty}$=95 percent confidence interval estimates of the average mean value.

Dated: December 16, 1975.

ROGER STRELOW,
Assistant Administrator for Air and Waste Management.

[FR Doc.75-34514 Filed 12-19-75;8:45 am]

[FRL 423-7]

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Emission Monitoring Requirements and Revisions to Performance Testing Methods

Correction

In FR Doc. 75-26565, appearing at page 46250 in the issue for Monday, October 6, 1975, the following changes should be made:

1. In the first paragraph on page 46250, the words "reduction, and reporting requirements" should be inserted immediately following the eighth line.

2. In the seventh from last line of the first full paragraph on page 46254, the parenthetical phrase should read, "October 6, 1975".

3. In the second line of the second full paragraph on page 46254, the next to last word, now reading "capacity", should read "opacity".

4. In paragraph (c)(2)(iii) of § 60.13 on page 46255, the parenthetical phrase "(date of promulgation" should read, "October 6, 1975".

5. In § 60.13, the paragraphs designated (g)(1) and (g)(1)(i) through (ix) on page 46256 should be designated paragraph (i) and (i) 1 through (9).

6. In the second line of the formula in paragraph (f)(4) of § 60.45 on page 46257, the figure now reading "6.34" should read "3.64".

7. The last line of the first paragraph in Appendix B on page 46259 should be changed to read "tinuous measurement of the opacity of stack emissions".

8. The paragraph now numbered "22" in Appendix B on page 46259 should be numbered "2.2".

9. In the next to last line of paragraphs 9.1.1 and 7.1.1 on pages 46261 and 46264 respectively "x" should read "x".

10. The first column in the table in paragraph 7.1.2 on page 46264, the first column should be headed by the letter "n" and figures 1 through 10 should read 2 through 11.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

APPENDIX—PUBLIC LAND ORDERS

[PUBLIC LAND ORDER 5558]

[A-031764]

ALASKA

Partial Revocation of Executive Order No. 8877, as Amended; Transfer of Lands From the Department of the Air Force to the U.S. Coast Guard; Withdrawal of Lands for Native Selection

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), and by virtue of the authority vested in the Secretary of the Interior by section 11(b)(3) of the Alaska Native Claims Settlement Act of December 18, 1971, 85 Stat. 688 (hereinafter referred to as the Act), it is ordered as follows:

1. Subject to valid existing rights, the following described lands, which were withdrawn for the War Department for military purposes by Executive Order No. 8877 of August 29, 1941, as amended by Public Land Order No. 1404 of April 3, 1957, and Public Land Order No. 5001 of January 26, 1971, are hereby transferred from the Department of the Air Force to the U.S. Coast Guard, Department of Transportation:

CHINIAK TRACKING STATION

KODIAK ISLAND

A parcel of land lying in T. 30 S., R. 18 W., Seward Meridian, section 9, encompassing the Air/Ground Building (Bldg. 130) at the former Chiniak (Kodiak) Air Force Station. Starting at a point of beginning which is 3,400 feet due South and 200 feet due East of U.S. Engineers' Monument "Curley" (1943), T. 30 S., R. 18 W., Seward Meridian, section 4; thence, 250 feet due South; thence, 200 feet due East; thence 250 feet due North; thence, 200 feet due West to the point of beginning. Containing approximately 1 acre.

2. Executive Order No. 8877 of August 29, 1941, as amended, is hereby revoked as to the following described lands (excluding the lands described in paragraph 1 of this order):

KODIAK ISLAND

Beginning at a point on line of mean high tide on the east shore of Kodiak Island in latitude 57°34'08" N., longitude 152°11'-54" W., thence north 8,000 feet; thence west 7,000 feet approximately to longitude 152°13' W., thence north 7,800 feet approximately on longitude 152°13' W., to a point on mean high tide on Kalsin Bay; thence easterly and southerly along line of mean high tide around Cape Chiniak and Cape Greville to point of beginning. Containing approximately 3,723 acres.

3. The lands described in paragraph 2 (excluding the lands described in paragraph 1) are hereby withdrawn pursuant to section 11(b)(3) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688), for selection by the Koniag Regional Corporation and appropriate village corporation within that Region.

4. Prior to any conveyance of the lands described in paragraph 2, the lands shall be subject to administration by the Secretary of the Interior under the applicable laws and regulations, and his authority to make contracts and to grant leases, permits, rights-of-way, or easements shall not be impaired by this order.

Applications for leases under the Mineral Leasing Act, as amended, 30 U.S.C. 181-287 (1970), will be rejected until this order is modified or the lands are appropriately classified to permit mineral leasing.

JACK O. HORTON,
Assistant Secretary of the Interior.

DECEMBER 10, 1975.

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 28—PUBLIC ACCESS, USE, AND RECREATION

Rachel Carson National Wildlife Refuge; Maine

The following special regulations are issued and are effective during the period January 1, 1976 through December 31, 1976.

§ 28.28 Special regulations, public access, use, and recreation; for individual wildlife refuge areas.

MAINE

RACHEL CARSON NATIONAL WILDLIFE REFUGE

Entry by foot is permitted only during daylight hours for the purpose of nature study, hiking, wildlife observation, photography, and clamming.

No motor vehicles of any kind are permitted on the refuge. Open fires and camping are prohibited. Pets are permitted if on a leash not over 10 feet in length.

The possession of any drugs or substances, or immediate precursors, identified in Schedules I, II, III, IV or V of the Controlled Substances Act, 21 U.S.C. 812, or any drugs or substances added to these schedules pursuant to the terms of the Act, is prohibited on the refuge, unless such drugs or substances were obtained in accordance with law. Presence in the refuge when under the influence of a controlled substance to a degree that may endanger oneself, or another person, or property, or may cause unreasonable interference with another person's enjoyment of the refuge, is prohibited.

Information about the refuge is available from the Refuge Manager, Parker River National Wildlife Refuge, Newburyport, Massachusetts 01950, or from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

The provisions of this special regulation supplement the regulations governing recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through December 31, 1976.

Dated: December 15, 1975.

WILLIAM C. ASHE,
Acting Regional Director,
U.S. Fish and Wildlife Service.

[FR Doc.75-34310 Filed 12-19-75;8:45 am]

PART 28—PUBLIC ACCESS, USE, AND RECREATION

Wapack National Wildlife Refuge; New Hampshire

The following special regulations are issued and are effective during the period January 1, 1976 through December 31, 1976.

§ 28.28 Special regulations, public access, use, and recreation; for individual wildlife refuge areas.

NEW HAMPSHIRE

WAPACK NATIONAL WILDLIFE REFUGE

Entry by foot is permitted only during daylight hours for the purpose of hiking, nature and geology study, photography, and blueberry picking.

No motor vehicle of any kind is permitted on the refuge. Open fires and camping are prohibited. Pets are permitted if on a leash not over 10 feet in length.

The possession of any drugs or substances, or immediate precursors identified in Schedule I, II, III, IV or V of the Controlled Substances Act, 21 U.S.C. 812, or any drugs or substances added to these schedules pursuant to the terms of the Act, is prohibited on the refuge, unless such drugs or substances were obtained in accordance with the law. Presence in the refuge when under the influ-

V40246 DEC 22 75 XUM

ence of a controlled substance to a degree that may endanger oneself or another person, or property, or may cause unreasonable interference with another person's enjoyment of the refuge, is prohibited.

Information about the refuge is available from the Refuge Manager, Parker River National Wildlife Refuge, Newburyport, Mass. 01950, or from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

The provisions of this special regulation supplement the regulations governing recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through December 31, 1976.

Dated: December 15, 1975.

WILLIAM C. ASHE,
Acting Regional Director,
U.S. Fish and Wildlife Service.

[FR Doc.75-34311 Filed 12-19-75;8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

[27 CFR Parts 178 and 181]

[Notice No. 287; Reference No. 277]

COMMERCE IN FIREARMS AND AMMUNITION AND IN EXPLOSIVES

Black Powder

In the May 20, 1975, issue of the FEDERAL REGISTER (40 FR 21961), the Bureau of Alcohol, Tobacco and Firearms published a notice of proposed rulemaking to amend 27 CFR Part 178 (Commerce in Firearms and Ammunition) and Part 181 (Commerce in Explosives). The proposed regulations were drafted to implement Public Law 93-639, effective January 4, 1975, by exempting from regulatory provisions commercially manufactured black powder in quantities not to exceed fifty pounds, percussion caps, safety and pyrotechnic fuses, quills, quick and slow matches, and friction primers, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices.

A 15-day-comment period was originally allowed in order that regulations be put into effect as soon as possible, since the amended legislation became effective on January 4, 1975. In view of the considerable interest in the proposals that the Bureau had not initially anticipated, notice of an extension of the comment period to July 7, 1975, was published June 12, 1975 (40 FR 25026).

The purpose of this notice is to announce that the Bureau is amending the original proposals as a result of the numerous comments and suggestions received from sporting organizations, antique firearms enthusiasts, and interested persons.

BACKGROUND

Public Law 93-639 removed the exemption in 18 U.S.C. 845 (a)(5) on all black powder in quantities not exceeding five pounds. In lieu of the five pound exemption, the amended law permits anyone to purchase and use commercially manufactured black powder in quantities of fifty pounds or less, percussion caps, safety and pyrotechnic fuses, quills, quick and slow matches, and friction primers, solely for sporting, recreational, or cultural purposes in antique firearms, as defined in 18 U.S.C. 921(a)(16), or in antique devices, as exempted from the term "destructive device" in 18 U.S.C. 921(a)(4). 18 U.S.C. 921(a)(4) was also amended to add language exempting antiques such as muzzle-loading cannons used for sporting, recreational, or cultural purposes, from the definition of "destructive device".

In commenting on the legislation, the House of Representatives, Committee on the Judiciary, which amended the original Senate bill, specifically addressed itself to the Treasury Department regulations that would be drafted to implement S. 1033:

"The Committee also wishes to stress that the bill will not unduly disrupt the regulatory scheme established under regulations by ATF. The regulations need only to be modified so that retailers will be required to keep records of their sales of black powder under the new exemption. Moreover, it is the expectation of the Committee that ATF will promulgate regulations and establish forms to require sporting users to identify themselves on purchase of black powder. Moreover, such ATF regulations could require that a purchaser-sportsman certify by affidavit that he intends to use the black powder for sporting, recreational, or cultural purposes. Such a regulatory scheme would identify the purchasers of black powder and would aid in the enforcement of the law and prosecution of violators." [House Report (Judiciary Committee) No. 93-1570, December 11, 1974]

Based on the foregoing, the Bureau originally proposed the following regulatory amendments in the original notice published May 20, 1975:

(1) *Definition of "destructive device".* The definition of "destructive device", found in Part 178, was proposed to be amended by the addition of language exempting antiques, such as muzzle-loading cannons used for sporting, recreational, or cultural purposes, from the term "destructive device". This proposal is not changed by this notice.

(§ 178.11 amended.)

(2) *Licenses.* Under the previous law, black powder in amounts of five pounds or less, for any purpose, was exempt from the licensing provisions of Part 181. Since Public Law 93-639 requires a determination as to whether commercially manufactured black powder in quantities of fifty pounds or less is going to be used solely for sporting, recreational, or cultural purposes, the original notice proposed that a retailer would be required to keep records certifying that the purchaser intended to use black powder in accordance with the provisions of the law. Further, the original notice also proposed a requirement that all persons selling black powder, percussion caps, safety and pyrotechnic fuses, quills, quick and slow matches, and friction primers, be licensed to permit ATF officers to maintain such a check on distributions of these materials. The Bureau's proposal on this issue has been changed to eliminate the requirement for licensing persons selling percussion caps, safety and pyrotechnic fuses, quills, and quick and slow matches, and friction primers. The new proposal is discussed more fully under "Amendments to the original notice".

(3) *User permits.* Under current regulations, a user permit is required in order to acquire explosive materials (except black powder in quantities of five pounds or less) in interstate or foreign commerce. As stated in the original notice, this requirement was proposed to be modified so that it would not be necessary for a person to obtain a user permit, if he intends to receive in interstate or foreign commerce, commercially manufactured black powder in quantities not to exceed fifty pounds, percussion caps, safety and pyrotechnic fuses, quills, quick and slow matches, and friction primers, to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. In this notice we are still proposing that it would not be necessary to obtain a user permit in order to receive in interstate or foreign commerce fifty pounds or less of commercially manufactured black powder, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices; however, as discussed under "Amendments to the original notice", we are eliminating reference to percussion caps and certain igniters from regulatory requirements.

(§§ 181.26 and 181.41 amended.)

(4) *Transaction record for black powder and certain igniters to be used in antique firearms and antique devices.* The original notice of proposed regulations provided that a licensee or permittee could sell to a nonlicensee or nonpermittee commercially manufactured black powder in quantities not to exceed fifty pounds, percussion caps, safety and pyrotechnic fuses, quills, quick and slow matches, and friction primers, to be used in antique firearms and in antique devices. However, the seller would be required to record the transaction on new ATF Form 5400.3. Further, the original notice proposed a requirement that purchasers of black powder and igniters would certify (by executing the transaction form) that the materials purchased were intended for sporting, recreational, or cultural purposes. In addition, the original notice proposed a requirement that sellers of such materials forward a second copy of executed Form 5400.3 to the appropriate ATF office within a specified time period.

The requirements concerning the preparation and disposition of Form 5400.3, as well as the information to be shown on the form, are being changed somewhat by this notice. These changes are more fully discussed under "Amendments to the original notice".

Along with the preceding proposed regulatory amendments to implement Public Law 93-639, two additional proposals were included in the original notice. The first involved an administrative change which proposed to provide alternate methods or procedures, in lieu of methods or procedures prescribed in Part 181.

V 40246 DEC 22 75 XUM

Under the proposed amendments, subject to certain conditions, the Director could approve an alternate method or procedure if (a) good cause is shown, (b) the requested method or procedure is substantially equivalent to that prescribed, and (c) no increased cost to the Government or hindrance to the effective administration of the regulations will result. This proposal remains unchanged by this notice.

(§ 181.22 amended.)

The second, which involves Form 4710, Explosive Transaction Record, would (a) provide for the disposition of the copy of Form 4710 to be made in accordance with the instructions on the form—that is to the nearest Special Agent in Charge—rather than forwarding the copy to the regional director, and (b) inform licensees and permittees that supplies of Form 4710 may be obtained, upon request, from the Director. This proposal remains unchanged by this notice.

(§ 181.126 amended.)

OBJECTIONS TO THE ORIGINAL NOTICE

Approximately 250 comments were received on the proposals, all of which were either totally opposed to our interpretation of the law and our implementing regulations or opposed to particular portions of the proposed regulations. A large volume of the comments received mentioned three principal objections to the proposed regulations. Briefly, these objections were:

(1) The proposed regulations exempted black powder, percussion caps, safety and pyrotechnic fuses, quills, quick and slow matches, and friction primers, only if used for sporting, recreational, or cultural purposes in antique firearms, but not in replicas thereof. Those persons commenting pointed out that virtually all of the "antique" sporting firearms are actually replicas of expensive and fragile models. This objection apparently resulted because of a misunderstanding of the law. Public Law 93–839 provided for the use of black powder "in antique firearms as defined in section 921(a)(16) of title 18 of the United States Code". It should be noted that the definition of "antique firearms" in 18 U.S.C. 921(a)(16) encompasses replicas of antique firearms. Thus, black powder intended for sporting, recreational, or cultural purposes, may be used in replicas of antique firearms.

(2) The proposed regulations placed unnecessary controls on the sale of percussion caps and other igniters intended for lawful uses in sporting weapons. Those persons commenting on this matter asked that dealers in, and purchasers of, such igniters not be regulated and that the transaction record be eliminated for sales of such igniters. We have proposed changes as a result of this objection that are more fully discussed under "Amendments to the original notice".

(3) The proposed regulations greatly exceeded the intent of Congress in its passage of Public Law 93–639. Those persons commenting on this issue felt that the Congressional intent was to facilitate the purchase of black powder and igniters by sporting users, but that the proposed regulations had the effect of making purchases of these materails more difficult. Specifically, these persons objected to the proposed requirement that purchasers of black powder sign a form certifying that the powder was intended to be used for sporting, recreational, or cultural purposes. Also, objections were raised concerning the proposal that a second copy of the transaction form be executed and forwarded to ATF. We have further explained our essentially unchanged interpretation of Public Law 93–639, concerning a certification record to be maintained by licensees, and have discussed proposed liberalizing changes we are making regarding the preparation and disposition of the certification form under "Amendments to the original notice".

AMENDMENTS TO THE ORIGINAL NOTICE

Full and careful consideration was given to all the comments received and, as a result, several changes are being made to the original proposals. These are discussed below.

(1) *Controls on the sale of percussion caps and other igniters.* As summarized above, many individuals objected to the proposed requirements regarding certain igniters used in antique weapons. After thorough consideration of these comments and of our existing regulations, the Bureau has modified its original proposal. The Bureau has traditionally considered percussion caps and other igniters used in antique firearms as small arms ammunition and, as such, these are exempt from regulatory provisions under 18 U.S.C. 845(a)(4) and 27 CFR 181.141. The House Judiciary Committee only discussed black powder when addressing the expected Treasury regulations, and did not refer to igniters. In light of these facts, we now feel that our originally proposed restrictions on the sale, purchase, and use of percussion caps, safety and pyrotechnic fuses, quills, quick and slow matches, and friction primers in antique firearms, are unnecessary and we are, therefore, eliminating these proposed requirements. Essentially, this would mean:

(a) An explosives license would not be required for those persons engaged in the business of selling these igniters.

(b) A person selling such igniters would not be required to maintain records of disposition of these items.

(c) A purchaser of these igniters would not be required to execute a transaction record on proposed Form 5400.3.

(§§ 181.26, 181.41, 181.105, 181.106, 181.108, 181.122, 181.123, 181.124, 181,125, 181.130 and 181.141 amended.)

(2) *Preparation and disposition of transaction records.* As discussed above, many persons commenting on the original proposal felt that the Bureau had exceeded the intent of Congress by requiring that purchasers of black powder provide identification and certification on a transaction form that black powder being purchased was intended for lawful purposes. We are still proposing that purchasers of black powder certify on Form 5400.3 that the black powder is intended for sporting, recreational, or cultural purposes in antique firearms or in antique devices. The report of the Judiciary Committee of the House of Representatives (Report No. 93–1570), stated that the Committee intended that "retailers will be required to keep records of their sales of black powder under the new exemption". The Committee further expected that ATF "establish forms to require sporting users to identify themselves on purchase of black powder". In addition to the above conditions, the Committee suggested that ATF could also "require that a purchaser-sportsman certify by affidavit that he intends to use the black powder for sporting, recreational or cultural purposes." We adopted this recommendation as it is a logical and simple solution to the problem of determining whether the black powder will be used for the purposes specified in the statutory exemption. The Bureau feels that because of these expectations, the intent of Congress in passing Public Law 93–639 was clearly to place certain requirements on sales of black powder so as to facilitate enforcement of the law and prosecution of violators. Thus, the Bureau cannot change its basic position concerning the requirements for licensing black power dealers, certification by purchasers of black powder, or maintenance of records of transactions in black powder, as proposed in the original notice.

The Bureau has, however, modified somewhat the information required to be shown on the transaction form and the disposition of the form. Under the modified proposal, the transaction form would reflect the following changes:

(a) A licensee would be required to prepare only one copy of the Form 5400.3 to be maintained on his business premises. The original proposal, which would have required a duplicate copy to be forwarded to ATF, on or before the close of business of the next business day, has been eliminated.

(b) A physical description of the purchaser that originally had been proposed for identification purposes has been eliminated. In lieu thereof, we are now proposing that only a positive identification, such as a driver's license, be presented as proof of identity at the time of sale.

(c) As mentioned in item (1) above, reference to percussion caps, safety and pyrotechnic fuses, quills, quick and slow matches, and friction primers, is being deleted from the form.

In summation, under the current proposal, Form 5400.3 requires a licensee to obtain from a purchaser of commercially manufactured black powder under the new exemption, the purchaser's name and address and his certification that the black powder is intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices, as well as proof of identity that he is in fact the person certifying the form.

(§§ 181.105, 181.108, 181.122, 181.123, 181.124 and 18.125 amended and § 181.130 added.)

PUBLIC PARTICIPATION

Prior to final adoption of such regulations, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing, in duplicate, to the Director, Bureau of Alcohol, Tobacco and Firearms, Washington, D.C. 20226 (Attn: Chief, Regulations and Procedures Division), on or before January 21, 1976. Written comments or suggestions which are not exempt from disclosure by the Bureau of Alcohol, Tobacco and Firearms, may be inspected by any person upon compliance with 27 CFR 71.22(d)(7). The provisions of 27 CFR 71.31(b) shall apply with respect to designation of portions of comments or suggestions as exempt from disclosure. Any interested person submitting written comments or suggestions who desires an opportunity to comment orally at a public hearing on these amended proposed regulations should submit his request, in writing, to the Director, Bureau of Alcohol, Tobacco and Firearms, within the 30-day period.

The proposed regulations are to be issued under the authority contained in 18 U.S.C. 847 (84 Stat. 959) and 18 U.S.C. 926 (82 Stat. 1226).

SPECIFIC CHANGES TO THE REGULATIONS

In consideration of the foregoing, the following specific changes to the regulations are proposed. The proposals which follow include those published in the original notice that remain unchanged, as well as the modifications discussed above.

PARAGRAPH 1. Section 178.11 is changed by amending the definition of "destructive device." As changed, § 178.11 reads as follows:

§ 178.11 Meaning of terms.

* * * * *

Destructive device. (a) Any explosive, incendiary, or poison gas (1) bomb, (2) grenade, (3) rocket having a propellant charge of more than 4 ounces, (4) missile having an explosive or incendiary charge of more than one-quarter ounce, (5) mine, or (6) device similar to any of the devices described in the preceding subparagraphs of this definition; (b) any type of weapon (other than a shotgun or a shotgun shell which the Director finds is generally recognized as particularly suitable for sporting purposes) by whatever name known which will, or which may be readily converted to, expel a projectile by the action of an explosive or other propellant, and which has any barrel with a bore of more than one-half inch in diameter; and (c) any combination of parts either designed or intended for use in converting any device into any destructive device described in paragraph (a) or (b) of this definition and from which a destructive device may be readily assembled. The term shall not include any device which is neither designed nor redesigned for use as a weapon; any device, although originally designed for use as a weapon, which is redesigned for use as a signalling, pyrotechnic, line throwing, safety, or similar device; surplus ordnance sold, loaned, or given by the Secretary of the Army pursuant to the provisions of section 4684 (2), 4685, or 4686 of title 10, United States Code; or any other device which the Director finds is not likely to be used as a weapon, is an antique, or is a rifle which the owner intends to use solely for sporting, recreational, or cultural purposes.

* * * * *

PAR. 2. Section 181.11 is amended to (1) change the definition of "Assistant Regional Commissioner", and (2) add a definition for "regional director" immediately following the definition of "Regional Commissioner". As amended § 181.11 reads as follows:

§ 181.11 Meaning of terms.

* * * * *

Assistant Regional Commissioner. Whenever used in this part shall mean a regional director as defined in this section.

* * * * *

Regional director. A regional director who is responsible to, and functions under the direction and supervision of, the Director, Bureau of Alcohol, Tobacco, and Firearms.

* * * * *

PAR. 3. Section 181.22 is revised to provide for alternate methods or procedures in lieu of methods or procedures prescribed in Part 181. As revised, § 181.22 reads as follows:

§ 181.22 Alternate methods or procedures; and emergency variations from requirements.

(a) *Alternate methods or procedures.* The permittee or licensee, on specific approval by the Director as provided by this paragraph, may use an alternate method or procedure in lieu of a method or procedure specifically prescribed in this part. The Director may approve an alternate method or procedure, subject to stated conditions, when he finds that—

(1) Good cause has been shown for the use of the alternate method or procedure;

(2) The alternate method or procedure is within the purpose of, and consistent with the effect intended by, the specifically prescribed method or procedure and that such alternate method or procedure is substantially equivalent to that specifically prescribed method or procedure; and

(3) The alternate method or procedure, he shall submit a written aplication of law and will not result in an increase in cost to the Government or hinder the effective administration of this part.

Where the permittee or licensee desires to employ an alternate method or procedure, he shall sumit a written application, in triplicate, to the regional director, for transmittal to the Director. The application shall specifically describe the proposed alternate method or procedure and shall set forth the reasons therefor. Alternate methods or procedures shall not be employed until the application has been approved by the Director. The permittee or licensee shall, during the period of authorization of an alternate method or procedure, comply with the terms of the approved application. Authorization of any alternate method or procedure may be withdrawn whenever, in the judgment of the Director, the effective administration of this part is hindered by the continuation of such authorization. As used in this paragraph, alternate methods or procedures shall include alternate construction or equipment.

(b) *Emergency variations from requirements.* The Director may approve construction, equipment, and methods of operation other than as specified in this part, where he finds that an emergency exists and the proposed variations from the specified requirements are necessary and the proposed variations—

(1) Will afford security and protection that are substantially equivalent to those prescribed in this part;

(2) Will not hinder the effective administration of this part; and

(3) Will not be contrary to any provisions of law. Variations from requirements granted under this paragraph are conditioned on compliance with the procedures, conditions, and limitations set forth in the approval of the application. Failure to comply in good faith with such procedures, conditions, and limitations shall automatically terminate the authority for such variations and the licensee or permittee thereupon shall fully comply with the prescribed requirements of regulations from which the variations were authorized. Authority for any variation may be withdrawn whenever, in the judgment of the Director, the effective administration of this part is hindered by the continuation of such variation. Where the licensee or permittee desires to employ such variation, he shall submit a written application, in triplicate, to the regional director, for transmittal to the Director. The application shall describe the proposed variation and set forth the reasons therefor. Variations shall not be employed until the application has been approved, except when the emergency requires immediate action to correct a situation that is threatening to life or property. Such corrective action may then be taken concurrent with the filing of the application and notification of the Director via telephone.

(c) *Retention of approved variations.* The licensee or permittee shall retain, as part of his records available for examination by alcohol, tobacco and firearms officers, any application approved by the Director under the provisions of this section.

PAR. 4. Section 181.26 is amended to provide that a nonlicensee or nonpermittee is not prohibited from shipping, transporting, or receiving in interstate or foreign commerce, commercially

V 40 246 DEC 22 75 XUM

manufactured black powder in qualities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. As amended, § 181.26 reads as follows:

§ 181.26 Prohibited shipment, transportation, or receipt of explosive materials.

(a) No person, other than a licensed importer, licensed manufacturer, licensed manufacturer-limited, licensed dealer, or permittee, shall transport, ship, cause to be transported, or receive in interstate or foreign commerce any explosive materials: *Provided*, That the provisions of this paragraph shall not apply to—

(1) The transportation, shipment, or receipt of explosive materials by a nonlicensed person or nonpermittee who lawfully purchases explosive materials from a licensee in a State contiguous to the purchaser's State of residence if, (i) the purchaser's State of residence has enacted legislation, currently in force, specifically authorizing a resident of that State to purchase explosive materials in a contiguous State, (ii) the provisions of § 181.105(c) are fully complied with, and (iii) the purchaser is not otherwise prohibited under paragraph (b) of this section from shipping or transporting explosive materials in interestate or foreign commerce or receiving explosive materials which have been shipped or transported in interstate or foreign commerce; or

(2) The lawful purchase by a nonlicensee or nonpermittee of commercially manufactured black powder in quantities not to exceed fifty pounds, if (i) the black powder is intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices, and (ii) the provisions of § 181.105(g) are fully complied with.

(b) No person may ship or transport any explosive material in interstate or foreign commerce or receive any explosive materials which have been shipped or transported in interstate or foreign commerce who (1) is under indictment for, or who has been convicted in any court of, a crime punishable by imprisonment for a term exceeding 1 year, (2) is a fugitive from justice, (3) is an unlawful user of or addicted to marihuana (as defined in section 4761 of the Internal Revenue Code of 1954; 26 U.S.C. 4761) or any depressant or stimulant drug (as defined in section 201(v) of the Federal Food, Drug, and Cosmetic Act; 21 U.S.C. 321 (v)), or narcotic drug (as defined in section 4731(a) of the Internal Revenue Code of 1954; 26 U.S.C. 4731(a)), or (4) has been adjudicated as a mental defective or has been committed to a mental institution.

PAR. 5. Paragraph (a) of § 181.41 is amended to exclude users of commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices, from the permit requirements of Part 181. As amended, § 181.41(a) reads as follows:

§ 181.41 General.

(a) Each person intending to engage in business as an importer or manufacturer of, or a dealer in, explosive materials, including black powder, shall, before commencing such business, obtain the license required by this subpart for the business to be operated. Each person who intends to acquire for use explosive materials from a licensee in a State other than the State in which he resides, or from a foreign country, or who intends to transport explosive materials in interstate or foreign commerce, shall obtain a permit under the provisions of this subpart: *Provided*, That it is not necessary to obtain such permit if the user intends to lawfully purchase—

(1) Explosive materials from a license in a State contiguous to the user's State of residence and the user's State of residence has enacted legislation, currently in force, specifically authorizing a resident of that State to purchase explosive materials in a contiguous State, or

(2) Commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices.

* * * * *

PAR. 6. A new paragraph (g) is added to §181.105, permitting a licensee to distribute commercially manufactured black powder in quantities not to exceed fifty pounds to a nonlicensee or nonpermittee, if (1) it is intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices, and (2) a transaction records is executed. As added, new §181.105(g) reads as follows:

§ 181.105 Distributions to nonlicensees and nonpermittees.

* * * * *

(g) Notwithstanding any other provision of this section, a licensed importer, licensed manufacturer, or licensed dealer, or a licensed manufacturer-limited or permittee disposing of surplus stocks, may sell or distribute commercially manufactured black powder in quantities of fifty pounds or less to a nonlicensee or nonpermittee if:

(1) The black powder is intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices, and

(2) The nonlicensee or nonpermittee furnishes to the licensee the transaction record, Form 5400.3, required by § 181.130.

PAR. 7. Paragraph (a) of § 181.106 is amended to provide that a licensee is not prohibited from distributing to an out-of-State nonlicensee or nonpermittee, commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. As amended, § 181.106(a) reads as follows:

§ 181.106 Certain prohibited distributions.

(a) A licensed importer, licensed manufacturer, licensed manufacturer-limited, or licensed dealer shall not distribute explosive materials to any person not licensed or holding a permit under this part, who the licensee knows or has reason to believe does not reside in the State in which the licensee's place of business is located: *Provided*, That the foregoing provisions of this paragraph shall not apply to:

(1) The distribution of explosive material to a resident of a State contiguous to the State in which the licensee's place of business is located, if the requirements of § 181.105(c) are fully met, or

(2) The purchase of commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices, if the requirements of § 181.105(g) are fully met.

* * * * *

PAR. 8. Section 181.108 is revised to provide procedures for the release from customs custody to a nonlicensee or nonpermittee, of imported commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. As revised, § 181.108 reads as follows:

§ 181.108 Importation.

(a) Explosive materials imported or brought into the United States by a licensed importer or permittee may be released from customs custody to the licensed importer or permittee upon proof of his status as a licensed importer or permittee. Such status shall be established by the licensed imported or permittee furnishing to the customs officer a certified copy of his license or permit (see § 181.104).

(b) A nonlicensee or nonpermittee may import or bring into the United States commercially manufactured black powder in quantities not to exceed fifty pounds. Upon submitting to the customs officer completed Form 5400.3, certifying that the black powder is intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices, black powder may be released from customs custody. The disposition of the executed Form 5400.3 shall be in accordance with the instructions on the form.

(c) The provisions of this section are in addition to, and are not in lieu of, any applicable requirement under 27 CFR Part 47.

PAR. 9. Section 181.122 is amended to add a new paragraph (f) instructing licensed importers to maintain separate records of distributions of commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. As amended, § 181.122 reads as follows:

§ 181.122 Records maintained by importers.

* * * * *

(f) Each licensed importer shall maintain separate records of sales or other distribution made to nonlicensees or nonpermittees of commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. Such records shall be maintained in the form and manner prescribed by § 181.130.

PAR. 10. Section 181.123 is amended to add a new paragraph (f) instructing licensed manufacturers to maintain separate records of distributions of commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. As amended, § 181.123 reads as follows:

§ 181.123 Records maintained by licensed manufacturers.

* * * * *

(f) Each licensed manufacturer shall maintain separate records of sales or other distributions made to nonlicensees or nonpermittees of commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. Such records shall be maintained in the form and manner prescribed by § 181.130.

PAR. 11. Section 181.124 is amended to add a new paragraph (g) instructing licensed dealers to maintain separate records of distributions of commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. As amended, § 181.124 reads as follows:

§ 181.124 Records maintained by dealers.

* * * * *

(g) Each licensed dealer shall maintain separate records of the sales or other distributions made to nonlicensees or nonpermittees of commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. Such records shall be maintained in the form and manner prescribed by § 181.130.

PAR. 12. Section 181.125 is amended to instruct licensed manufacturers-limited and permittees to maintain separate records of dispositions of surplus stocks of commercially manufactured black power in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. As amended, § 181.125 (b) and (c) reads as follows:

§ 181.125 Records maintained by licensed manufacturers-limited and permittees.

* * * * *

(b) A licensed manufacturer-limited disposing of surplus stocks of explosive materials to other licensees or to permittees shall record in the permanent record not later than the close of the next business day following the date of the disposition, the information prescribed in § 181.123(c)(1). Each licensed manufacturer-limited shall maintain separate records of dispositions of surplus stocks of explosive materials to nonlicensees or nonpermittees. Such records shall be maintained in the form and manner as prescribed by § 181.126. Each licensed manufacturer-limited shall maintain separate records of dispositions of surplus stocks of commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. Such records shall be maintained in the form and manner prescribed by § 181.130.

(c) Each permittee shall record in a permanent record the manufacturers' marks of identification (if any), the quantity and class of explosive materials, as prescribed in the Explosives List, he daily acquires, the date of such acquisition, and the name, address and license number of the person from whom explosive materials were obtained. The information required by this paragraph shall be recorded not later than the close of the next business day following the date of such acquisition. A permittee disposing of surplus stocks of explosive materials to other permittees or to licensees shall record in the permanent record not later than the close of the next business day following the date of the disposition, the information prescribed in § 181.124(d). Each permittee shall maintain separate records of dispositions of surplus stocks of explosive materials to nonlicensees or nonpermittees. Such records shall be maintained in the form and manner as prescribed by § 181.126. Each permittee shall maintain separate records of dispositions of surplus stocks of commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. Such records shall be maintained in the form and manner as prescribed by § 181.130.

* * * * *

PAR. 13. Section 181.126 is amended to (1) provide for the disposition of the copy of Form 4710 to be made in accordance with the instructions on the form, and (2) inform licensees and permittees that supplies of Form 4710 may now be obtained, upon request, from the Director. As amended, § 181.126 (c) and (f) reads as follows:

§ 181.126 Explosives transaction record.

* * * * *

(c) Form 4710 shall be completed in duplicate, the original of which shall be retained by the licensee or permittee as part of his permanent records in accordance with the requirements in paragraph (d) of this section, and the copy shall be forwarded in accordance with the instructions on the form, on or before the close of business on the business day next succeeding that on which the transaction occurs.

* * * * *

(f) A licensee or permittee may obtain, upon request, a supply of Form 4710 from the Director.

PAR. 14. A new section, § 181.130, is added immediately following § 181.129, providing instructions for the use of the new transaction record for commercially manufactured black powder in quantities not to exceed fifty pounds, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices. As added, new § 181.130 reads as follows:

§ 181.130 Transaction record for black powder to be used in antique firearms or in antique devices.

(a) A licensee or permittee shall not sell or otherwise distribute to a nonlicensee or nonpermittee commercially manufactured black powder in quantities of fifty pounds or less, intended to be used solely for sporting, recreational, or cultural purposes in antique firearms or in antique devices, unless he records the transaction on Form 5400.3.

(b) Prior to the sale or other distribution of the black powder in paragraph (a) of this section to a nonlicensee or nonpermittee who is acquiring it under the provisions contained in § 181.105(g), the licensee or permittee so distributing the black powder shall obtain an executed Form 5400.3 from the distributee. The Form 5400.3 shall contain all the information as indicated by the headings on the form and the instructions thereon or issued in respect thereto, and as required by this part.

(c) Form 5400.3 shall be retained by the licensee or permittee as part of his permanent records in accordance with the requirements of paragraph (d) of this section.

(d) Each Form 5400.3 shall be retained in numerical (by transaction serial number) order commencing with "1" and continuing in regular sequence. When the numbering of any series reaches "1,000,000," the licensee or permittee may recommence the series. The recommenced series shall be given an alphabetical prefix or suffix. Where there is a change in proprietorship, or in the individual, firm, corporate name, or trade name, the series in use at the time of such change may be continued.

(e) The requirements of this section shall be in addition to any other record-keeping requirement contained in this part.

(f) A licensee or permittee may obtain, upon request, a supply of Form 5400.3 from the Director.

V 401246 DEC 22 75 XUM

PAR. 15. Section 181.141 is revised to (1) delete the current general exemption from the regulations with respect to black powder in quantities not to exceed five pounds, and (2) insert a new paragraph (b) specifically addressing the exemption from the regulations of black powder as provided by Public Law 93–639. As revised, § 181.141 reads as follows:

§ 181.141 **Exemptions.**

(a) *General.* The provisions of this part shall not apply with respect to:

(1) Any aspect of the transportation of explosive materials via railroad, water, highway, or air which are regulated by the U.S. Department of Transportation, and agencies thereof.

(2) The use of explosive materials in medicines and medicinal agents in the forms prescribed by the official United States Pharmacopoeia, or the National Formulary.

(3) The transportation, shipment, receipt, or importation of explosive materials for delivery to any agency of the United States or to any State or political subdivision thereof.

(4) Small arms ammunition and components thereof.

(5) The manufacture under the regulation of the military department of the United States of explosive materials for, or their distribution to or storage or possession by, the military or naval services or other agencies of the United States.

(6) Arsenals, navy yards, depots, or other establishments owned by, or operated by or on behalf of, the United States.

(7) The importation and distribution of fireworks in a finished state, commonly sold at retail for personal use in compliance with State laws or local ordinances.

(8) Gasoline, fertilizers, propellant actuated devices, or propellant actuated industrial tools manufactured, imported, or distributed for their intended purposes.

(b) *Black powder.* The provisions of this part shall not apply with respect to commercially manufactured black powder in quantities not to exceed fifty pounds, percussion caps, safety and pyrotechnic fuses, quills, quick and slow matches, and friction primers: *Provided,* That such black powder is intended to be used solely for sporting, recreational, or cultural purposes in antique firearms, as defined in 18 U.S.C. 921(a)(16), or in antique devices, as exempted from the term "destructive device" in 18 U.S.C. 921(a)(4), and the provisions of §§ 181.105(g) and 181.130 are fully complied with.

Signed: October 20, 1975.

Approved: December 11, 1975.

REX D. DAVIS,
Director.

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

CUSTOMS FIELD ORGANIZATION

Proposed Change in Customs Region I

In order to increase administrative flexibility and improve overall management and efficiency in the Ogdensburg, New York, Customs district (Region I), it is proposed to revoke the designations of Fort Covington, New York, and Chateaugay, New York, as Customs ports of entry in the Ogdensburg, New York, Customs district (Region I), and to establish Fort Covington and Chateaugay as Customs stations under the supervision of the Trout River, New York, Customs port of entry in the same Customs district. The Customs station at Churubusco, New York, which is presently under the supervision of the Chateaugay, New York, port of entry, would also be placed under the supervision of the Trout River, New York, port of entry.

Therefore, notice is hereby given that by virtue of the authority vested in the President by section 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951 (3 CFR Ch. II), and pursuant to authority provided by Treasury Department Order No. 190, Rev. 10 (40 FR 2216), it is proposed to revoke the designations of Fort Covington, New York, and Chateaugay, New York, as Customs ports of entry in the Ogdensburg, New York, Customs district (Region I), and to designate Fort Covington, New York, and Chateaugay, New York, as Customs stations under the supervision of the port of Trout River, New York, in the Ogdensburg, New York, Customs district. It is also proposed to place the Customs station of Churubusco, New York, presently under the supervision of the port of Chateaugay, New York, under the supervision of the port of Trout River, New York. §§ 1.2(c) and 1.3(d) of the Customs Regulations (19 CFR 1.2(c), 1.3(d)) would be amended accordingly.

A similar notice of proposed rulemaking was published in the FEDERAL REGISTER on March 9, 1971 (36 FR 4547). However, no action was taken on that proposal.

Data, views, or arguments with respect to the foregoing proposal may be addressed to the Commissioner of Customs, Attention: Regulations Division, Washington, D.C. 20229. To ensure consideration, communications must be received on or before January 21, 1976.

Written material and suggestions submitted will be available for public inspection in accordance with § 103.8(b) of the Customs Regulations (19 CFR 103.8(b)), at the Regulations Division, Headquarters, United States Customs Service, Washington, D.C., during regular business hours.

Dated: December 10, 1975.

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

DEPARTMENT OF DEFENSE

Corps of Engineers

[33 CFR Part 214]

[ER 500-2-2]

EMERGENCY SUPPLIES OF DRINKING WATER

Emergency Employment of Army and Other Resources

Notice is hereby given that the regulation set forth in tentative form below is proposed by the Secretary of the Army, acting through the Chief of Engineers, to prescribe policies and provide guidance implementing an amendment of Public Law 84–99, Emergency Flood Control Work (33 USC 701n). The proposed regulation established procedures to be taken by the Corps of Engineers to initiate furnishing emergency supplies of clean drinking water pursuant to Public Law 84–99, as amended.

Prior to issuing the final regulation, consideration will be given to any comments, suggestions, or objections thereto which are submitted in writing 45 days from the date of this FEDERAL REGISTER to: Chief of Engineers, ATTN: (DAEN–CWO–E), Department of the Army, Washington, D.C. 20314.

Until the final regulation is issued, these proposed rules will provide interim guidance to all Corps of Engineers field operating agencies.

Dated: December 12, 1975.

RUSSELL J. LAMP,
Colonel, Corps of Engineers Executive.

It proposed to amend Title 33 of the Code of Federal Regulations by adding Part 214 as follows:

Sec.

214.1 Purpose.
214.2 Applicability.
214.3 Reference.
214.4 Additional authority.
214.5 Policy.
214.6 Discussion.
214.7 Exclusions.
214.9 Requirements.
214.10 Types of assistance.
214.11 Costs.

AUTHORITY: Pub. L. 84–99, as amended, Emergency Flood Control Work 33 U.S.C. 701n; (69 Statute 186), dated June 28, 1955.

§ 214.1 Purpose.

This provides information, guidance, and policy for execution of the Chief of Engineers' authority to furnish supplies of clean drinking water pursuant to Pub. L. 84–99, as amended by Section 82(2), Pub. L. 93–251 (88 Stat. 34).

§ 214.2 Applicability.

This regulation is applicable to Corps of Engineers field operating agencies assigned Civil Works activities, including the USAED Alaska, and the Pacific Ocean Division. Its provisions are applicable within the 50 states, and the District of Columbia, Puerto Rico, Virgin Islands, American Samoa, and Guam.

§ 214.3 Reference.

(a) Pub. L. 84–99, as amended (33 U.S.C. 701n).

(b) Pub. L. 93–251, Section 82(2).

(c) ER 500–1–1.

§ 214.4 Additional authority.

Section 82(2), Pub. L. 93–251, dated 7 March 1974, revised Pub. L. 84–99, as amended, by adding the following new sentence. "The Chief of Engineers, in the exercise of his discretion, is further authorized to provide emergency supplies of clean drinking water, on such terms as he determines to be advisable, to any locality which he finds is confronted with a source of contaminated drinking water causing or likely to cause a substantial threat to the public health and welfare of the inhabitants of the locality." This authority expands the measures the Chief of Engineers may employ in providing emergency relief pursuant to Pub. L. 84–9.

§ 214.5 Policy.

Emergency work under this authority will be applied to situations in which the source of water has become contaminated. The contamination may be accidental, deliberate, or caused by natural events. However, loss of the water source or supply due to any cause is not included in the language of Section 82(2), Pub. L. 93–251, and furnishing emergency supplies by the Corps of Engineers under those situations was not intended by this legislation. Approval of measures to furnish clean drinking water will be pursuant to this regulation, and in accordance with procedures outlined in ER 500–1–1 by HQDA (DAEN–CWO–E) WASH DC 20314. DAEN–CWO–E will be notified by telephone when the emergency water situation becomes known.

§ 214.6 Discussion.

(a) The amendment provides for furnishing emergency supplies of drinking water. The method of furnishing those supplies is not provided for in the amendment, and is left to the discretion of the Chief of Engineers. Any feasible method, including restoration of service from an alternate source when the main source has been contaminated, is authorized where most feasible (however, see paragraphs (d) and (e) of this section).

(b) The scope of work is limited solely to providing emergency supplies of clean drinking water. Sewage treatment and disposal, and other sanitary requirements, are not included. In addition, the Corps of Engineers role in providing emergency supplies is a temporary measure until the locality is able to assume their responsibility. The locality is ultimately responsible for providing supplies of drinking water.

(c) The cause of the contamination may be due to any situation, not necessarily flood related. It encompasses all situations involving contaminated source of drinking water, whether caused by flooding or otherwise.

(d) To be eligible, a locality must be confronted with a source of water that is contaminated. The loss of clean drinking water must not be solely the result of a failure in the distribution system. For example, the emergency could be due to a failure of a reservoir purification system, and the locality might thus be faced with a contaminated source. Furnishing of emergency supplies of clean drinking water may not be undertaken in these cases since the distribution system is not considered to be a source.

(e) Employment of the authority under the amendment requires a finding by the Chief of Engineers, or his delegate, that there is, in fact, a contaminated source of drinking water. A loss of supply or distribution is not in itself a justification for furnishing supplies of water by the Corps of Engineers under this authority.

(f) The contamination must cause or be likely to cause a substantial threat to the public health and welfare. An identifiable and defined threat of impairment to the public health and welfare is considered necessary. There is no requirement, however, that actual sickness exist from contaminated water to invoke the authority. But a clear threat must be established. Lack of palatability, in itself, may not constitute a serious health threat (see § 214.9(d)).

(g) Inhabitants of the locality, rather than commercial enterprises, are identified as the group threatened. A business firm faced with contamination of water used in its process is not eligible. The drinking water used by the people in the area must be affected.

§ 214.7 Delegation of Authority.

The authority to approve measures for furnishing emergency supplies of clean drinking water pursuant to the Section 82(2), Pub. L. 93–251 amendment of Pub. L. 84–99, is delegated to division engineers, up to a $50,000 expenditure for the incident. Additional obligational authority of Code 400 funds will be obtained from DAEN–CWO–E prior to authorizing the proposed added work.

§ 214.8 Exclusions.

The authority does not require correcting the contamination, or repair of water systems so that clean drinking water supplies become available again. Reestablishing community water supplies remains the responsibility of local government and other Federal programs. These methods may be employed under the authority, if they are the most feasible ways to provide emergency supplies of clean drinking water, but there is no mandate to do so. To the extent state or local governments can provide water with their own resources, the locality will be excluded from the provision of emergency supplies under Pub. L. 84–99. In general, the following situations are not considered to be appropriate for Corps action under this authority:

(a) Contamination which causes a loss of palatability, but poses no material threat to public health and welfare.

(b) Contamination, such as by bacteria, which can be reduced to a safe level by the users boiling the water.

(c) Confrontation with normal levels of impurities or contaminants in a drinking water source that does not pose substantial threat to the public health.

(d) Contamination by natural intrusions over a period of time, which are known to be occurring and which may accumulate in sufficient concentrations to pose a future health threat, but which have not yet reached the level of a present hazard.

(e) Loss or diminishing of a water source, due to such things as an earthquake or drought.

(f) Contamination of a drinking water source as a regular occurrence due to recurring events such as drought or flooding, when no corrective community action has yet been initiated.

(g) Contamination which, while posing a substantial threat to health and welfare, can be corrected by local authorities, other Federal authorities, or other appropriate means before emergency supplies are deemed necessary.

§ 214.9 Requirements.

Providing emergency supplies of clean drinking water pursuant to the emergency functions of the Corps of Engineers is supplemental to the efforts of the community. Such actions must be in accordance with both Federal and municipal authorities. Corps response must be restricted to requests for assistance received from an appropriate state official. Each request must be considered on its own merits. The factors in each case may vary, but the following should be included in the evaluation.

(a) Whether the criteria required by the law and outlined in § 214.6 have been met.

(b) The extent of state and local efforts to provide clean drinking water and their capability to do so. Corps efforts to provide temporary supplies of drinking water must be limited to measures clearly beyond the resources reasonably available to the state and locality.

(c) The adequacy of the state or local community agreement to mutually participate with the Federal government, on terms determined advisable by the Chief of Engineers, or his delegate, which must include the following:

(1) To provide, without cost to the United States, all lands, easements, and rights-of-way necessary for the authorized work.

(2) To hold and save the United States free from damages in connection with the authorized work other than negligence attributable to the United States or its contractor.

(3) To maintain and operate in a manner satisfactory to the Chief of Engineers all installed work during the emergency.

V40246 DEC 22 75 XUM

(4) To remove when determined feasible by the district engineer, at no cost to the Federal government, the installed equipment at the end of the emergency and return it to the Corps of Engineers.

(5) As soon as possible to actively initiate measures required to resolve the emergency situation.

(d) The provision of water quality statements with the request, and the identification of the threat to public health and welfare as determined by recognized authorities such as the State Health Department, Environmental Protection Agency, or recognized commercial laboratory.

(e) The identification of the affected area as a legally recognized governmental body or public entity that exercises a measure of control in the common interest of the inhabitants.

§ 214.10 Types of Assistance.

The temporary emergency supplies of clean drinking water may be provided through such actions as:

(a) The use of water tank trucks to haul clean drinking water from a nearby known safe source to water points established for local distribution.

(b) Procurement and distribution of bottled water.

(c) Laying of temporary above ground water lines from a nearby safe source of water to the affected community where water points for local distribution can be established.

(d) Installation of temporary filtration.

§ 214.11 Costs.

Costs incurred by the Corps of Engineers in furnishing emergency supplies of clean drinking water are chargeable to PL 84–99 funds, 96X3125, Code 910–400 and repayment by the community generally will not be required. Costs of necessary measures for the decontamination of the water supply source are the responsibility of local governments and are not authorized under Pub. L. 84–99.

For the Chief of Engineers.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[7 CFR Parts 1824, 1901]

PROGRAM-RELATED INSTRUCTIONS

Environmental Impact Statements Proposed Redesignation-Revision

Notice is hereby given that the Farmers Home Administration (FmHA) has under consideration the establishment under Chapter XVIII, Title7, a new subchapter H—"General,—Part 1901, Program-Related Instructions," in the Code of Federal Regulations, Subpart G, "Environmental Impact Statements," of this new Part 1901 is transferred and redesignated from Part 1824 of this Chapter XVIII, and has been revised including a change in title. This revision covers all Agency programs and provides for companies with the National Environmental Policy Act and related guidelines issued by the Council on Environmental Quality.

Interested persons are invited to submit written comments, suggestions, data or arguments to the Office of the Chief, Directives Management Branch, Farmers Home Administration, United States Department of Agriculture, Room 6316, South Building, Washington, D.C. 20250, on or before January 21, 1976. All written submissions made pursuant to this notice will be made available from public inspection at the Office of the Chief, Directives Management Branch, during regular business hours (8:15 a.m.–4:45 p.m.).

Part 1824 is redesignated as Part 1901.

As proposed, Subpart G of Part 1901 as revised and redesignated, reads as follows:

Subpart G—Environmental Impact Statement

Sec.

1901.301 Purposes.
1901.302 Policy.
1901.303 Scope.
1901.304 Identifying actions that may significantly affect the environment.
1901.305 Environmental impact assessments.
1901.306 Coordination with other agencies.
1901.307 Draft and final Environmental Impact Statements.
1901.308 State and local agency review of Environmental Impact Statements.
1901.309 Emergency circumstances.
Exhibit A—Assessing Environmental Impact.
Exhibit B—Cover page for Environmental Impact Statements.
Exhibit C—Summary to accompany Environmental Impact Statements.
Exhibit D—Content of Environmental Impact Statements.

AUTHORITY: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; Sec. 10 Pub. L 93–357, 88 Stat 392; delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Asst. Sec for Rural Development, 7 CFR 2.70.

Subpart G—Environmental Impact Statements

§ 1901.301 Purpose.

This subpart provides agency policies, procedures, and guidelines for compliance with section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, the Council on Environmental Quality (CEQ) Guidelines for Environmental Impact Statements, August 1, 1973, and the Secretary of Agriculture's Memorandum 1695, Supplement 4 (revised). Such compliance includes the preparation of environmental assessments and when needed, the preparation, circulation, and review of Environmental Impact Statements (EIS).

§ 1901.302 Policy.

(a) The Farmers Home Administration (FmHA) will consult with appropriate Federal, State, and local agencies and other organizations and individuals to assess environmental impact of any proposed FmHA actions that the State Director determines will significantly affect the environment. The agency will act to avoid or minimize adverse environmental effects, including secondary effects, and restore or enhance environmental quality.

(b) The requirements of this subpart will be complied with before any agency decision is made about legislation or agency action is completed on making, modifying or establishing regulations, procedures and policy, approving loans or grants, and before funds are made available to a borrower or grantee.

(c) FmHA will assess experience in implementing section 102(2)(C) of NEPA to assure compliance with NEPA requirements and that environmental safeguards are executed according to plan. As appropriate, the Department of Agriculture and CEQ will be informed of problems encountered, and suggestions will be made for additional criteria and guidance needed for full compliance with the NEPA process.

§ 1901.303 Scope.

This subpart covers the following types of actions: new and continuing program activities; recommendations or favorable reports on legislation including requests for appropriations; and making, modifying or establishing regulations, procedures, and policy.

(a) *Program actions requiring an environmental assessment.* Specifically, the following agency actions are presumed to possibly be significant actions under NEPA and, therefore, will require an environmental assessment. If it is determined that the action will have a significant environmental impact, an EIS will be prepared before any funds are committed to the action.

(1) Loans and grants for the development of business and industry.

(2) Loans for multiple housing projects of more than 50 units.

(3) Loans for more than 25 one- to four-family-dwelling units in a subdivision.

(4) Loans in rural areas to construct, enlarge, extend, or otherwise improve:

(i) Community water, sanitary sewage, solid waste disposal, and storm waste water disposal systems.

(ii) Other essential community facilities such as fire and rescue, health, safety, public buildings, schools, transportation, traffic, and law enforcement.

(b) *Legislation.* The CEQ and the Office of Management and Budget (OMB) will provide guidance as needed to assist in identifying the need for EIS and for recommendations or favorable reports on legislation including requests for appropriations. When needed, EIS will be prepared before submitting legislative proposals to OMB. The final EIS, along with comments received on the draft statement, will be made available to the Congress and to the public for consideration in connection with the proposed legislation or report. When the scheduling of Congressional hearings on legislation does not allow adequate time, a draft environmental statement may be provided pending transmittal of comments received and a final statement.

(c) *Program regulations, procedures, and policies.* Environmental assessments and impact statements, when needed, will be prepared when making, modifying or establishing regulations, procedures and policy and for ongoing projects and programs to avoid or minimize adverse environmental effects. Attention should be given to significant environmental considerations not fully evaluated at the time prior loans were made including those prior to enactment of NEPA. Before any additional or subsequent financial assistance is extended in such cases, appropriate action will be taken when needed to mitigate to the extent possible any adverse environmental effects.

(d) *Program actions not requiring an environmental assessment.* The following agency actions are generally presumed not to be significant actions under NEPA and will therefore not usually require an environmental assessment. However, when the unusual circumstances of a specific case indicate a possible significant environmental effect, or that the action might become a controversial issue, and an environmental assessment results in a determination of significant effect, an EIS will be made.

(1) Loans to individual farmers in rural areas for the purchase, development, and operation of family farms.

(2) Loans to individual families in rural areas for the purchase, construction, or improvement of single residences.

(3) Loans in multiple housing facilities of not more than 50 dwelling units.

(4) Loans in housing subdivisions of not more than 25 one- to four-family-dwelling units.

(5) Loans to family farmers and other rural residents to develop land, water, and other related resources for increased production of food and fiber crops, improved pastures, feed crops and water facilities for livestock, and improved habitats for fish and wildlife.

(6) Emergency loans to farmers in declared or designated areas as a result of a major or natural disaster.

§ 1901.304 Identifying actions that may significantly affect the environment.

(a) In assessing significant environmental impact of a proposed action, all aspects of environmental impact will be considered, including those listed in Exhibit A of this subpart. A Federal action significantly affecting the quality of the human environment must be viewed as to the overall, cumulative impact of the proposed action, related Federal actions in the area, and further actions contemplated. Significant impacts may include both beneficial and detrimental effects, even if on balance, the effect will be beneficial. Secondary effects such as associated investments and changed patterns of social and economic activities may, through their impact on existing community facilities and activities, be more significant than the primary action.

(b) An action which significantly affects the quality of the human environment may directly or indirectly affect human beings through effects on the natural environment. Significant environmental effects, however, may sometimes be difficult to define precisely and uniformly due to variation of social, economic, political and ecological conditions. Therefore, sound judgment must be used in determining when environmental statements are required.

(c) Controversy also is a factor to consider in determining if a proposed action is significant. For example, is the action likely to involve the public in an active controversy based upon environmental issues? Will the action have a significant effect on normal economic, social and political processes?

§ 1901.305 Environmental impact assessments.

(a) The FmHA official who receives a preapplication or application for a loan or grant that might have a significant impact on the environment will:

(1) Request the applicant to complete Form FmHA 449–10, "Applicant's Environmental Impact Evaluation."

(2) Complete Form FmHA 440–46, "Environmental Impact Assessment," based upon Form FmHA 449–10 and other information.

(3) Submit both forms and other related information, as a part or the preapplication or application to the State Director.

(b) Applicants may be requested to provide analyses and information for use in making environmental impact assessments and statements. However, in all cases, evaluation of the environmental issues, completion of an environmental assessment and, if needed, preparation of draft and final environmental impact statements will be the responsibility of agency officials.

(c) The State Director will determine the need for an EIS in connection with the loan or grant applied for based upon the material received and any additional information needed for a proper assessment. Appropriate officials of other Federal agencies from which funds also may be obtained should assist in making the assessment.

(d) If the State Director determines that an EIS is not needed, then the clearinghouse and Federal, State, and local agencies (having jurisdiction by law or special expertise or authority to develop and enforce environmental standards), and the applicant will be advised that the loan or grant requested will have no significant impact on the environment. A draft EIS will not be prepared unless additional information or subsequent action indicates the need for one. The State Office will keep a record of "determinations of no significant effect."

§ 1901.306 Coordination with other agencies.

(a) When other agencies are directly involved in an FmHA action that requires an EIS, the State Director will contact the agencies concerned to determine if a joint statement will be prepared and if a single lead agency will assume primary responsibility for preparing a statement. As necessary, the Office of the Coordinator of Environmental Quality Activities, USDA, will be consulted and, if appropriate, assistance will be obtained from CEQ. Factors relevant in determining an appropriate lead agency include the time sequence in which the agencies become involved, the magnitude of their involvement, and their expertise with respect to the proposed activity and related impacts.

(b) When a lead agency is ageed upon other than FmHA, FmHA will provide that agency with information about its respective areas of jurisdiction and expertise. The lead agency will discuss the development of statements with FmHA and other agencies and submit working drafts to them for comments and suggestions. Statements will indicate agency participation and concurrence. Such statements should contain an environmental assessment of the full range of Federal actions involved, reflect the views of all participating agencies, and be prepared before major or irreversible actions have been taken by any of the participating agencies.

§ 1901.307 Draft and final Environmental Impact Statements.

(a) *Explanation of EIS format.* A draft EIS is the first formal statement for filing with CEQ and for review and comment by other agencies and the public. It must fulfill and satisfy, to the fullest extent possible, the requirements established for a final EIS by section 102(2)(C) and other responsibilities set out in section 2 and Title I of NEPA. A final EIS reflects the results of the draft review process. It also is filed with CEQ.

(1) Exhibit B shows the format of the cover page for an EIS, Exhibit C is a guide for preparing a summary sheet that must accompany each EIS, and Exhibit D indicates the information needed in an EIS.

(2) No action that requires an EIS will be taken by FmHA before 90 days has elapsed after the date CEQ publishes the notice of public availability of such statements in the FEDERAL REGISTER or 30 days has elapsed after publishing the notice for final statement. These periods may run concurrently to the extent that they overlap.

(b) *Preparation of EIS by another agency.* If an EIS is needed for a project involving another Federal agency, the State Director will contact that agency to determine agency relationships and responsibilities in the preparation of the statement in accordance with § 1901.306. If the EIS will be prepared by a lead agency other than FmHA, the State Director will so notify the clearinghouse and the County Supervisor.

(c) *Preparation of EIS by FmHA.* If no other agency is involved or FmHA is the lead agency for the preparation of the EIS, the State Director will notify the clearinghouse that, based upon an environmental assessment of the loan or grant requested, a determination has been made that an EIS will be prepared by FmHA.

(1) The State Director will request the District Director and County Supervisor to provide information needed for the preparation of the statement.

(2) The County Supervisor will notify the applicant in writing that an EIS will be prepared, and that final action will not be taken on the application until

V 40 246 DEC 22 75 XUM

such statement has been prepared in accordance with this subpart.

(3) On receiving the needed information, the State Director will prepare and process the draft EIS. The State Director will send 25 copies to the National Office, 2 copies to the clearinghouse, and a copy to regional, State, or other field offices of the Environmental Protection Agency (EPA) as well as to other appropriate Federal agencies and interested organizations and individuals. Comments on the draft will be requested within 45 days.

(4) The State Director will prepare and process the final EIS taking into consideration comments received on the final statement and any other pertinent information. Any comments received on the final statement that warrant further consideration before loan or grant closing should be referred to the Administrator for instructions on actions to be taken.

(5) The State Director will send 5 copies of draft and final impact statements to CEQ. Two copies of the summary sheet will be sent to the Office of Management and Finance (OMF) of USDA for referal to OMB.

(6) If the proposed action to be financed with loan or grant funds is highly controversial and there is strong indication that a public hearing might be appropriate for providing the public with relevant information, the State Director will consider:

(i) The magnitude of the proposal in terms of economic costs, the geographic area, and uniqueness or size of commitment of resources;

(ii) The degree of interest in the proposal, as evidenced by requests from the public and from Federal, State, and local authorities that a hearing be held;

(iii) The complexity of the issue and the likelihood that information will be presented at the hearing that will be of assistance to the agency in fulfilling its responsibilities under the Act; and

(iv) The extent to which public involvement already has been achieved through other means, such as earlier public hearings, meetings with citizen representatives, and written comments on the proposed action.

(7) If a determination is made that a public hearing is appropriate, then the applicant will be advised that an EIS is required and that a public hearing is requested regarding the environmental aspects of the proposed action. A draft EIS will be prepared and made available to the public at least 15 days before such hearings.

(8) Necessary attention will be given to appropriate consultation and coordination in accordance with the requirements of the Fish and Wildlife Coordination Act or the Wildlife requirement of the Watershed Protection and Flood Prevention Act, National Historic Preservation Act and section 4(f) of the Department of Transportation Act 49 U.S.C. 1653(f). To the extent possible statements or findings required by these statutes concerning environmental impact should be combined with the EIS requirements of section 102(2)(C) of NEPA to yield a single document which meets all applicable requirements.

§ 1901.308 State and local agency review of Environmental Impact Statements.

(a) The system of clearinghouses described in OMB Circular A-95 provides for obtaining the views of State and local environmental agencies on proposed FmHA projects to which the Circular applies. Under Part I of A-95, review of the proposed project in the case of Federally assisted projects generally takes place before preparing the impact statement. Therefore, comments obtained on the environmental effects of the proposed project represent inputs to the EIS.

(b) Comments made on environmental effects of proposed Federal or Federally assisted projects by clearinghouses, or by State and local environmental agencies through clearinghouses, in the course of the A-95 review, should be attached to the draft EIS when it is circulated for review.

(c) Copies of the draft statement should be sent to the agencies making such comments, so that they may comment again if they wish.

(d) The clearinghouses also may be used, by mutual agreement, for obtaining reviews of the draft EIS. However, FmHA may wish to deal directly with appropriate State or local agencies in the review of statements. In some cases, the Governor may have designated a specific agency other than the clearinghouse for such reviews. In any case, the clearinghouses should be sent both draft and final copies of the statements.

(e) To aid clearinghouses in coordinating State and local comments, draft statements should include copies of State and local agency comments made earlier under the A-95 process and should indicate on the summary sheet those other agencies from which comments have been requested.

§ 1901.309 Emergency circumstances.

(a) If any emergency makes it necessary to take an action with significant environmental impact without observing the minimum periods for agency review and advance availability of EIS, the State Director will submit to the Administrator:

(1) Complete documentation of the emergency circumstances, and

(2) Recommendations for consulting with CEQ about alternative arrangements.

(b) When there are overriding considerations of expense to the Government or impaired program effectiveness, the Administrator will consult with CEQ about appropriate modifications of minimum periods for review of draft and final EIS.

EXHIBIT A—ASSESSING ENVIRONMENTAL IMPACT

In assessing the environmental impact of a proposed action, the following environmental aspects including social and economic effects as well as physical, will be considered:

A. Air. How and to what extent will the action affect the air quality? Will it contribute to a degradation of air quality? Will it cause changes in chemical and physical composition?

B. Water. How and to what extent will the action affect the availability, supply, use and quality of water?

1. Will the action cause marine pollution or affect commercial fishery and shellfish sanitation?

2. Will it affect waterway regulation and stream modification activities?

3. Will the action divert water from one basin to another and have a significant effect on the quality or quantity of water in either basin?

4. Will the action contribute to a significant depletion or degredation of ground or surface water?

C. Fish and wildlife. How and to what extent will the action affect biological and economic considerations related to effective management of fish and wildlife.

D. Solid Waste. How will the proposed action affect activities related to the creation, management, and disposal of solid waste materials? What type of solid waste will be generated as a result of the action?

E. Noise. Will the proposed action result in kinds of noises and noise levels that will be disturbing or a nuisance in the immediate and overlying areas?

F. Radiation. Will the proposed action create heat, noise, energy waves, electrical or radioactive effects, physical vibrations, or other thermal, electrical or microwave activity that will be disturbing or a nuisance or create interference in the immediate and outlying areas?

G. Hazardous substances. Will the proposed action create or generate any substances, materials, or activities that are dangerous because of toxicity, flammability, combustible or explosive tendancies or characteristics. Will it create or generate substances that might result in contamination of food, clothing, or other materials?

H. Energy supply and natural resources development. 1. Electric energy development, generation, transmission and use.

2. Petroleum development, extraction, refining, transport and use.

3. Natural gas development, production, transmission and use.

4. Coal and minerals development, mining, conversion, processing, transport and use.

5. Renewable resource development, production, management, harvest, transport and use.

6. Energy and natural resources conservation.

7. Allocation and utilization of energy.

I. Land use and management. 1. Land use changes, planning, and regulation of land development.

2. Public land management.

J. Protection of environmentally critical areas. Floodplains, wetlands, beaches and dunes, unstable soils, steep slopes, aquifer recharge areas.

K. Land use in coastal areas.

L. Redevelopment and construction in builtup areas.

M. Density and congestion mitigation.

N. Neighborhood character and continuity.

O. Impacts on low-income populations.

P. Historic, architectural, and archeological preservation. Will the action have a significant effect on areas of recognized archelogical value or properties listed on, or being considered for nomination to, the National Register of Historical Places?

Q. Soil and plant conservation and hydrology.

R. Community recreation facilities—indoor—outdoor. Will the action have a significant effect on public parks or other areas of recognized scenic or recreational value?

S. Settlement patterns.

T. Changes in utility requirements and delivery systems.

U. Changes in social service demands.

V. Population movements—immigration—emigration.

W. Commercial and industrial complexities.

X. Educational facilities and delivery systems.

Y. Health and medical facilities and delivery systems.

Z. Transportation and communication systems and networks. Highways, roads, streets, railroads, airports, TV, radio, telephone, telegraph, microwave, signals.

EXHIBIT B—COVER PAGE FOR ENVIRONMENTAL IMPACT STATEMENTS

Each environmental impact statement will have a cover page with information similar to that shown in the box. (Headings in the left column are for guidance only and should not be listed.)

COVER PAGE

Report number	USDA-FmHA-EIS-ADM-ALA-75-1 [1]
Title of project	Beaver Creek Community, Ford, Alabama. Water and Sewer System.
Subtitle	(Draft) or (Final) Environmental Statement.
Name, title, address, and telephone number of FmHA official who prepared statement.	John A. Garrett, State Director, 474 South Court Street, Montgomery, Alabama 36104, FTS: 205-263-7302, Com: 205-265-5611 Ext. 302.
Applicant's name and address	Beaver Creek Community, Ford, Alabama 36104.
Date prepared	February 29, 1975.
Sponsoring agency (name and address).	Prepared by USDA—Farmers Home Administration, U.S. Department of Agriculture, Farmers Home Administration, 474 South Court Street, Montgomery, Alabama 36104.

[1] U.S. Department of Agriculture, Farmers Home Administration, Environmental Impact Statement (Administrative), State Fiscal Year 1975, sequential number 1 within the year. Draft (D) and final (F) statements for the same project should be designated as "D" or "F" and assigned identical report numbers even though the final statement may be prepared in a subsequent fiscal year.

EXHIBIT C—SUMMARY TO ACCOMPANY ENVIRONMENTAL IMPACT STATEMENTS

Each environmental impact statement will include a summary sheet with information in the following format:

SUMMARY SHEET

Environmental Impact Statement, prepared in Accordance With Section 102(2)(C) of P.L. 91-190. United States Department of Agriculture, Farmers Home Administration.

Prepared by name-title-address-telephone, title of Statement, (name of proposed action and applicant), draft statement □, final statement □, administrative action □, legislative action □.

Brief description of action and its purpose; location of activity; State and county, kind and amount of assistance requested from FmHa and other sources, if any; estimated total cost of activity; kind of facility or activity to be developed; estimated dates for starting and completing development. Indicate any other proposed Federal actions in the area that are related to and discussed in the statement, if any.

Summary of environmental impacts and adverse environmental effects.

Summary of major alternatives considered.

For draft statements list all Federal, State, and local agencies and other parties from which comments were requested.

For draft statements list all Federal, State, and local agencies and other parties from which comments were received.

This statement sent to CEQ on

_____
(Date)

Draft stateemnt sent to CEQ on

_____
(Date)

_____
(Enter only on final EIS)

EXHIBIT D—CONTENT OF ENVIRONMENTAL IMPACT STATEMENTS

Information should be presented in a form easily understood, giving attention to the substance of the information rather than to the particular form, length, or details of the statement. A systematic, interdisciplinary approach integrating the natural and social sciences and environmental design arts will be used. Information need not always occupy a distinct section of the statement if it is otherwise adequately covered in discussing the impact of the proposed action and its alternatives. Environmental impact statements will include the following headings in the order listed:

ENVIRONMENTAL IMPACT STATEMENT

United States Department of Agriculture, Farmers Home Administration, prepared by name-title-address-telephone, title of statement, (name of proposed action and applicant), draft statement □ final statement □ administrative action □ legislative action □.

Description. Deseribe the proposed action clearly including enough information and technical data to give readers a clear understanding of the nature of the proposed action. Highly technical and specialized analyses and data should, if needed, be attached to this statement. Where appropriate, describe the present environment, location, size, land ownership and status, physiograph, ecosystems, climate, and other special features. Where relevant, provide maps or other graphic material. Give the objectives and purposes of the proposal, along with other relevant background information.

The interrelationships of the proposed action with other projects and possible cumulative effects should be presented. Identify growth characteristics of the affected area and any population and growth assumptions used. Use OBERS Projections (compiled by the Bureau of Economic Analysis of the Department of Commerce and the Economic Research Service of the Department of Agriculture for the Water Resources Council) if available.

Describe the relationship of the proposal to land use plans, policies, and controls for the affected area. If conflicts exist, the proposed resolution of these conflicts or the reasons why they cannot be resolved must be thoroughly addressed.

Environmental impacts. Analyze and describe both the anticipated favorable and adverse impacts of the proposed action as it affects the environment. Where appropriate, assess international environmental impacts. Include the natural, social, and economic aspects of the environment in the assessment. Air, water, land use, wildlife, civil rights, minority groups, and persons with low incomes, for example, may be affected by a proposed action. (See Exhibit A for examples of other physical, social, and economic aspects of the environment to be considered in assessing environmental impact.)

Consider primary, secondary, and cumulative effects in the analysis. Measures to minimize the adverse environmental impacts of the proposal should be discussed. Include summaries of the probable adverse effects that cannot be avoided such as water or air pollution, undesirable land use patterns, damage to life systems, urban congestion, and health hazards. Interests and considerations of Federal policy that might offset the adverse environmental effects should be indicated.

Relationship between local short-term uses of the environment and the maintenance and enhancement of long-term productivity. Assess the action for cumulative and long-term effects from the perspective that each generation is trustee of the environment for succeeding generations.

Irreversible and irretrievable commitment of natural, cultural, and other resources. Identify the extent to which the action curtails the range of beneficial use of the environment.

Alternatives to the proposed action. Alternatives to accomplish an objective should be identified and effects evaluated as part of the planning process. Evaluation must be sufficient to determine benefits, costs, and risks. The "best" alternative is selected as the proposed action or several alternatives are presented, pending selection of the best alternative, and presented to others for review and criticism. The impacts and consequences of each alternative should be presented so that others may form an independent view of the worth of the proposed action and possible alternative courses of action. In reviewing the draft statement, additional viable alternatives may be identified. Alternatives may include those not within the existing authority of the agency. A "no action" alternative will generally have to be evaluated, along with other alternatives such as different designs, locations, or new approaches to accomplishing the objectives.

Available benefit/cost information for the proposed action and each alternative should be either appended to the EIS or made available to the public.

Consultation with appropriate Federal agencies and review by State and local agencies and public involvement. The draft EIS should describe consultation and involvement and a summary of the results of this action, including a list of those consulted.

Attach all substantive comments received on the draft EIS (or summaries of the draft where response has been exceptionally heavy) to the final EIS, whether or not each such comment is thought to merit individual discussion by the agency in the text of the EIS.

Cover sheet and summary sheet for environmental impact statements. Include for all EIS a cover page and a summary sheet as shown in Exhibits B and C of this subpart.

All comments should be submitted in writing to (name and address of the FmHA official who prepared the EIS) within (45 days for draft statements) and (30 days for final statements). Comments on the draft statement (will be) (were) considered in the development of the final statement.

No final action will be taken by the Farmers Home Administration before (90 days for draft statements) and (30 days for final statements) from the date CEQ pub-

V401246 DEC 22 75 XUM

lished the notice of public availability of this statement in the FEDERAL REGISTER.

Copies of this EIS are being made available to the Council on Environmental Quality, The Environmental Protection Agency, interested Federal and State agencies, and other organizations and parties known to have a direct interest in the action.

Copies of the statement are available from the agency official who prepared it or from the Administrator, Farmers Home Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Date statement prepared----------

Copies of this EIS are being made available to the Council on Environmental Quality, The Environmental Protection Agency, interested Federal and State agencies, and other organizations and parties known to have a direct interest in the action.

Copies of the statement are available from the agency official who prepared it or from the Administrator, Farmers Home Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Date statement prepared----------

Effective date. This document shall be effective on December 22, 1975.

Dated: December 15, 1975.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 154]

EDUCATIONAL OPPORTUNITY CENTERS PROGRAM

Proposed Criteria for Funding for Fiscal Year 1976

Pursuant to the authority contained in Title IV, Part A, Subpart 4 of the Higher Education Act of 1965, as amended (20 U.S.C. 1070d–1070d–1), notice is hereby given that the Commissioner of Education, with the approval of the Secretary of Health, Education, and Welfare proposes to issue the regulations set forth below which contain funding criteria which he will utilize in evaluating applications to carry out Educational Opportunity Centers.

Educational Opportunity Centers serve areas with major concentrations of low-income persons by providing, in coordination with other applicable programs and services, information with respect to financial and academic assistance available for persons in such areas desiring to pursue a program of postsecondary education; assistance to such persons in applying for admission to institutions of higher education, including the preparation of applications for use by admissions and financial aid officers; and counseling and tutorial services and other necessary assistance to such persons while attending such institutions.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposed criteria to the Division of Student Support and Special Programs, Bureau of Postsecondary Education, U.S. Office of Education, Seventh and D Streets SW., Room 4010, Washington, D.C. 20202. Comments received in response to this Notice will be available for public inspection at the above office Mondays through Fridays between 8:30 a.m. and 4:30 p.m. All relevant material must be received on or before January 21, 1975, unless January 21, 1975, is a Saturday, Sunday, or Federal holiday, in which case such material must be received by the next following business day.

(Catalog of Federal Domestic Assistance Program Number: 13.543 Educational Opportunity Centers)

Dated: October 10, 1975.

T. H. BELL,
U.S. Commissioner of Education.

Approved: November 21, 1975.

MARJORIE LYNCH,
Acting Secretary of Health, Education, and Welfare.

EDUCATIONAL OPPORTUNITY CENTERS

Section 154.6 of Part 154 of Title 45 of the Code of Federal Regulations is revised to read as follows:

§ 154.6 Funding criteria.

(a) *Continuation awards.* Priority will be given to a request for funds to continue the operation of a Center that (1) received funds in a prior fiscal year and (2) was approved for a multi-year work period that has not expired. (continuation award)

(b) *Conditions for approval.* Requests for continuation awards will be approved only if (1) the need continues to exist for the services provided by the Center;

(2) Satisfactory progress has been made in implementing the approved work plan and in achieving the Center's goals and objectives, as indicated by site visits, progress reports, and other relevant data;

(3) The Center continues to offer promise of success in providing information to residents of the target area on the variety of postsecondary options available, increasing the rate at which persons from the target area enroll in postsecondary educational institutions, and improving the rate at which enrolled students from the target area remain in and complete programs of postsecondary education;

(4) All required reports, including data collections reports and quarterly performance and fiscal reports, have been received and accepted by the Commissioner; and

(5) Funds are available to continue the Center.

(c) *New awards.* Except as provided in paragraphs (a) and (b) of this section, the Commissioner will select applicants to be funded under this part on the basis of the criteria set forth in § 100a.26(b) of this chapter, as well as the following additional criteria:

(1) The degree to which services are needed to enhance access to postsecondary education, as indicated by (i) the number of secondary and postsecondary students and other persons residing in the area; (ii) the number of low-income families in the target area; (iii) the historical rate of participation in postsecondary education by residents in the area; and (iv) the number of persons to be served by the Center;

(2) The extent to which the applicant has successfully operated a Center comparable or identical to those authorized under this part. If that Center was not funded under the Educational Opportunity Centers Program, the applicant shall provide a description of that Center, including the number of low-income persons served and the kinds of services offered, the number of persons enrolled in and graduated from postsecondary institutions as the result of services offered, and the percentage of increase in postsecondary enrollment and graduation by residents of the area served,

(3) The comprehensiveness of the applicant's plan for carrying out the activities under § 154.7 and the extent to which these activities will result in increased enrollment and retention in and graduation of low-income, educationally disadvantaged persons from postsecondary institutions;

(4) The qualifications of the proposed staff and the extent to which the staff has experience in dealing with low-income and physically handicapped persons;

(5) The extent to which representatives from the community, secondary schools, and postsecondary schools have participated in the formulation of the proposal and will participate in the operation of the Center;

(6) The extent to which all members of a consortia will make resources available and participate in the activities of the Center to reach the goals and objectives of the proposed work program;

(7) The extent of the Center's relationship to Talent Search, Upward Bound, and Special Services for Disadvantaged Students projects in the area and to such other similar programs and services, including those for the physically handicapped, in terms of (i) coordinating services to individuals who participate in more than one such program; (ii) providing services not otherwise available from Talent Search, Upward Bound, and Special Services projects and other similar programs; and (ii) avoiding duplication of services;

(8) The degree to which the Center will draw upon and coordinate the resources and staff efforts of institutions of higher education and postsecondary education in admitting low-income, educationally disadvantaged persons.

(9) The reasonableness of the allocation of resources among the Center's required activities; and

(10) The reasonableness of the cost for operating the Center.

(d) *Geographic consideration.* The Commissioner will award grants or contracts to insure that major concentrations of low-income persons, in both urban and rural areas, will be represented among the areas served by Centers.

(20 U.S.C. 1070d–1)

DEPARTMENT OF TRANSPORTATION

Coast Guard

[33 CFR Part 117]

[CGD 75-231]

DUTCH KILLS, N.Y.

Proposed Drawbridge Operation Regulations

At the request of the City of New York, the Coast Guard is considering revising the regulations for the Hunterspoint Avenue drawbridge across Dutch Kills, Queens, New York, to require at least 6 hours notice at all times. The draw is presently required to open on signal. This change is being considered because of limited requests for draw openings.

Interested persons may participate in this proposed rulemaking by submitting written data, views, or arguments to the Commander (oan), Third Coast Guard District, Governors Island, New York, New York 10004. Each person submitting comments should include his name and address, identify the bridge, and give reasons for any recommended change in the proposal. Copies of all written communications received will be available for examination by interested persons at the office of the Commander, Third Coast Guard District.

The Commander, Third Coast Guard District, will forward any comments received before February 5, 1976, with his recommendations to the Chief, Office of Marine Environment and Systems, who will evaluate all communications received and take final action on this proposal. The proposed regulations may be changed in the light of comments received.

In consideration of the foregoing, it is proposed that Part 117 of Title 33 of the Code of Federal Regulations, be amended by adding a new § 1117.162 immediately after § 117.161 to read as follows:

§ 117.162 Dutch Kills: City of New York highway bridge at Hunterspoint Avenue, Queens.

The draw shall open on signal if at least 6 hours notice is given.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; (33 U.S.C. 499, 49 U.S.C. 1655(g)(2)); 49 CFR 1.46(c)(5), 33 CFR 1.05–1(c)(4)).

Dated: December 12, 1975.

D. J. RILEY,
Captain, U.S. Coast Guard, Acting Chief, Office of Marine Environment and Systems.

[FR Doc.75-34436 Filed 12-19-75;8:45 am]

[46 CFR Parts 32, 92, 190]

[CGD 75-032]

STRUCTURAL FIRE PROTECTION

"B" Class Bulkheads

The Coast Guard is considering amending the requirements for "B" class bulkheads in Parts 32, 92, and 190 of Title 46 of the Code of Federal Regulations by deleting the provisions that the bulkheads be capable of preventing the passage of smoke when subjected to the standard fire test described in those requirements.

Interested persons are invited to participate in this proposed rulemaking by submitting written views, data, or arguments to the Executive Secretary, Marine Safety Council (G–CMC/81), U.S. Coast Guard, Washington, D.C. 20590. Each person submitting a comment should include his name and address, identify this notice (CGD 75–032) and the specific section of the proposal to which his comment applies, and give reasons for his comments. The proposal may be changed in light of the comments received.

All comments received before February 5, 1976, will be considered before final action is taken on the proposal. Copies of all written comments received will be available for examination by interested persons in Room 8117, Nassif Building, 400 Seventh Street, S.W., Washington, D.C.

No public hearing is planned but one may be held at a time and place to be set in a later notice in the FEDERAL REGISTER if requested in writing by an interested person raising a genuine issue and desiring to comment orally at a public hearing.

Parts 32, 92, and 190 of Title 46 presently require that a "B" class bulkhead used in construction of a tank vessel, cargo or miscellaneous vessel, or oceanographic vessel be capable of preventing the passage of flame and smoke for at least one half hour when subjected to the standard fire test described in those Parts. These requirements are not consistent with Regulation 35 of Chapter II of the International Convention for the Safety of Life at Sea (1960), with the approval requirements in Subpart 164.008 of Title 46, or with the "B" class bulkhead requirements for passenger vessels in Part 72 of Title 46. "B" class bulkheads are described in Regulation 35 and § 72.05–10(c)(2) of those capable of preventing the passage of flame when subjected to the standard fire test; these regulations do not contain additional provisions concerning a capability to prevent passage of smoke. Subpart 164.008 provides in part that a bulkhead panel used in class B–15 construction on merchant vessels is approved for use in vessel construction if the panel can prevent the passage of flame for at least one half hour when subjected to the standard fire test and if the bulkhead meets certain thermal insulation requirements.

When the "B" class bulkhead requirements were originally published in Parts 32, 92, and 190, inclusion of the reference to smoke was an error. Since their publication the Coast Guard has continued to approve "B" class bulkheads for use in merchant vessel construction using the procedures described in Subpart 164.008 and, therefore, without considering whether the bulkheads can prevent the passage of smoke. The Coast Guard has continued to use the approval procedures in Subpart 164.008 in order to implement Regulation 35, which is the international standard for "B" class bulkhead construction on vessels. Accordingly, this notice proposes to delete the passage of smoke requirements in Parts 32, 92, and 190.

These amendments are proposed under the authority of 46 U.S.C. 375, 391a, and 416; 49 U.S.C. 1655(b); and 49 CFR 1.4(b) and 1.46.

In consideration of the foregoing, the Coast Guard proposes to amend Parts 32, 92, and 190 of Chapter I of Title 46 of the Code of Federal Regulations as follows:

PART 32—SPECIAL EQUIPMENT, MACHINERY, AND HULL REQUIREMENTS

§ 32.57–5 [Amended]

1. In § 32.57–5(c), delete the words "and smoke" from the second sentence.

PART 92—CONSTRUCTION AND ARRANGEMENT

§ 92.07–5(c) [Amended]

2. In § 92.07–5(c), delete the words "and smoke" from the second sentence.

PART 190—CONSTRUCTION AND ARRANGEMENT

§ 190.07–5(c) [Amended]

3. In § 190.07–5(c), delete the words "and smoke" from the second sentence.

Dated: December 17, 1975.

W. M. BENKERT,
Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

[FR Doc.75-34437 Filed 12-19-75;8:45 am]

[46 CFR Part 105]

[CGD 75-105]

VESSELS OF NOT MORE THAN 5000 GROSS TONS, USED IN PROCESSING AND ASSEMBLING OF FISHERY PRODUCTS HAVING ON BOARD INFLAMMABLE OR COMBUSTIBLE CARGOES IN BULK

Proposed Application

The Coast Guard is considering amending the regulations for commercial fishing vessels dispensing petroleum products, contained in 46 CFR Part 105, to include vessels of not more than 5000 gross tons, used in the processing and assembling of fishery products in the fisheries of the States of Oregon, Washington, and Alaska, if they have on board inflammable or combustible cargo in bulk.

Pub. L. 93–430 permanently exempted these vessels from the requirements of

V 40 246 DEC 22 75 XUM

46 U.S.C. 391a (Vessels carrying certain cargoes in bulk), but authorized the Secretary of the department in which the Coast Guard is operating to promulgate separate regulations concerning the extent to which and the conditions under which these vessels may be allowed to have on board inflammable or combustible cargoes in bulk.

Accordingly, the Coast Guard proposes to make the existing regulations in Part 105 applicable to these vessels. Part 105 was originally promulgated to regulate the transporting and handling of inflammable or combustible cargo in bulk on board cannery tenders, fishing tenders, and fishing vessels of not more than 500 gross tons used in the salmon or crab fisheries of the States of Oregon, Washington, and Alaska, when engaged exclusively in the fishing industry.

The regulations in Part 105 are appropriate for this new class of exempted vessels, since this new class is essentially similar to the class of exempted vessels already regulated under Part 105, with the exception of the increase in size from 500 to 5000 gross tons.

Interested persons or organizations may participate in this proposed rulemaking by submitting written data, views, or arguments to the Commandant (G–CMC/82), U.S. Coast Guard, Washington, D.C. 20590. Each person or organization submitting a comment should include their name and address, identify this notice (CGD 75–10[illegible]), and give reasons for any recommendations made. Comments received before February 5, 1976, will be considered before final action is taken on this proposal. Copies of all written comments received will be available for examination in room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, SW., Washington, D.C. This proposal may be changed in light of comments received.

No hearing is contemplated, but one may be held at a time and place set in a later notice in the FEDERAL REGISTER, if requested by a person or organization desiring to comment orally at a public hearing and raising a genuine issue.

In consideration of the foregoing, it is proposed to amend 46 CFR Part 105 as follows:

1. Section 105.01–1 is revised to read as follows:

§ 105.01–1 Purpose.

The purpose of the regulations in this part is to provide adequate safety in the transporting and handling of inflammable or combustible cargo in bulk on board certain commercial fishing vessels and tenders, as authorized by 46 U.S.C. 391a (Tanker Act; R.S. 4417a), as amended by section 4 of Pub. L. 90–397 (approved July 11, 1968, 82 Stat. 341) and section 6(3) of Pub. L. 93–430 (approved October 1, 1974, 88 Stat. 1183). The regulations in this part set forth minimum requirements for two categories of commercial fishing vessels and tenders which have on board inflammable or combustible cargo in bulk.

2. Section 105.01–5 is revised to read as follows:

§ 105.01–5 Intent of Pub. L. 90–397 (approved July 11, 1968, 82 Stat. 341) and Pub. L. 93–430 (approved October 1, 1974, 88 Stat. 1180).

(a) Pub. L. 90–397 allowed cannery tenders, fishing tenders, and fishing vessels of not more than 500 gross tons used in the salmon or crab fisheries of the States of Oregon, Washington, and Alaska when engaged exclusively in the fishing industry, to have on board inflammable or combustible cargo in bulk to the extent and upon conditions as might be required by regulations promulgated by the Secretary of the department in which the Coast Guard is operating.

(b) Pub. L. 93–430 allowed vessels of not more than 5000 gross tons used in the processing and assembling of fishery products in the fisheries of the States of Oregon, Washington, and Alaska to have on board inflammable or combustible cargo in bulk to the extent and upon conditions as might be required by regulations promulgated by the Secretary of the department in which the Coast Guard is operating.

3. Section 105.01–10 is amended by revising paragraph (a) to read as follows:

§ 105.01–10 Effective date of regulations.

(a) Amendments, revisions, or additions to the regulations in this part will become effective 90 days after the date of publication in the FEDERAL REGISTER, unless the Commandant directs otherwise.

* * * * *

§ 105.05–1 [Amended]

4. Section 105.05–1 is amended by:

a. In paragraph (a), inserting the words "and all vessels of not more than 5000 gross tons used in the processing and assembling of fishery products in the fisheries of the States of Oregon, Washington, and Alaska, the construction of which is contracted for on or after "----------" (date of final rule publication) between the numerals "1969" and the word "which."

b. In paragraph (b), inserting the words "and all vessels of not more than 5000 gross tons used in the processing and assembling of fishery products in the fisheries of the States of Oregon, Washington, and Alaska, the construction of which is contracted for prior to "----------" (date of final rule publication) between the numerals "1969" and the word "which."

5. Section 105.05–3 is amended by revising it to read as follows:

§ 105.05–3 New vessels and existing vessels for the purpose of application of regulations in this part.

(a) *New vessels.* In the application of the regulations in this part, the term "new vessels" means any commercial fishing vessel of not more than 500 gross tons used in the salmon or crab fisheries of Oregon, Washington, or Alaska, the construction of which is contracted for on or after December 1, 1969, and vessels of not more than 5000 gross tons used in the processing and assembling of fishery products in the fisheries of the States of Oregon, Washington, and Alaska, the construction of which is contracted for on or after "----------" (date of final rule publication).

(b) *Existing vessels.* In the application of the regulations in this part, the term "existing vessels" means any commercial fishing vessel of not more than 500 gross tons used in the salmon or crab fisheries of Oregon, Washington, or Alaska, the construction of which is contracted for prior to December 1, 1969, and vessels of not more than 5000 gross tons used in the processing and assembling of fishery products in the fisheries of the States of Oregon, Washington, and Alaska, the construction of which is contracted for prior to "----------" (date of final rule publication).

6. Section 105.05–5 is revised to read as follows:

§ 105.05–5 Types of vessels.

(a) The only types of commercial fishing vessels to which the provisions of this part apply are self-propelled manned vessels with one of the following:

(1) Permanently installed dispensing tanks or containers on open decks.

(2) Permanently installed dispensing tanks or containers located below deck or in closed compartments.

(3) Temporary dispensing tanks or containers installed on open decks.

7. Section 105.10–25 is amended by revising it to read as follows:

§ 105.10–25 Commercial fishing vessel.

(a) The term "commercial fishing vessel" includes fishing vessels, cannery tenders, fishing tender vessels, and vessels processing or assembling fishery products.

8. Section 105.90–1 is amended by: revising the section heading and revising the introductory portion of paragraph (b) to read as follows:

§ 105.90–1 Existing commercial fishing vessels dispensing petroleum products.

* * * * *

(b) Existing vessels must meet the following requirements:

(1) * * *

* * * * *

(88 Stat. 1183 (46 U.S.C. 391a); 49 CFR 1.46(o)(4))

Dated: December 16, 1975.

W. M. BENKERT,
Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

Federal Aviation Administration
[14 CFR Part 39]
[Airworthiness Docket No. 74–SW–26]

BELL MODEL 206B HELICOPTERS

Proposed Airworthiness Directives

The Federal Aviation Administration is considering amending Part 39 of the Federal Aviation Regulations by adding an airworthiness directive applicable to Bell Model 206B helicopters, serial numbers 914 through 1414. Amendment 39–1954 (39 FR 32549), AD 74–19–03, required modification of all inboard ribs in the horizontal stabilizers of Bell Models 206A and 206B helicopters, serial numbers 1 through 913, in accordance with Bell Helicopter Company Service Bulletin No. 206–01–73–7, Revision A, to prevent possible failure of the inboard ribs. The agency has received reports of inboard ribs cracking on helicopters having serial numbers above 913. The Helicopter Association of America and Bell Helicopter Company suggested that horizontal stabilizers on Model 206B helicopters, serial numbers 914 through 1413, be modified to comply with Bell Helicopter Company Service Bulletin No. 206–01–73–7, Revision D, also. In the interest of safety, the agency proposes to issue an airworthiness directive, applicable to Model 206B helicopters, serial numbers 914 through 1413, requiring the modification of the inboard rib on the right and left stabilizers.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or comments as they may desire. Communications should identify the docket number and be submitted in triplicate to the Regional Counsel, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101. All communications received on or before January 23, 1976 will be considered by the Director before taking action upon the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments will be available, both before and after the closing date for comments, in the Office of Regional Counsel for examination by interested persons.

This amendment is proposed under the authority of Sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423) and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, it is proposed to amend § 39.13 of Part 39 of the Federal Aviation Regulations by adding the following new airworthiness directive:

BELL. Applies to Bell Model 206B helicopters, serial numbers 914 through 1413, certificated in all categories.

Compliance required within 200 hours' time in service after the effective date of this AD, unless already accomplished.

To prevent possible failure of the inboard ribs on the horizontal stabilizers, P/N 206–020–119 and 206–020–123, replace any cracked inboard ribs and modify all inboard ribs by installing a doubler specified in and using the applicable procedures described in Items 3 through 24, Bell Helicopter Company Service Bulletin No. 206–01–73–7, Revision D, dated August 5, 1974, or later FAA approved revision.

Equivalent methods of compliance with this airworthiness directive may be approved by the Chief, Engineering and Manufacturing Branch, Flight Standards Division, Southwest Region, Federal Aviation Administration.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to the Service Manager, Bell Helicopter Company, P.O. Box 482, Fort Worth, Texas 76101. These documents may also be examined at the Office of the Regional Counsel, Southwest Region, FAA, 4400 Blue Mound Road, Fort Worth, Texas, and at FAA Headquarters, 800 Independent Avenue, S.W., Washington, D.C. A historical file on this AD which includes the incorporated material in full is maintained by the FAA at its headquarters in Washington, D.C., and at the Southwest Regional Office in Fort Worth, Texas.

Issued in Fort Worth, Texas, on December 10, 1975.

A. H. THURBURN,
Acting Director, Southwest Region.

NOTE: The incorporation by reference provisions in this document was approved by the Director of the FEDERAL REGISTER on June 19, 1967.

[14 CFR Part 39]
[Docket No. 75–NW–22–AD]

BOEING 707–300/400/300B/300C SERIES AIRPLANES

Proposed Airworthiness Directives

Amendment 39–1897, AD 74–15–03, requires a one time inspection of the wing skin at the four critical fasteners under the external rib chord at WBL 59.24 on Boeing Model 707–300/400/300B/300C series airplanes. After issuing Amendment 39–1897 the agency has determined from fatigue studies that repetitive inspections are necessary. Therefore, the agency is considering amending Amendment 39–1897 to require eddy current inspections of the wing skin at the four critical fasteners, 4,000 flights after the initial inspection and/or oversizing, and each 2,000 flights thereafter.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the docket number and be submitted in duplicate to the Department of Transportation, Federal Aviation Administration, Northwest Region, Office of Regional Counsel, Attention: Airworthiness Rules Docket, 9010 East Marginal Way South, Seattle, Washington 98108. All communications received on or before February 1, 1976, will be considered by the Administrator before taking action upon the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

In consideration of the foregoing, it is proposed to amend § 39.13 of the Federal Aviation Regulations, Amendment 39–1897, AD 74–15–03, as follows:

1. Add the following to the end of the paragraph preceding paragraph (1): "Repetitive inspections are noted in paragraph (3) and terminating action is noted in paragraph (4)."

2. Delete the last sentence of paragraph (1)(a).

3. Add paragraphs (3) and (4) as follows:

(3) Repetitive inspections are to be accomplished at the times specified in (a) or (b) below, in accordance with the eddy current inpection procedures of Boeing Service Bulletin No. 3168, or in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region. Wing skins found cracked are to be repaired prior to further flight in accordance with Boeing Service Bulletin No. 3168 or in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region. Thereafter reinspect at intervals not to exceed those specified in (a) below.

(a) For airplanes which have been modified in accordance with Boeing Service Bulletin No. 2626, following the inspection required by paragraph (1)(a), reinspect at intervals not to exceed 2,000 flights.

(b) For airplanes which have not been modified in accordance with Boeing Service Bulletin No. 2626, inspect within 4,000 flights after accomplishment of the eddy current inspections required by paragraph (1)(a) and at intervals thereafter not to exceed 2,000 flights.

(4) Replacement of the upper wing skin in accordance with Boeing Service Bulletin No. 2607, or in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region constitutes terminating action for this AD.

This amendment is proposed under the authority of Sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423) and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Seattle, Washington December 12, 1975.

C. B. WALK, Jr.,
Director, Northwest Region.

[14 CFR Part 39]
[Airworthiness Docket No. 75–SW–79]

MODELS 206A, 206B, 206A–1 AND 206B–1 HELICOPTERS

Proposed Airworthiness Directives

The Federal Aviation Administration is considering amending Part 39 of the Federal Aviation Regulations by adding an airworthiness directive applicable to certain Bell Models 206A, 206B, and all

V401246 DEC 22 75 XUM

Models 206A–1 and 206B–1 helicopters. There have been two cases of alleged cracks occurring in certain main rotor hub yokes installed on Models 206A and 206B helicopters.

Since this condition is likely to exist or develop in other main rotor hub yokes installed on certain Bell Models 206A and 206B helicopters and on all Models 206A–1 and 206B–1 helicopters, the proposed airworthiness directive would require a one-time inspection and possible rework of the main rotor hub yoke.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or comments as they may desire. Communicatons should identify the docket number and be submitted in triplicate to the Regional Counsel, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101. All communications received on or before January 23, 1976, will be considered by the Director before taking action upon the proposed rule. The proposals contained in this notice may be chnaged in the light of comments received. All comments will be available, both before and after the closing date for comments, in the Office of the Regional Counsel for examination by interested persons.

This amendment is proposed under the authority of Sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423) and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, it is proposed to amend Section 39.13 of Part 39 of the Federal Aviation Regulations by adding the following new airworthiness directive:

BELL. Applies to Bell Models 206A, 206B, 206A–1, and 206B–1 helicopters certificated in all categories, except those having installed main rotor hub yokes delivered as replacement spar parts from Bell Helicopter Company after August 11, 1974, and Models 206A and 206B bearing serial numbers 1174, 1192, 1252, 1355, 1381, 1382, 1390, 1398, 1399, 1400, 1408 through 1411, 1444, 1464, 1466, and subsequent.

Compliance required within 200 hours' time in service after the effective date of this AD unless already accomplished.

To detect and prevent possible cracks in the main rotor hub yokes, accomplish the following:

(a) Remove the main rotor hub assembly from the helicopter and remove the pillow blocks and trunnion from the hub assembly in accordance with the pertinent model maintenance manual.

(b) Inspect the yoke for cracks in each trunnion bore and in each tooling hole in the yoke web section using a 10-power or higher magnifying glass or using an equivalent inspection method.

(c) If a crack is found, remove and replace the discrepant yoke before further flight.

(d) Inspect each yoke trunnion bore edge for nicks, scratches, or tool marks using a 10-power or higher magnifying glass or using an equivalent inspection method.

(e) If nicks, scratches, or tool marks are found on these edges, they must be removed, before further flight, as prescribed in Bell Helicopter Company Service Bulletin No. 206–04–1–741, Revision A, dated August 22, 1974, or later approved revision or in accordance with an equivalent FAA approved procedure.

(f) Assemble and install the main rotor hub on the helicopter in accordance with the pertinent model maintenance manual.

Issued in Fort Worth, Texas, on December 10, 1975.

A. H. THURBURN,
Acting Director,
Southwest Region.

[14 CFR Part 71]

[Airspace Docket No. 75–GL–69]

TRANSITION AREA

Proposed Designation

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to designate a transition area at Kewanee, Illinois.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon, Des Plaines, Illinois 60018. All communications received on or before January 21, 1976 will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon, Des Plaines, Illinois 60018.

An instrument approach procedure has been developed for the Kewanee Municipal Airport, Kewanee, Illinois. Controlled airspace is required to protect this procedure.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (40 FR 441), the following transition area is added:

KEWANEE, ILLINOIS

That airspace extending upward from 700 feet above the surface within a five-mile radius of the Kewanee Airport (latitude 41°13'08" N., longitude 89°57'42" W.); and within three miles each side of the 218° bearing from the airport, extending from the five-mile radius area to eight miles southwest.

This amendement is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C 1348), and of Section 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)].

Issued in Des Plaines, Illinois, on December 8, 1975.

R. O. ZIEGLER,
Acting Director,
Great Lakes Region.

National Highway Traffic Safety Administration

[49 CFR Part 571]

[Docket No. 75–16; Notice 05]

AIR BRAKE SYSTEMS; TRUCKS AND TRAILERS

Stopping Distance Requirements

This notice proposes amendment of Standard No. 121, *Air Brake Systems*, 49 CFR 571.121, to establish stopping distance requirements that are less stringent than existing requirements, and to revise dynamometer requirements to permit more flexibility in vehicle design. The existing interim retardation force requirements for trailers would be replaced by less stringent values. In addition, the recovery, actuation timing, and parking brake requirements for towing vehicles would be modified, and full applicability of the standard to some categories of specialized air-braked trucks would be delayed.

This proposed modification of the standard is responsive to information developed at a public meeting held in Washington, D.C., on October 29, 30, and 31, 1975, as well as other information collected by the NHTSA on field experience since the standard's implementation. Additionally, the notice responds to requests from Freightliner Corporation, PACCAR Corporation, White Motor Corporation, and the American Trucking Associations (ATA). This agency has responded separately to the issues raised at the public meeting concerning air-braked buses (40 FR 52856, November 13, 1975).

Standard No. 121 specifies minimum performance requirements for air-braked trucks, buses, and trailers. The standard was issued in February 1971 and went into effect for trailers on January 1, 1975, and for trucks and buses on March 1, 1975. Many aspects of air brake performance are regulated, including limitations on vehicle stopping distances (except for trailers) and the amount of wheel slip that occurs during braking (S 5.3). These two requirements are intended to improve the stopping ability and directional control of air-braked vehicles to reduce the number and severity of crashes in which they are involved. Manufacturers modified their brake systems in two fundamental respects to meet these requirements: an increase in brake torque, particularly on the front axles of some trucks, and introduction of antilock systems that limit wheel slip as specified by the standard.

Thousands of trucks, buses, and trailers have been manufactured to comply with Standard No. 121 since its effective dates, and have been certified by their manufacturers as complying with the standard. Many of these vehicles are in service and reports on their peformance have been made to the NHTSA. The agency has undertaken testing of 121-equipped vehicles at its Safety Research laboratory to evaluate performance of vehicles manufactured to comply with the standard. The agency has also contracted for a large-scale statistical evaluation of in-use vehicles to measure the effect of the standard on accident rates and severity, as well as factors such as maintenance, reliability, and operating costs. To evaluate the first-hand experience with 121 implementation, the NHTSA held discussions during September 1975 with all manufacturers of antilock systems, several large manufacturers of air-braked vehicles, and the major manufacturer of air-braked axles for buses, heavy trucks, and specialized air-braked vehicles. As noted, a public meeting to hear views of interested persons on the standard was held in October 1975.

The public meeting was held, in large measure, because of strong expressions of dissatisfaction by numerous representatives of the air-braked vehicle industry with the performance of vehicles that meet the standard. The American Trucking Associations, Consolidated Freightways Corporation (and its truck-building subsidiary), and PACCAR Corporation have most sharply disagreed with the continued implementation of the standard in its present form. Their major objections appear to be that the new systems are overly expensive (both in purchase and maintenance costs) for the safety benefit achieved, and that malfunctions in the antilock systems can increase the chance of loss of vehicle control under panic stop conditions. Manufacturers and users of trucks, buses, and trailers, as well as component suppliers, a test equipment manufacturer, and the California Department of Highway Patrol (CHP) addressed the public meeting.

Although some of the truck operators that addressed the meeting had little or no 121 equipment in their own fleets from which to gain first-hand experience, most commenters felt that improvements already underway would lead to reductions in the cost of acquiring and servicing the new brake systems. Kelsey-Hayes Corporation stated that the price of its antilock componentry would be reduced substantially in the future. General Motors agreed that some cost reduction might result from increased familiarity with the new braking systems. Other antilock manufacturers expressed confidence that "start-up" problems were under control and that improved procedures would make their systems less expensive to maintain in the future. These views were expressed in early September meetings with antilock and vehicle manufacturers, as well as at the public meeting. The NHTSA concludes that additional time is needed for equipment "debugging," personnel training, and the development of competitive market pressures before equilibrium costs of the standard may be firmly established and, therefore that a broad-scale modification of the standard for cost reasons at this time would be inappropriate.

Manufacturer and user concern over the safety aspects of trucks manufactured to comply with Standard No. 121 centers on the presence of strong brakes and antilock systems on the front axle. Until the advent of Standard No. 121, trucks manufactured for use in the United States were often equipped with weak front axle brakes, or no front axle brakes at all. This arrangement was intended to preserve steering control in a panic stop by precluding the possibility of wheel lockup. European braking practices differ completely, providing strong front axle brakes to ensure front wheel lockup before other axles to preserve stability of the vehicle as a whole.

The present stopping distance requirement of 277 feet from 60 mph for the loaded vehicle on dry pavement, among other safety improvements is intended to result in more effective front axle brakes. Under equivalent conditions, average passenger car performance is 200 feet, and the truck stopping distances are calculated to ensure better compatibility with passenger cars on the highway. The standard also requires "no lockup" performance, in order to preserve both steering control and stability during a panic stop with the more effective brakes. Some manufacturers and users object to this combination of requirements, fearing steering axle lockup of the stronger brakes in the event of malfunction of an antilock system installed by the manufacturer.

The NHTSA has evaluated numerous performance data developed in the opening months of Standard No. 121 implementation. The largest sources of data are the public meeting on the standard and individual reports of vehicle manufacturers and users. The durability of early production antilock systems has been reduced somewhat by mass-production start-up problems and by certain design deficiencies in protection of electrical circuitry from the effects of moisture and vibration. Instances of these problems were raised by numerous speakers at the October meeting. Additionally, an electromagnetic interference problem has been identified and corrected in an antilock design that was developed and produced prior to the advent of Standard No. 121. Finally, a design deficiency in the Rockwell International antilock system for bus applications has developed that can cause the antilock system to momentarily release the brakes at low speeds when they should remain applied. All of the design or start-up deficiencies with safety consequences have been reported to the NHTSA as safety-related defects and are subject to recall campaigns. In the case of buses, the NHTSA has proposed a suspension of the performance requirements that result in antilock installation while the manufacturers of transit and intercity buses develop improved designs.

Analysis of the reports made to this agency on truck and trailer installation of antilock systems indicates that the durability problems stem from design deficiencies of certain systems that are being isolated and changed with introduction of the systems into service. This improvement bears out the December 1973 prediction of Wagner Electric Corporation, a major supplier of air brake equipment including antilock systems, that "continued development will eventually improve their [antilock systems] overall performance—but most of these changes for refinement in electronics, improved pneumatic/electronic response, durability, sensor standardization, and design standards require the normal evolution of field experience under real life conditions, using mass produced parts for a genuine field history".

It is noteworthy that no safety related defect attributable to antilock system design or production has been reported to the NHTSA since early July, after the standard was implemented for all air-braked vehicles on March 1, 1975. At the public meeting, it was the conclusion of General Motors, a manufacturer of both antilock systems and air-braked vehicles, that "it is in the best interest of all parties to continue their efforts to make FMVSS 121, Air Brake Systems, a viable standard." A representative of United Parcel Service (UPS), a large user of air-braked vehicles, stated that its judicious selection of antilock componentry for UPS trailers had resulted in good performance of the systems. Early September meetings with Ford, International Harvester, Mack, Fruehauf, and General Motors confirmed that these manufacturers do not consider improved antilock durability to be technologically unfeasible. There are, of course, manufacturers that believe the antilock systems are too complex to be installed and maintained in air-braked vehicles (e.g., Freightliner, Wesco Truck and Trailer Sales). Based on its evaluation of all of these reports, the NHTSA concludes that antilock systems are sufficiently reliable and will become more so, justifying their continued installation on air-braked vehicles in satisfaction of the standard's requirements for directional stability.

The standard's requirement that fully-loaded vehicles stop from 60 mph within 277 feet on a dry surface is not an unreasonable demand. For example, a 121-equipped International Harvester three-axle Transtar in combination with a control trailer has demonstrated that it is capable of meeting all stopping requirements of the standard easily without adverse handling consequences.

Some other vehicles produced to comply with the standard, however, exhibit unsatisfactory handling characteristics during braking. A major reason for these problems appears to be that manufacturers have oversized some front brakes in order to achieve 100-percent compliance that exists in any braking system number of brake packages requiring certification testing. The brake imbalance that exists in any braking system (due to production variations in lining

V 401246 DEC 22 75 XUM

material, clearances, etc.) is of course magnified as the brakes become more effective. Design considerations in the steering axle geometry (such as scrub radius) can magnify the effects of imbalance.

With a view to the economic problems being experienced by heavy truck manufacturers, the NHTSA has decided that it may be desirable to reduce the performance levels of the standard somewhat to permit the "depowering" of the steering axle brakes sufficiently to improve handling characteristics, while these design problems are being resolved by the manufacturers.

This course of action meets the objections of the ATA, Consolidated Freightways, Wagner, and others, that the effective front brakes could conceivably be a safety hazard if the antilock on the front axle fails. With reduced performance levels, the front axle retardation force can be reduced substantially. In fact, the NHTSA calculates that braking forces will be reduced sufficiently to obviate the need for antilock systems on the front axle of many vehicles to meet the standard's stopping distance requirements. This calculation takes into account that, in stopping distance testing, the driver may modulate the braking effort as necessary to stop the vehicle within the prescribed distance without uncontrolled lockup of wheels. At the same time, this course of action maintains the goals of Standard No. 121 for meaningful minimum performance levels for directional stability and stopping distance on air-braked vehicles.

A further advantage of the proposed course of action would be to minimize the concerns of operators for the compatibility of 121 equipment with pre-121 equipment. At the public meeting, operators of 121-equipped trailers with non-121 tractors reported that the new trailers were doing more than their share of braking, and that this inbalance of beaking effort caused high wear and brake temperatures that decrease lining life and increase the hazards associated with overheated brakes. The NHTSA proposes, along with reduced performance levels for trucks, that trailers meet comparable retardation force levels under S5.4.1. The decreased performance levels essentially will permit all 121 equipment to be more compatible with the non-121 equipment with which it must be operated for the next few years. In this way, trailers produced today can utilize lower friction linings for compatibility with the majority of today's non-121 tractors, and higher friction linings in the future as more 121-equipped trucks are introduced.

Other requirements of the standard affect the levels of brake performance supplied on the front axle and the overall compatibility of 121 vehicles with non-121 vehicles. The NHTSA has recently granted requests of Freightliner Corporation and PACCAR Corporation to increase flexibility of design in meeting the dynamometer requirements of the standard. Mack Trucks, Inc., also noted in its November 7, 1975, comments for the public meeting record, that dynamometer performance levels should be carefully tailored in conjunction with any stopping distance changes to assure that the manufacturers can take full advantage of reduced performance levels. Freightliner, PACCAR, and White Truck also requested revision of the parking brake grade-holding requirement (S5.6.1) that was granted in part by the NHTSA. The NHTSA also granted an ATA petition to limit the minimum as well as maximum brake actuation time of towing vehicles, to improve compatibility between towed and towing vehicles.

With these considerations in mind, the NHTSA hereby proposes several modifications of Standard No. 121's requirements. It is proposed that the required stopping distance from 60 mph on a dry surface in the loaded condition be modified from 277 feet to 293 feet. In the case of the 20-mph stop on a wet surface, the maximum permissible distance would be modified from 54 feet to 60 feet as requested by Freightliner. The proposed loaded-vehicle dry-pavement stopping distances are also those requested by Freightliner, except that a 60-mph stopping distance is added because Freightliner only proposed stopping distance requirements up to 55 mph. These values closely approximate Wagner's request.

The dynamometer requirements would be modified to be consistent with the new stopping distance performance levels. In the case of trailers, the retardation force levels comparable to the 60-mph stopping distance of 293 feet would be modified from a 0.47 value to a 0.43 value. For all vehicles, the dynamometer brake power and recovery requirements would be modified by increasing the upper pressure limit. The "hot stop" dynamometer requirement (S5.4.2.2) would be deleted, since the 14 fpsps deceleration rate is not comparable to the new stopping distance requirements. In addition, dynamometer recovery requirements would be deleted for the front axle of truck-tractors.

The brake actuation timing requirements (S5.3.3) for towing vehicles would be modified by the addition of a 0.20-second limit on the minimum speed of brake actuation on towing vehicles. Taking into account manufacturer tolerances of 0.05 second in timing, this level is calculated to provide the 0.25-second limit requested by the ATA. This proposal would not become effective until 1 year following the issuance of an amendment to S5.3.3.

Although PACCAR and Freightliner petitioned for reduction of grade-holding levels in the parking brake requirements for all vehicles (S5.6.1), the NHTSA considers that the 20-percent grade is a reasonable performance level. In the case of most combination vehicles, each vehicle must hold in the fully-loaded condition, although in service, the vehicles share the braking effort necessary to hold the full load in all but the extremely rare case of a loaded trailer parked separately on a steep grade. To provide more realistic requirements for these vehicles, the NHTSA proposes modification of the static retardation force requirements of S5.6.1 to provide an equivalent grade-holding requirement of 17 percent of GVWR for truck-tractors and 23 percent for trailers (of the portion of GVWR supported by the trailer axles). These values average to an ability to hold the loaded combination vehicle on approximately a 20-percent grade. The change is calculated to reduce the cost of parking brakes on tandem axle vehicles by reducing the necessity for parking brakes on both axles of the tandem.

In the future, the NHTSA intends to reduce the disparity between heavy and light vehicle braking performance levels, but the new performance levels established on the basis of this proposal will not be modified without further notice and opportunity to comment by interested persons (This statement does not apply to other aspects of Standard No. 121, such as the recent proposal in response to the California Highway Patrol (40 FR 56920, December 5, 1975)). The results of NHTSA's statistical evaluation of the standard will be available as the basis for further change. A public meeting may also be desirable in advance of further changes.

The September 1, 1976, date for compliance with the requirements of the standard for some specialized vehicles is imminent. Because this proposal makes the level of performance uncertain, the NHTSA considers it unreasonable to maintain the present effectiveness dates for these vehicles. For this reason, the effective date for these vehicles and for full compliance of vehicles listed in S5.3.1.2 with a September 1, 1976, effective date is proposed to be delayed until September 1, 1977.

With regard to the category of specialized powered vehicles permanently excluded from the standard in a recent amendment (40 FR 38160, August 27, 1975), the Grove Manufacturing Company has suggested reevaluation of that action in one respect. Grove submitted data indicating that the mobile-crane type of vehicle can comply with the standard in every respect other than stopping distance requirements conducted at unloaded vehicle weight. The NHTSA, noting that these vehicles' loaded and unloaded weights are nearly the same, tentatively concludes that the loaded stopping requirements alone are a sufficient test of this vehicle type. Accordingly, it is proposed that these vehicles be excepted from the service brake stopping distance requirements at unloaded vehicle weight.

§ 571.121 [Amended]

In consideration of the foregoing, it is proposed that Standard No. 121, *Air Brake Systems*, be amended as follows:

1. In S3., *Application*, and in S5.3.1.2, the "March 1, 1976" and "September 1, 1976" date would be modified to read "September 1, 1977" wherever it appears.

2. Section S5.3.1.3 would be amended to read:

S5.3.1.3 A truck with an unloaded vehicle weight that is not less than 95 percent of GVWR need not meet the requirements of S5.3.1 at unloaded vehicle weight plus 500 pounds.

3. Section S5.3.3 would be amended by the addition of a new sentence at the end of the text to read:

"On and after September 1, 1977, with initial service reservoir system air pressure of 100 psi, the air pressure in each brake chamber of a truck designed to tow an air-braked vehicle shall, when measured from the first movement of the service brake control, research 60 psi in a time that is not less than 0.20 seconds."

4. The first sentence of S5.4.1 would be amended by the deletion of that part of the sentence that begins ", except that • • •."

5. The service air line pressure of "90 psi" in S5.4.2.1 would be revised to "100 psi", and the service air line pressure of "75 psi" in S5.4.3 would be revised to "85 psi".

6. Section S5.4.2.2 would be amended by deletion of the last sentence of the text.

7. In the first sentence of S5.4.3, the phrase "the brakes" would be replaced with the phrase "the brakes of a vehicle other than a truck-tractor".

8. Section S5.6.1 would be amended to read:

S5.6.1 *Static retardation force.* With all other brakes rendered inoperative, during a static drawbar pull in a forward or rearward direction, the static retardation force produced by the application of the parking brakes shall be:

(a) In the case of a vehicle other than a truck-tractor or trailer, such that the quotient

$$\frac{\text{static retardation force}}{\text{GAWR}}$$

is less than 0.28 for an axle other than a steerable front axle;

(b) In the case of a truck-tractor, such that the quotient

$$\frac{\text{static retardation force}}{\text{GVWR}}$$

is not less than 0.17; and

(c) In the case of a trailer, such that the quotient

$$\frac{\text{static retardation force}}{\text{sum of non-steerable GAWR's}}$$

is not less than 0.23.

9. In the first sentence of S6.1.10.6, the phrase "service brake stopping distances specified in Table II" would be replaced by the phrase "the value 68, 90, 115, 143, 174, 208, or 245 (corresponding to a speed of 30, 40, 45, 50, 55, or 60 mph as appropriate for the truck-tractor tested)".

10. Table IIa would be deleted and Table II would be amended to read:

TABLE II.—*Stopping distance in feet*

Vehicle speed in miles per hour	Service brake			Emergency brake	
	Skid No. 75		Skid No. 30	Skid No. 75	
	At GVWR (1)	Unloaded (1a)	(2)	(3)	(4)
20	35	35	60	83	85
25	54	52	----------	123	131
30	76	73	----------	170	186
35	101	98	----------	225	249
40	131	127	----------	288	325
45	166	150	----------	358	409
50	203	183	----------	435	504
55	246	219	----------	520	608
60	293	258	----------	613	730

11. Table III would be amended by the deletion of Column 2, the redesignation of Column 3 as Column 2, and the replacement of the present values of Column 1 with the values 0.05, 0.12, 0.18, 0.25, 0.31, 0.38, and 0.43, corresponding to the brake chamber pressures of 20, 30, 40, 50, 60, 70, and 80.

Interested persons are invited to submit comments on the proposal. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street, SW., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Comment closing date: February 2, 1976.

Proposed effective date: Date of publication of final rule in the FEDERAL REGISTER.

(Secs. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407) delegation of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on December 17, 1975.

ROBERT L. CARTER,
Associate Administrator,
Motor Vehicle Programs.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-814]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Town of Washington Park, North Carolina

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.4(a)), hereby gives notice of his proposed determinations of flood elevations for the Town of Washington Park, North Carolina.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the Town of Washington Park must adopt flood plain management measures that are consistent with the flood elevations determnied by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at Washington Park Municipal Building, 419 Fairview Street, Washington Park, North Carolina 27889.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor Thomas Richter. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community or on or before March 22, 1976, whichever is the later.

The proposed 100-year Flood Elevations are:

V401246 DEC 22 75 XUM

Source of flooding and location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
		Right	Left
Pamlico River:			
Pine St.	10	Street section south of north shoulder of Isabella Ave.	
College Ave.	10	Street section southeast from point 400 ft southeast of Pine St.	
Pine St.	10	Street section north from point 70 ft north of Isabella Ave.	
River Rd.	10	Street section west from point 600 ft west of Hickory St.	
College Ave.	10	Street section west from point 340 ft west of Pine St.	
Hickory St.	10	Street section south from point 80 ft south of Small St.	
Spruce St.	10	Street section south from point 170 ft south of Small St.	

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: December 3, 1975.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

[24 CFR Part 1917]

[Docket No. FI-815]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for City of Tallahassee, Florida

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.4(a)), hereby gives notice of his proposed determinations of flood elevations for the City of Tallahassee, Florida.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the City of Tallahassee must adopt flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at City Hall, Tallahassee, Florida, 32304.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mr. Daniel A. Kleman, City Manager, City Hall, Tallahassee, Florida, 32304. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community or on or before March 22, 1976, whichever is the later.

The proposed 100-year Flood Elevations are:

FLOAT GLASS FROM THE UNITED KINGDOM

Final Countervailing Duty Determination

On June 30, 1975, a "Notice of Preliminary Countervailing Duty Determination" was published in the FEDERAL REGISTER (40 FR 27499) with respect to float glass from the United Kingdom.

The notice stated that, on the basis of an investigation conducted pursuant to § 159.47(c), Customs Regulations (19 CFR 159.47(c)), a preliminary determination had been made that no bounty or grant is being paid or bestowed, directly or indirectly, within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303), upon the manufacture, production, or exportation of float glass from the United Kingdom.

The notice further stated that, before a final determination would be made, consideration would be given to any relevant data, views or arguments submitted in writing within 30 days from the date of the notice of preliminary determination. The 30-day period was extended to September 3, 1975, by notice published in the FEDERAL REGISTER August 15, 1975 (40 FR 34423).

After consideration of all information received, a final determination is hereby made, that, for the reasons stated in the preliminary determination, no bounty or grant is being paid or bestowed, directly or indirectly, within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303), upon the manufacture, production or exportation of float glass from the United Kingdom.

This notice is published pursuant to section 303(a), Tariff Act of 1930, as amended (19 U.S.C. 1303(a)).

VERNON D. ACREE,
Commissioner of Customs.

Approved: December 16, 1975.

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

Department of the Air Force

USAF SCIENTIFIC ADVISORY BOARD

Meeting

DECEMBER 12, 1975.

The USAF Scientific Advisory Board Science and Technology Advisory Group, Air Force Systems Command, will hold a meeting on January 15, 1976 from 8:30 a.m. to 4:00 p.m. and January 16, 1976 from 8:30 a.m. to 2:00 p.m. at Wright Patterson AFB, Ohio in Building 620, Area B, Room 2.8.

The Group will receive classified briefings and participate in classified discussions relating to the review of selected Air Force Wright Aeronautical Laboratories Programs.

The meetings concern matters listed in Section 552(b) of Title 5, United States Code, specifically subparagraph (1) thereof, and that accordingly the meetings will be closed to the public.

For further information contact the Scientific Advisory Board Secretariat at 202-697-8404.

JAMES L. ELMER,
Major, USAF Executive, Directorate of Administration.

US ARMY MEDICAL RESEARCH AND DEVELOPMENT ADVISORY PANEL

Amended Notice of Meeting[1]

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Pub. L. 92-463, notice is hereby given that the US Army Medical Research and Development Advisory Panel will meet from 0800 hours to 1630 hours on 8 January 1976 at Fort Detrick, Frederick, Maryland 21701.

The agenda consists of a briefing and tour of the US Army Medical Bioengineering Research and Development Laboratory, Building 568, Fort Detrick, from 0800 hours to 1130 hours, and a briefing and tour of the US Army Medical Research Institute of Infectious Diseases, Building 1425, Fort Detrick, from 1300 hours to 1630 hours.

The meeting is open to the public; however, space accommodations are limited. Persons wishing to attend should advise the Executive Secretary, in writing prior to the meeting, at the following address: U.S. Army Medical Research and Development Command, Forrestal Building, Room 8G091, Washington, D.C. 20314.

Dated: December 16, 1975.

By authority of the Secretary of the Army.

ROBERT G. FLOWERS, Jr.,
Lt. Colonel, U.S. Army, Chief, Plans Office, TAGO.

Drug Enforcement Administration

CONTROLLED SUBSTANCES

Proposed Aggregate Production Quota for 1976—2,5-Dimethoxyamphetamine

Section 306 of the Controlled Substances Act (21 U.S.C. 826) requires that the Attorney General establish aggregate production quotas for all controlled substances listed in Schedules I and II. This responsibility has been delegated to the Administrator of the Drug

[1] Amends notice published at 40 FR 57224.

V40246 DEC 22 75 XUM

Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations and has been further delegated to the Acting Administrator by virtue of his designation as such by Order Number 607–75 of the Attorney General, dated May 30, 1975 and pursuant to the authority delegated to him by § 0.132(d) of Title 28 of the Code of Federal Regulations.

The quotas are to provide adequate supplies of each such substance for (1) the estimated medical, scientific, research, and industrial needs of the United States, (2) lawful export requirements, and (3) the establishment and maintenance of reserve stocks.

2,5-Dimethoxyamphetamine is a Schedule I controlled substance which has an industrial use in the photographic industry. No quota has been established to date for 1976 for this substance. In order to provide for industrial needs during 1976, the Acting Administrator of the Drug Enforcement Administration hereby proposes a quota for this substance for 1976, expressed as grams of anhydrous base.

Basic Class:	*Proposed 1976*
2,5-Dimehtoxyamphetamine	30,000,000

All interested persons are invited to submit their comments and objections in writing regarding this proposal. These comments or objections should state with particularity the issues concerning which the person desires to be heard. Comments and objections should be submitted in quintuplicate to the Administrator, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative, and must be received by January 26, 1976. If a person believes that one or more issues raised by him warrant a full adversary-type hearing, he should state and summarize the reasons for his belief.

In the event that comments or objections to this proposal raise one or more issues which the Acting Administrator finds, in his sole discretion, warrants a full adversary-hearing, the Acting Administrator shall order a public hearing in the FEDERAL REGISTER summarizing the issues to be heard and setting the time for the hearing (which shall not be less than 30 days after the date of publication).

Dated: December 15, 1975.

HENRY S. DOGIN,
Acting Administrator,
Drug Enforcement Administration.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

GRAIN AND OTHER GRADED COMMODITY STANDARDS

Approval of a Visual Grading Aid System for Grain, Rice, Dry Peas, Dry Beans, Dry Lentils, and Other Graded Commodities

The Department of Agriculture hereby announces the approval of a visual grading aid system for use in the official grading of grain, rice, dry peas, dry beans, dry lentils, and other graded commodities.

This Notice is issued under authority of section 4 of the United States Grain Standards Act, as amended (82 Stat. 762, 7 U.S.C. 76), and section 203 of the Agricultural Marketing Act of 1946, as amended (60 Stat. 1087, 7 U.S.C. 1622).

The visual grading aid system consists of a portable table-top transparency viewer and photographic color transparencies. The viewer uses a precisely controlled light source of desired intensity and quality. The transparencies, depicting quality levels, are prepared under closely controlled conditions and are officially approved by the Grain Division, Agricultural Marketing Service, before being released for use. Up to five transparencies can be placed simultaneously in the viewer at the inspection table to aid the inspector in making the more difficult subjective grading decisions.

The new visual aid system has advantages over the present official grading aids which consist of natural specimens displayed in sealed plastic containers. The natural specimen grading aids deteriorate rapidly and are costly to produce. Color chips, which also are used as visual grading aids, will remain in effect and continue to be used in making grading decisions.

The color transparencies system was developed by nongovernment interests who will offer it for sale to interested parties.

The Department invites any person who has developed or may develop a system to help official inspection personnel grade grain more quickly or more accurately to submit the system for evaluation.

Requests for information concerning the new visual grading aid system, approved devices and procedures, criteria for approved devices, or requests for approval of devices should be directed to the Grain Division, Agricultural Marketing Service, U.S. Department of Agriculture, 1400 Independence Avenue, S.W., Washington, D.C. 20250.

Approval of the Visual Grading Aid System shall become effective December 22, 1975.

Done at Washington, D.C., on December 16, 1975.

DONALD E. WILKINSON,
Administrator.

Office of the Secretary

SPECIAL GRANTS PROGRAM

Closing Date for Applications

Notice is hereby given that pursuant to the authority contained in section 2 of Pub. L. 89–106 (7 U.S.C. 4501) the Cooperative State Research Service (CSRS) will award competitive grants in the following areas:

	Dollars
1. Environmental Quality	625,000
2. Food and Nutrition	893,750
3. Beef and Pork Production	1,781,250
4. Soybeans	625,000
5. Pest Management	625,000
6. Transportation	625,000
7. Forage, Pasture, and Range	1,000,000
8. Genetic Vulnerability	625,000

The dollar amounts shown above include funds to be awarded to grants during the transition quarter between fiscal years 1976 and 1977. Using the same identification numbers as above, funds in each Subject-Matter category will be available as shown below.

Subject-matter category:	Fiscal year 1976	Transition quarter
1	$492,000	$133,000
2	715,000	178,750
3	1,425,000	356,250
4	500,000	125,000
5	500,000	125,000
6	500,000	125,000
7	800,000	200,000
8	500,000	125,000

Research proposals submitted in response to this notice will be evaluated by peer pannels in competition with proposals from other institutions, organizations, or individuals. Research proposals selected by the peer panels will be awarded funds from those available for Fiscal Year 1976 (ending June 30, 1976) or for the Transition Quarter (July 1 to September 30, 1976).

APPLICATION PROCEDURES

1. *Advance notice.* A. Institutions that intend to submit research proposals must notify Cooperative State Research Service of the Subject-Matter categories in which the proposals will compete for funds. Notification should be in the form of tentative proposal titles that are clearly referenced to the Subject-Matter categories shown above. To prevent duplication, advance notice from any institution should originate from one authorized individual.

B. No more than 5 proposal titles, with no more than 2 in any one Subject-Matter category, will be accepted from an institution. These will be regarded as your primary choices for later submission in the form of detailed proposals.

C. In addition, a secondary listing can be included that shows proposal titles which the institution could submit, if needed, in the form of detailed proposals.

D. Advance notice of titles must be received prior to February 1, 1976, and should be addressed to: Administrator, Cooperative State Research Service, U.S. Department of Agriculture, Washington, D.C. 20250.

E. Advance notice will be used by Cooperative State Research Service to compile primary titles by Subject-Matter categories. If Cooperative State Research Service determines an insufficient number of titles in any category, institutions will be solicited to submit proposals by category as determined from secondary titles.

2. *Research proposal submission.* A. Research proposals, corresponding to those in the primary listing of the advance notice and as solicited by Cooperative State Research Service, must be received prior to March 1, 1976.

B. Only those proposals that have been included in an advance notice as described above will be considered for funding. Others will be returned to the originating institution.

C. All proposals from one institution or organization must be signed by the same authorized individual. This signature will be regarded by Cooperative State Research Service as an indication of the institution's commitment to pursue the research activities described in the proposal if funded.

D. Proposals will be considered for funding only if they conform to the Subject-Matter guidelines as detailed in Appendix I. Statements of review criteria (Appendix III and IIIA) and the required proposal format (Appendix II) will assist scientists in the preparation of proposals.

E. Submit five (5) copies of each proposal to: Administrator, Cooperative State Research Service, U.S. Department of Agriculture, Washington, D.C. 20250.

F. After grants are awarded, all copies of proposals not funded will be returned to the originating organization.

3. *Regulations.* A. The regulations applicable to this grant program include Subpart 4–3.51 of the USDA Procurement Regulations (41 CFR 4–3.51), "Negotiated Research Agreements with Educational Institutions", and Title 4 of the USDA Administrative Regulations, "Agriculture Grant and Agreement Regulations".

B. Funded projects will be subject to the provisions for Protection of Human Subjects (Secretary's Memorandum No. 1755).

C. Maximum research project duration is five (5) years from the time of the award.

4. *Eligibility.* Grants may be made to State Agricultural Experiment Stations, colleges, universities, and other research institutions and organizations, and to federal and private organizations, and individuals for research to further the programs of the Department of Agriculture.

J. PAUL BOLDUC,
Acting Assistant Secretary for Administration.

APPENDIX I

GUIDELINES FOR SUBJECT MATTER CATEGORIES FOR FISCAL YEAR 1976 GRANTS UNDER PUBLIC LAW 89–106

The various specific areas of inquiry are not necessarily listed in order of priority

1.0 Environmental Quality ($492,000 will be available in FY 1976; $133,000 will be available in the Transition Quarter).

Not included in the total in FY 1976 is $75,000 that has already been committed for environmental quality research and $50,000 ($33,000 from FY 1976 and $17,000 in the Transition Quarter) for cooperation with the Fish and Wildlife Service in the Department of Interior.

A proposal should not exceed $90,000 in CSRS grant support. Approximately equal amounts will be allocated to the two specific areas listed below.

Specific Areas of Inquiry

1.1 Development of processes by which wastes from animal production units can be made into useful byproducts including, but not limited to, animal feed and methane.

1.2 Development of methods and practices to minimize pollution hazards from land applications of municipal sludge and effluent.

2.0 Food and Nutrition ($715,000 will be available in FY 1976; $178,750 will be available in the Transition Quarter)

Not included in the totals are $225,000 FY 1976 and $56,250 transition quarter that have been committed for support of research on food and agricultural policies, and taro.

A proposal should not exceed $150,000 in CSRS grant support.

Specific Areas of Inquiry

2.1 Human Nutrition

2.1.1 Determine appropriate criteria and methodology (such as quick or large-scale screening of population groups) for establishing human nutrient requirements.

2.1.2 Investigate factors affecting biological availability of nutrients (such as chemical form of nutrient, interrelationships to other nutrients, presence of inhibitors, analytical values vs. biological availability).

2.1.3 Determine appropriate and effective methods for altering food patterns to improve nutritional status.

2.2 Foods

2.2.1 Determine the effects of processing and fabrication of foods from traditional and non-traditional sources on nutrient quality, compatability, interrelationships of constituents and accceptability.

2.2.2 Develop acceptable processes, procedures, and technology, including fortification, which will result in improved nutritive value, better handling and storage characteristics and acceptability of foods.

2.2.3 Search for new techniques to reduce the costs of sanitation and preservation of foods and to lower expenditures of chemicals, water, energy, and raw materials during processing.

3.0 Beef and Pork Production ($1,425,000 will be available in FY 1976; $356,250 will be available in the Transition Quarter).

Not included in the totals are $75,000 in FY 1976 and $18,750 in the transition quarter for lone star tick research.

Specific Areas of Inquiry

3.1 Beef Production ($997,500 will be available in FY 1976; $249,375 will be available in the Transition Quarter).

A proposal should not exceed $150,000 in CSRS grant support.

3.1.1 Increase reproductive efficiency and capacity of beef animals by natural or induced methods. (Suggested areas of emphasis include: conception rates, increased embryo survival rates, increased multiple births, decreased age of puberty, decreased time between calving and breeding for next calving, decreased postnatal death, increased resistance to agents responsible for pre- and postnatal deaths).

3.1.2 Develop improved systems or subsystems for beef production utilizing maximum amounts of forage with the aim to decrease the dependence on feed grains and minimize costs of production of acceptable quality beef. (Processing procedures all the way to consumption are included. Forages include range, pasture, harvested forage, silage, and crop residues).

3.1.3 Determine the cause and develop methods of diagnosis, prevention, and control of the bovine respiratory disease complex.

3.2 Swine production ($427,500 will be available in FY 1976; $106,875 will be available in the Transition Quarter).

A proposal should not exceed $125,000 in CSRS grant support.

3.2.1 Develop means of increasing the efficiency of production of quality pork. (Including but not limited to reproduction, disease of young pigs, stress(es), and metabolic efficiency).

4.0 Soybean Research ($500,000 will be available in FY 1976; $125,000 will be available in the Transition Quarter).

A proposal should not exceed $90,000 in CSRS grant support.

Specific Areas of Inquiry

4.1 Production Management Systems. Research to systematize the integration of existing information into soybean production decisions by evaluating contributions from, and interactions between, input and output factors and yielding recommendations for production management.

4.2 Determination, Description and Modelling of Growth. Research should identify components and functions which account for growth, productivity and quality and seek methods to achieve control of growth processes.

4.3 Pest Management. Expand knowledge of soybean resistance or tolerance to diseases,

V401246 DEC 22 75 XUM

weeds and insects, including genetics of host and pests.

Research to develop information about the biology and life cycles of insects, nematodes, diseases and weeds.

Develop control mechanisms involving pesticides, biological control and other approaches.

4.4 Broadening Germ-Plasm Base. Research to increase the utilization or the creation of plant materials to exploit genetic diversity including screening and characterization of germ-plasm collections.

4.5 Plant Nutrition and Root Development. Research on soil factors, root and nodule development and related nitrogen fixation and photosynthetic activity.

5.0 PEST MANAGEMENT ($500,000 will be available in FY 1976; $125,000 will be available in the Transition Quarter)

A proposal should not exceed $100,000 in SCRS grant support.

Specific Areas of Inquiry

5.1 The refinement of multiple methods of pest suppression and the establishment of dynamic loss levels of pests including precedures for predicting the effect of the pest damage and suppression techniques on yield. (Includes all pests and multiple methods of pest suppression on plant and animal hosts as well as ecological, erop density and spatial heterogeneity factors).

5.2 Development and integration of computer simulation models of plant growth and pest population dynamics for predictive and forecasting purposes.

6.0 Transportation and related Marketing and storage Problems of Agricultural and Forestry Products ($500,000 will be available in FY 1976; $125,000 will be available in the Transition Quarter)

A proposal should not exceed $90,000 in CSRS grant support.

Specific Areas of Inquiry

6.1 Examine logistical problems associated with the seasonal nature of agricultural production, mobility and capacity of transportation equipment and changing demands of domestic and foreign markets.

6.2 Investigate methods for improving intermodal transportation systems to increase efficiency in transloading, handling, marketing and storage of agricultural and forestry products and to maintain product quality in domestic and export markets.

6.3 Determine ways to more effectively utilize transportation and related equipment and facilities and develop equipment and facilities better adapted to the specialized needs of agricultural and forestry industries.

6.4 Examine the adequacy and appropriateness of policies affecting available and needed transport services for agricultural and forestry products.

7.0 Forage, Pasture and Range ($800,000 will be available in FY 1976; $200,000 will be available in the Transition Quarter)

Not included in the totals are $200,000 FY 1976 and $50,000 transition quarter that have been committed for soil erosion in the Pacific Northwest.

*A proposal should not exceed $100,000 in CSRS grant support except in Area *7.3, where the limit will be $125,000*

Specific Areas of Inquiry

7.1 Increased Productivity

7.1.1 Devise practices that promote establishment, raise productivity, improve botanical composition in established stands or increase longevity.

7.1.2 Incorporate heritable characteristics that confer high yield on important forage species.

7.1.3 Develop strains of forage plants that reliably produce heavy crops of seed, and/or devise procedures that recover an increased share of the seed produced.

7.2 Breeding for Improved Quality

7.2.1 Incorporate heritable characteristics that confer high digestibility or palatability on important forage species.

7.2.2 Incorporate heritable characteristics that protect nutritive value from loss before feeding.

7.3 More Efficient Utilization

7.3.1 Develop systems of harvest (grazing and mechanical) that facilitate recovery of an optimum proportion of the forage produced.

7.3.2 Develop or devise unconventional on-farm procedures that facilitate or speed up the harvest, movement, processing, preservation or storage of the nutrients produced.

7.3.3 Develop for ruminants other than beef cattle, forage systems or subsystems that support specified levels of gain or maintenance with minimum expense for concentrate feeds, energy or other purchased supplies.

7.4 Basic Genetic Studies on Forage Plants

7.4.1 Develop more efficacious breeding and selection techniques for polyploid and/or cross-pollinated species.

7.4.2 Investigate the inheritance of traits with great economic value such as digestibility, palatability and longevity.

8.0 Genetic Vulnerability Strategies ($500,000 will be available in FY 1976; $125,000 will be available in the Transition Quarter).

A proposal should not exceed $100,000 in CSRS grant support and be directed to the improvement of cultivated plant species.

Specific Areas of Inquiry

8.1 Gene Management. Contribute to the development of more efficient management systems for diverse germ-plasm through investigation of population structures, chromosome and cytoplasm manipulation, wide crosses, genetics of physiological traits, and microbiological techniques.

8.2 Evaluations. Develop methodology for collaborative multiple screening techniques applicable to large groups of accessions.

8.3 Epidemiology. Clarify the relationship between the genetic makeup of the host and the course and rate of development of outbreaks of major economic pests.

APPENDIX II

FORMAT FOR RESEARCH PROPOSAL

1. Title Page

A. *Title:* A brief, clear, specific designation of the subject of the research. Do not include such terms as, "A Study of—" or "A Detailed Analysis of—." Names of geographical regions or political subdivisions should not be included unless they are important to the subject of the research.

B. *Principal Investigator(s):*

C. *Name of performing organization and address:*

D. *Category of research program in which proposal will compete for funds:* Include the number of the specific area of inquiry as given in the Guidelines.

E. *Date of Submission:*

F. *Approval Signatures of appropriate officials:* All proposals from a University, College or Institution must be signed by the same authorized official(s).

G. Submitted to:

Dr. R. L. Lovvorn, Administrator, Cooperative State Research Service, United States Department of Agriculture, Washington, D.C. 20250.

2. *Objectives:* A clear, complete, and logically-arranged statement of the specific aims of the research.

3. *Procedures:* A statement of the essential working plans and methods to be used in attaining each of the stated objectives. Procedures should correspond to the obejctives and follow the same order. Procedures should include items such as: the sampling plan, experimental design, and analyses anticipated.

4. *Justification:* This should describe: (1) the importance of the problem to the state or region, being sure to include estimates of the magnitude of the problem; (2) the importance of starting the work now; and (3) reasons for the work being performed in your particular institution.

5. *Literature Review:* A summary of pertinent publications with emphasis on the relationship to the proposed research. Cite important and recent publications from other institutions as well as your own institution. Citations should be accurate and complete.

6. *Current Research:* Describe the relevancy of the proposed research to on-going research and as yet unpublished research at your own and at other institutions. This section may be convenient to combine with LITERATURE REVIEW.

7. *Facilities and Equipment:* The location of the work and the facilities and equipment needed and available should be clearly indicated. This section may be combined with Section 3, PROCEDURES, but the combination must clearly show needed and available facilities and equipment.

8. *Research Timetable:* Show all important research phases as a function of time.

9. *Personnel Support:* Identify clearly all personnel who will be involved in the research. For each scientist involved include: (1) An estimate of the time commitments necessary; (2) Statement of training and research experience; and (3) List of other research projects on which currently engaged.

10. *Financial Support:* Total of funds requested from CSRS for proposal must not exceed maximum in specific area. Show estimated annual costs by source of funds (grant and other sources) in conventional budget categories. Include indirect costs where appropriate.

11. *Institutional Units Involved:* List each unit of the institution contributing essential services or facilities. The responsibilities of each should be clearly shown. If there is an advisory, or coordinating committee for the project, list members by name, title, and affiliation.

12. *Impacts:* Estimate the magnitude of the scientific and/or socioeconomic benefits expected from the new knowledge or technology generated. Describe the users of the research results; how the results could be used; their potential impact on the problem defined in the project justification statement; the beneficiaries of the research results and the nature of the benefits received.

APPENDIX III

INSTRUCTIONS FOR PEER PANELS ON USE OF SCORING FORM

The following items are numbered to correspond to those on the scoring form:

A. *Relevancy of Proposal to Guidelines:* Conformance of each proposal to the guidelines will be evaluated first in CSRS and if *item (1)* is checked, the proposal will go routinely to peer review. Peers may not agree with CSRS and can so indicate on the scoring form. Where *Item (2)* is checked, CSRS will send the proposal for peer review to get additional insights. Where *item (3)* is checked, the proposal will be returned to the originating institution as inappropriate for further consideration.

B. *Scientific Criteria:* These criteria will provide the primary rationale for making awards. For all items, positive scoring will range from 1 (poor) through 10 (outstanding). A score of "0" will be reserved for those cases in which the proposal does not cover the item. In such cases, the Peers will recommend (or not) for negotiation with the originating institution largely as a function of the quality of other items.

Item 4: Score from 1 to 10 points based on your assessment. (Refer in particular to Elements 2, 3 and 4 in Format.)

Item 5: Consider educational background and experience of the principal investigator, and the nature and composition of research team and support personnel. (Refer to element 9 in Format.)

Item 6: Distribute 10 points based on the adequacy of all facilities, equipment and program support. Reduce points to reflect excessive purchases of equipment with grant funds. (Refer to Elements 7 and 10 in Format.)

Item 7: Score from 1 to 10 points based on justification of grant support requested. (Refer in particular to Element 10 in Format.)

Item 8: Assess the probability that the research can be completed and written for publication during the period of the grant. Consider the amount of time and attention that investigators, research team, and support personnel will devote to project. (Refer in particular to Elements 8 and 9 in Format.)

Item 9: Distribute points in increasing amount based on investigator's knowledge of relevant literature and on-going research. (Refer to Elements 5 and 6 in Format.)

C. *Impacts Criteria: Items 10 and 11:* Score from 1 to 10 points in each item based on your assessment of the magnitude of the scientific and/or socioeconomic benefits expected from the new knowledge and technology generated from the research project. (Refer in particular to Element 12 in the Format.)

APPENDIX IIIA

PEER PANEL SCORING FORM

State and identification number: .....
Project title: .....

A. Relevance of Proposal to Guidelines (check one item)
(1) ☐ Within Guidelines (forward for Peer Evaluation)
(2) ☐ Some minor deviation(s) from Guidelines (forward for Peer Evaluation with notation)
(3) ☐ Does not conform to guidelines (return proposal to originating institution)

B. Scientific Criteria

	Score [1] 1–10 (low to high)	Comments
(4) Overall scientific and technological quality of proposal		
(5) Research competence of the principal investigator(s), research team and support personnel.		
(6) Adequacy of facilities, equipment, and related program support.		
(7) Justification of support requested in relation to objectives and procedures.		
(8) Feasibility of attaining objectives during life of proposed research.		
(9) Awareness of published literature & current research related to proposed research.		
Subtotal		
C. Impacts Criteria		
(10) Relevance and importance of proposed research to solution of specific areas of inquiry (identified in guidelines).		
(11) Estimate of expected benefits		
Total		

D. Extended Comments: Use back of page

[1] A score of 0 indicates that proposal does not contain information on which to base judgment and negotiation with Institution may be indicated.

Soil Conservation Service

CLARKSVILLE FAIRGROUNDS PARK WATER-BASED RECREATION RC&D MEASURE, TENNESSEE

Availability of Negative Declaration

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; part 1500.6(e) of the Council on Environmental Quality Guidelines (38 FR 20550) August 1, 1973; and part 650.8 (b)(3) of the Soil Conservation Service Guidelines (39 FR 19651) June 3, 1974; the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Clarksville Fairgrounds Park—a Water-Based Recreation RC&D Measure, Montgomery County, Tennessee.

The environmental assessment of this federal action indicates that the measure will not create significant adverse local, regional, or national impacts on the environment and that no significant controversy is associated with the measure. As a result of these findings, Mr. Donald C. Bivens, State Conservationist, Soil Conservation Service, USDA, 561 U.S. Courthouse, 801 Broadway, Nashville, Tennessee 37203, has determined that the preparation and review of an environmental impact statement is not needed for this measure.

The measure concerns a plan for development of a recreation park on a 52-acre tract of land adjacent to the Cumberland River, Barkley Lake. Water use facilities to be built include a river fishing access, fishing pier, parking lots, grills, benches, and walking path. Other facilities such as shelters, picnic tables, and restrooms are to be provided along with lighting facilities, landscaping, fencing, an entrance gate, and appurtenances. Development of the 52 acres will provide recreational facilities for the 119,000 people living in the Clarksville-Hopkinsville-Montgomery and Christian County Standard Metropolitan Statistical Area (SMSA).

The environmental assessment file is available for inspection during regular working hours at the following location:

Soil Conservation Service, USDA, 561 United States Courthouse, Nashville, Tennessee 37203

The negative declaration is available for single-copy requests at the above location.

No administrative action on implementation of the proposal will be taken until 15 days after the date of this publication.

(Catalog of Federal Domestic Assistance Program No. 10.901, National Archives Reference Services.)

Dated: December 12, 1975.

VICTOR H. BARRY, JR.,
Deputy Administrator for Field Services, Soil Conservation Service.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Resources Administration

HEALTH MANPOWER EDUCATION INITIATIVE PROJECTS

Announcement of National Priority

Section 774(a) of the Public Health Service Act (42 U.S.C. 295f-4(a)) authorizes the Secretary of Health, Education, and Welfare to make grants to public and nonprofit private health or educational entities for the purpose of improving the distribution, supply, quality, utilization, and efficiency of health personnel and the health services delivery system. Under section 774(a) of the Act, grants may be awarded for projects:

1. To encourage the establishment or maintenance of programs to alleviate shortages or health personnel in areas designated by the Secretary through training or retraining such personnel in facilities located in those areas or to otherwise improve the distribution of health personnel by geographic area or by specialty group;

2. To provide training programs leading to more efficient utilization of health personnel;

3. To initiate new types and patterns or improve existing patterns of training, retraining, continuing education, and advanced training of health personnel, including teachers, administrators, specialists, and paraprofessionals (particularly physicians' assistants, dental therapists, and pediatric nurse practitioners);

4. To encourage new or more effective approaches to the organization and delivery of health services (including emergency medical services) through

V401246 DEC 22 75 XUM

training individuals in the use of the team approach to delivery of health services (including emergency medical services) and otherwise;

5. To assist State, local, or other regional arrangements among schools and related organizations and institutions to carry out any of the above purposes; or

6. To provide for (1) the discovery, collection, development or confirmation of information for, (2) the planning, development, demonstration, establishment, or maintenance of, or (3) the alteration or renovation of existing facilities for, any of the purposes described above.

Proposed regulations implementing section 774(a) of the Act were published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18790). Section 57.2606(a) of the proposed regulations provides that the Secretary in awarding grants will take into consideration, among other pertinent factors, the national need which the particular project proposes to serve.

Notice is hereby given that the Secretary has determined there is a priority national need for projects to train health professions, nursing, and public health students and students in auxiliary health fields in the use of the interdisciplinary team approach to the delivery of primary health care. Therefore, in fiscal year 1976 funding preference will be given to projects which address such national need. For purposes of these projects, training in the interdisciplinary team approach to the delivery of primary health care is considered to be an educational program that teaches individuals to function as an integral part of an interprofessional team of health personnel, organized under the leadership of the professional who is accountable for the care of the patient, working toward a more efficient and more effective delivery of such health care. Central to the objectives of such training is the ability of the group to interact in such a way as to achieve a higher level of effectiveness or efficiency than would occur if each worked independently. Therefore, the purpose of the training is the acquisition of knowledge and skills necessary to work in an interactive group with a delineation and understanding of the roles of each and the relationship of the roles to one another in achieving the objectives.

Although funding preference will be given to the projects which address the priority national need described above, applications for projects to carry out the other purposes authorized by section 774 (a) of the Act will also be accepted and considered for funding. All applications must meet the requirements of final regulations which will be promulgated shortly pursuant to section 774(a) of the Act.

This program is administered by and application materials may be obtained from the Special Programs Staff, Office of Interdisciplinary Programs, Bureau of Health Manpower, Health Resources Administration, 9000 Rockville Pike, Bethesda, Maryland 20014 (Telephone 301–496–6821). The deadline for receipt of applications for grants for fiscal year 1976 funding is February 2, 1976.

Dated: December 12, 1975.

KENNETH M. ENDICOTT,
Administrator,
Health Resources Administration.

[FR Doc.75-34308 Filed 12-19-75;8:45 am]

PUBLIC HEALTH AND ALLIED HEALTH PROFESSIONS GRANT PROGRAMS

Application Announcement

Notice is hereby given that the Division of Associated Health Professions, Bureau of Health Manpower, Health Resources Administration, is now accepting applications for grants in fiscal year 1976 for the programs listed below. Although, the President did not request funds in support of these programs in the 1976 budget, consideration of the continuation of these programs is currently underway in the Congress. On the contingency that funds may be made available by the Congress, all potential applicants are being advised that they may apply. However, there can be no assurance that funds will ultimately be available for making grant awards.

Eligible applicants may request application materials by contacting immediately the Education Development Branch, Division of Associated Health Professions, Bureau of Health Manpower, Health Resources Administration, Building 31, Room 3B19, 9000 Rockville Pike, Bethesda, Maryland 20014 (301, 496–5697).

Program	Public Health Service Act	Application receipt deadline
Traineeship for professional public health personnel	Sec. 312 (formerly sec. 306)[6]	Feb. 27
Special purpose [1]		
Short term [1] [3]		(5)
General purpose [2]		Apr. 1
Project grants for graduate training in public health [1]	Sec. 313(a) (formerly sec. 309(a)) [4]	Mar. 15
Grants to schools of public health for public health training (formula grants).[3]	Sec. 313(c) (formerly sec. 309(c))[4]	Mar. 1
Grants to improve the quality of training for allied health professions special improvement grants.[3]	Sec. 792(b)	Mar. 22
Special projects for experimentation, demonstration, and institutional improvement.[4]	Sec. 792(c)	Mar. 15

ELIGIBLE APPLICANTS

[1] Schools of public health and other public and nonprofit private institutions offering graduate or specialized training in public health for professional health personnel.
[2] Public and nonprofit private schools of public health accredited to award the master of public health degree.
[3] Public and nonprofit private training centers for allied health professions, as defined in sec. 795(1) of the act, and implementing regulations.
[4] Public and nonprofit private agencies, organizations, and institutions.
[5] To obtain application materials and deadlines for grants for public health traineeships (short term), applicants should contact the Regional Health Administrator DHEW regional offices.
[6] Redesignated by Public Law 93-353.

KENNETH M. ENDICOTT,
Administrator,
Health Resources Administration.

Office of Education

EDUCATIONAL OPPORTUNITY CENTERS PROGRAM

Closing Date for Receipt of Applications

Notice is hereby given that pursuant to the authority contained in Title IV, part A, Subpart 4 of the Higher Education Act of 1965, as amended (20 U.S.C. 1070d–1070d–1), applications are being accepted for awards under the Educational Opportunity Centers Program.

Applications must be received by the Office of Education Application Control Center on or before February 11, 1976. For Fiscal Year 1976 no continuation awards will be funded.

A. *Applications sent by mail.* An application sent by mail should be addressed as follows: U.S. Office of Education, Grant and Procurement Management Division, Application Control Center, 400 Maryland Avenue, S.W., Washington, D.C. 20202, Attention: 13.543. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than February 6, 1976, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

B. *Hand delivered applications.* An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets, SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, or Federal holidays.

Applications will not be accepted after 4:00 p.m. on the closing date.

C. *Program information and forms.* Information and application forms may be obtained from the Division of Student Support and Special Programs, Room 4010, 7th and D Streets, SW., Washington, D.C. 20202.

D. *Applicable regulations.* The regulations applicable to these programs include the Office of Education General Provisions Regulations (45 CFR Part 100a), the regulations set forth at 45 CFR Part 154 (Educational Opportunity Centers), and the proposed funding criteria for Educational Opportunity Centers, published in this issue of the FEDERAL REGISTER.

(20 U.S.C. 1070d–1070d–1)

(Catalog of Federal Domestic Assistance Programs, Number 13.453 Educational Opportunity Centers)

Dated: December 15, 1975.

T. H. BELL,
U.S. Commissioner of Education.

[FR Doc.75-34435 Filed 12-19-75;8:45 am]

COMMUNITY EDUCATION PROGRAM

Notice on Closing Date for Receipt of Applications

Notice is hereby given that pursuant to the authority contained in section 405 of the Education Amendments of 1974, Pub. L. 93-380 (20 U.S.C. 1864), applications are being accepted for the Community Education Program. This program is authorized to make grants to State education agencies (SEA) and to local education agencies (LEA) to pay the Federal share of the cost of establishing, expanding, and maintaining community education programs. The program is also authorized to make grants to institutions of higher education (IHE) to develop and establish or expand programs which will train persons to plan and operate community education programs.

Applications must be received by the U.S. Office of Education Application Control Center on or before March 3, 1976.

A. *Applications sent by mail.* An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, 400 Maryland Avenue SW., Washington, D.C. 20202, Attention 13.563. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than February 27, 1976, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or,

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare or the U.S. Office of Education mail rooms in Washington, D.C. (In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.)

B. *Hand delivered applications.* An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Applications will not be accepted after 4:00 p.m. on the closing date, March 3, 1976.

C. *Pre-Application.* No pre-application will be required for Fiscal Year 1976.

D. *State comment.* A local educational agency *must* provide a copy of its application to the appropriate State educational agency. For verification of submission to the SEA, the LEA applicant must enclose in its application to the Commissioner, a copy of the dated cover letter used to forward a copy of its application to the SEA. State educational agencies wishing to submit advice and comment on any application originating within their State may do so by forwarding such advice and comment to the Community Education Program, U.S. Office of Education. (See address below.) Advice and comments received from SEAs no later than March 31, 1976 will be considered in reviewing applications.

E. *Program information and forms.* Information and application forms may be obtained from the U.S. Office of Education, Community Education Program, Regional Office Building Three, Room 5622, 7th and D Streets, SW., Washington, D.C. 20202. (202) 245–0691.

F. *Applicable regulations.* The regulations applicable to this program are the Office of Education General Provisions Regulations (45 CFR Part 100a), which are included in the Community Education Program application package, and the Community Education Program Regulation (45 CFR Part 160c) published on December 12, 1975 in the FEDERAL REGISTER.

(20 U.S.C. 1864)

(Catalog of Federal Domestic Assistance Number 13.563; Community Education Program)

Dated December 17, 1975.

T. H. BELL,
U.S. Commissioner of Education.

RIGHTS AND RESPONSIBILITIES OF WOMEN ADVISORY COMMITTEE

Meeting

The Secretary's Advisory Committee on the Rights and Responsibilities of Women, which was established to review the policies, programs, and activities of the Department of Health, Education, and Welfare relative to women and to make recommendations to the Secretary on how to better the services of HEW's programs to meet these special needs of women, will meet on Thursday and Friday, January 15–16, 1976, from 9:00 a.m. to 5:00 p.m. each day in Room 5169, HEW—North Building, 330 Independence Avenue, SW., Washington, D.C. The agenda includes the consideration of new priorities for 1976 and a report on the status of the Committee and its 1975 projects.

Interested persons wishing to address the Committee, should contact the Executive Secretary by COB Friday, January 9. Phone: 202–245–8454. Written statements received by January 9 will be duplicated and distributed to the members. Members of the public are invited to attend the meeting.

Dated: December 15, 1975.

SANDRA S. KRAMER,
Acting Executive Secretary, Secretary's Advisory Committee on the Rights and Responsibilities of Women.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Interstate Land Sales Registration

[Docket No. N-75-469]

CAPTAIN'S COVE

Hearing

In the matter of Captain's Cove, OILSR No. 0-0829-54-27 Doc. No. 75-266-IS.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d) Notice is hereby given that:

1. First Charter Land Corporation, Wesley T. Butler, President, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90-448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued November 13, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Captain's Cove, located in Greenbackville, Virginia, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received November 25, 1975, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d): *It is hereby ordered*, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, De-

V401246
DEC 22 75
XUM

partment of HUD, 451 7th Street, SW., Washington, D.C., on February 4, 1976, at 10:00 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before January 21, 1976.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: December 11, 1975.

By the Secretary.

JAMES W. MAST,
Administrative Law Judge.

[Docket No. N-75-468]

STONE KNOB

Hearing

In the matter of Stone Knob, OILSR No. 0-4278-57-39, Doc. No. 75-238-IS.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d).

Notice is hereby given that:

1. Coldstream Wildpark, Inc., Henry C. Barksdale, President, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90-448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued October 22, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Stone Knob, located in Hampshire County, West Virginia, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received November 7, 1975, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d): *It is hereby ordered*, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, SW., Washington, D.C., on February 9, 1976, at 10:00 a.m.

The following time and procedure is applicable to such hearing:

All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C. 20410 on or before January 26, 1976.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: December 11, 1975.

By the Secretary.

JAMES W. MAST,
Administrative Law Judge.

[Docket No. N-75-470]

THORNHURST LAKE ESTATES

Hearing

In the matter of Thornhurst Lake Estates, OILSR No. 0-1724-44-81 Docket No. 75-249-IS.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d).

Notice is hereby given that:

1. Pocono Resorts Enterprises, William D. Morgan, President, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90-448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued October 22, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Thornhurst Lake Estates, located in the state of Pennsylvania, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received November 17, 1975, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d): *It is hereby ordered*, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, SW., Washington, D.C., on February 5, 1976, at 10:00 a.m.

The following time and procedure is applicable to such hearing:

All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before January 23, 1976.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: December 11, 1975.

By the Secretary.

JAMES W. MAST,
Administrative Law Judge.

DEPARTMENT OF TRANSPORTATION

RADIO TECHNICAL COMMISSION FOR AERONAUTICS

Meeting

Notice is hereby given of a meeting of the Radio Technical Commission for Aeronautics (RTCA) Special Committee 129—Future Civil Aviation Frequency Spectrum Requirements, which is being utilized as an advisory committee within the meaning of the Federal Advisory Committee Act, 5 U.S.C. Appendix I. It is to be held January 8-9, 1976, in Conference Room 8201, Federal Communication Commission, 2025 M Street, NW., Washington, D.C. 20554, commencing at 9:30 am. Agenda items include:

1. Review and approval of Minutes of Sixth Meeting held on December 5, 1975.
2. Reports on FCC Steering Committee meeting and of Informal Groups.
3. Review of ITU Radio Regulations pertaining to the Aeronautical Services.
4. Review of footnotes to the Table of Frequency Allocations.

Meetings of Special Committee 129 are open to the public, subject to limitations of space available. Subject to time being available, any member of the public may present oral statements at the meeting, or may submit written statements to the RTCA Secretariat. Requests to receive additional information or to be heard should be made by contacting the RTCA Secretariat, Suite 655, 1717 H Street, NW., Washington, D.C. 20006, or telephone Area Code (202) 296-0484.

Issued in Washington, D.C., on December 10, 1975.

EDGAR A. POST,
Designated Officer.

MICROWAVE LANDING SYSTEM ADVISORY COMMITTEE

Meeting

Pursuant to Section 10(a)(2) of Pub. L. 92-463, notice is hereby given that the Microwave Landing System (MLS) Advisory Committee will hold a meeting on January 20 and 21, 1976, beginning at 9:30 AM in Conference Room 3201, Trans Point Building, 2100 2nd Street, S.W., Washington, D.C.

Topics to be considered include: discussion of user views on the MLS program; the review of Phase III procurement and test plans, and results of recently conducted tests; discussion of the U.S. Microwave Landing System proposal to the International Civil Aviation Organization (ICAO); system transition and implementation considerations and policy status; and discussion of MLS operational benefits.

Anyone desiring further information on the meeting should contact Mr. G. Jensen, Executive Director, Microwave Landing System Advisory Committee, Federal Aviation Administration, 2100 2nd Street, S.W. Washington, D.C., 20590, telephone 202-426-3633. The meeting will be open to the public.

Issued in Washington, D.C. on November 28, 1975.

JACK W. EDWARDS,
Acting Executive Director, Microwave Landing System Advisory Committee.

Materials Transportation Bureau

HAZARDOUS MATERIALS OPERATIONS

Notice of Application for Exemptions or Renewals

In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Operations has received applications for exemptions and renewals of exemptions, that are described below. The modes of transportation requested are identified by a number in the "Nature of Application" portion of the table below as follows: 1—Motor Vehicle, 2—Rail Freight, 3—Cargo Vessel, 4—Cargo-only Aircraft, 5—Passenger-carrying Aircraft.

Complete copies of the applications are available for inspection and copying at the Public Docket Room, Office of Hazardous Materials Operations, Department of Transportation, Room 6213, Trans Point Building, 2100 Second Street SW., Washington, D.C.

Interested persons are invited to submit views or comments with respect to any one or more of the applications. Comments should refer to the application number and be submitted in duplicate to the Docket Section, Office of Hazardous Materials Operations, Department of Transportation, Washington, D.C. 20590. All comments received before the close of business on the specified comment closing date will be considered and will be available in the docket for inspection and copying, both before and after the closing date.

This notice of receipt of applications for exemptions and renewals of exemptions is published in accordance with section 107 (a) of the Hazardous Materials Transportation Act (49 U.S.C. 1806(a)) and the Materials Transportation Bureau's regulations on this subject (49 CFR 107.109(a)), and does not represent any agency decision or other exercise of judgment concerning the merits of the petitions.

New exemptions

Application No.	Applicant	Regulation(s) affected	Nature of application
75-108	Eagle-Picher Industries, Inc., Joplin, Mo.	49 CFR 173.206	To allow the shipment of lithium batteries not presently provided for in the regulations. (Mode 1.)
75-109	Pennwalt Corp., Philadelphia, Pa.	49 CFR 173.314	To allow the shipment of chlorine in "ton containers" patterned after DOT specification 110A500W. (Modes 1 and 2.)
75-110	Kerr-McGee Chemical Corp., Oklahoma City, Okla.	49 CFR 173.251	To allow the use of DOT specification 37A steel drums, with certain inside containers for boron tribromide. (Modes 1, 2, 3, 4, and 5.)
75-111	Hercules, Inc., Wilmington, Del.	49 CFR 173.268 and 179.201-1.	To allow the use of safety relief devices with higher pressure settings than presently authorized on DOT 111A60ALW2 tank cars in nitric acid service. (Mode 2.)
75-112	Olin Corp., Winchester-Western Division, East Alton, Ill.	49 CFR 173.65	To allow the use of DOT specification 10B wooden barrels, formerly authorized, for shipments of a class A explosive. (Mode 1.)
75-113	Boeing Commercial Airplane Co., Seattle, Wash.	49 CFR 173.302	To allow the use of non-DOT specification FRP aluminum cylinders in compressed gas service. (Modes 4 and 5.)
75-114	Williams, Dimond & Co., San Francisco, Calif.	46 CFR 146.22-100 and 49 CFR 173.119.	To allow the shipment of a flammable liquid in non-DOT specification portable tanks built to ISO specifications. (Modes 1, 2, and 3.)

NOTE.—The closing date for filing comments on the above applications, is Jan. 23, 1976.

Renewals

Application No.	Applicant	Regulation(s) affected	Nature of application
75-115	Airco Cryplants Corp., New Providence, N.J.	49 CFR 173.315	To amend special permit 7025, to determine the "One way travel time" by a modified procedure. (Mode 1.)
75-116	Virginia Chemicals, Inc., Portsmouth, Va.	46 CFR 146.21-100, 146.25-100, 49 CFR 173.119, 173.249.	To amend special permit 6720, to allow the shipment of additional organic amines. (Modes 1, 2, and 3.)
75-117	Diamond Shamrock Chemical Co., Cleveland, Ohio.	46 CFR 146.23-100, 146.27-100.	To renew U.S. Coast Guard permit 28-73, allowing shipments of corrosive materials with deviation from the stowage requirements. (Mode 3.)
75-118	3M Co., Saint Paul, Minn.	49 CFR 173.124, 14 CFR 103.9.	To renew special permit 4662, allowing shipments of ethylene oxide, 12 cartridges to a box and 10 boxes in a carton. (Modes 1, 2, and 4.)
75-119	Military Traffic Management Command (MTMC), Department of the Army, Washington, D.C.	49 CFR 173.62 and 177.835.	To renew special permit 2709, allowing the transportation of desensitized liquid nitroglycerin in specially designed containers. (Mode 1.)
75-120	MCB Manufacturing Chemists, Norwood, Ohio.	49 CFR pt. 173	To renew special permit 6700, allowing the use of polyethylene drums without overpack for certain corrosive liquids. (Modes 1, 2, and 3.)
75-121	Mason and Hanger-Silas, Mason Co., Inc., Amarillo, Tex.	49 CFR 173.65	To renew special permit 6043, allowing the shipment of a certain class A explosive shipped as a reagent. (Modes 1 and 2.)
75-122	Norris Industries, Los Angeles, Calif.	49 CFR 173.302	To renew special permit 6088, allowing the use of non-DOT specification aluminum alloy cylinders for shipment of compressed gases. (Modes 1 and 2.)
75-123	MTMC, Washington, D.C.	49 CFR 173.214	To renew special permit 5279, allowing the transportation of zirconium metal powder in a container not presently authorized for this commodity by the regulations. (Modes 1 and 2.)
75-124	do	49 CFR 173.60 and 173.87.	To renew special permit 6250, allowing the transportation of aircraft components containing class C explosives. (Modes 1 and 3.)
75-125	Chilton Metal Products, Chilton, Wis.	49 CFR 173.304 and 175.85.	To renew special permit 6036, allowing shipments of a certain flammable compressed gas in cylinders not presently authorized for than commodity. (Modes 1 and 2.)
75-126	Allied Chemical, Morristown, N.J.	49 CFR 173.315	To renew special permit 6173, allowing tht transportation of liquefied ethylene in specially designed cargo tanks. (Mode 1.)
75-127	RMI Co., Niles Ohio.	49 CFR 173.206	To renew special permit 3648, allowing the shipment of a certain flammable solid in packaging not presently authorized by the regulations. (Mode 1.)
75-128	Dow Chemical Co., Freeport, Tex.	49 CFR 173.263 and 173.249.	To renew special permit 6790, allowing the use of a fiberglass reinforced plastic cargo tank for certain corrosive liquids. (Mode 1.)
75-129	MTMC, Washington, D.C.	49 CFR 173.34 and 173.302.	To renew special permit 6068, allowing the shipment of Nitrogen in non-DOT specification cylinders. (Modes 1, 2, and 4.)
75-130	do	49 CFR 173.306	To renew special permit 5789, allowing the shipment of hydraulic accumulators overpacked in a strong wooden box. (Modes 1, 2, 3, and 4.)

V40246 DEC 22 75 XUM

Renewals

Application No.	Applicant	Regulation(s) affected	Nature of application
75-131	Uniroyal Chemical, Naugatuck, Conn.	49 CFR 173.346	To renew special permit 6397, allowing the use of the DOT 34 polyethylene container for certain class B poisons. (Modes 1 and 2.)
75-132	Dow Chemical Co., Midland, Mich. and Great Lakes Chemical Corp., El Dorado, Ark.	49 CFR 173.252 and 46 CFR 146.23-100.	To renew special permit 6958, allowing the shipment of elemental bromine in a lead lined portable tank. (Modes 1 and 2.)
75-133	MTMC, Washington, D.C.	49 CFR 173.315	To renew special permit 1479, allowing the use of a specially designed cargo tank for transportation of liquified fluorine and mixtures thereof. (Mode 1.)
75-134	Austin Powder Co., Cleveland, Ohio.	49 CFR 173.62, 177.834, and 177.835.	To renew special permit 5112, allowing the use of a specially designed container for transportation of liquid high explosives. (Mode 1.)
75-135	Hercules, Inc., Wilmington, Delaware, and MTMC, Washington, D.C.	49 CFR 173.336 and 177.811.	To renew special permit 312, allowing the transportation of nitrogen tetroxide in specially designed cargo tanks. (Mode 1.)
75-136	Buckeye Fire Equipment Co., Cleveland, Ohio, and Fenwal, Inc., Ashland, Mass.	49 CFR 173.305	To renew special permit 6629, allowing the use of non-DOT specification spherical pressure vessels for shipments of compressed gas. (Mode 1.)
75-137	United Technologies, Sunnyvale, Calif., and MTMC, Washington, D.C.	49 CFR 173.65	To renew special permit 4041, allowing the use of DOT specification 37A drums for small particle size ammonium perchlorate classed as high explosives. (Modes 1 and 2.)
75-138	MTMC, Washington, D.C.	49 CFR 173.145	To renew special permit 6954, allowing the transportation of methylhydrazine in modified DOT specification MC 312 cargo tanks. (Mode 1.)
75-139	Rohm and Haas Co., Philadelphia, Pa.	46 CFR 146.22-100	To renew U.S. Coast Guard permit 27-73, allowing a certain flammable solid in DOT 37A specification drums. (Mode 3.)
75-140	Phillips Petroleum Co., Bartlesville, Okla.	49 CFR 173.249	To renew special permit 6943, allowing the transportation of alkaline caustic liquid in DOT-51 stainless steel portable tanks. (Mode 1.)
75-141	MTMC, Washington, D.C.	49 CFR 174.526 and 175.835.	To renew special permit 5022, allowing shipments of class A and B explosives and accompanying devices in or on transport vehicles equipped with heating or refrigerating apparatus. (Modes 1 and 2.)
75-142	Virginia Chemicals, Inc., Portsmouth, Va.	49 CFR 173.302, 173.304, and 173.305.	To renew special permit 6151, allowing the use of DOT-39 aluminum cylinders without safety relief devices, for shipments of certain compressed gases. (Modes 1 and 2.)

The closing date for filing comments on the above applications for renewal is: January 9, 1976.

J. R. GROTHE,
Chief, Exemptions Branch, Office of Hazardous Materials Operations.

National Highway Traffic Safety Administration

NATIONAL MOTOR VEHICLE SAFETY ADVISORY COUNCIL

Public Meeting

On January 27, 28 and 29, 1976, the National Motor Vehicle Safety Advisory Council will hold open meetings in the DOT Headquarters Building, 400 Seventh Street, SW., Washington, D.C. The Advisory Council is composed of 25 members, a majority of whom are representatives of the general public, including representatives of State and local governments, with the remainder including representatives of motor vehicle manufacturers, motor vehicle equipment manufacturers, and motor vehicle dealers. The Advisory Council makes recommendations to the Secretary of Transportation on motor vehicle safety and property loss reduction programs carried out by the National Highway Traffic Administration.

The following meetings are subject to the approval of the National Highway Traffic Safety Administrator.

On January 27 in room 2232 the committees of the Advisory Council will meet. On January 28 in room 2232 the Safety Defects Hearing will be held. On January 29 in room 2232 the full Council will meet with the Executive Committee meeting immediately following the Council meeting.

Agendas and times for the above meetings will be published prior to the meeting dates.

For further information contact the NHTSA Executive Secretary, room 5215, 400 Seventh Street, SW., Washington, D.C., telephone 202-426-2872.

This notice is given pursuant to section 10(a)(2) of Public Law 92-463, Federal Advisory Committee Act (FACA), effective January 5, 1973.

Issued: December 16, 1975.

WM. H. MARSH,
Executive Secretary.

ARMS CONTROL AND DISARMAMENT AGENCY

GENERAL ADVISORY COMMITTEE ON ARMS CONTROL AND DISARMAMENT

Meeting

Notice is hereby given in accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770, 5 U.S.C. App. I) and paragraph 8b of Office of Management and Budget Circular No. A-63 (Revised) dated March 27, 1974, that a meeting of the General Advisory Committee on Arms Control and Disarmament is scheduled to be held on Monday, February 2, 1976, from 8:30 a.m. to 6:00 p.m. and on Tuesday, February 3, 1976, from 8:30 a.m. to 5:00 p.m., at 2201 C Street, N.W., Washington, D.C. in room 7516. The purpose of the meeting is for the Committee to receive classified briefings and hold classified discussions concerning continuing international negotiations and other arms control issues.

The meeting will be closed to the public. A determination has been made by the Director of the Arms Control and Disarmament Agency in accordance with section 10(d) of the Federal Advisory Committee Act and paragraph 8d(2) of Office of Management and Budget Circular No. A-63 (Revised) that the meeting will be concerned with matters of the type described in 5 U.S.C. 552(b)(1). This determination was made pursuant to a delegation of authority from the Office of Management and Budget dated June 25, 1973, issued under the authority of Executive Order 11769 dated February 21, 1974.

Dated: December 15, 1975.

SIDNEY D. ANDERSON,
Advisory Committee Management Officer.

CIVIL AERONAUTICS BOARD

[Docket No. 26487; Order 75-12-64]

NORTHWEST AIRLINES, INC.

Transatlantic, Transpacific and Latin American Mail Rates

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 15th day of December 1975.

By petition dated December 11, 1975, Northwest Airlines, Inc. (Northwest), requests that the Board issue an order authorizing negotiations among the parties to this proceeding for the purpose of developing a proposed settlement of some or all of the issues under investigation. Northwest further requests that the authority extend until January 5, 1976.

In support of its request, Northwest states that on the first day of the hearing,[1] the Administrative Law Judge (ALJ) temporarily recessed the proceedings in order to permit the parties to explore the feasibility of settlement negotiations among the parties; that after nearly one and a half days of preliminary exploratory discussions, the parties reported to the ALJ that they believed negotiations could possibly lead to a proposed settlement of most, if not all, of the issues in this case; and that the ALJ, based on this report, recessed the hearing until January 6, 1976, in order to facilitate the negotiations.

[1] The hearing was commenced on December 8, 1975, in Washington, D.C.

Northwest indicates that an order approving the negotiations may not be necessary even though the negotiations will require discussion of mail rates not only between each carrier and the Postal Service but also among the carriers collectively and the Postal Service. It points out that under section 406 of the Federal Aviation Act, only the Board can fix rates for mail transportation. Moreover, because the purpose of the negotiations is to arrive at a settlement of a formal investigation instituted by the Board, any prohibition there might be against such discussions may not apply.[2]

However, Northwest believes that it would be highly desirable to have a Board authorization for the negotiations since it has been unable to find a specific Board or judicial precedent which would permit the discussions absent a Board order.

Because of the short hearing recess permitted by the ALJ for discussions, the Board has decided to act upon the petition without awaiting answers to be filed.[3] It is argued that Board authorization is not necessary for settlement discussions among the parties to this proceeding, since both the carriers and the sole users of the service will be present and only the Board has the final authority to set mail rates. In the present circumstances, we do not believe it is necessary to reach that issue. Northwest has indicated a reluctance to enter the discussions absent such authorization. We believe that there is a strong public interest in attempting to resolve the issues in this proceeding through settlement discussions rather than prolonged and costly litigation.[4] We will therefore grant the requested authority.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, particularly sections 102, 204, 406, 412, and 414 thereof, and the regulations promulgated in 14 CFR Part 302,

It is ordered, That: 1. The parties to this investigation may engage in discussions until January 5, 1976, in order to develop a proposed settlement of some or all of the issues to this investigation;

2. Any proposal reached as a result of such discussions shall be filed in Docket 26487 forthwith upon conclusion of the discussions; and

3. This order shall be served upon all parties to Docket 26487.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.75-34469 Filed 12-19-75;8:45 am]

[Docket No. 28610; Order 75-12-77]

PAN AMERICAN WORLD AIRWAYS, INC.

Order Granting Temporary Emergency Exemption

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 17th day of December 1975.

By telegraphic application dated December 11, 1975, Pan American World Airways requested an exemption pursuant to section 416(b) of the Act and Rule 410 of the Board's rules of practice to enable Pan American, inter alia to carry traffic between New York and San Francisco on existing Pan American flights over that sector for the duration of the work stoppage at United Air Lines, Inc. We have decided to grant Pan American's exemption request for the period December 18, 1975 through December 23, 1975 to the extent necessary to enable the carrier to engage in passenger interstate air transportation between New York and San Francisco on its daily Flight #1, departing New York at 9 a.m. and arriving in San Francisco at 12:10 p.m. and its Flight #2, departing San Francisco at 9:45 a.m. and arriving in New York at 5:50 p.m.

In support of its request for an exemption from sections 401 and 403 of the Act, Pan American states: that in light of the overwhelming demand for transportation which, due to United's work stoppage, cannot be met by air carriers certificated in this market, grant of Pan American's exemption request is required in the public interest; that enforcement of sections 401 and 403 of the Act would unduly burden Pan American because of the unusual circumstances affecting its operations, the unusual circumstances being the United work stoppage and the fact that Pan American conducts operations over this route without local traffic rights; and that there is ample capacity on Pan American's New York-San Francisco-Tokyo flights to accommodate traffic which would otherwise be stranded beacuse of the United work stoppage. In a later telegraphic communication also dated December 11, 1975, Pan American has stated that it would charge the fares and rates currently provided in United's tariffs.

Answers[1] in opposition to Pan American's request for temporary fill-up rights between New York and San Francisco were filed between December 12 and 16 by American Airlines, the Air Line Pilots Association, International (ALPA), the United Airlines Pilots Master Executive Council (United Pilots), The Flying Tiger Line, Trans World Airlines, and United Air Lines. American states, inter alia, that there is no public need for another carrier in the New York-San Francisco market since American and TWA offer a number of frequencies in that market and American clearly has the capability of adding extra sections on days when demand may peak; that Pan American's request is contrary to Board policy; that Pan American's request is a complex and controversial one which the Board has repeatedly held to be inappropriate for an exemption; and that where the underlying situation involves a labor dispute affecting markets where the remaining carriers are supplying ample service to meet the public demand, Board policy expressly requires denial of an exemption to a carrier in Pan American's position. ALPA states that the Board's policy has been against temporary authorizations for air carriers to operate over the route of struck carriers; that it is impossible to visualize any burden upon Pan American which would result from the denial of its requested exemption; that the requested exemption is clearly contrary to the public interest since it may cause the current strike against United to be extended indefinitely and expanded to other carriers; and that granting the exemption would destroy the delicate balance which the Railway Labor Act established for collective bargaining negotiations, contrary to the Board's responsibilities under section 401(k) of the Act. The United Pilots take the position that the grant of Pan American's exemption request would be an unconscionable interference in the collective bargaining process and would undoubtedly prolong the United strike. Flying Tiger opposes an exemption for the carriage of freight in the New York-San Francisco market on the ground that the certificated carriers in this market have made available sufficient additional freighter capacity to service all available traffic. TWA states that it is only during the period December 17-23 that it may have difficulty accommodating all of the traffic in the New York-San Francisco market, and that it objects, therefore, to Pan American's request except for that period and provided that, even on those dates, Pan American's authority be restricted so as to prevent the carrier from advertising or holding out such services.[2] Finally, United states, inter alia, that the facts indicate that there clearly is no need for additional service by Pan American in the New York-San Francisco market; and that contrary to Pan American's alleged desire to provide needed service, the carrier is really attempting

[2] Northwest also believes that two Supreme Court decisions may be sufficient authority for the negotiations. These cases held that no cause of action under the Sherman Act was alleged insofar as it was predicated upon mere attempts to influence the Legislative Branch for the passage of laws or the Executive Branch for their enforcement "Eastern Railroad Presidents Conference v. NOERR Motor Freight, Inc." 365 U.S. 127 (1961) and "United Mine Workers v. Pennington" 381 U.S. 657 (1965).

[3] Northwest has indicated that all of the parties who attended the first day of the hearing have no objection to the request.

[4] Indeed, Section 4 of the International Fair Competitive Practices Act of 1974 (P.L. 93-623) requires that the Board act expeditiously in setting mail rates for foreign mail transportation.

[1] Telegraphic communications received from the United Pilots, Flying Tiger, and TWA are hereby treated as answers. While Rule 410 of the Board's Rules of Practice which provides for emergency exemptions does not specifically authorize telegraphic answers to applications for emergency exemptions, in view of the emergency nature of the application involved herein, we will accept the telegraphic answers received.

[2] In this regard, TWA requests that Pan American merely be permitted to honor tickets sold to passengers by one of the carriers authorized to serve the route and endorsed over by such carriers to Pan American.

V40246 DEC 22 75 XUM

to obtain the fill-up rights it has sought since 1950 by way of the "back door."

Answers in support of Pan American's request were filed by Emery Air Freight, Corp.[3] and the American Society of Travel Agents, Inc. (ASTA). Emery states that it has a substantial volume of cargo which it will be unable to move unless Pan American's requested authority is granted since the authorized carriers now operating are having extreme difficulty in accommodating Emery's freight. ASTA states that there is an overwhelming demand for transportation which cannot and will not be met by those air carriers presently certificated to carry passengers in the New York-San Francisco market and that the impact resulting from the United strike will increase greatly as the holiday season approaches; and that because of the excess capacity on Pan American flights, that carrier could easily and conveniently accommodate many of the persons who will be affected by the United work stoppage.

Upon consideration of the foregoing, the Board has determined to grant an exemption to Pan American pursuant to section 416(b) of the Federal Aviation Act of 1958, as amended, from the provisions of sections 401 and 403 that would otherwise prevent the carrier from engaging in interstate passenger air transportation between New York and San Francisco. As indicated above, this temporary emergency authority will permit Pan American to carry domestic passenger traffic on presently operating flights at the fares currently provided in the tariffs of United Air Lines for the very limited period between December 18–23, 1975, inclusive.[4] The Board finds that the combination of (1) the peaking of holiday traffic in the period immediately prior to Christmas; (2) the abrupt cessation of United's service by reason of a strike; and (3) the ready availability of seats on one presently operating Pan American B–747 daily round-trip service, justifies the grant of temporary exemption authority on an emergency basis.

TWA has stated that it "may have difficulty in accommodating all of the traffic, Dec. 17 through Dec. 23 inclusive." Moreover, while American Airlines and other parties note that thus far there has been no general shortage of seating accommodations based on average load-factor data, the Board is aware that the domestic air transportation system suffers pronounced peaking problems in the days preceding Christmas, as TWA acknowledges in the case of the market at issue. We recognize, of course, that carriers generally provide extra sections in holiday periods, and that both TWA and American intend to offer additional capacity between New York and San Francisco. Furthermore, the fact that passengers cannot be accommodated in a peak period on short notice, and are therefore waitlisted, is not by itself a basis for authorizing additional capacity by a carrier not holding certificate rights, by use of the Board's extraordinary exemption powers. Here, however, United is not offering any service, and consequently has been unable to honor reservations made well in advance. In these circumstances, and based on the representations made by TWA and American, the Board cannot find that the market will receive the same capacity that it would have received if United were operating.

Specifically, the Board cannot conclude that American's and TWA's extra sections will be equivalent to the services (including extra sections) that would have been offered by United had it been operating.[5] Thus, it appears likely to us that some travelers who would have used United's services (or the services of TWA and American that have been prematurely closed out by reason of United's cessation of service) will be unable to travel. In these circumstances, it would not be consistent with the public interest to prevent Pan American from accommodating the traveling public in seats that would otherwise be unused and which are available on one international round-trip flight operating between New York and San Francisco daily. On the contrary, public interest considerations clearly dictate that Pan American's capacity be made available to the traveling public immediately in view of the travel peak and United's cessation of service.[6] In these circumstances, it would be an undue burden on Pan American, because of the limited extent of its operations, to require a certificate proceeding which in any event could not be effected in time to meet traffic requirements. Moreover, the cost of processing such an application would be disproportionate to the limited revenues which would accrue to Pan American. In addition, it is to be noted that the only injury that can be claimed by the incumbent carriers is de minimis revenue diversion.

It is important to emphasize that it is not our intention to intervene in a labor controversy nor to favor one side against the other; we do not believe that the strictly limited temporary authority conferred herein will have that effect. Our sole goal is to alleviate, to the extent possible, a temporary public hardship. We believe that our action can have only an extremely negligible effect, if any at all, upon the normal economic forces in play between management and labor.[7]

United, the incumbent carriers, and various labor groups, including the IAM, have objected to the grant of Pan American's request. Our action is therefore solely motivated by the conditions previously recited. For the same reason, the grant of this exemption does not constitute a precedent for any other request (except in connection with the factually similar circumstances set forth in the companion order involving the San Francisco-Seattle market), nor shall operations conducted pursuant to this order be recognized as having any significance in support of the selection of Pan American in any subsequent certificate proceeding or for the grant of any subsequent exemption request.

To avoid any potential for misleading the public by conveying an intimation of permanence or greatly increased services in what is, in fact, authority of extremely short duration, involving limited additional capacity, the Board has determined that it would not serve the public interest to allow Pan American publicly to advertise the services authorized in this order. However, the Board will expect American and TWA—and United, to the extent its reservations service is still operating—to notify travelers making inquiries (including those already on their own waitlists) whom these carriers are unable to accommodate, of the availability of Pan American's service during this limited time. As an alternative, these carriers may make available their waitlists to Pan American so that the latter may contact the travelers.

Finally, we have determined that our action herein does not result in a major Federal Action significantly affecting the quality of the Environment within the meaning of the National Environmental Policy Act of 1969 since Pan American is at present operating the flights.

In sum, we find that enforcement of sections 401 and 403 of the Act, insofar as they would otherwise prevent the services authorized herein, would be an undue burden upon Pan American by reason of the limited extent of its operations and is not in the public interest.

Accordingly, it is ordered, That: 1. Pan American World Airways, Inc. be and it hereby is exempted from section 401 of the Act and the terms, limitations and conditions of its certificate for Route 130 to the extent necessary to enable it to engage in, during the period December 18, 1975 through and including December 23, 1975, interstate air transportation of passengers between New York, New York and San Francisco, California on its daily Flight #1 and Flight #2: *provided*, That extra sections shall not be operated and that Pan American shall not advertise the services;

2. Pan American World Airways, Inc. be and it hereby is exempted from the tariff filing requirements of section 403 of the Act and the Board's regulations thereunder for the services authorized herein: *provided* That it shall charge the fares currently provided in the tariffs of United Air Lines, Inc.; and

[3] Emery's answer was also filed in telegraphic form. See footnote 1.

[4] Extra sections are not authorized under the authority granted herein.

[5] United ordinarily operates 3 daily nonstop round trips and numerous other direct services between New York and San Francisco, a substantial portion of the capacity offered in this large market.

[6] We do not find that the peaking considerations above-recited apply to cargo in this market so as to warrant a grant of the requested exemption insofar as cargo is concerned.

[7] See, in this connection, Order E–23928, July 9, 1966, at page 2.

3. The Board reserves the right to revoke or modify the authority conferred by this order as circumstances may warrant.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,[8] *Secretary.*

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1976

Proposed Addition

Notice is hereby given pursuant to section 2(a) (2) of Pub. L. 92–28; 85 Stat. 79, of the proposed addition of the following commodity to Procurement List 1976, November 25, 1975 (40 F.R. 54742).

CLASS 7530

Pad, Writing Paper, Canary Yellow 7530–00–286–6173 GSA Regions 2 and 3 only.

Comments and views regarding this proposed addition may be filed with the Committee not later than 30 days after the date of this Federal Register. Communications should be addressed to the Executive Director, Committee for Purchase from the Blind and Other Severely Handicapped, 2009 Fourteenth Street North, Suite 610, Arlington, Virginia 22201.

This notice supersedes that portion of the notice dated September 19, 1975 (40 F.R. 43269) pertaining to the proposed addition of this item.

This notice is automatically cancelled on or before June 22, 1976.

By the Committee.

C. W. FLETCHER,
Executive Director.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN COTTON TEXTILE PRODUCTS FROM THAILAND; IMPORT LEVEL AMENDMENT

Entry or Withdrawal for Warehouse for Consumption

DECEMBER 17, 1975.

On March 24, 1975, there was published in the FEDERAL REGISTER (40 F.R. 13025) a letter dated March 19, 1975 from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs, establishing levels of restraint applicable to certain specified categories of cotton textiles and cotton textile products produced or manufactured in Thailand and exported to the United States during the twelve-month period beginning April 1, 1975. As set forth in that letter, the levels of restraint are subject to adjustment pursuant to paragraph 5 of the Bilateral Cotton Textile Agreement of March 16, 1972, as amended, between the Governments of the United States and Thailand, which provides that within the aggregate and applicable group limits, limits on certain categories may be exceeded by not more than 5 percent.

Accordingly, there is published below a letter of December 17, 1975 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs amending the level of restraint applicable to cotton textile products in Category 22/23, produced or manufactured in Thailand and exported to the United States during the twelve-month period which began on April 1, 1975.

Effective Date: December 17, 1975.

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Commissioner of Customs, Department of the Treasury, Washington, D.C. 20229

DECEMBER 17, 1975.

DEAR MR. COMMISSIONER: On March 19, 1975, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry during the twelve-month period beginning April 1, 1975 of cotton textiles and cotton textile products in certain specified categories produced or manufactured in Thailand in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Pursuant to paragraph 5 of the Bilateral Cotton Textile Agreement of March 16, 1972, as amended, between the Governments of the United States and Thailand, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed, effective on December 17, 1975, to increase the level of restraint established for cotton textile products in Categories 22/23 to 1,367,444 square yards[2] for the twelve-month period which began on April 1, 1975.

The actions taken with respect to the Government of Thailand and with respect to imports of cotton textiles and cotton textile products from Thailand have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance U.S. Department of Commerce.

[FR Doc.75–34373 Filed 12–19–75;8:45 am]

COMMODITY FUTURES TRADING COMMISSION

ADVISORY COMMITTEE ON REGULATION OF COMMODITY FUTURES TRADING PROFESSIONALS

Meeting

Notice is hereby given, pursuant to Section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. App. I, § 10(a), that the Commodity Futures Trading Commission Advisory Committee on Regulation of Commodity Futures Trading Professionals ("Advisory Committee on Commodity Futures Trading Professionals") will conduct a public meeting on January 6, 1975, at the Downtown Athletic Club of N.Y.C., 19 West Street, New York, N.Y., in the Gotham Room, 17th floor, beginning at 10:00 a.m. The objectives and scope of activities of the Advisory Committee on Commodity Futures Trading Professionals will be to consider and submit reports and recommendations to the Commission on the following subjects:

(1) Appropriate financial requirements to be utilized by the Commission to insure the integrity of any transaction effected on behalf of a client, customer, or participant by a commodity futures trading professional.

(2) Responsibilities of the Commission and the concerned Exchanges over the training and fitness standards of commodity futures trading professionals.

The summarized agenda for the meeting is as follows:

Discussion: What should be the financial requirements for commodity futures trading professionals? In connection with this discussion, the following questions will be considered:

1. Is there a need to establish financial requirements for commodity futures trading professionals?

2. If so, who should establish the requirements?

3. To what extent should the requirements go?

4. What should be the capital structure of commodity futures trading professionals in order to insure the integrity of any transaction they effect on behalf of a client, customer or participant?

Discussion: What should be the training requirements and minimum fitness standards for commodity futures trading professionals? In connection with this discussion, the following questions will be considered:

[8] Robson, Chairman, and O'Melia, Vice Chairman, Filed Concurring Statement, which is filed as part of the original document.
